# THIS CATALOGUE SUPERSEDES ALL PREVIOUS ISSUES

---

## STANDARDS

Buffalo Scales will be furnished to weigh in the Standard of any country.

If other than American Standard is desired, it should be so stated.

## GAUGE FOR RAILROAD TRACK SCALES

Unless otherwise specified, scales for U. S. Standard gauge, 4 feet 8½ inches, will be furnished.

## PLATFORM DIMENSIONS

The first number given in stating a platform size always denotes the measurement parallel with the beam.

## CHANGES

A charge will be made to cover the cost of any change in regularly listed scales, either as to design or finish.

## REPAIRS

In ordering parts, give the shop number of the scale for which intended.

In Portable Platform and Dormant Scales, the shop number will be found stamped into the end of wood cap over beam.

In Wagon, Miner and R. R. Track Scales, the shop number will be found stamped on the face of the beam at the butt end.

It is also well to give the catalogue number of scale in addition to the shop number.

## PLANS

Unless style of framing for Wagon, Miner, Depot and R. R. Track Scales is mentioned, it is assumed that timber will be used.

## EQUIVALENTS OF METRIC WEIGHTS IN TERMS OF U. S. STANDARD WEIGHTS

### WEIGHT

1 Milligram (1-1000 grm.)	= 0.015 grain (Avoirdupois)
1 Centigram (1-100 grm.)	= 0.154 grain (Avoirdupois)
1 Decigram (1-10 grm.)	= 1.543 grain (Avoirdupois)
1 Gramme (1 grm.)	= 15.432 grain (Avoirdupois)
1 Dekagram (10 grm.)	= 5.644 drams (Avoirdupois)
1 Hectogram (100 grm.)	= 3.527 oz. (Avoirdupois)
1 Kilogram (1000 grm.)	= 2.2046223 lb. or 15432.3564 grains
1 Myriagram (10 kilog.)	= 22.046 lb.
1 Quintal (100 kilog.)	= 2.2046 cwt.
1 Tonne (1000 kilog.)	= 1.1023 ton
1 Gram (1 gram)	= 0.03215 oz. (Troy)
	15.432 grains (Troy)
1 Gram (1 grm.)	= 0.2572 drachm (Apothecaries)
	0.7716 scruple (Apothecaries)
	15.432 grains (Apothecaries)

## EQUIVALENTS OF U. S. STANDARD WEIGHTS IN TERMS OF METRIC WEIGHTS

### AVOIRDUPOIS WEIGHT

1 Grain	= 0.0648 gramme
1 Dram	= 1.772 grammes
1 Ounce (16 drams)	= 28.350 grammes
1 Pound (16 ozs. or 7000 grs.)	= 0.45359243 kilogram
1 Stone (14 lb.)	= 6.350 kilograms
1 Quarter (25 lb.)	= 11.34 kilograms
1 Hundredweight (cwt.)	= 45.36 kilograms
(100 lb.)	= 0.4536 Quintal
1 Ton (20 cwt.)	= .9076 tonnes or 907.60 kilogram

### TROY WEIGHT

1 Grain	= 0.0648 gramme
1 Pennyweight (24 grains)	= 1.5552 grammes
1 TROY Ounce	
(20 pennyweights)	= 31.1035 grammes

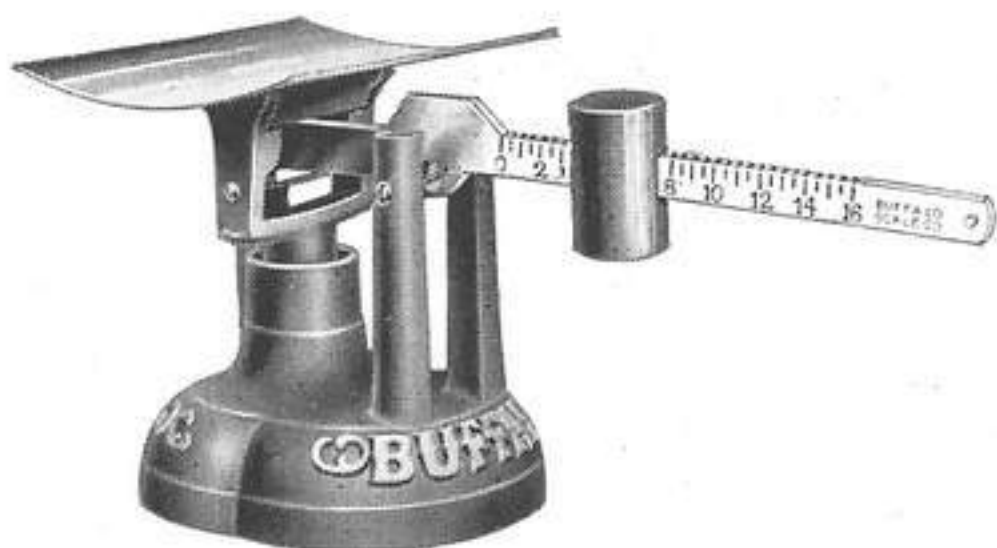

### APOTHECARIES' WEIGHT

1 Grain	= 0.0648 gramme
1 Scruple (20 grains)	= 1.296 grammes
1 Drachm (3 scruples)	= 3.888 grammes
1 Ounce (8 drachms)	= 31.1035 grammes

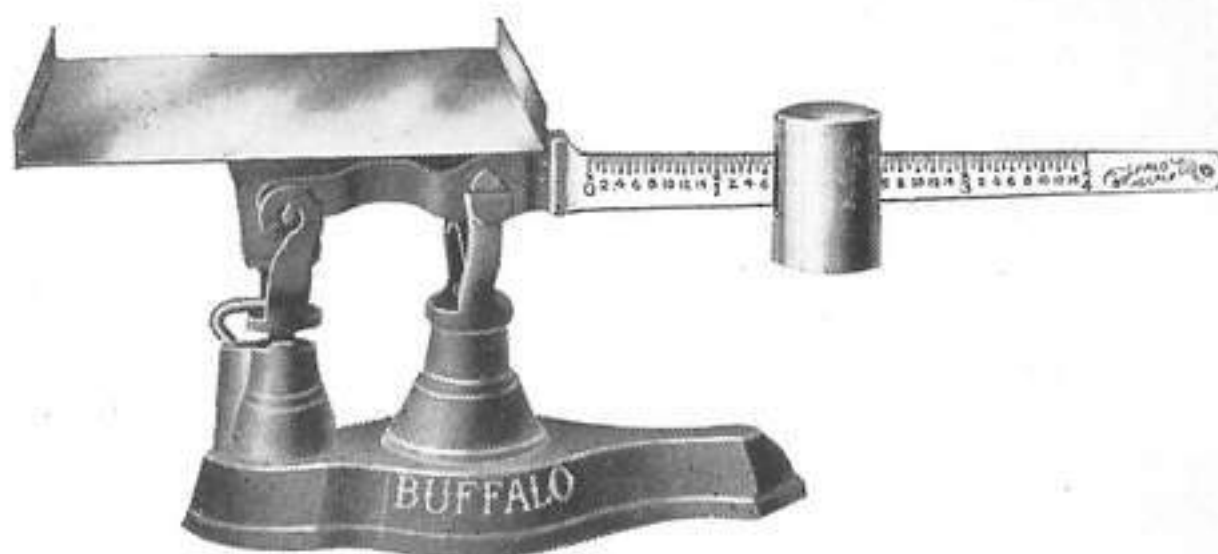

## SPECIAL SCALES

In addition to the scales shown in our catalogue, we are in a position to furnish numerous special modifications to be used for new or unusual purposes, or to fit difficult or contracted locations. Particular attention will be given to any specifications furnished us, and plans will be cheerfully supplied purchasers desiring scales as above stated.

Having furnished special scales for steel and iron plants, asphalt and chemical works, oil mills, elevators, breweries and numerous other lines of industry, we have a large assortment of patterns which enable us to meet the requirements of nearly all users of scales, and overcome the difficulties of location, or other conditions not regular. The range of special modifications which we can furnish is almost unlimited, and we urge intending purchasers to give full information if they cannot use the scales as listed in this catalogue.

No. 500

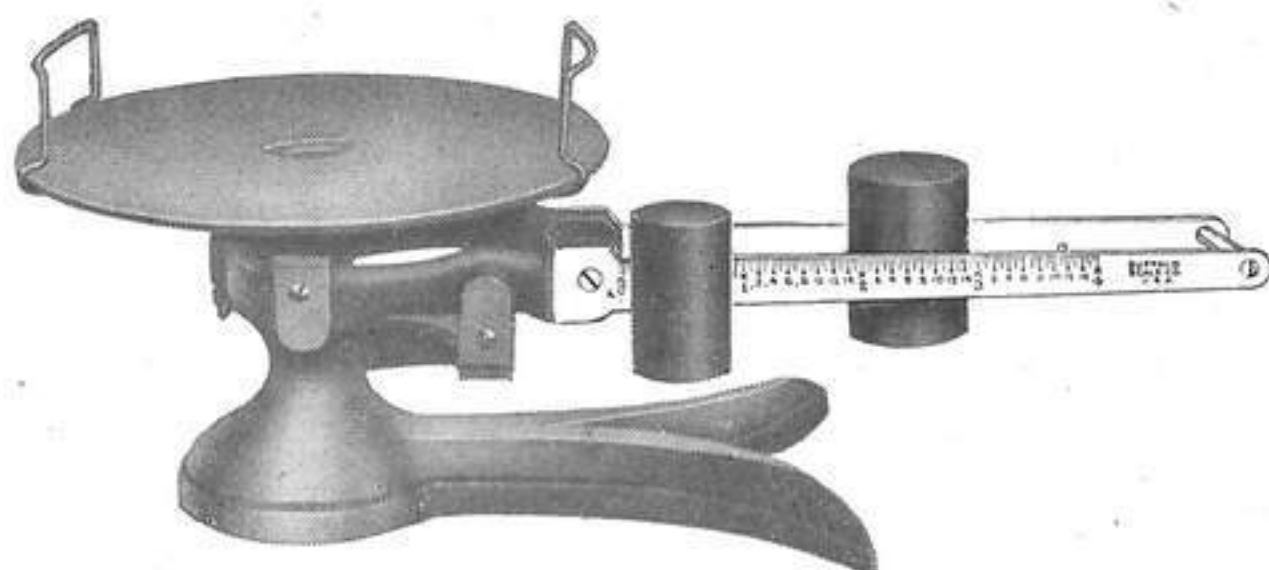

No. 506

## POSTAL SCALES

ADOPTED BY U. S. GOVERNMENT

Postal scales are marked in  $\frac{1}{2}$ -ounce graduations, but can be furnished in the 15-gram weights adopted by the Universal Postal Union. Our Postal Scales have been adopted by the United States Government, and are particularly adapted for office use.

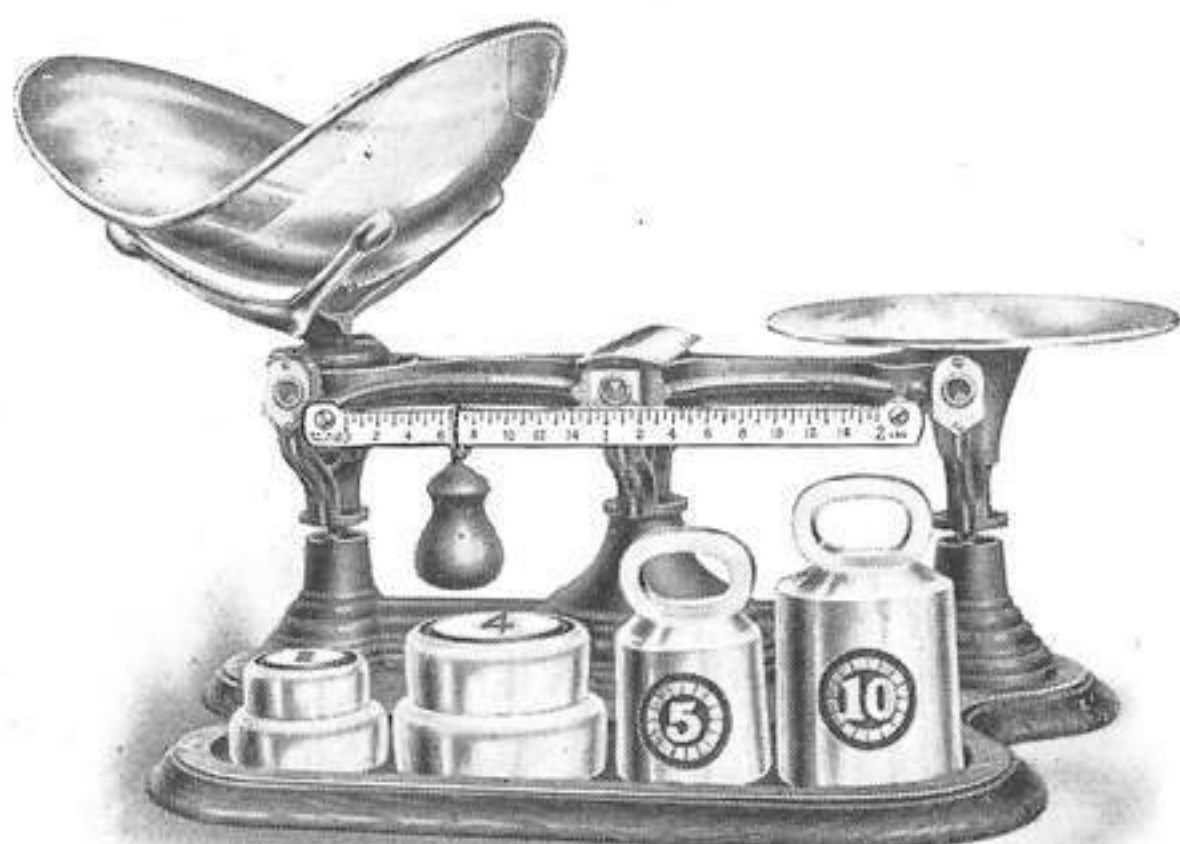

No.	Capacity		Price	
		Gram Wts.		Nickel plated
500	$\frac{1}{2}$ to 9 ozs.	15	\$3 00	\$5 00
502	$\frac{1}{2}$ to 16 ozs.	15	4 00	6 00
504	$\frac{1}{2}$ to 32 ozs.	15	6 00	8 50
506	$\frac{1}{2}$ oz. to 4 lbs.		8 00	12 00
508	$\frac{1}{2}$ oz. to 6 lbs.	Double Beam	12 00	16 00

## PARCEL POST SCALES

Designed for weighing Parcel Post packages, also suitable for domestic use. Very accurate, substantial scales, with full capacity beams, no loose weights being required. Heavy cast iron platform, 10 inches in diameter, with wire fenders on sides. Iron work finished in black enamel; beams polished brass.

No.	Capacity	Price
510	$\frac{1}{2}$ oz. to 12 lbs.	\$10 00
512	1 oz. to 24 lbs.	11 00

## AGATE-BEARING SCALES

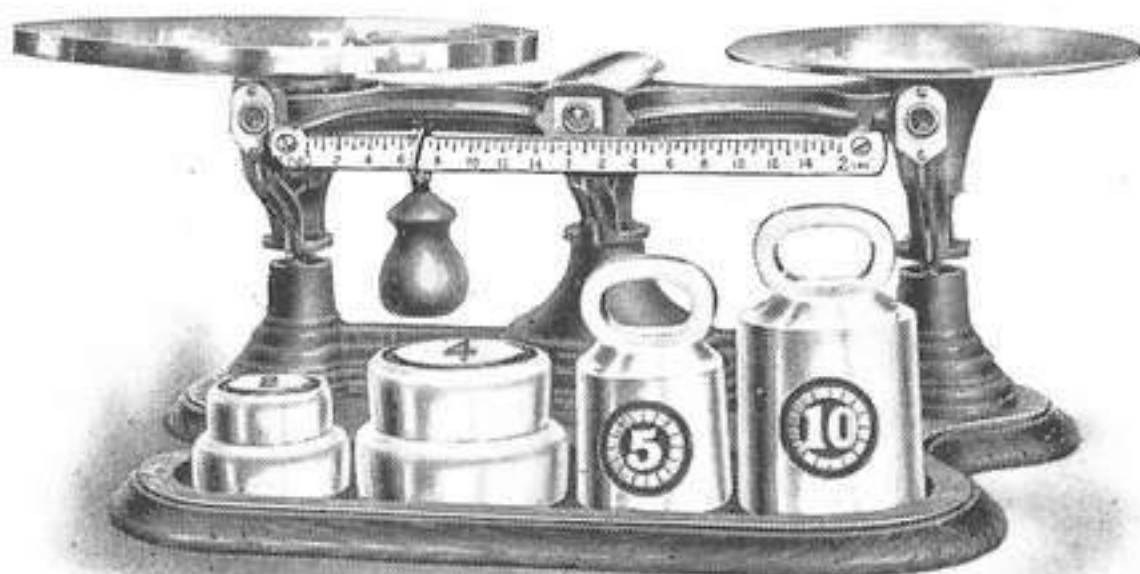

This line of agate-bearing, even-balance scales is unequalled for fine weighing. The six tool steel pivots of each scale rest upon bearings of fine agate, highly polished, making the scales full jeweled.

The scoop, shield, weight plate, side beam and pivot caps are brass, nickel plated. The scoop is seamless, being pressed from heavy sheet brass, and it is reinforced at four points, sides and ends. The scoop rests upon rubber tips set into the fork, thus preventing its shifting, and also protecting it from being marred.

The weights are nickel plated. A large oak or cherry baseboard is provided for the scale, and in this base there is a cloth-lined recess for the weights.

The workmanship and materials in these scales are the very finest. They may be had complete, as listed, or without weights and baseboard. Unless otherwise ordered, they will be sent complete.

No.	Capacity	Beam	Price
514	$\frac{1}{4}$ oz. to 8 lbs.	Without side beam	
516	$\frac{1}{4}$ oz. to 8 lbs.	With 16 oz. side beam	
526	$\frac{1}{4}$ oz. to 16 lbs.	Without side beam	
528	$\frac{1}{4}$ oz. to 16 lbs.	With 16 oz. side beam	
538	$\frac{1}{4}$ oz. to 27 lbs.	Without side beam	
540	$\frac{1}{4}$ oz. to 27 lbs.	With 32 oz. side beam	

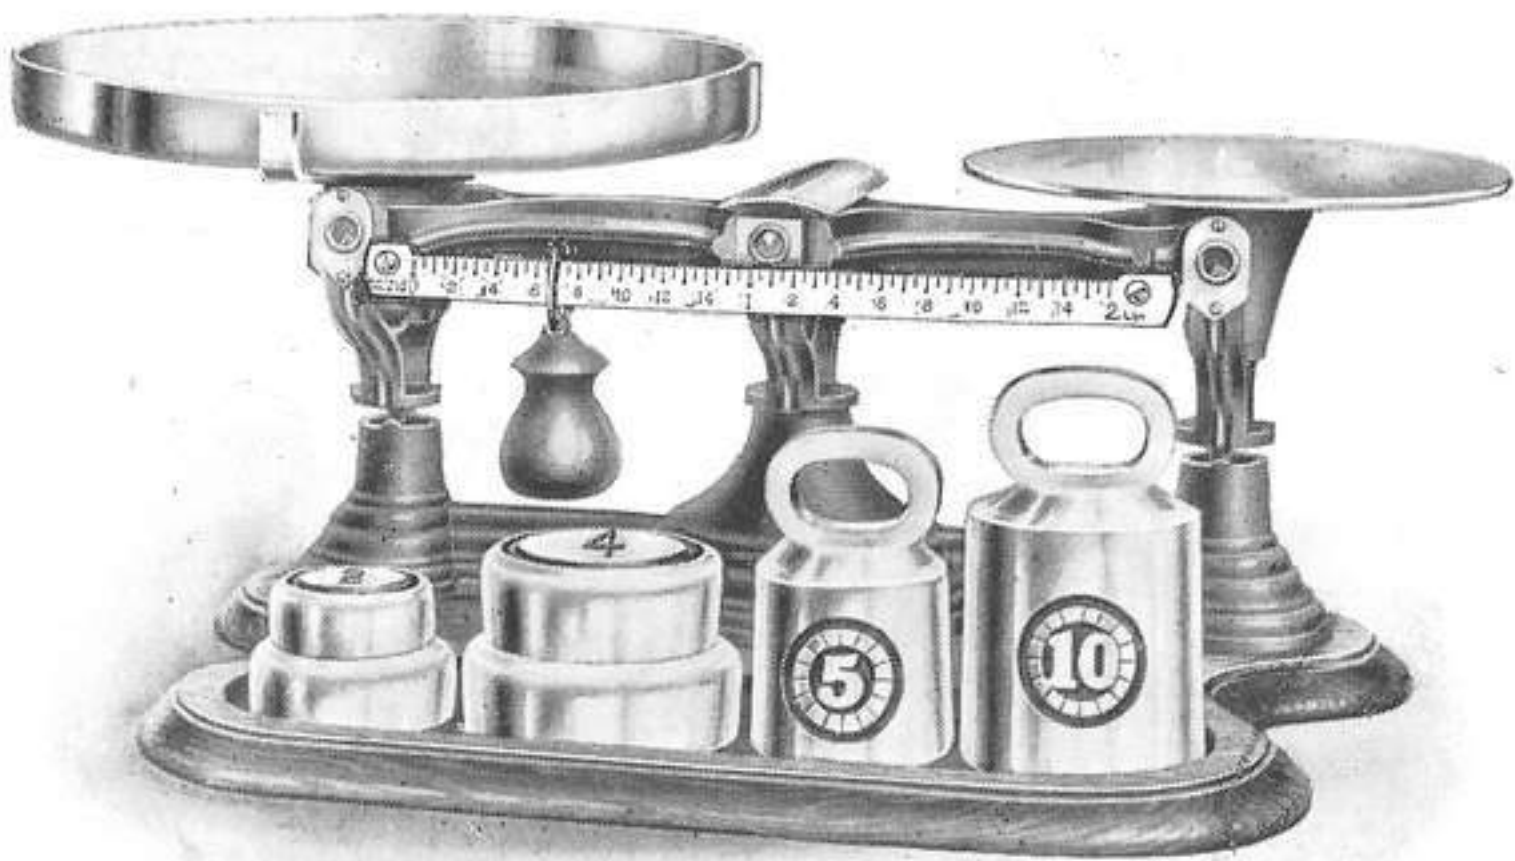

## AGATE-BEARING SCALES

### WITH PORCELAIN PLATE

A general description of this scale will be found on page 16. Instead of the scoop, however, this scale is equipped with a porcelain plate, as shown in cut. The scales are particularly adapted for the weighing of meats and butter. They may be had complete, as listed, or without weights and baseboard. Unless otherwise ordered, they will be sent complete.

No.	Diam. of Plate	Capacity	Beam	Price
518	8 in.	$\frac{1}{4}$ oz. to 8 lbs.	Without side beam	
520	8 in.	$\frac{1}{4}$ oz. to 8 lbs.	With 16 oz. side beam	
530	10 in.	$\frac{1}{4}$ oz. to 16 lbs.	Without side beam	
532	10 in.	$\frac{1}{4}$ oz. to 16 lbs.	With 16 oz. side beam	
542	13 in.	$\frac{1}{4}$ oz. to 27 lbs.	Without side beam	
544	13 in.	$\frac{1}{4}$ oz. to 27 lbs.	With 32 oz. side beam	

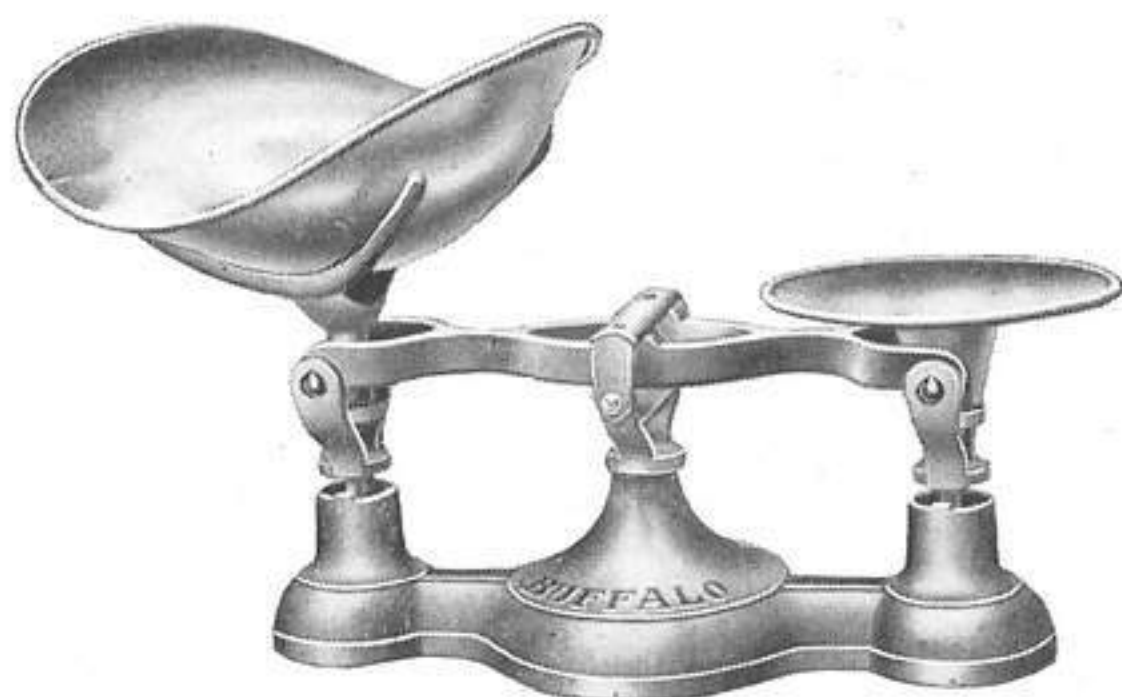

## AGATE-BEARING SCALES

### WITH SUGAR PAN

A general description of this scale will be found on page 16. The nickel plated brass pan which is used instead of a scoop is seamless and extra heavy. These scales are especially designed for weighing sugar and other materials sold in paper bags. They may be had complete, as listed, or without weights and baseboard. Unless otherwise ordered they will be sent complete.

No.	Diam. of Pan	Capacity	Beam	Price
521	8 in.	$\frac{1}{4}$ oz. to 8 lbs.	Without side beam	
523	8 in.	$\frac{1}{4}$ oz. to 8 lbs.	With 16 oz. side beam	
531	10 in.	$\frac{1}{4}$ oz. to 16 lbs.	Without side beam	
533	10 in.	$\frac{1}{4}$ oz. to 16 lbs.	With 16 oz. side beam	
545	13 in.	$\frac{1}{4}$ oz. to 27 lbs.	Without side beam	
547	13 in.	$\frac{1}{4}$ oz. to 27 lbs.	With 32 oz. side beam	

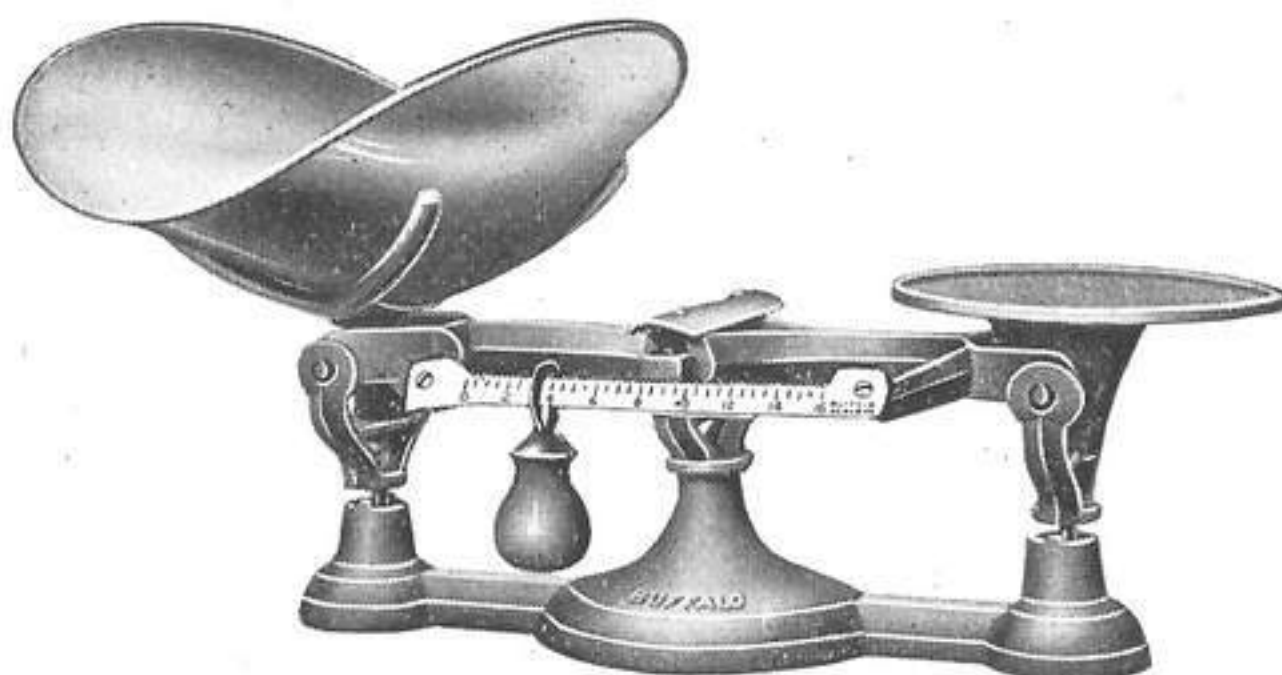

## EVEN-BALANCE TRIP SCALES

Bright vermilion finish.

These scales will be furnished with agate bearings at an additional price of \$5.00 each.

Scales will be sent with weights unless otherwise ordered.

No.	Capacity	Scoop	Price with Weights	Price without Weights
560	$\frac{1}{4}$ oz. to 2 lbs.	Tin, seamless	\$ 5 50	\$ 4 50
562	$\frac{1}{4}$ oz. to 2 lbs.	Brass, "	6 50	5 50
564	$\frac{1}{4}$ oz. to 6 lbs.	Tin, "	7 00	5 50

## LABORATORY TRIP SCALES

This scale is in general use for laboratory work, especially in universities and colleges. It is most carefully made and is sensitive, accurate and durable. Beam is marked to 10 grams in decigram divisions. The scale has a balance adjustment and indicator. The plates are 6 inch square opal glass and the scale proper is finished in black enamel, ornamented. All brass parts are nickel plated.

For agate bearings add to list \$5.00.

No.	Capacity	Price without Weights
820	1 kilo x decigram	\$7 50

Set Iron Nest Weights, hexagonal pattern, 1 kilo to 5 grams.

Price extra.....\$1 25

Set Iron Nest Weights, hexagonal pattern, 500 grams to 5 grams.

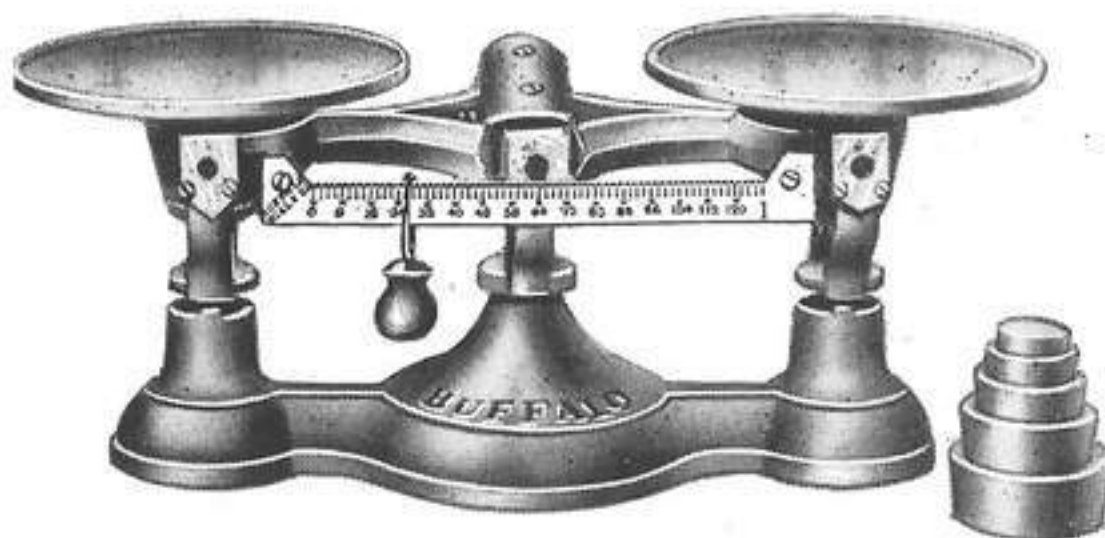

Price extra.....1 00

Set Brass Knob Weights, in open block, 1 kilo to 5 grams.

Price extra.....4 50

Set Brass Knob Weights, in open block, 500 grams to 1 gram.

Price extra.....3 50

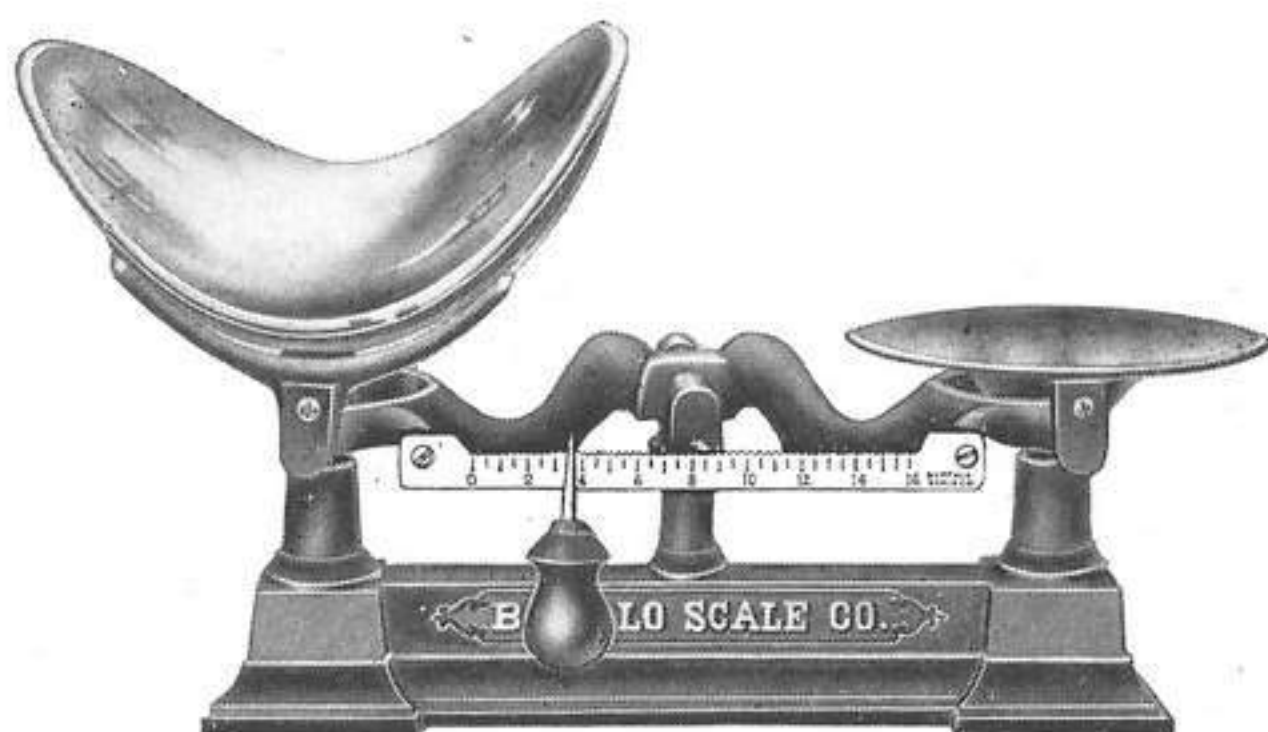

## SILK TRIP SCALES

This scale is designed for very fine work and is used for many purposes beside the weighing of silk.

It has two iron plates  $5\frac{3}{8}$  inches in diameter. The side beam has a capacity of 1 ounce by 128th of an ounce, but may be furnished in 100ths of an ounce, if so ordered.

This scale will be furnished with agate bearings at an additional cost of \$5.00 each.

No.	Capacity	Price
813	2 lbs. x $\frac{1}{128}$ oz. without scoop	\$14 00
815	2 lbs. x $\frac{1}{128}$ oz. with brass seamless scoop	16 00

## IMPROVED EVEN-BALANCE SCALES

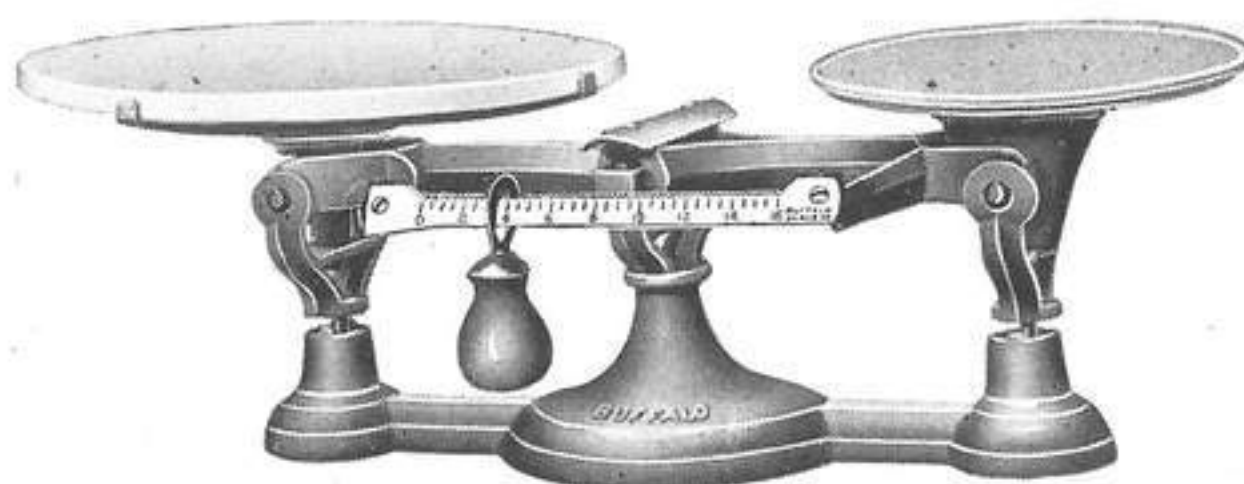

WITH BRASS SIDE BEAM

Extra finish, black and gold.

Two plates, flat-bottom scoop and balance weight \$1.00 extra.

Scales will be sent with weights unless otherwise ordered.

No.	Capacity	Scoop	Price with Weights	Price without Weights
632	$\frac{1}{4}$ oz. to 4 lbs.	Tin, seamless	\$ 6 00	\$5 50
634	$\frac{1}{4}$ oz. to 4 lbs.	Brass, "	6 75	6 25
636	$\frac{1}{4}$ oz. to 8 lbs.	Tin, "	7 00	6 25

No. 664-674

No. 675-679

## MEAT AND BUTTER SCALES

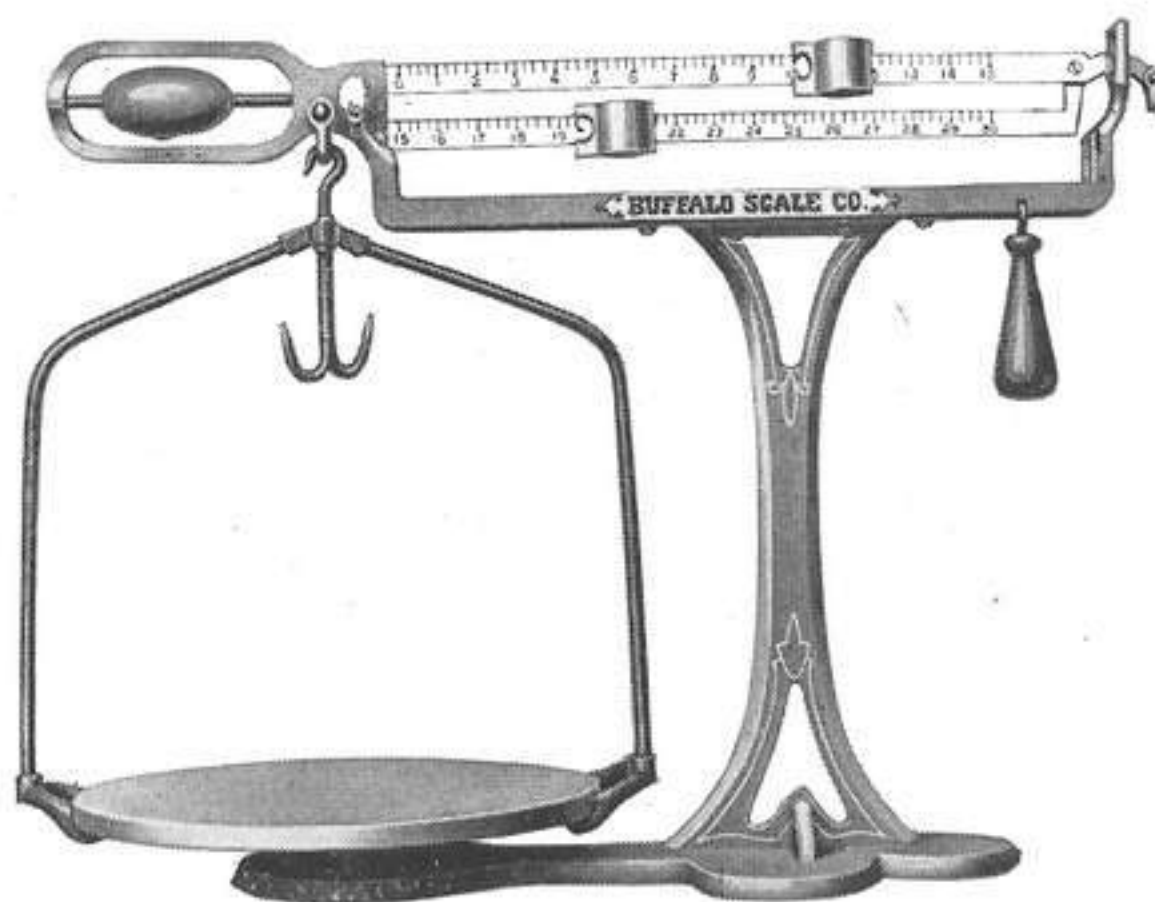

WITH TEN-INCH PORCELAIN PLATE

This scale is handsomely finished in black and gold. Furnished with agate bearings at \$5.00 extra. Galvanized to prevent rust, \$3.00 extra.

No.	Capacity	Beam	Price
664	$\frac{1}{2}$ oz. to 62 lbs.	With single beam	\$12 75
666	$\frac{1}{2}$ oz. to 62 lbs.	With double beam	13 75
668	$\frac{1}{2}$ oz. to 22 lbs.	With single beam	10 50
670	$\frac{1}{2}$ oz. to 22 lbs.	With double beam	11 50
672	$\frac{1}{2}$ oz. to 10 lbs.	With single beam	9 50
674	$\frac{1}{2}$ oz. to 10 lbs.	With double beam	10 50

Full capacity, double beam, no loose weights.

No.	Capacity	Price
[675 679	$\frac{1}{2}$ oz. to 12 lbs. 1 oz. to 24 lbs.	\$13 50 14 50

## BOSTON MARKET SCALES

Bright vermilion finish. Double beam. Marble slab, either dark or light.

Can be hung on a bracket at same price. Beam, poises and bows brass, nickel plated. Beam marked on both sides.

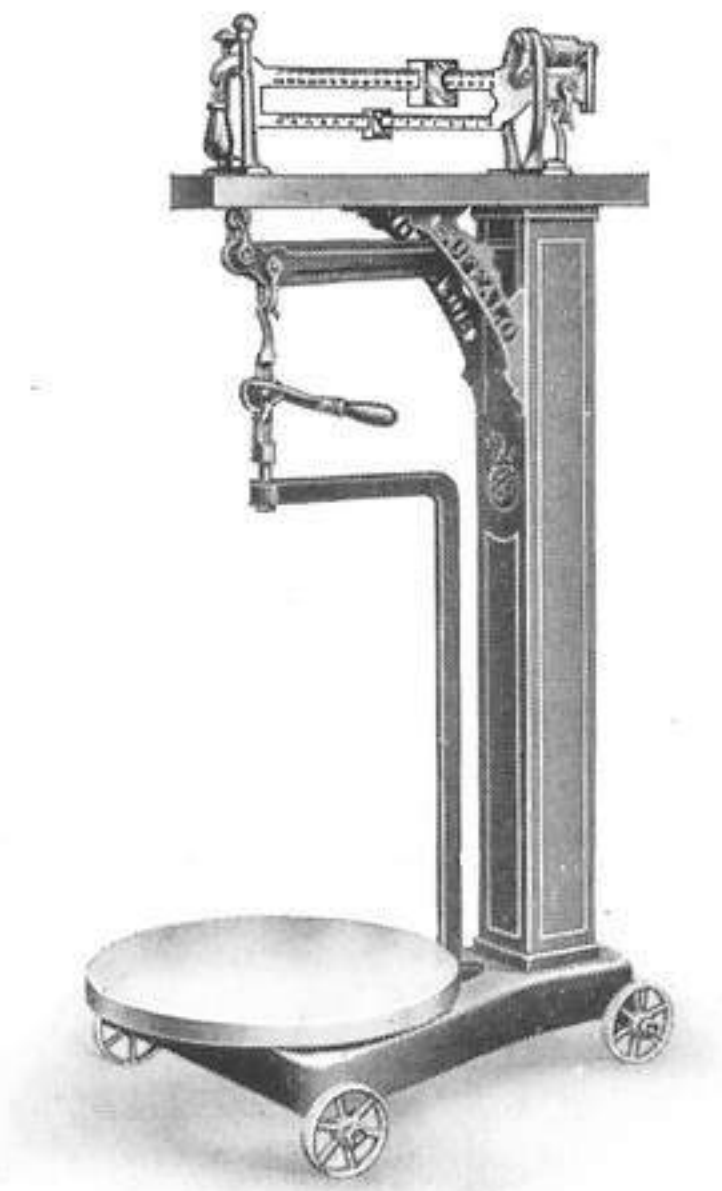

The above scales will be furnished with agate bearings for beam at an additional price of \$3.00, and a complete set for beam and loop, \$5.00 extra.

### WITH HOOKS

No.	Capacity	Slab	Price
681	30 lbs. by 1 oz.	15 inches diameter	\$26 00
683	60 lbs. by 1 oz.	15 " "	27 00

### WITHOUT HOOKS

680	30 lbs. by 1 oz.	15 inches diameter	\$24 00
682	60 lbs. by 1 oz.	15 " "	25 00

## SUSPENSION BUTTER SCALES

Double beam. No loose weights. Portable pattern.

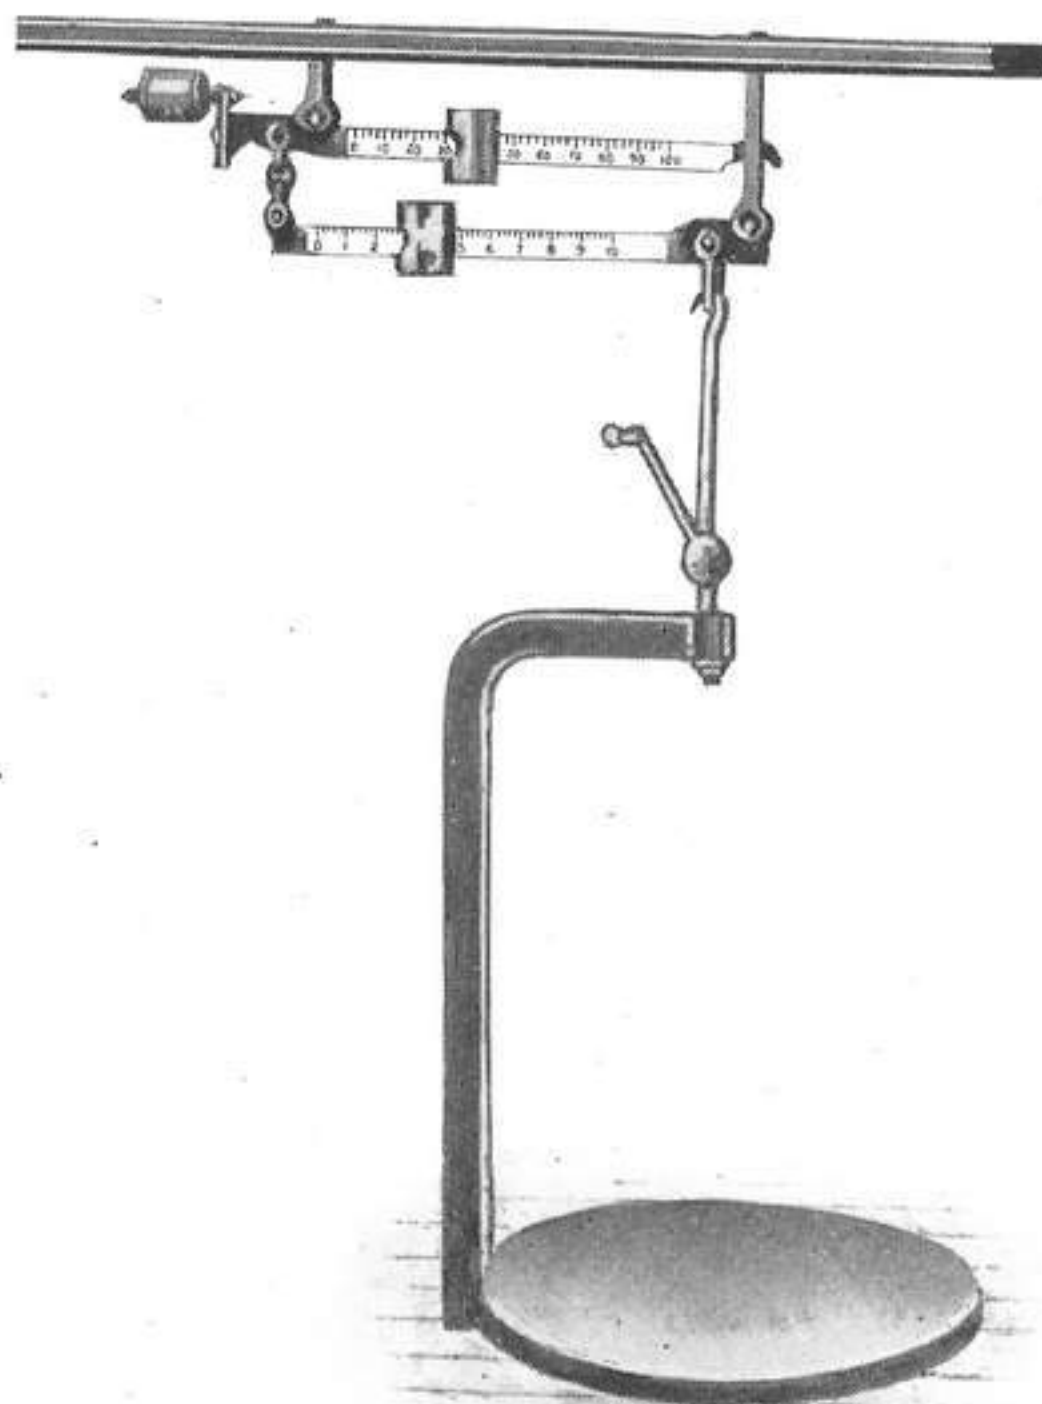

This scale is particularly adapted for weighing tubs of butter and cheese. All the pivots, bearings and working parts of the scales are above the platform, and thus entirely out of the way of the salt and moisture. The platform is fitted with a relieving device, putting the strain on the scales only when in use.

### WITH WHEELS

No.	Capacity	Platform Diameter	Price
688	115 lbs. by 1 oz.	20 inches	\$40 00
690	215 lbs. by 1 oz.	20 "	42 00

### WITHOUT WHEELS

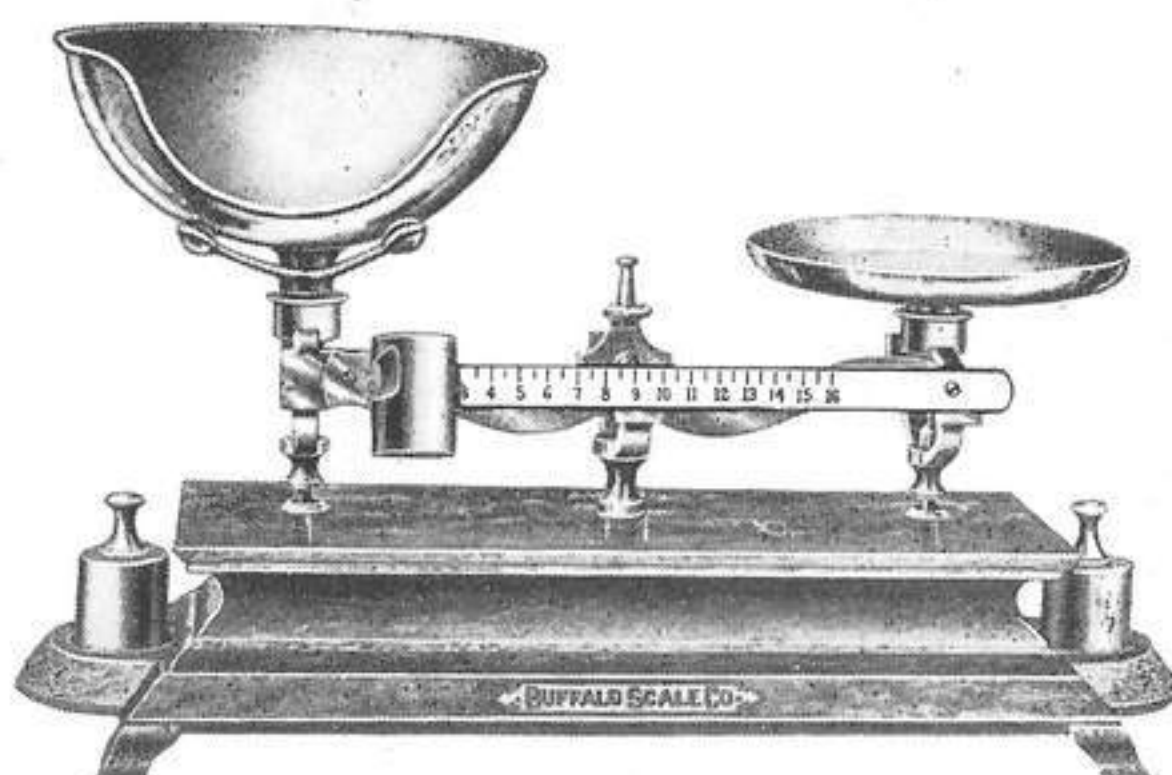

684	115 lbs. by 1 oz.	20 inches	\$36 00
686	215 lbs. by 1 oz.	20 "	38 00

## SUSPENSION CREAMERY SCALES

This scale is intended to be used same as scale on page 31, but is suspended in permanent place. No. 691 has bracket and rod, and is complete, ready to fasten to post. No. 692 is furnished with wood cap.

No.	Capacity	Price
691	110 lbs. by 1 oz.	\$33 00
692	110 lbs. by 1 oz.	30 00

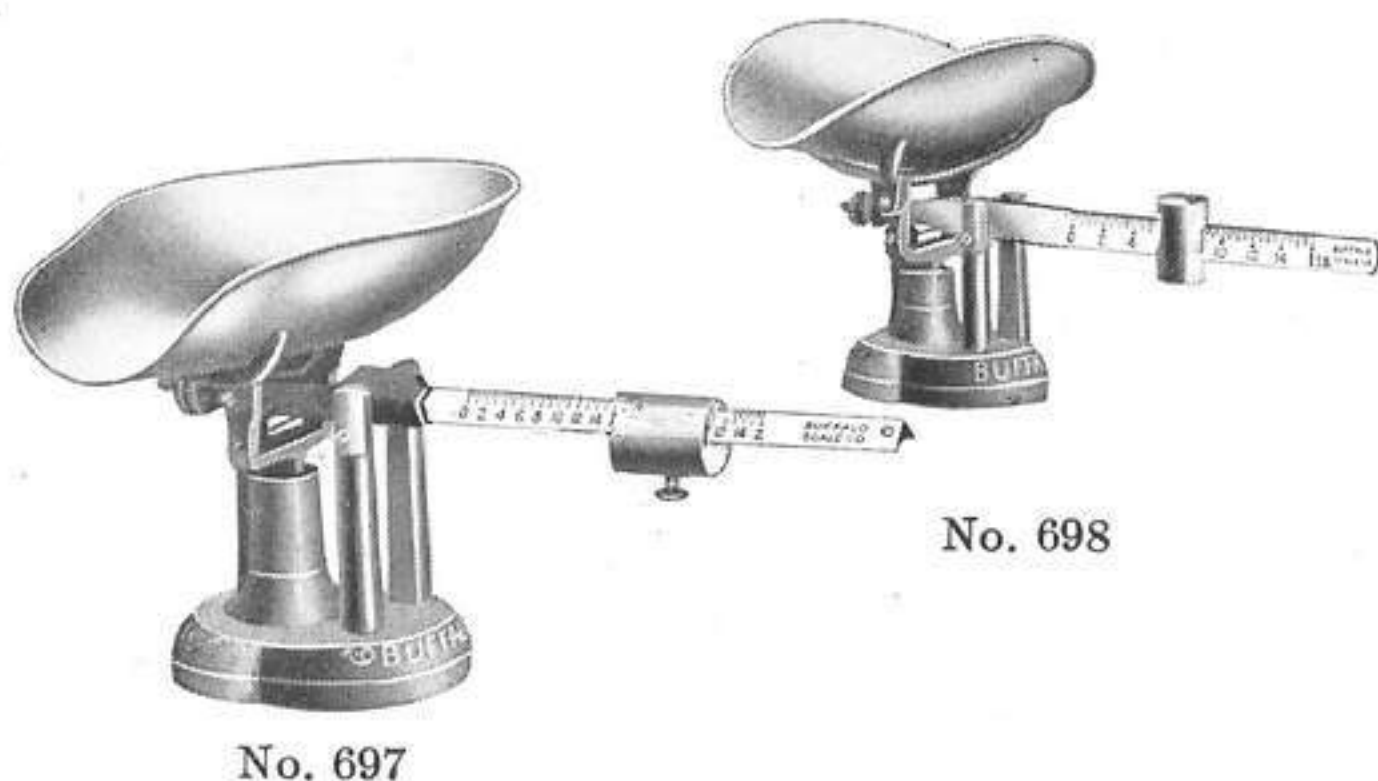

## CONFECTIONERS' SCALES

Upper parts brass, nickel plated. Marbleized base; ebonized base if desired. Rubber-tipped scoop fork.

These scales will be furnished with agate bearings at an additional price of \$5.00.

No.	Capacity	Beam	Price
694	3 lbs. by $\frac{1}{2}$ oz.	With side beam	\$35 00
695	3 lbs. by $\frac{1}{2}$ oz.	Without side beam	35 00

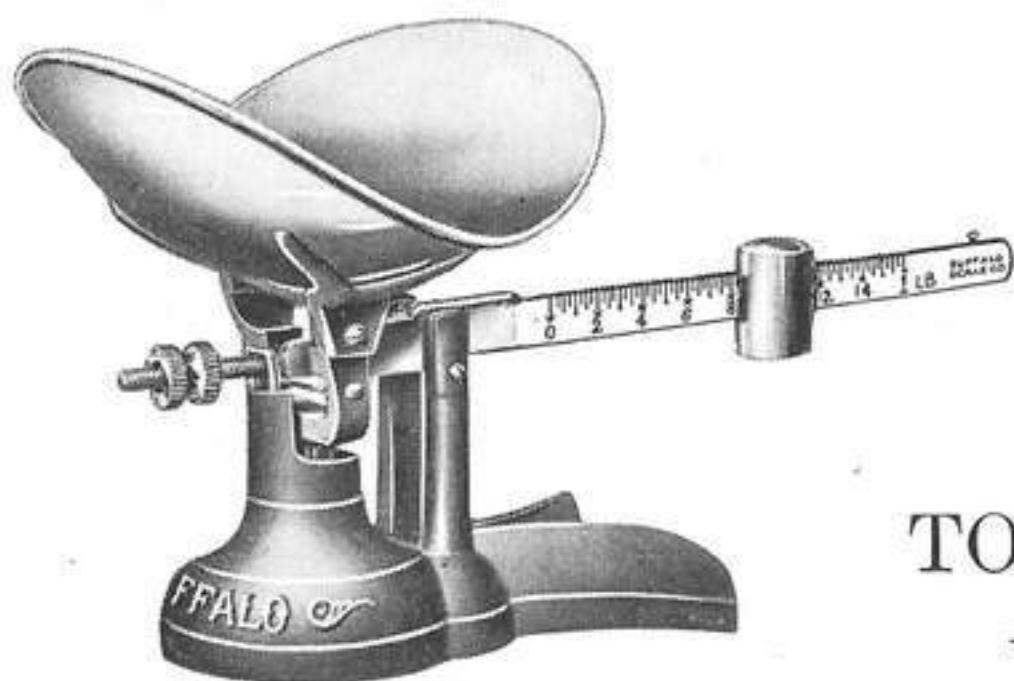

No. 697

No. 698

## CANDY SCALES

There are no loose weights required with these scales, and they are especially desirable for weighing candy. Handsomely finished in black and gold. The 2 and 4-pound sizes are furnished with round-pattern candy scoops. The 4-pound size has double beam.

No.	Capacity	Price
696	$\frac{1}{4}$ oz. to 4 lbs.	\$10 00
697	$\frac{1}{4}$ oz. to 2 lbs.	8 00
698	$\frac{1}{4}$ oz. to 1 lb.	Nickel { 4 50
699	$\frac{1}{4}$ oz. to 1 lb.	plated { 7 50

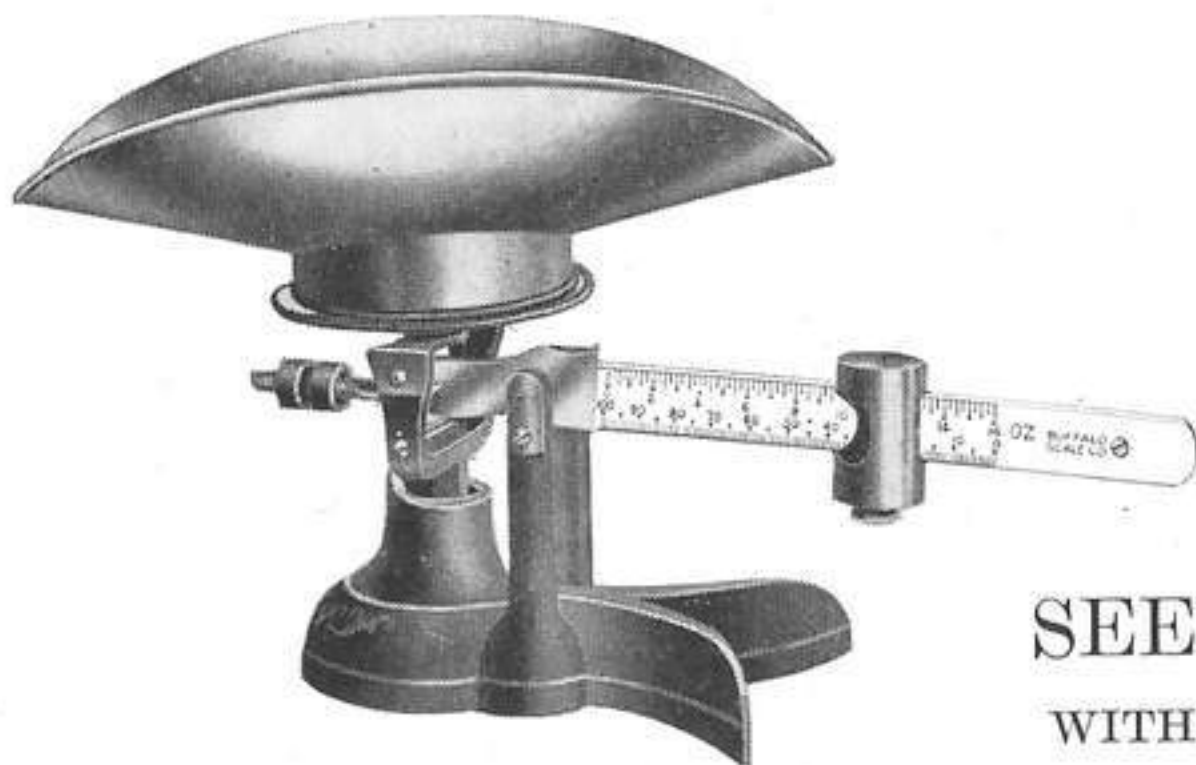

## TOBACCO SCALES

WITH BRASS SCOOP

Same scale with iron plate and brass scoop having ring under it, 50 cents extra.

No.	Capacity	Price
704	$\frac{1}{4}$ oz. to 1 lb.	Nickel { \$5 50
706	$\frac{1}{4}$ oz. to 1 lb.	plated { 8 75

## SEED SCALES

WITH BRASS SCOOP

Scale No. 710 is especially designed for ascertaining the percentage of dirt in seed.

The beam has two rows of marks, the upper indicating the weight, 1 lb. by  $\frac{1}{4}$  ounces; the lower row, the percentage graduations 100 to 0.

In use, a sample pound is weighed, sifted and replaced in the scoop. The poise is then run back until the beam balances. The lower row of marks shows the percentage of loss by dirt removed.

No.	Capacity	Price
708	$\frac{1}{16}$ oz. to 1 lb. Avoirdupois graduation	\$6 00
710	$\frac{1}{4}$ oz. to 1 lb. Percent. graduation	6 00

Sieves for above, net \$2.00.

## MOISTURE SCALES

This scale is used in smelting plants for ascertaining the percentage of moisture in ores. Its capacity is 50 ounces by  $\frac{1}{2}$ -ounce graduations. The beam has two rows of marks, the upper indicating the weight as above stated; the lower row of marks is the percentage graduation and reads from 100 to 0.

In use a sample of ore is weighed, after which it is thoroughly dried and re-weighed, when by means of the lower row of marks the exact percentage of loss may be instantly determined.

No.	Capacity	Scoop	Price
711	50 oz. x $\frac{1}{2}$ oz.	Tin, seamless	\$10 00

Extra for brass scoop, \$1.00.

## PULP SCALES

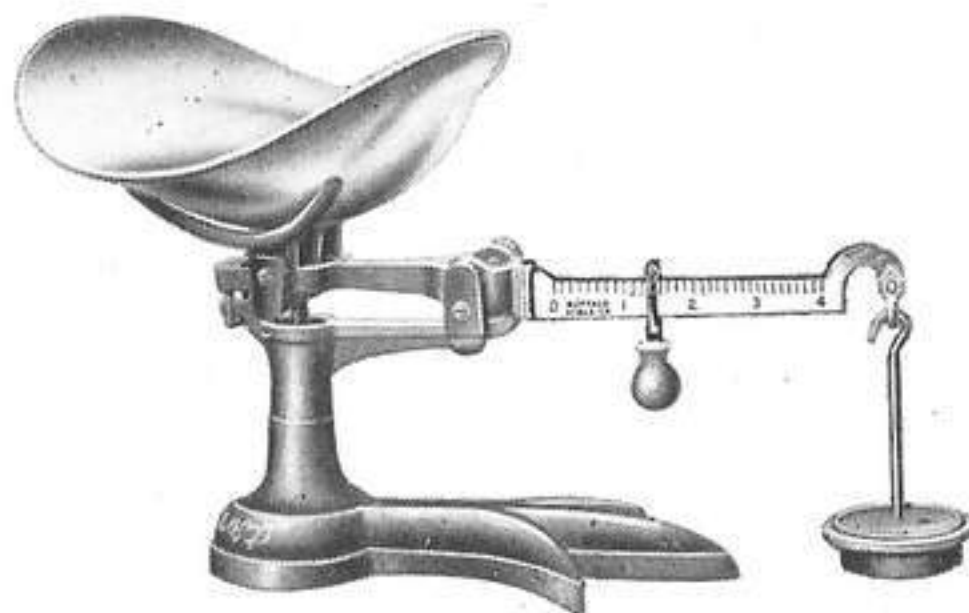

Similar in construction to the Moisture Scale described above, but without scoop. The Iron Plate is six inches in diameter.

No.	Capacity		Price
713	16 oz. x $\frac{1}{4}$ oz.	Without Scoop	\$10 00

## GLASS BLOWERS' SCALES

Similar in construction to Moisture Scale described above, but without scoop. The Iron Plate is eight inches in diameter.

No.	Capacity		Price
715	2 lbs. x $\frac{1}{4}$ oz.	Without Scoop	\$10 00

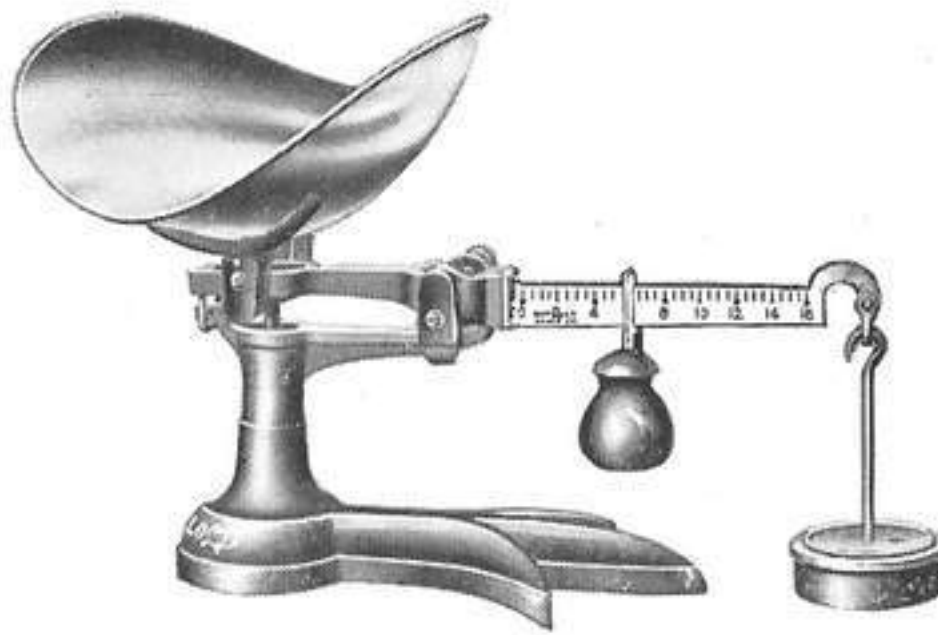

## DRUGGIST SCALES

This scale has but 4 ounces on the beam and is graduated to  $\frac{1}{16}$  of an ounce, making it very sensitive

No.	Capacity	Beam	Scoop	Price
716	$\frac{1}{16}$ oz. to 8 lbs.	Single	Tin, seamless	\$10 00
718	$\frac{1}{16}$ oz. to 8 lbs.	Single	Brass, "	11 00
720	$\frac{1}{16}$ oz. to 8 lbs.	Double	Tin, "	11 00
722	$\frac{1}{16}$ oz. to 8 lbs.	Double	Brass, "	12 00

Tin funnel scoop for this scale, \$0.75 extra.

Brass funnel scoop for this scale, \$1.00 extra.

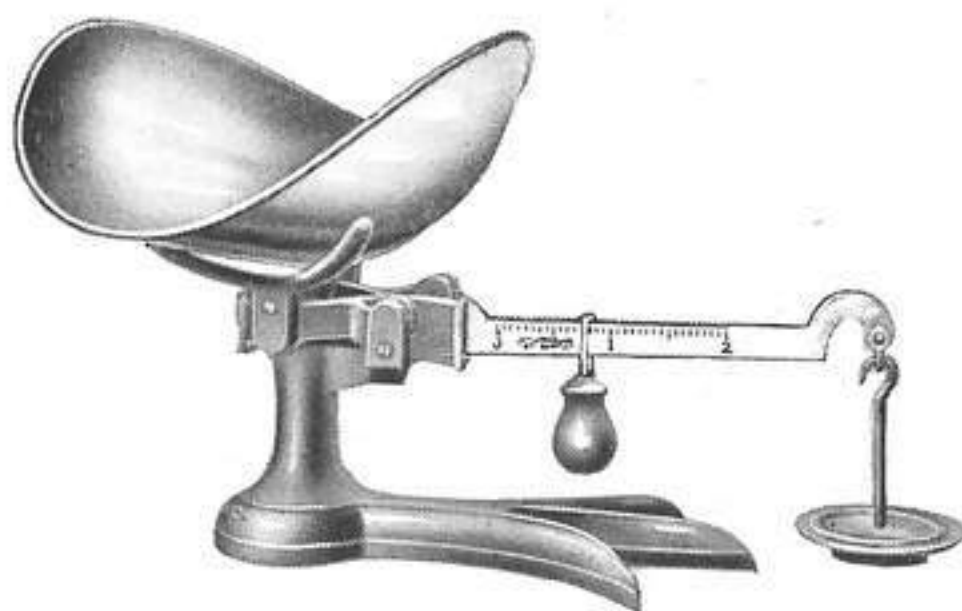

## TEA SCALES

This scale has a capacity on beam of 16 ounces and is graduated to  $\frac{1}{4}$  of an ounce. No small loose weights.

No.	Capacity	Beam	Scoop	Price
724	$\frac{1}{4}$ oz. to 10 lbs.	Single	Tin, seamless	\$ 8 00
726	$\frac{1}{4}$ oz. to 10 lbs.	Single	Brass, "	9 00
728	$\frac{1}{4}$ oz. to 10 lbs.	Double	Tin, "	9 00
730	$\frac{1}{4}$ oz. to 10 lbs.	Double	Brass, "	10 00

Tin funnel scoop for this scale, \$0.75 extra.

Brass funnel scoop for this scale, \$1.00 extra.

## COUNTER SCALES

The beam is in  $\frac{1}{2}$ -ounce graduations to 2 pounds. The double beam has a capacity of 4 pounds on beam.

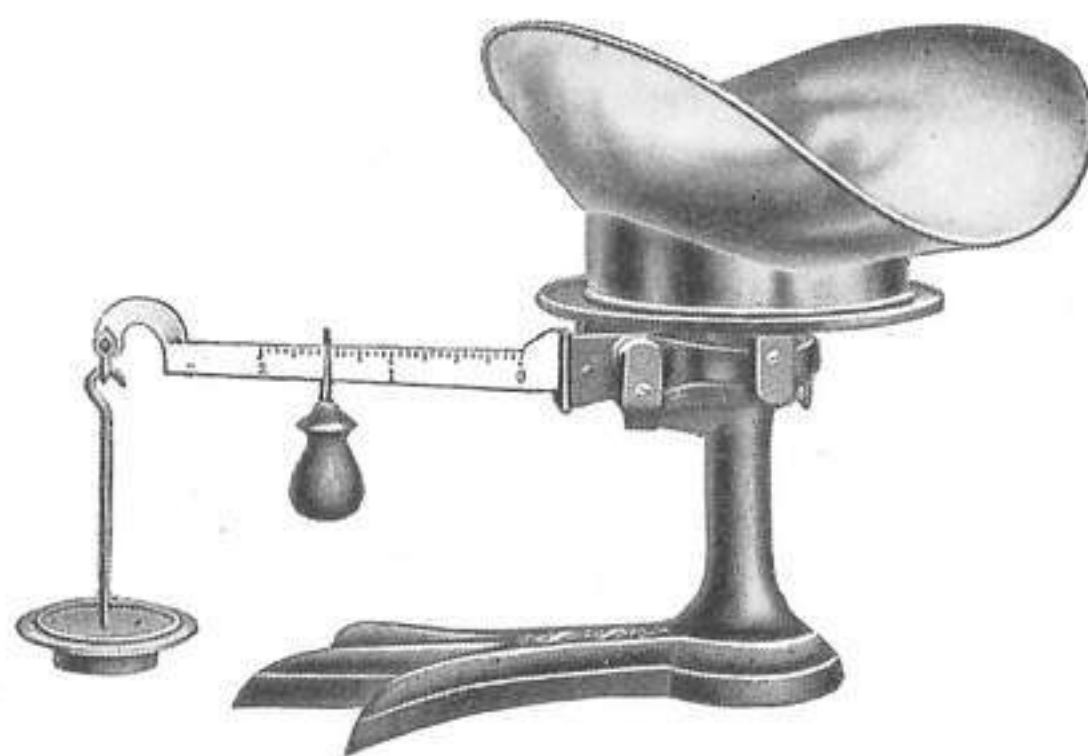

No.	Capacity	Scoop	Price
734	$\frac{1}{2}$ oz. to 36 lbs.	Tin, seamless	\$10 00
736	$\frac{1}{2}$ oz. to 36 lbs.	Brass, "	11 50
746	$\frac{1}{16}$ oz. to 36 lbs.	Iron plate, no scoop	9 50

## DOUBLE BEAM

738	$\frac{1}{2}$ oz. to 36 lbs.	Tin, seamless	\$11 00
740	$\frac{1}{2}$ oz. to 36 lbs.	Brass, "	12 50
742	$\frac{1}{16}$ oz. to 36 lbs.	Tin, "	12 00
744	$\frac{1}{16}$ oz. to 36 lbs.	Brass, "	13 50

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

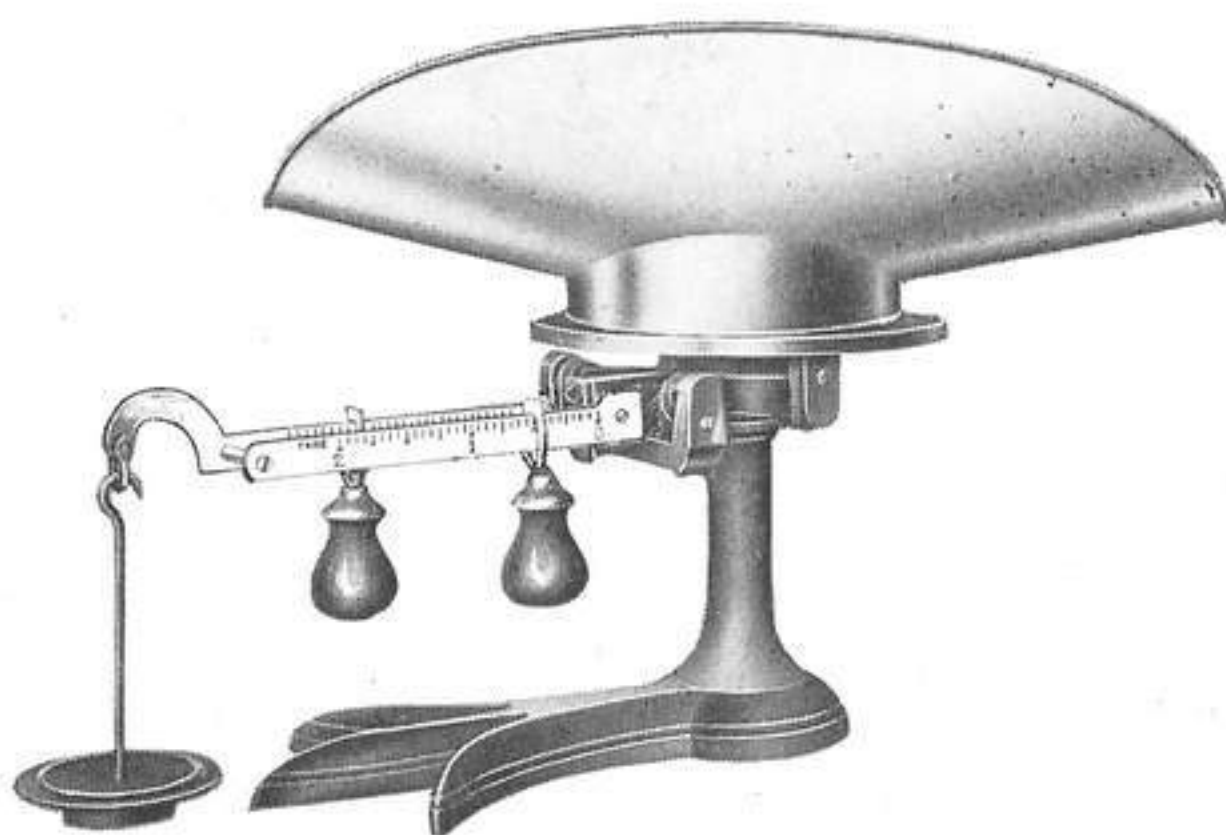

## GROCER SCALES

Especially designed for weighing groceries. Capacity on beam 2 pounds by  $\frac{1}{2}$  of an ounce. No small loose weights.

No.	Capacity	Scoop	Price
748	$\frac{1}{2}$ oz. to 62 lbs.	Tin, seamless	\$12 00
750	$\frac{1}{2}$ oz. to 62 lbs.	Brass, "	13 50
752	$\frac{1}{2}$ oz. to 62 lbs.	Without scoop	10 75

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

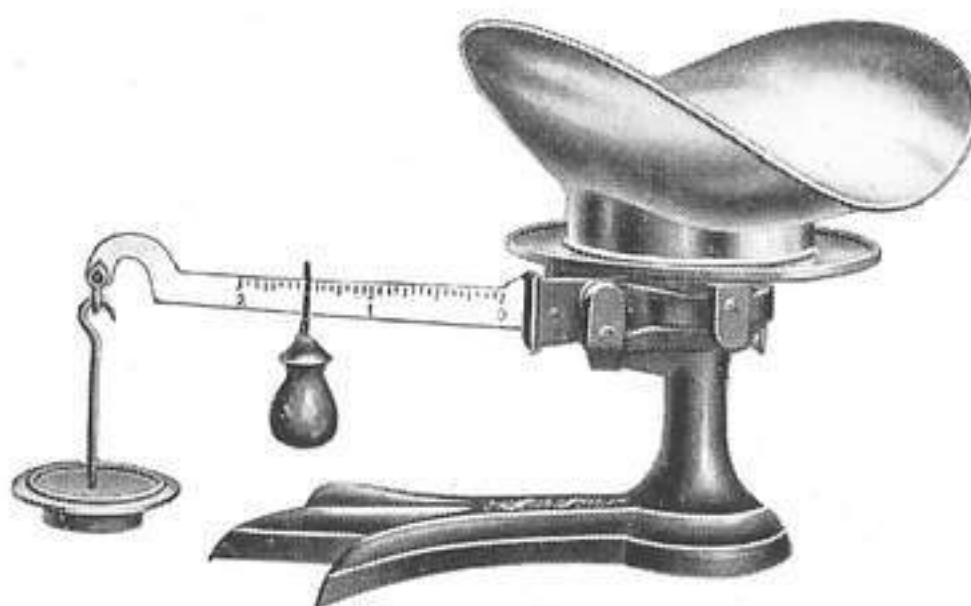

## DOUBLE-BEAM GROCER SCALES

Each beam has a capacity of 2 pounds by  $\frac{1}{2}$  of an ounce. No small loose weights.

No.	Capacity	Scoop	Price
754	$\frac{1}{2}$ oz. to 62 lbs.	Tin, seamless	\$13 00
756	$\frac{1}{2}$ oz. to 62 lbs.	Brass, "	14 50
758	$\frac{1}{2}$ oz. to 62 lbs.	Without scoop	11 75

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## SPICE SCALES

Capacity on beam 2 pounds by  $\frac{1}{2}$  of an ounce. No small loose weights.

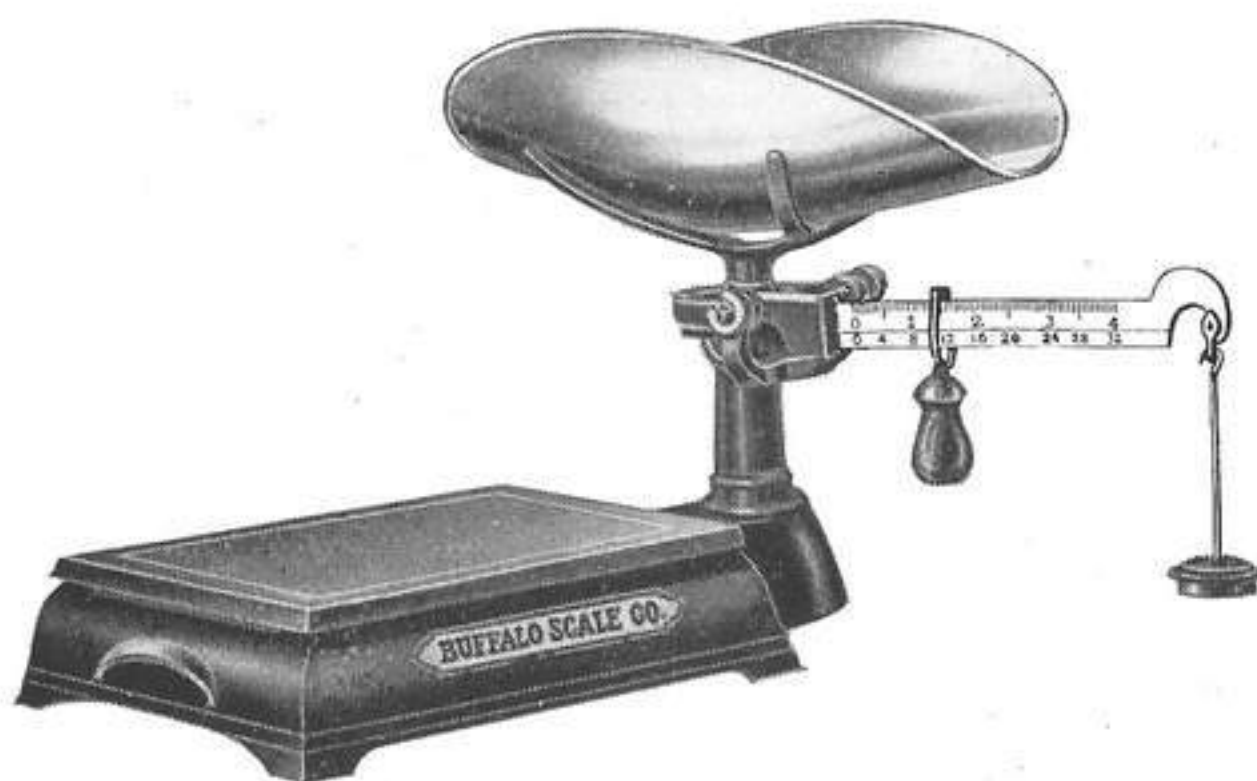

No.	Capacity	Scoop	Price
760	$\frac{1}{2}$ oz. to 36 lbs.	Tin, seamless	\$10 00
762	$\frac{1}{2}$ oz. to 36 lbs.	Brass, " "	11 00

## DOUBLE BEAM

764	$\frac{1}{2}$ oz. to 36 lbs.	Tin, seamless	\$11 00
766	$\frac{1}{2}$ oz. to 36 lbs.	Brass, " "	12 00

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## UNION SCALES

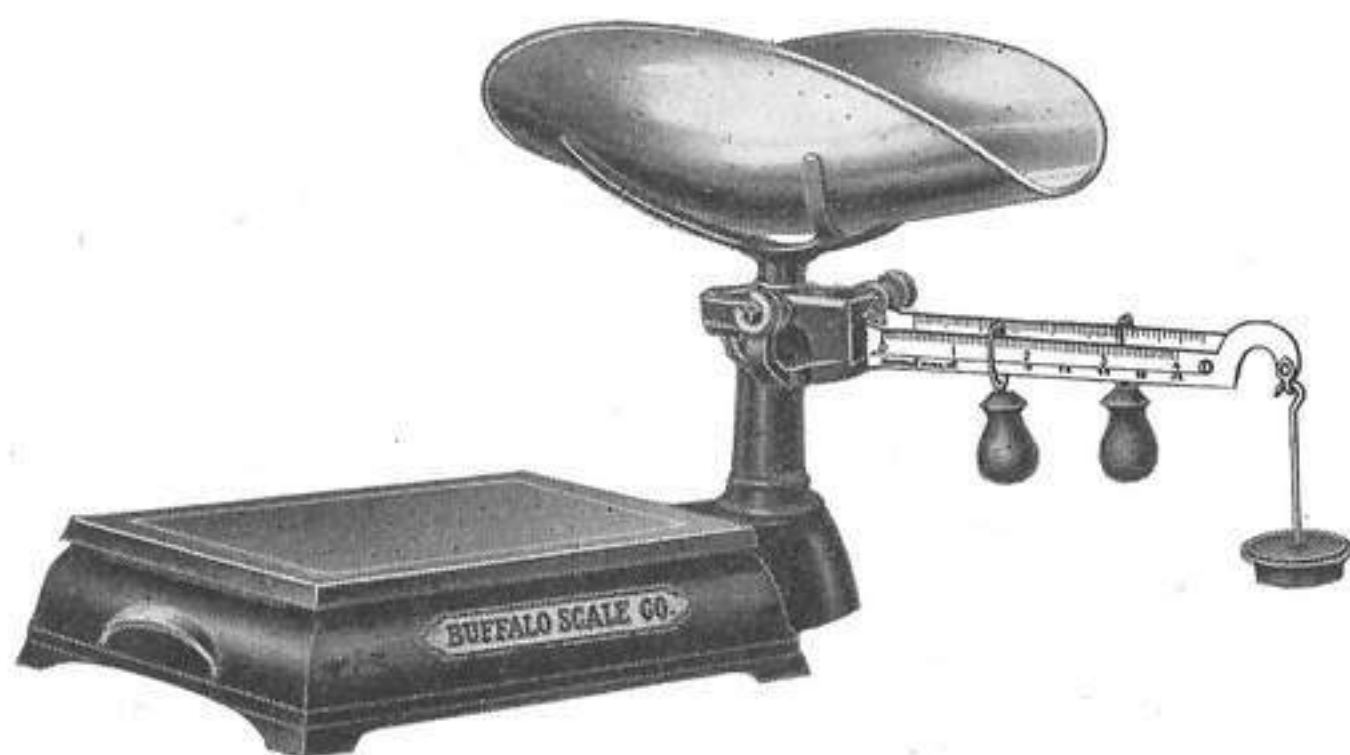

This is a very convenient scale for all kinds of counter use.

Platform 10 by 13 $\frac{3}{4}$  inches. Weighs from  $\frac{1}{2}$  of an ounce to 32 pounds in scoop and to 245 pounds on platform.

No.	Capacity	Scoop	Price
768	$\frac{1}{2}$ oz. to 245 lbs.	Tin, seamless	\$14 00
770	$\frac{1}{2}$ oz. to 245 lbs.	Brass, "	15 00

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## DOUBLE-BEAM UNION SCALES

Platform is 10 by 13 $\frac{3}{4}$  inches. Weighs from  $\frac{1}{2}$  of an ounce to 32 pounds in scoop and to 245 pounds on platform.

No.	Capacity	Scoop	Price
772	$\frac{1}{2}$ oz. to 245 lbs.	Tin, seamless	\$15 00
774	$\frac{1}{2}$ oz. to 245 lbs.	Brass, " "	16 00

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## IMPROVED UNION SCALES

WITH TWO PLATFORMS

Platform 10 by 13 $\frac{3}{4}$  inches. Weighs from  $\frac{1}{2}$  of an ounce to 32 pounds in scoop and to 245 pounds on platform.

No.	Capacity	Scoop	Price
776	$\frac{1}{2}$ oz. to 245 lbs.	Tin, seamless	\$14 50
778	$\frac{1}{2}$ oz. to 245 lbs.	Brass, " "	15 50

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## DOUBLE-BEAM IMPROVED UNION SCALES

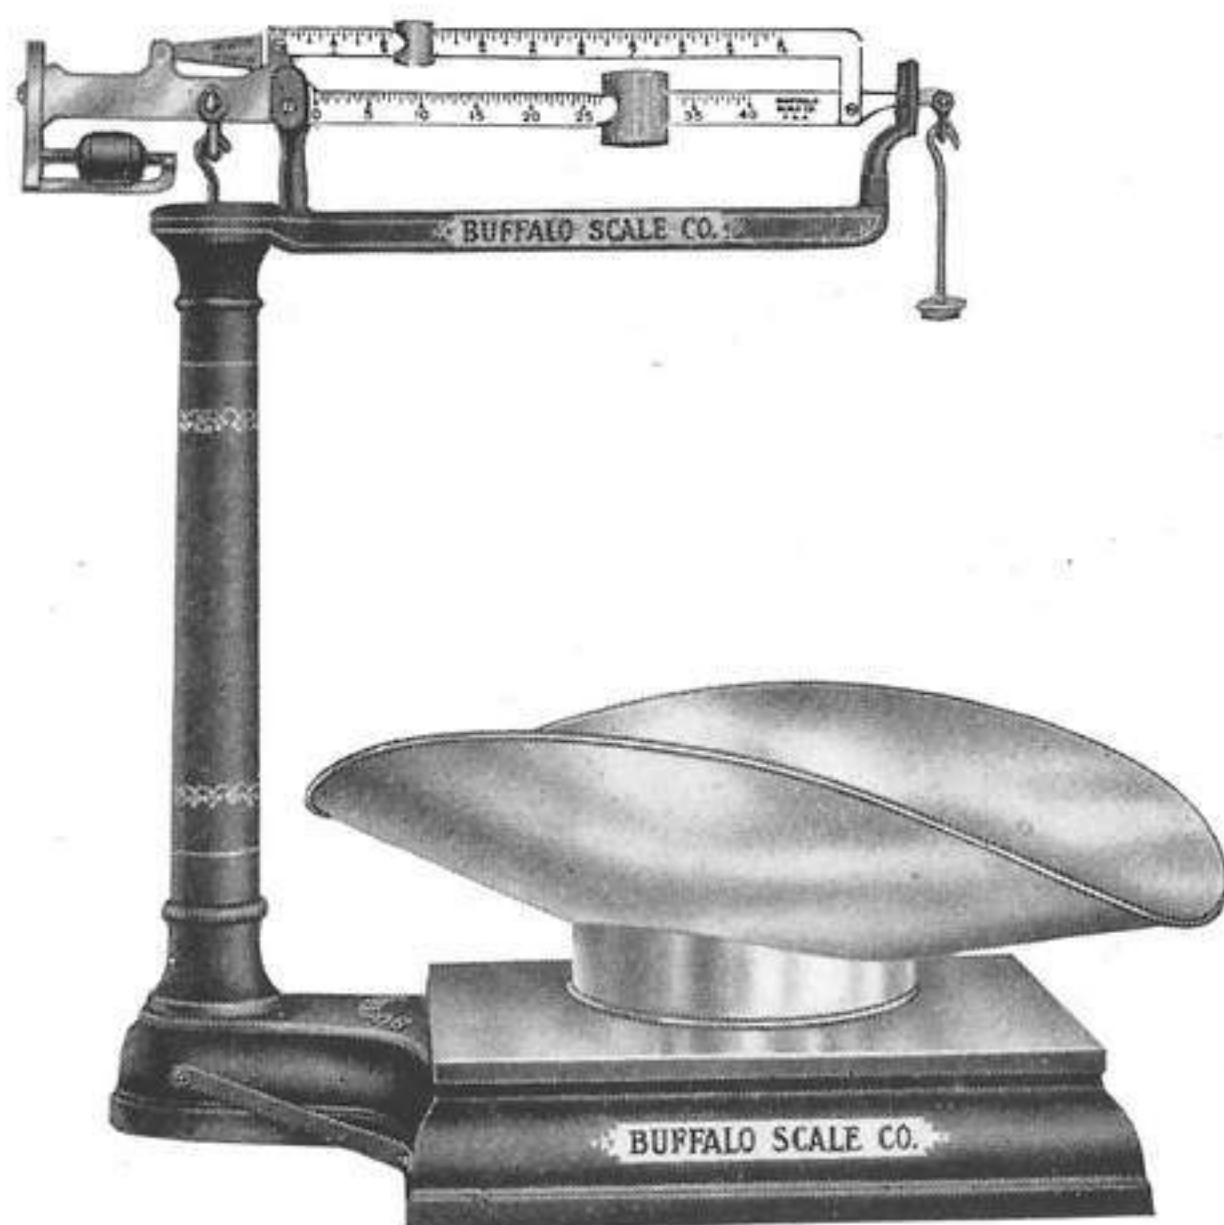

WITH TWO PLATFORMS

Platform 10 by 13 $\frac{3}{4}$  inches. Weighs from  $\frac{1}{2}$  of an ounce to 32 pounds in scoop and to 245 pounds on platform.

No	Capacity	Scoop	Price
780	$\frac{1}{2}$ oz. to 245 lbs.	Tin, seamless	\$15 50
782	$\frac{1}{2}$ oz. to 245 lbs.	Brass, “	16 50

Tin funnel scoop for this scale, \$1.00 extra.

Brass funnel scoop for this scale, \$1.50 extra.

## BOSTON PLATFORM SCALES

Nickel plated beam and poises. Double beam, marked on both sides. Beautifully finished.

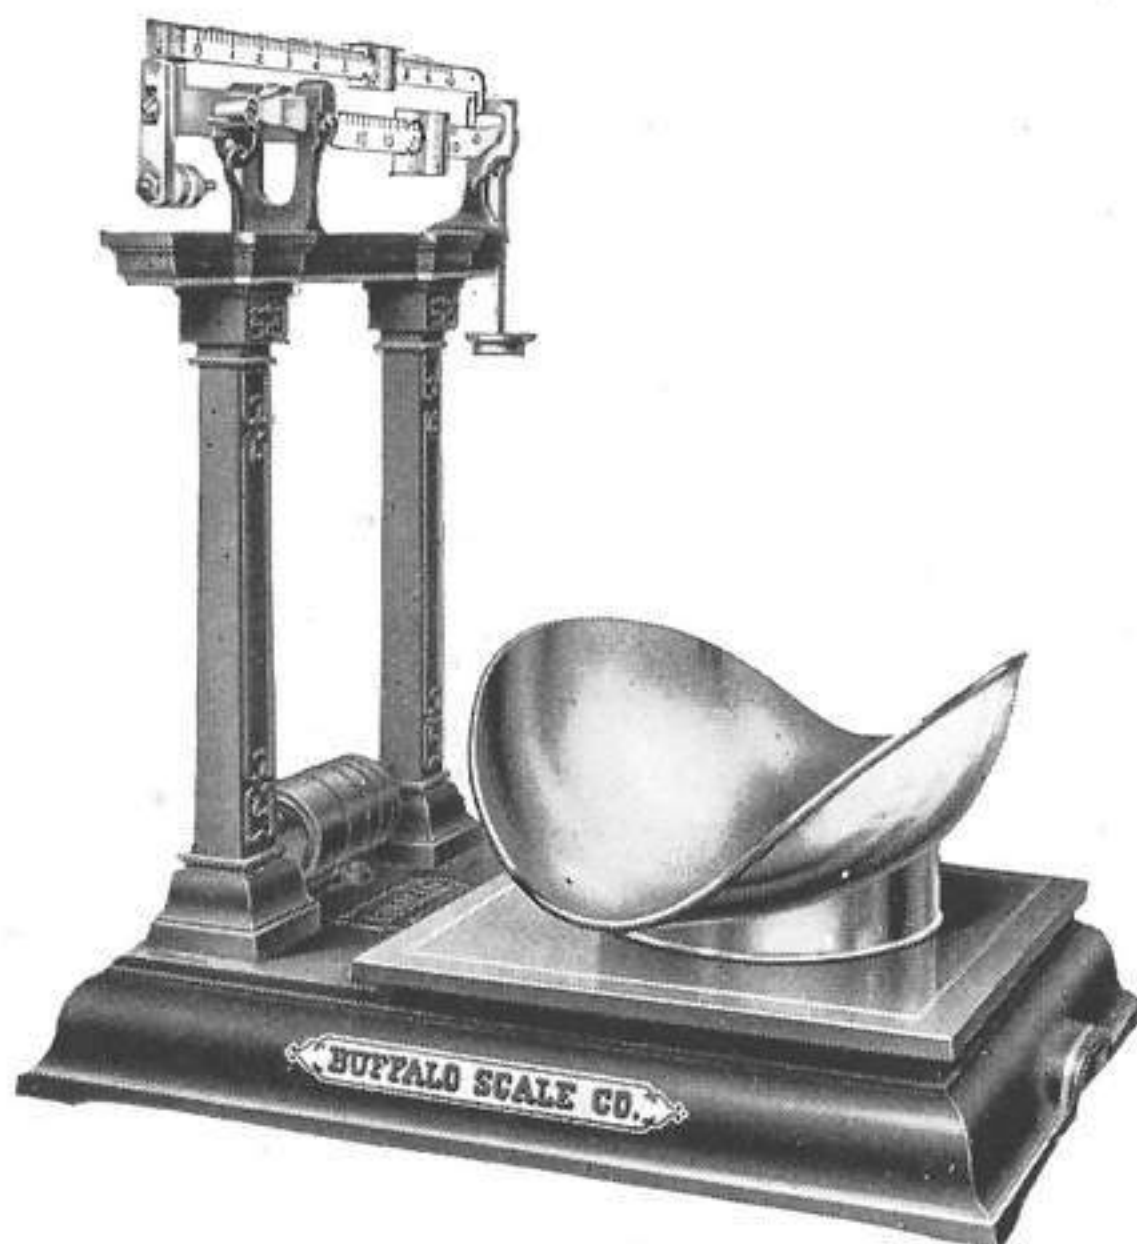

A very convenient, accurate and durable counter scale of simple design. The beam and supporting arm can be set as shown or at right angles with platform.

It is finished in black and gold. Has patent scoop-balancing latch, nickel plated beam, the upper bar of which is graduated to weigh 10 pounds by ounce marks, the lower bar 40 pounds by  $\frac{1}{2}$ -pound marks.

Height over all, 25 inches. Size of platform, 10 by  $13\frac{1}{2}$  inches. Capacity 250 pounds by 1 ounce.

No.	Scoop	Price
794	Large seamless tin scoop	\$24 00
796	Large seamless brass scoop	25 00
678	Marble slab, but no scoop	24 00

Agate bearings for beam, \$3.00 extra.

## NIAGARA COUNTER SCALES

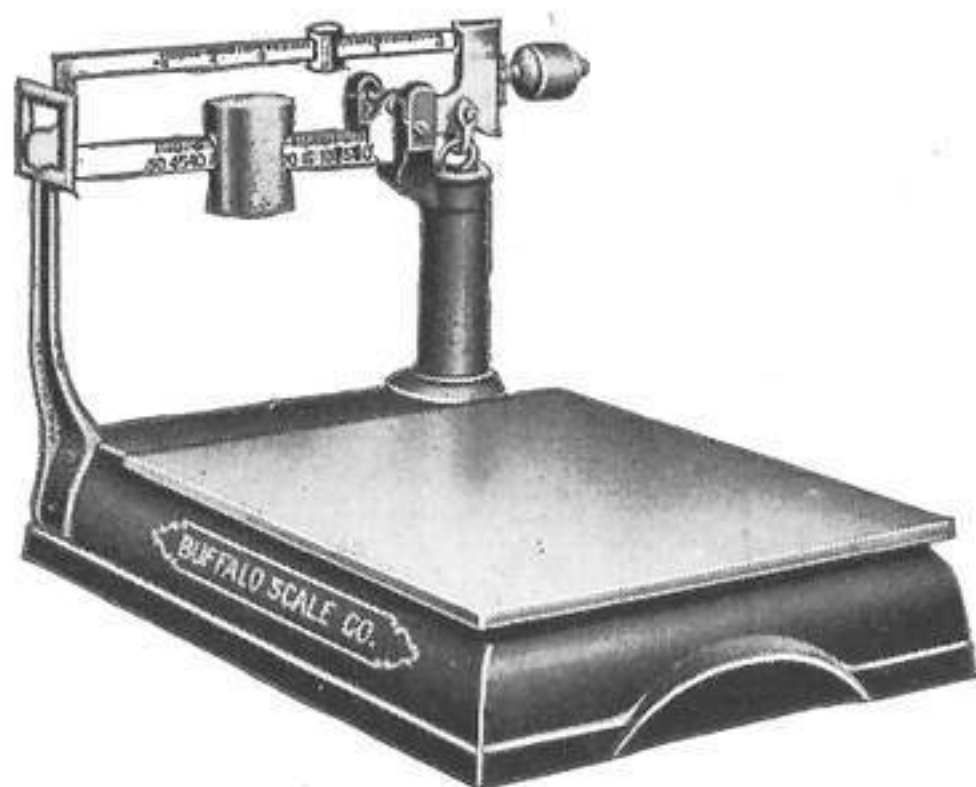

High beam counter scales, which are now a necessity in almost every store, were originated by the Buffalo Scale Company over 35 years ago. The first requirement in a scale of this type is simplicity of construction. Every additional bearing means additional friction and decreased accuracy, ultimately, if not at once. With this fact kept in mind, we have produced in the Niagara, our latest design, an exceptionally sensitive, durable scale. Its appearance, too, has received careful consideration, and, from an artistic point, is most satisfactory. The finish is black and gold.

The Niagara has a large platform,  $12\frac{3}{4}$  by  $13\frac{3}{4}$  inches. The beam and poises are nickel plated. The beam is short and acts quickly. The upper bar will weigh 10 pounds by 1-ounce marks; the lower bar 25 pounds by  $\frac{1}{4}$ -pound marks. The total capacity, 255 pounds, is made up by loose weights. Height over all is 24 inches.

No.	Scoop	Price
797	Large seamless tin scoop	\$25 00
799	Large seamless brass scoop	27 00
677	Marble slab but no scoop	25 00

Extra list for agate bearings for beam, \$3.00.

No. 801. When a particularly elegant scale is desired, the Niagara is furnished with agate bearings for beam, suspended bearings under platform, nickel plated brass scoop and nickel plated weights, counterpoise and weight rack. Enameled in dark green, rubbed very smooth and decorated in gold leaf, \$50.00.

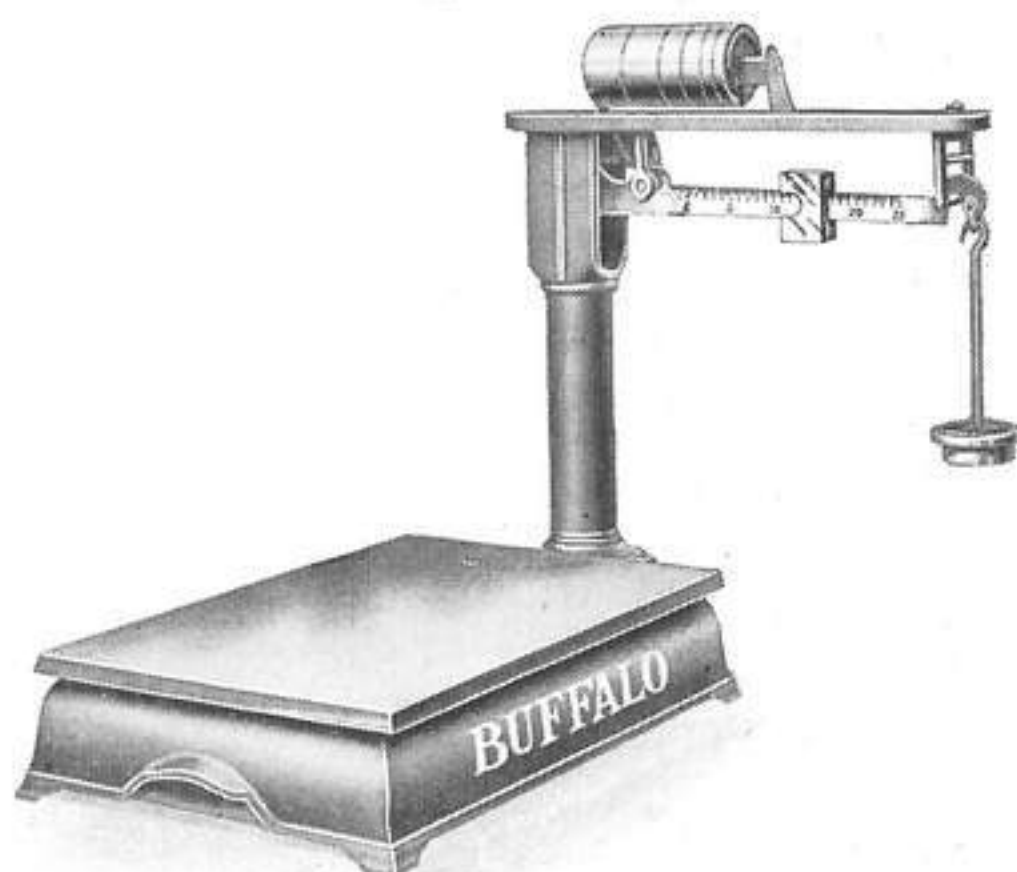

## EXPRESS PACKAGE SCALES

No loose weights.

Upper bar is marked to 5 pounds in 1-ounce notches. Lower bar 1-pound notches to 50 pounds.

No.	Capacity	Platform	Price
800	1 oz. to 55 lbs.	10 ½ x 12 inches	\$15 00

## COUNTER PLATFORM SCALES

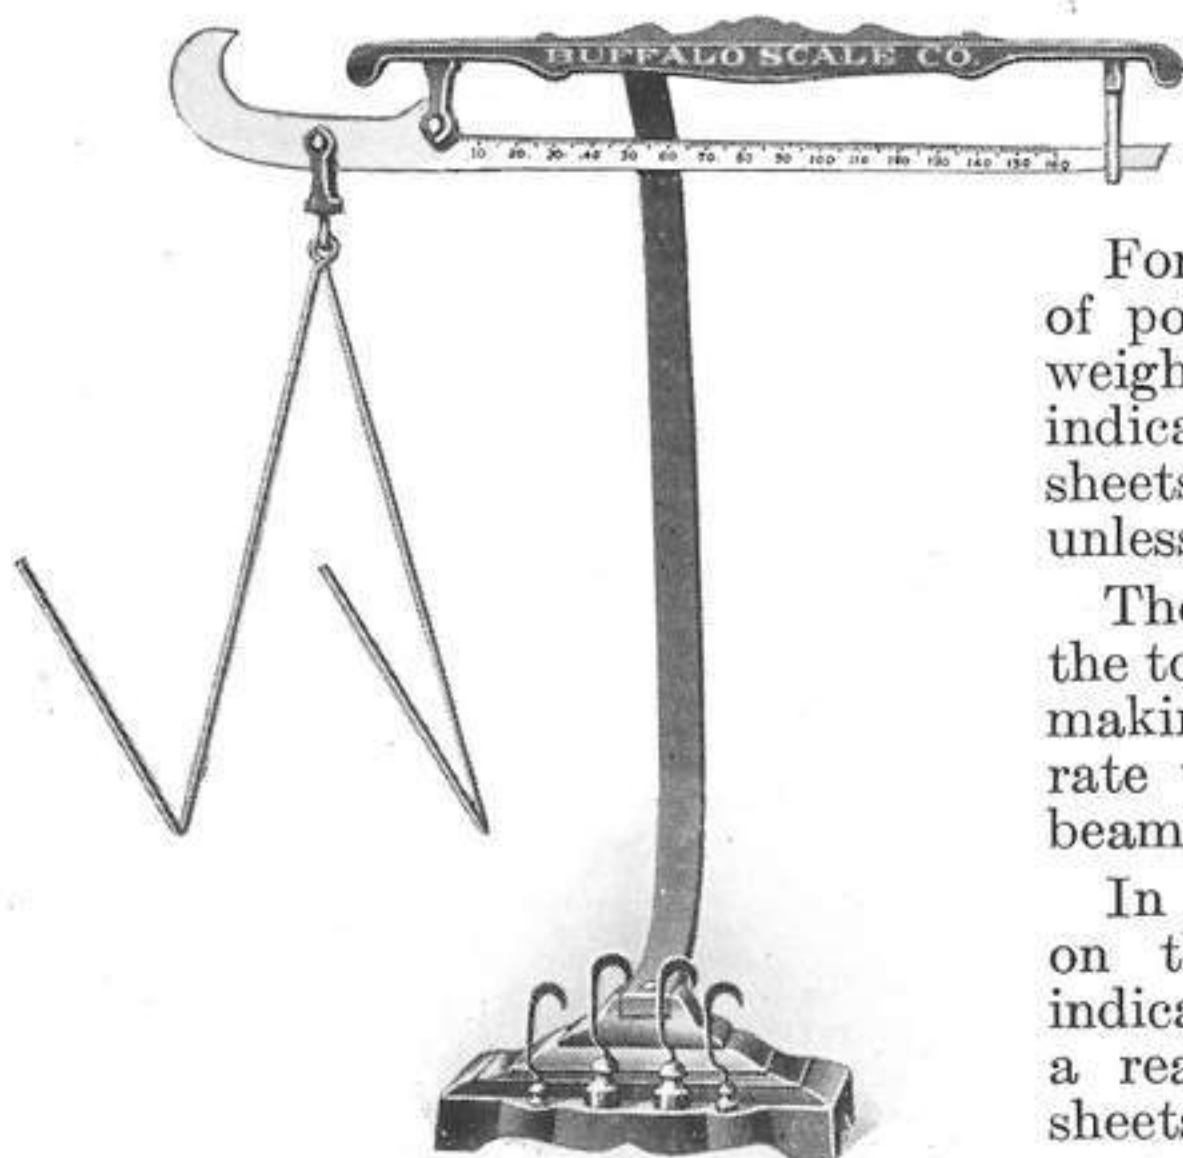

WITH IRON PILLAR AND SLIDING BRASS POISE

No.	Capacity	Pillar	Height	Platform	Price
802	250 lbs. by 1 oz.	Short	12 $\frac{3}{4}$ inches	10 $\frac{1}{2}$ x 14 $\frac{1}{2}$ inches	\$16 00
804	300 lbs. by 2 oz.	Short	15 $\frac{1}{2}$ inches	13 $\frac{1}{2}$ x 19 "	19 00
806	300 lbs. by 2 oz.	High	32 $\frac{1}{2}$ inches	13 $\frac{1}{2}$ x 19 "	21 00

## BULLION SCALES—TROY WEIGHT

This scale is especially designed for weighing silver bullion and is handsomely finished, with brass poise, weights and counterpoise.

No.	Capacity	Platform	Price
808	3200 oz. by $\frac{1}{4}$ oz.	13 $\frac{1}{2}$ x 19 inches	\$50 00

## PAPER SCALE WITH STAND

For determining the number of pounds to the ream by the weight of one sheet. Weights indicating 480 sheets and 500 sheets to the ream furnished unless otherwise ordered.

These beams are notched on the top and have hanging poises, making them much more accurate than the ordinary smooth beam with sliding poise.

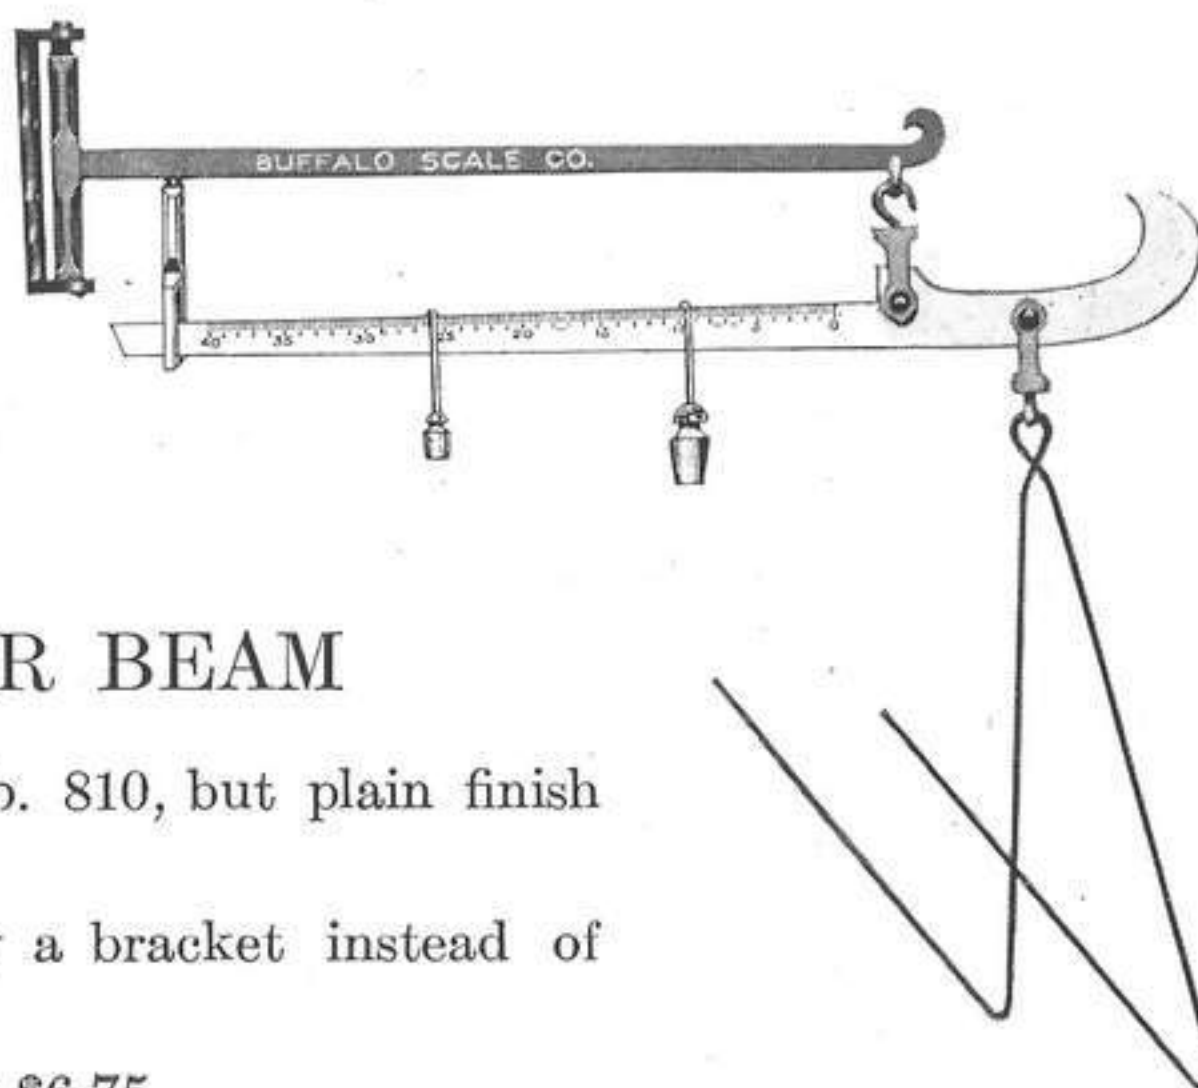

In use, a single sheet is placed on the scale and the result indicates the number of pounds a ream of either 480 or 500 sheets will weigh.

The side of the beam ordinarily used is marked 160 and is called the "heavy" side.

The other side of beam, marked 40, is used when weighing very light sheets and is called the "light" side.

When weighing on the "heavy" side of beam, the larger poises, either the 480 or the 500, are used. When weighing on the "light" side, the smaller poises, 480 or 500, are used.

No. 810. Price \$15.00.

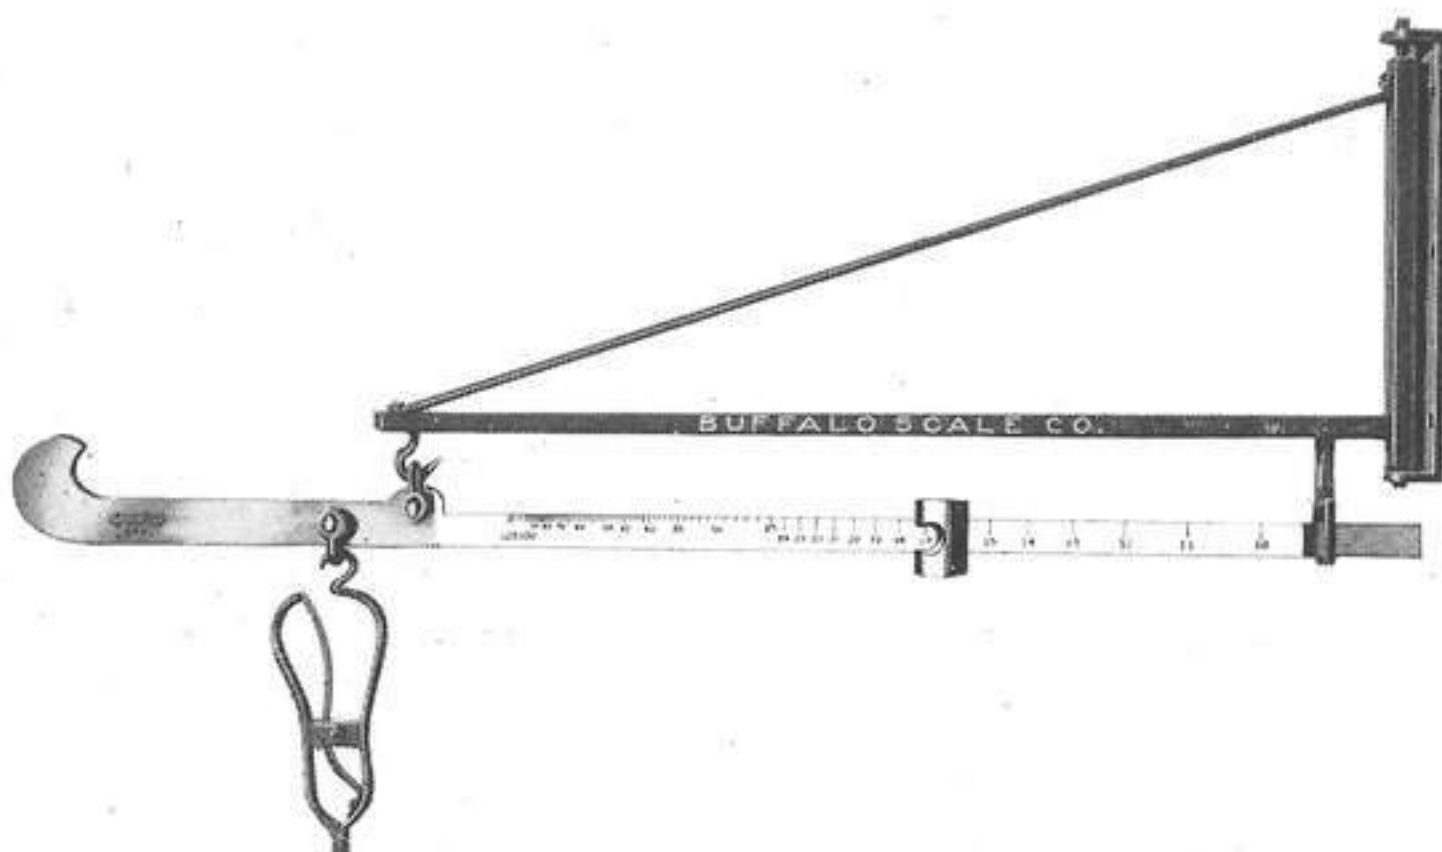

## PAPER BEAM

Similar to No. 810, but plain finish throughout.

Supported by a bracket instead of stand.

No. 812, price \$6.75.

## PAPER BOARD BEAMS

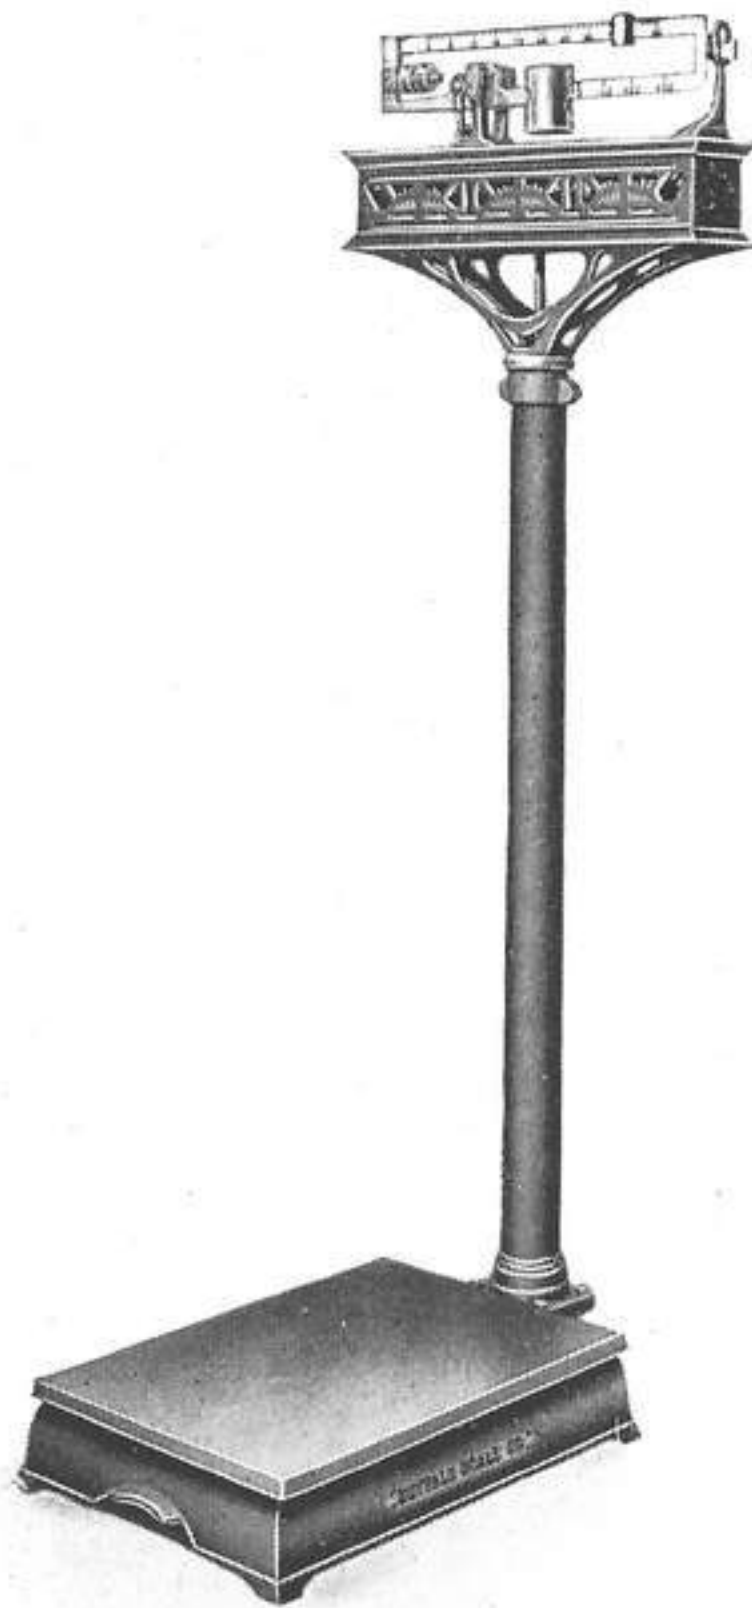

This beam is used to determine the number of sheets of pasteboard in a 50-pound bundle, by weighing a single sheet.

Beam No. 809 is graduated to indicate from 10 to 45 sheets in single sheet marks, from 45 to 100 in 5 sheet marks, from 100 to 200 in 25 sheet marks and from 200 to 400 in 100 sheet marks.

Beam No. 811 is double the length of the above described beam and is graduated from 10 to 100 in single sheet marks and from 100 to 125 in 5 sheet marks.

We have also furnished many special beams of this kind.

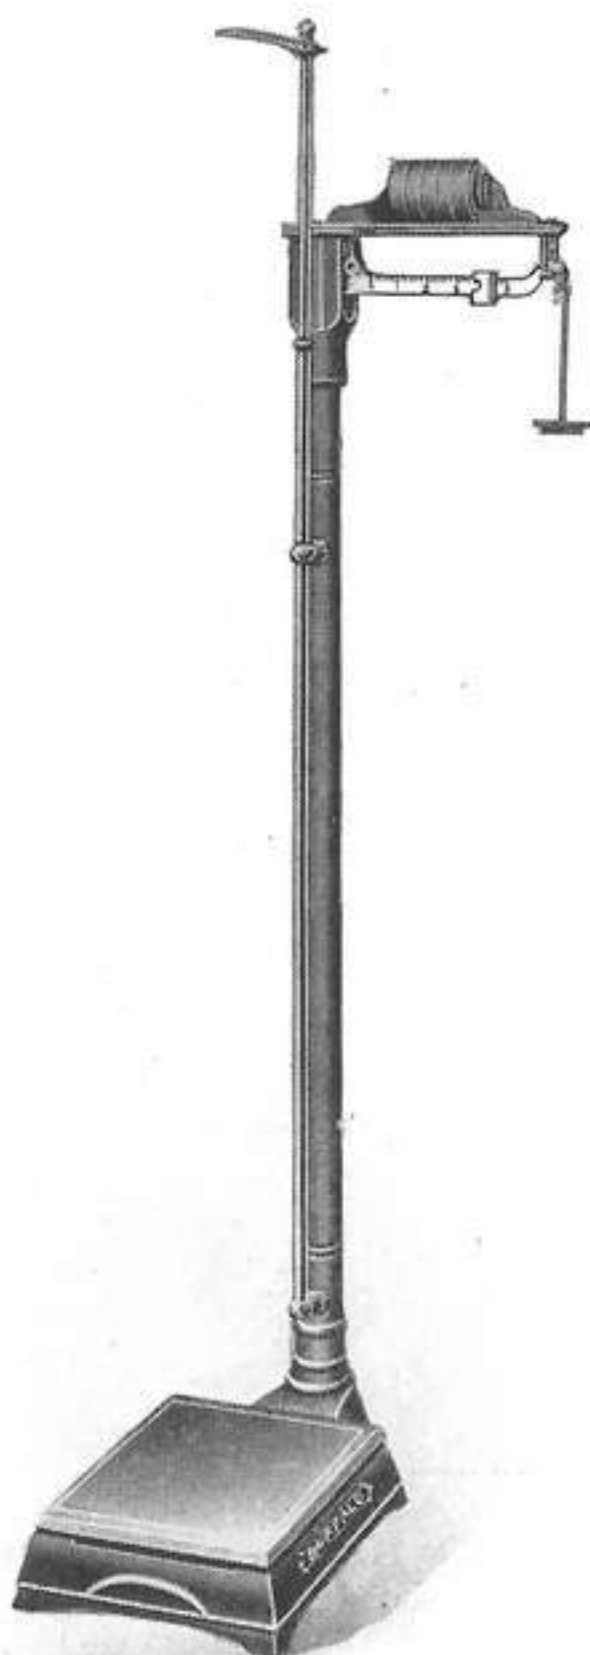

Write for net prices.

## PHYSICIANS' SCALES

The above illustration gives only a fair idea of the artistic design and finish of this most attractive personal scale. The base, platform, pillar and cap are of iron and the beam and poises are of brass. The capacity,  $\frac{1}{4}$  pound to 300 pounds, is marked upon the beam, so that no loose weights are required. If desired, the scale will be graduated in the Metric system, 100 grams to 175 kilos, without additional charge. In the regular finish the iron work is japanned black, relieved with bronze striping, and the beam is polished brass. In the extra finish, the iron work will be furnished in any color, but we recommend a dull black, as used on wrought iron, with gold-leaf striping. In this extra finish the beam and its supports are nickel plated. The measuring rod is of brass, nickel plated, similar to the one used on our scale No. 826.

No.	Capacity Lbs.	Platform Size, Inches	Price Regular	Price Extra Finish
821	300 by $\frac{1}{4}$	$13\frac{1}{2} \times 19\frac{1}{2}$ without measuring rod	\$28 00	\$40 00
823	300 by $\frac{1}{4}$	$13\frac{1}{2} \times 19\frac{1}{2}$ with measuring rod	41 00	53 00

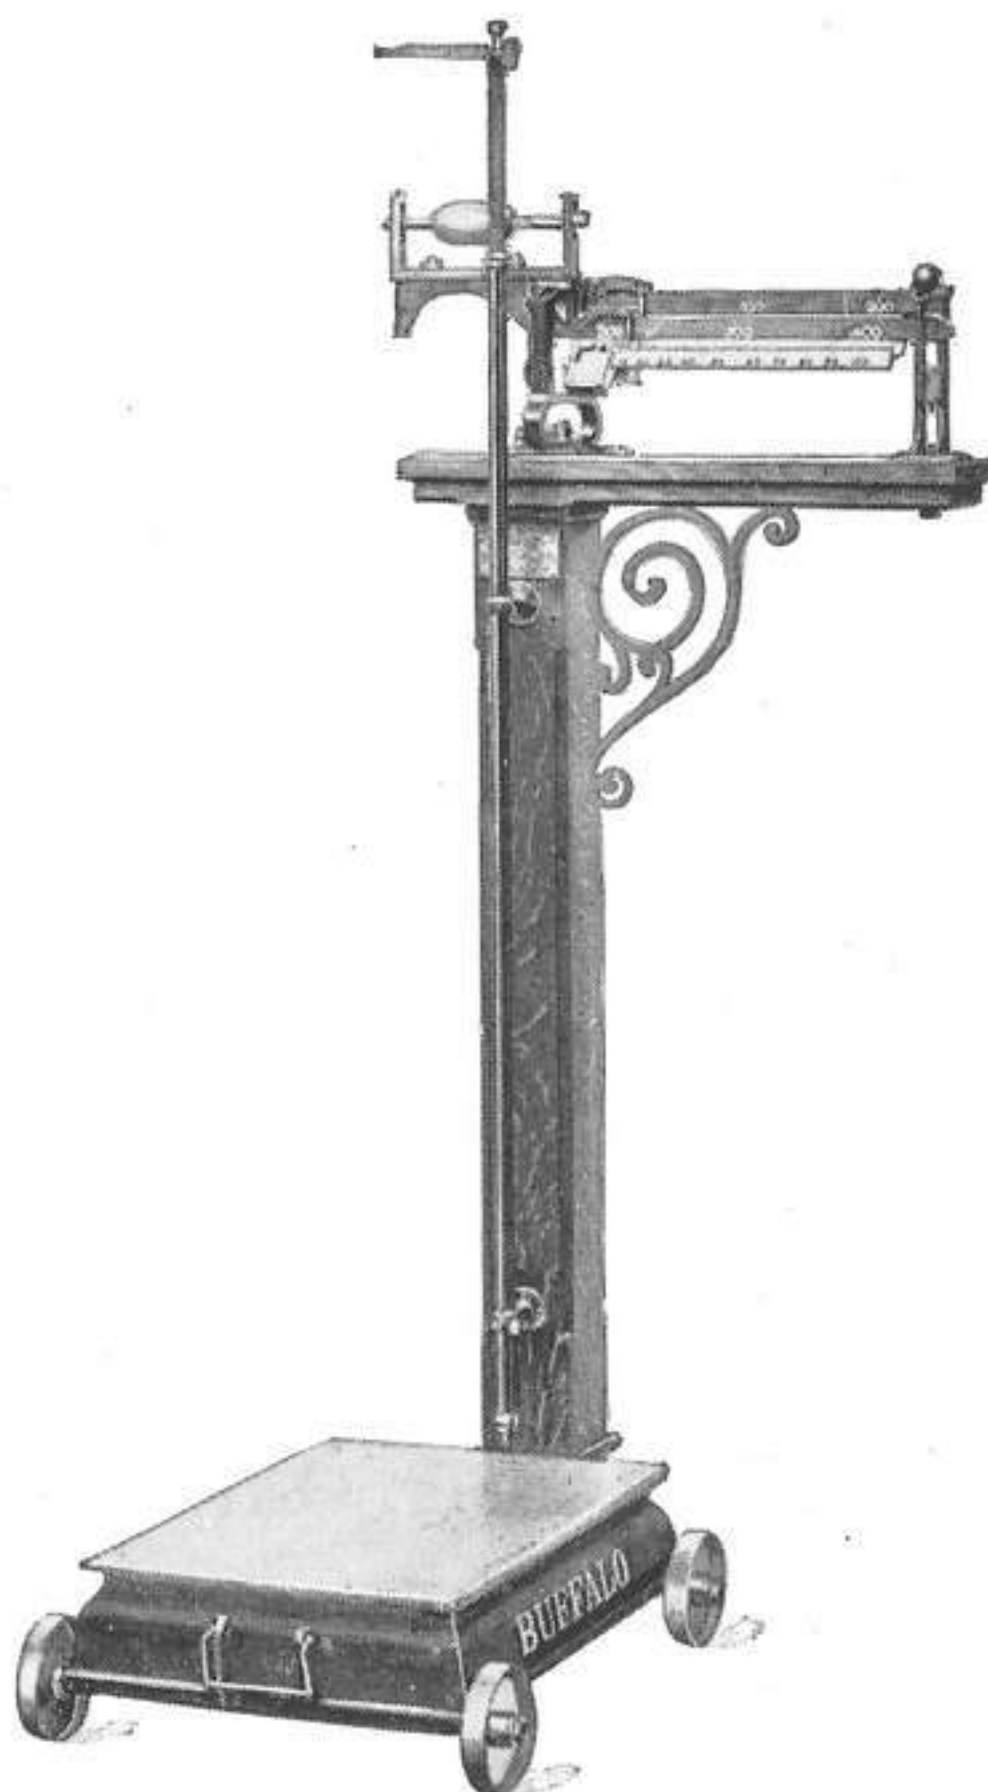

## BATHROOM SCALES

This scale is suitable for use in private houses, and especially in bathrooms. It is constructed of iron and brass throughout, with a tall pillar which places the beam on a level with the eye, and is finished in black and gold or white enamel, as may be desired, with nickel plated sliding poise beam. If desired, the scale can be graduated in the Metric system, to 125 kilos by 20-gram divisions.

Scale is furnished either with or without measuring rod.

No.	Capacity	Platform	Price
824	250 lbs. by 1 oz.	{ 10 ½ x 14 ½ inches { with measuring rod }	\$26 00
822	250 lbs. by 1 oz.	10 ½ x 14 ½ inches	18 00

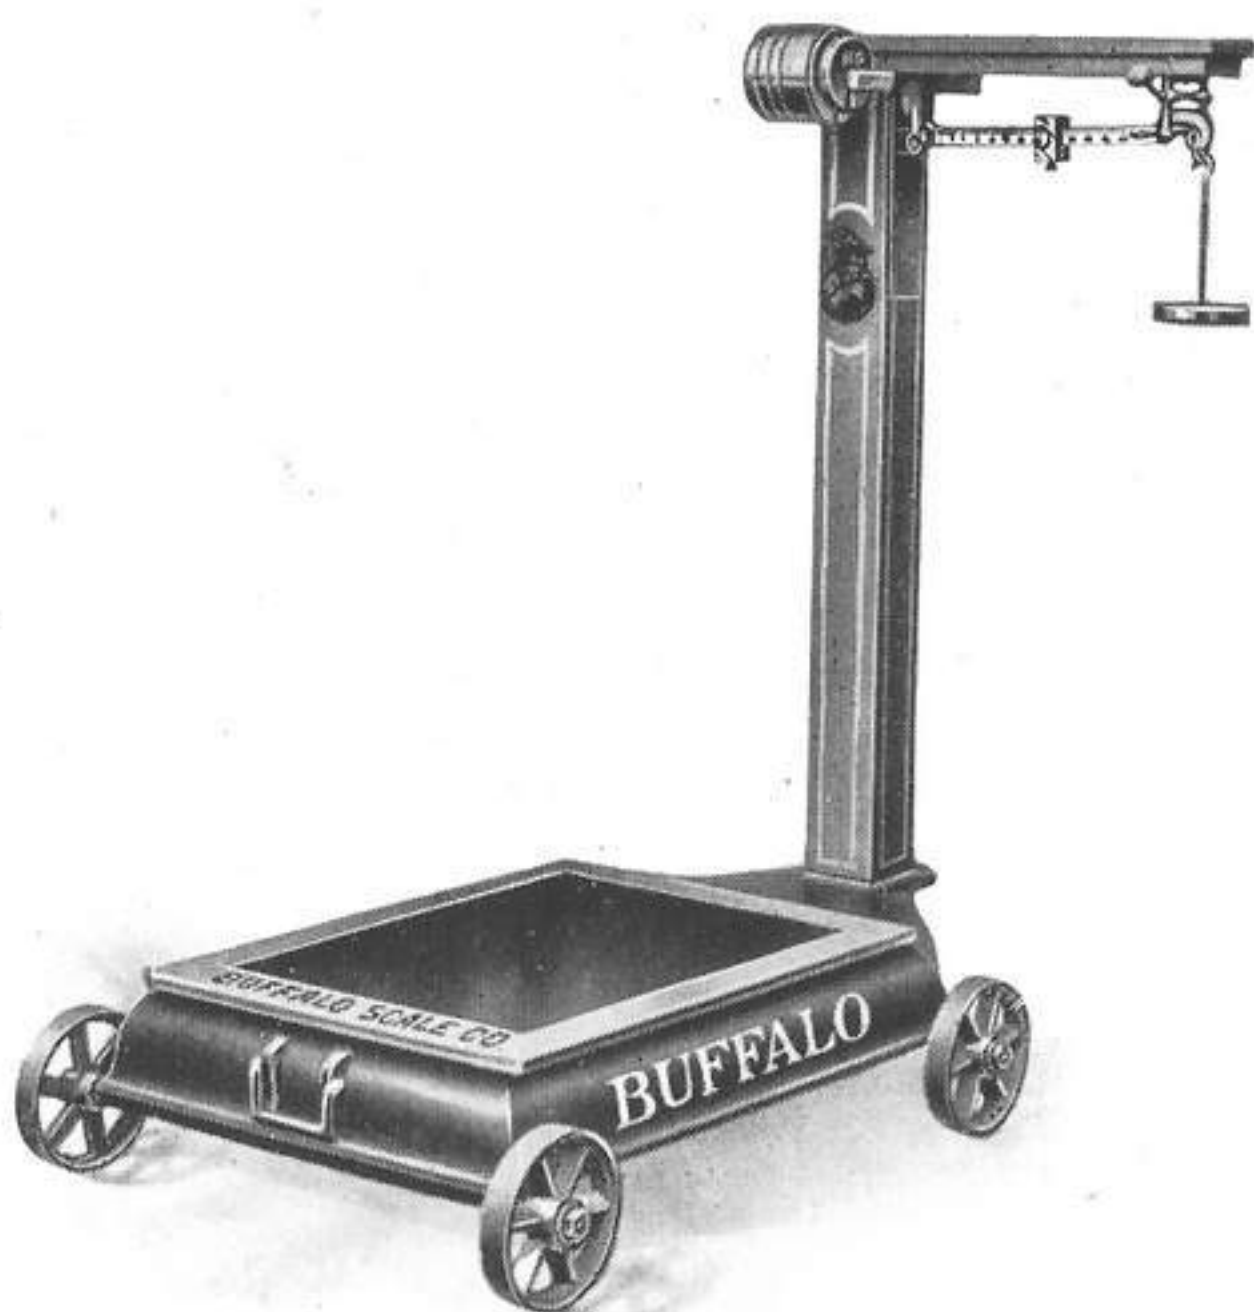

## FANCY COMBINATION BEAM SCALES

### WITH WHEELS

It has handsomely enameled iron frame. The platform is covered with stamped sheet brass. The patent combination beam dispenses with the use of loose weights and is of brass, nickel plated, as is the measuring rod. The beam and measuring rod will be graduated to the Metric system, if desired, without additional charge. The pillar and caps are of oak, handsomely polished. Cherry woodwork will be furnished at the same price as oak, and mahogany at an additional list price.

No.	Capacity	Platform	Price
826	500 by $\frac{1}{2}$ lbs.	15 x 21 inches	\$100 00

Additional list for mahogany woodwork, \$10.00.

## PLATFORM SCALES

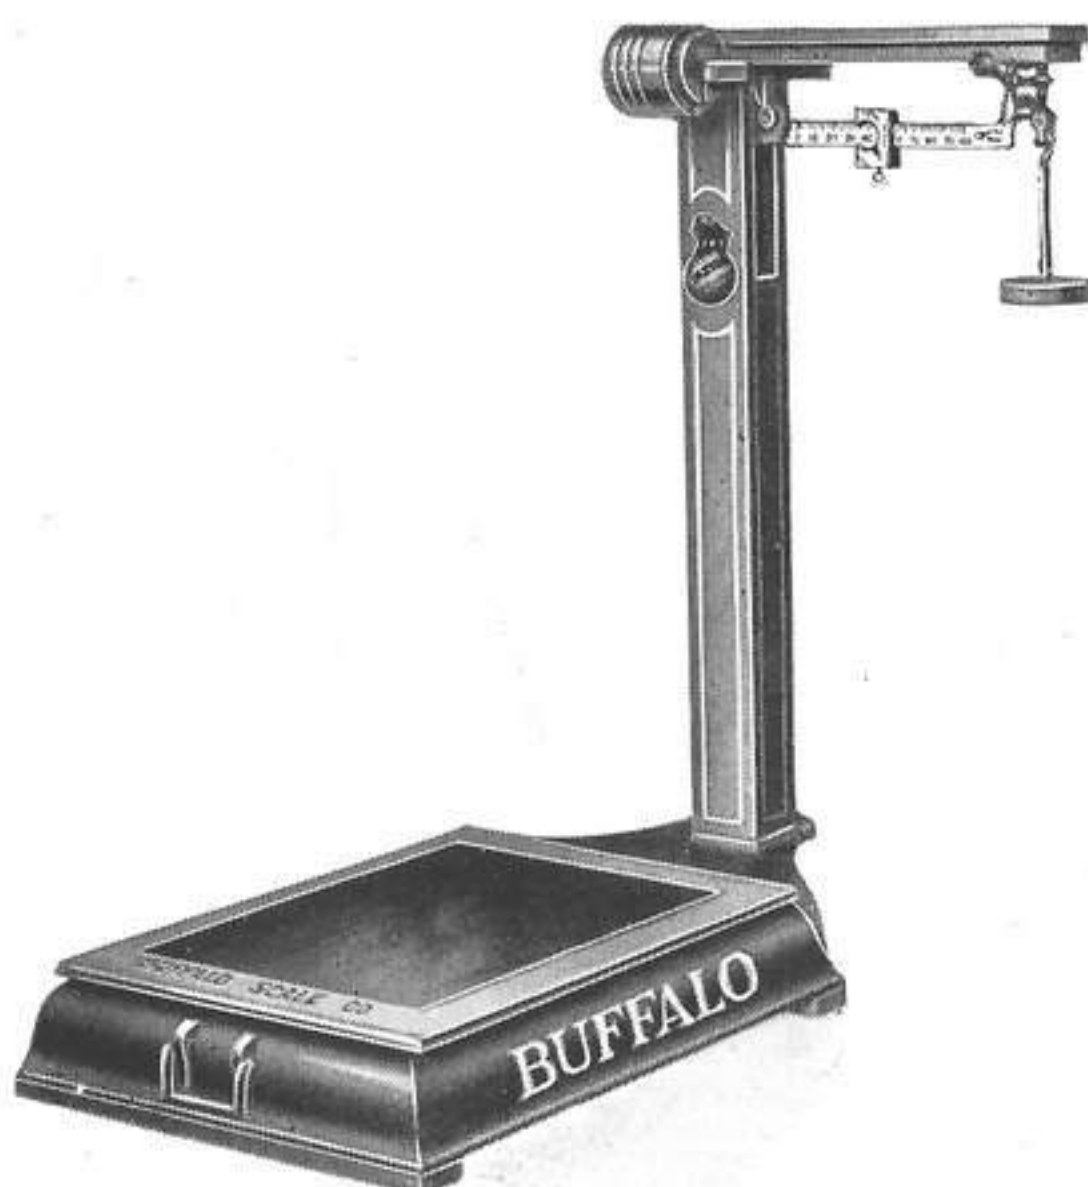

### WITH WHEELS

Adapted for all kinds of general weighing. The beams have sliding poises with set screws. The two smaller scales have beams marked to 50 pounds by  $\frac{1}{4}$ -pound marks; large sizes, beams are marked to 100 pounds by  $\frac{1}{2}$ -pound marks.

No.	Capacity	Platform	Price
1200	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$26 00
1202	600 by $\frac{1}{4}$ lbs.	16 x 25 "	33 00
1204	800 by $\frac{1}{2}$ lbs.	17 x 26 "	38 00
1206	1000 by $\frac{1}{2}$ lbs.	17 x 26 "	43 00
1208	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	49 00
1210	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	56 00
1212	2000 by $\frac{1}{2}$ lbs.	24 x 33 "	75 00
1214	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	85 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

Double beams, see page 61.

## PLATFORM SCALES

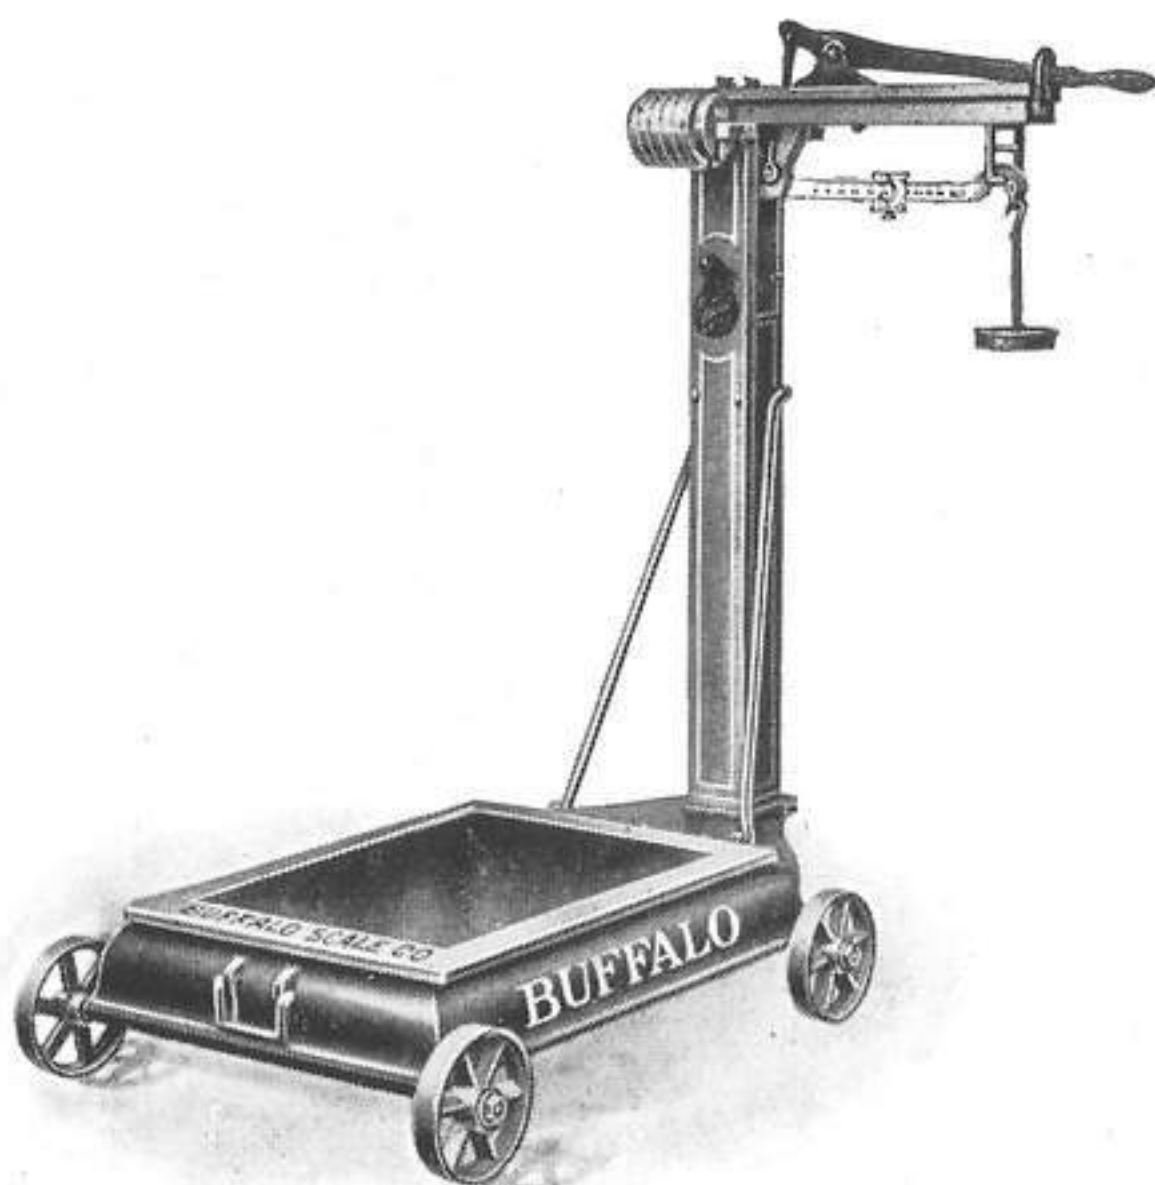

### WITHOUT WHEELS

Adapted for all kinds of general weighing. The beams have sliding poises with set screws. The two smaller scales have beams marked to 50 pounds by  $\frac{1}{4}$ -pound marks; large sizes, beams are marked to 100 pounds by  $\frac{1}{2}$ -pound marks.

No.	Capacity	Platform	Price
1221	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$23 00
1223	600 by $\frac{1}{4}$ lbs.	16 x 25 "	30 00
1225	800 by $\frac{1}{2}$ lbs.	17 x 26 "	34 00
1227	1000 by $\frac{1}{2}$ lbs.	17 x 26 "	39 00
1229	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	45 00
1231	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	52 00
1233	2000 by $\frac{1}{2}$ lbs.	24 x 33 "	70 00
1235	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	80 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

Double beams, see page 61.

## PLATFORM SCALES

WITH WHEELS AND DROP LEVER

Adapted for all kinds of general weighing. The beams and poises are of brass. The two smaller scales have beams marked to 50 pounds by  $\frac{1}{4}$ -pound marks; large sizes, beams are marked to 100 pounds by  $\frac{1}{2}$ -pound marks.

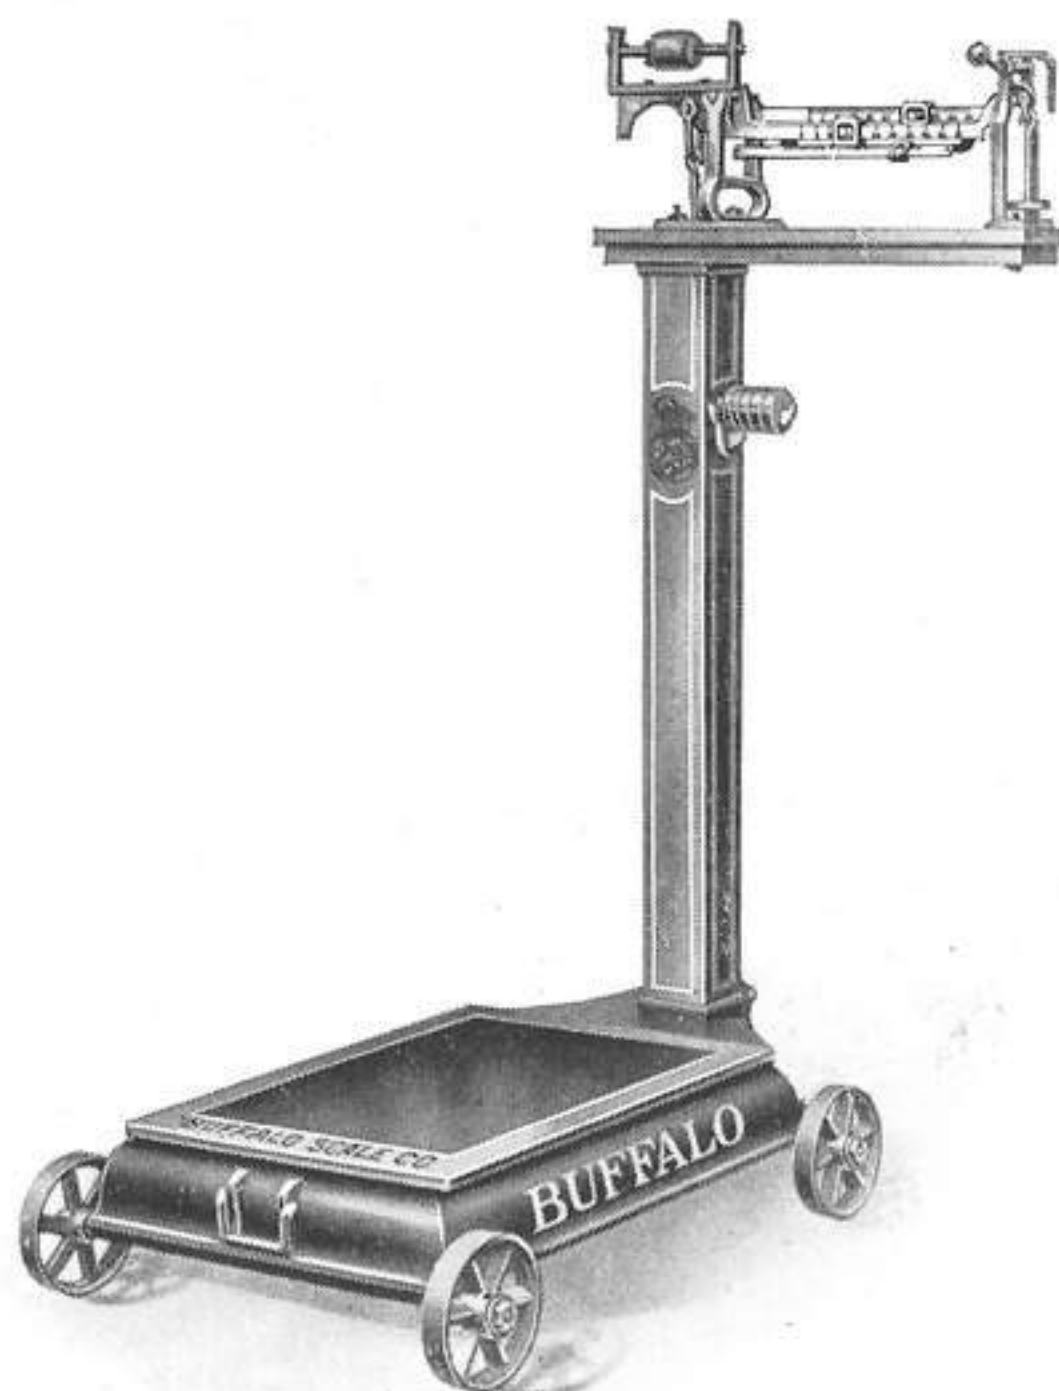

Our drop-lever scales are made very heavy and strong, and have pillar braced.

Notched beam with hanging poise furnished when so ordered.

No.	Capacity	Platform	Price
1236	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$ 34 00
1238	600 by $\frac{1}{4}$ lbs.	16 x 25 "	41 00
1240	800 by $\frac{1}{2}$ lbs.	17 x 26 "	46 00
1242	1000 by $\frac{1}{2}$ lbs.	17 x 26 "	51 00
1244	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	59 00
1246	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	70 00
1248	2000 by $\frac{1}{2}$ lbs.	24 x 33 "	82 00
1250	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	94 00
1252	3000 by $\frac{1}{2}$ lbs.	30 x 38 "	114 00
1254	3500 by $\frac{1}{2}$ lbs.	30 x 38 "	125 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

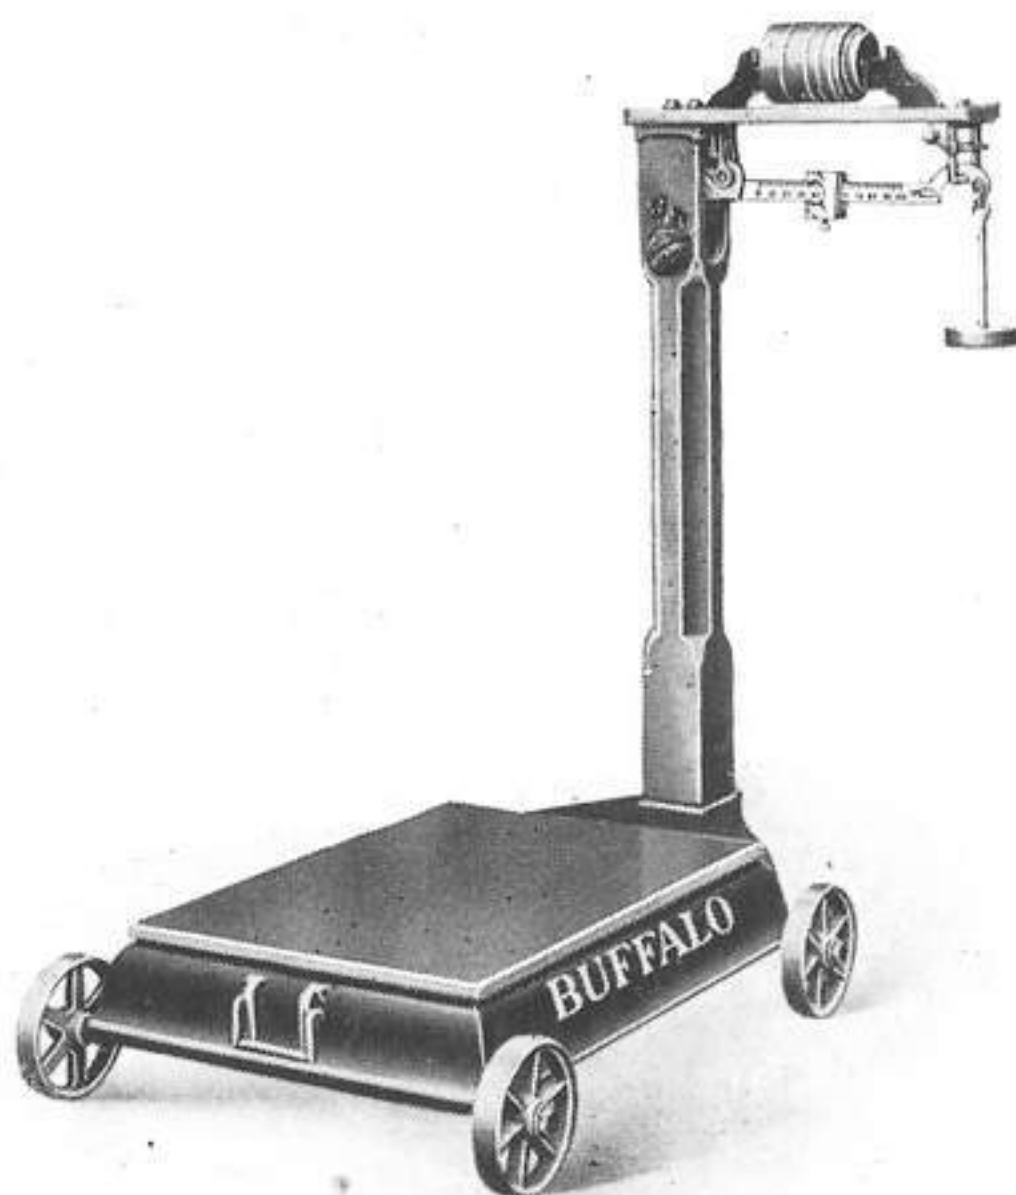

Double beams, see page 61.

## LABORATORY PLATFORM SCALES

This scale is especially designed for the mechanical department of universities and colleges. It is equipped with a 3-bar combination brass beam and balance indicator. The main beam is graduated 50 pounds x 5-pound marks; the unit beam 5 pounds x  $\frac{1}{50}$ -pound marks; the tare beam is graduated 50 pounds x  $\frac{1}{4}$ -pound marks. The total capacity of the scale, 500 pounds, is made up with brass weights on a brass counterpoise. The workmanship and finish are of the best and the scales are especially accurate. We have a large number in use.

No.	Size of Platform	Price
1264	15 x 21 inches	\$60 00

## PLATFORM SCALES—ALL METAL

This scale is constructed of metal throughout.

The two smaller scales have beams marked to 50 pounds by  $\frac{1}{4}$ -pound marks; large sizes, beams are marked to 100 pounds by  $\frac{1}{2}$ -pound marks.

### WITH WHEELS

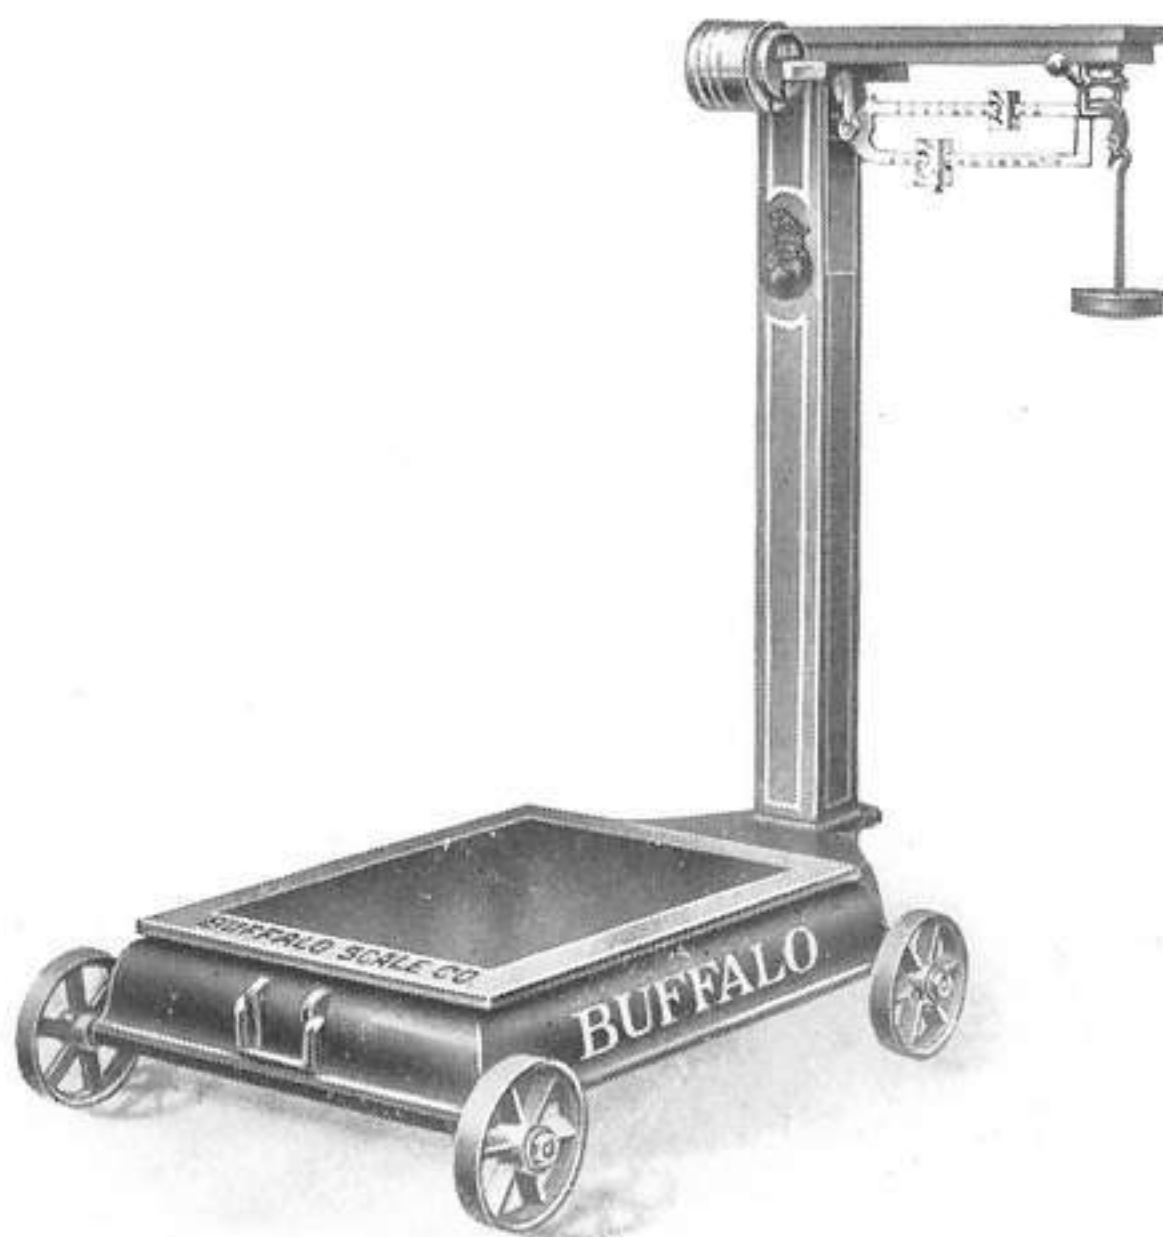

No.	Capacity	Platform	Price
1266	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$31 00
1268	600 by $\frac{1}{4}$ lbs.	16 x 25 "	39 00
1270	800 by $\frac{1}{2}$ lbs.	17 x 26 "	44 00
1272	1000 by $\frac{1}{2}$ lbs.	17 x 26 "	49 00
1274	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	56 00
1276	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	63 00

1280	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	95 00

### WITHOUT WHEELS

1265	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$28 00
1267	600 by $\frac{1}{4}$ lbs.	16 x 25 "	36 00
1269	800 by $\frac{1}{2}$ lbs.	17 x 26 "	40 00
1271	1000 by $\frac{1}{2}$ lbs.	17 x 26 "	45 00
1273	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	52 00
1275	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	59 00
1277	2000 by $\frac{1}{2}$ lbs.	24 x 33 "	78 00
1279	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	90 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

Double beams, see page 61.

## DOUBLE-BEAM PLATFORM SCALES

WITH SLIDING BRASS POISES. LOWER POISE HAS SET SCREW

This scale is of use where it is necessary to take tare weights. The 400 and 600-pound beams are marked in  $\frac{1}{4}$ -pound marks to 50 pounds. On all larger sizes the top bar is marked to 50 pounds in  $\frac{1}{4}$ -pound marks, and lower to 100 pounds in  $\frac{1}{2}$ -pound marks.

### WITH WHEELS

No.	Capacity	Platform	Price
1282	400 lbs.	15 x 21 inches	\$30 00
1284	600 lbs.	16 x 25 "	37 00
1286	800 lbs.	17 x 26 "	42 00

1287	800 lbs.	17 x 26 "	38 00
1289	1000 lbs.	17 x 26 "	43 00

Double beam can be furnished on any size platform scale, but is not recommended for drop lever scales.

Extra for Double Beam, 400-1000 lbs. Scales .....\$4 00  
 Extra for Double Beam, 1200-1600 lbs. Scales ..... 5 00  
 Extra for Double Beam, 2000-2500 lbs. Scales ..... 6 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

## PLATFORM SCALES

### WITH BAG RACK

The bag rack on platform prevents bags from leaning against pillar, and makes scale desirable for weighing articles of all kinds in bags.

The two smaller scales have beams marked to 50 pounds by  $\frac{1}{4}$ -pound marks; large sizes, beams are marked 100 pounds by  $\frac{1}{2}$ -pound marks.

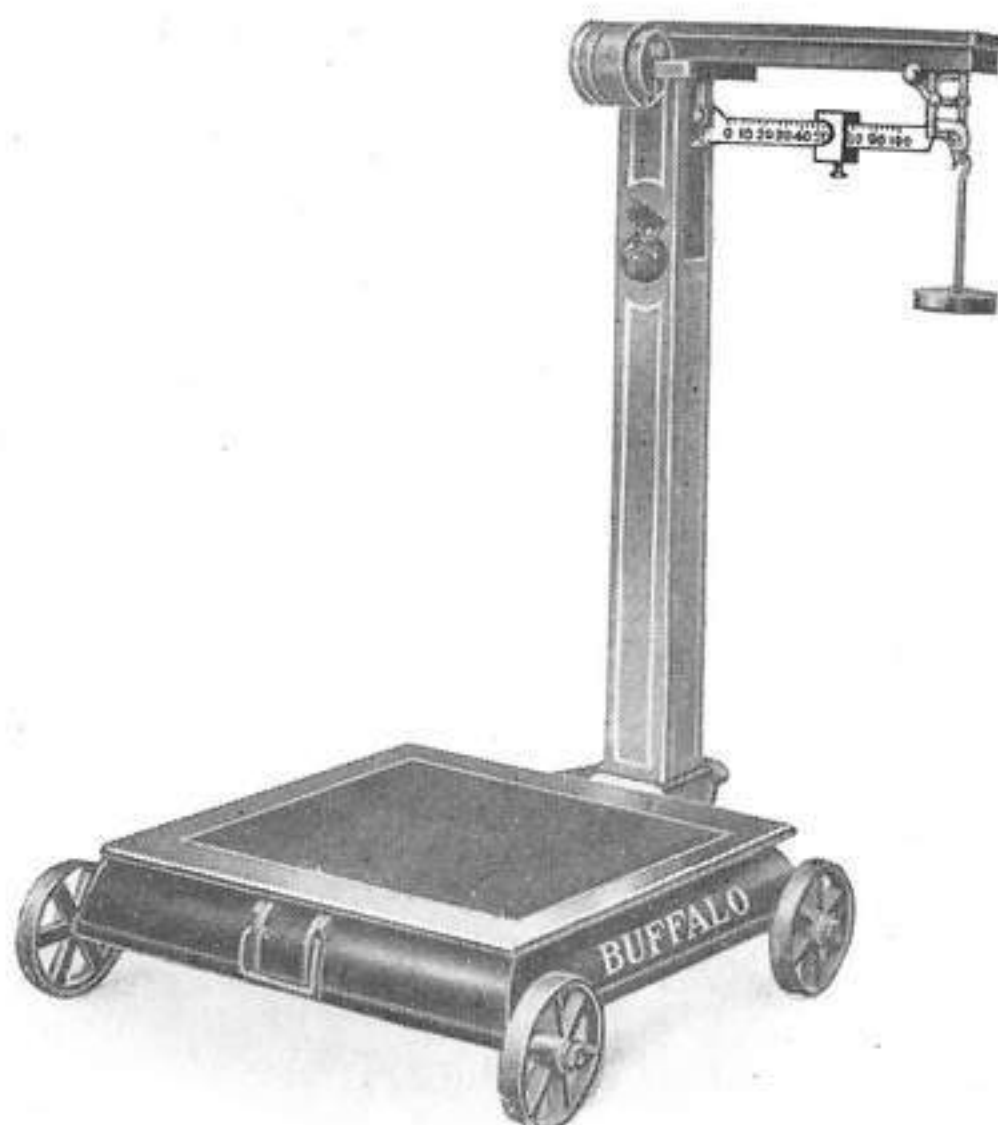

### WITH WHEELS

No.	Capacity	Platform	Price
1298	400 by $\frac{1}{4}$ lbs.	15 x 21 inches	\$29 00

1323	2000 by $\frac{1}{2}$ lbs.	24 x 33 "	74 00

Rubber, Composition or Cushion Wheels furnished at an additional price.

## SQUARE PLATFORM SCALES

This scale is designed to meet the demand for scales adapted for weighing bulky articles. It offers about 30% more platform room at almost the same price as the old style platform scale.

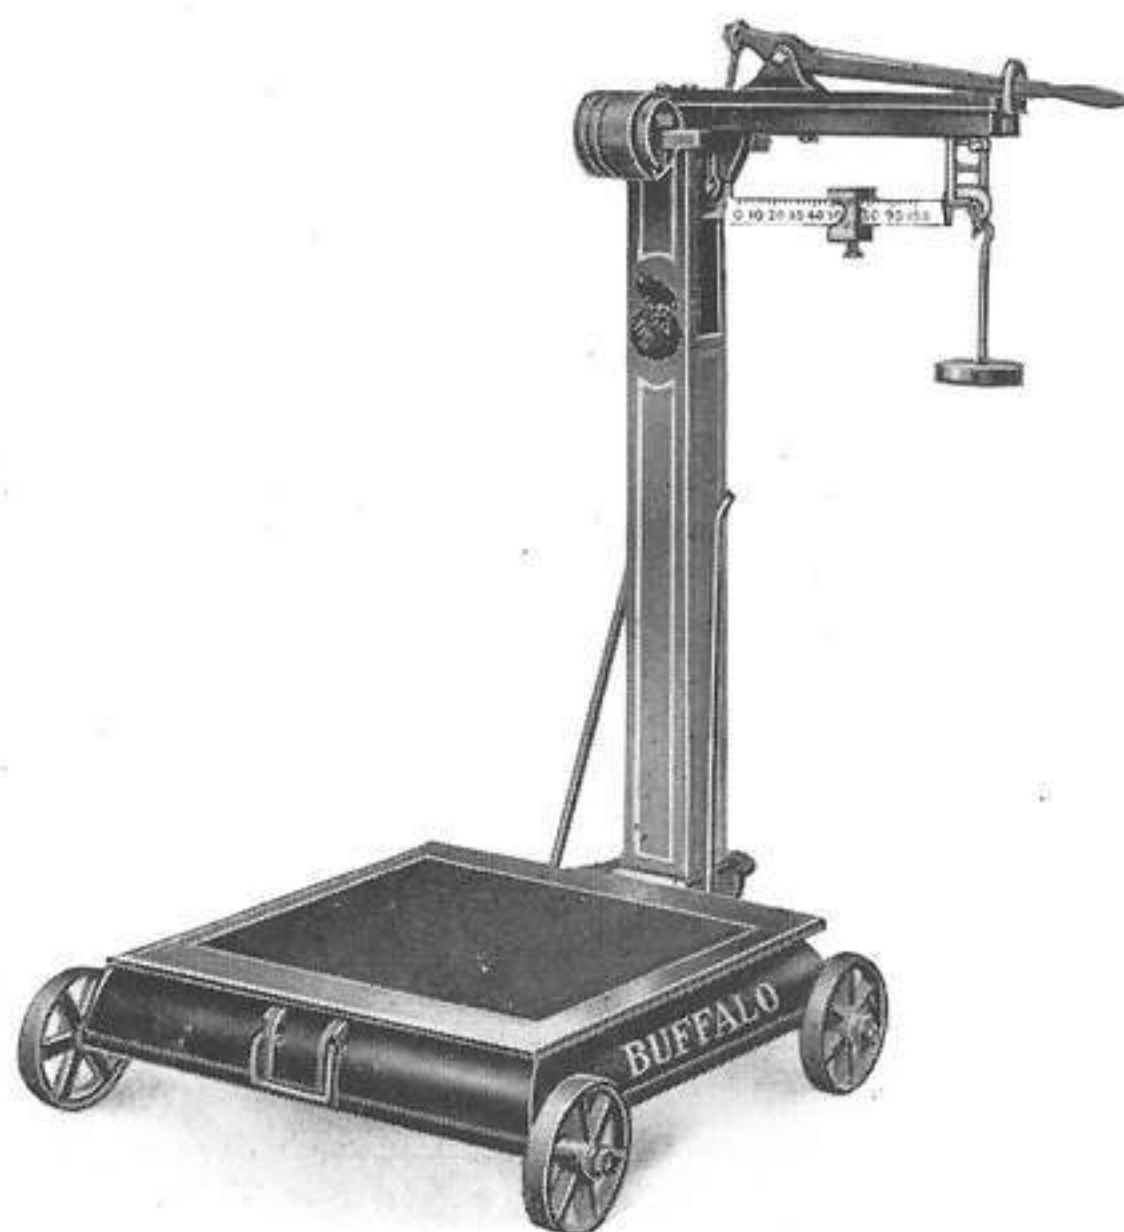

The beams are graduated to 100 pounds by  $\frac{1}{2}$ -pound divisions, with the exception of the 600-pound size, which is graduated to 50 pounds by  $\frac{1}{4}$ -pound divisions.

### WITH WHEELS

No.	Capacity	Platform	Price
1324	600 by $\frac{1}{4}$ lbs.	23 x 23 inches	\$35 00
1326	1000 by $\frac{1}{2}$ lbs.	25 x 25 "	45 00

1362	2000 by $\frac{1}{2}$ lbs.	31 x 31 "	85 00

## SALT MEAT AND FISH SCALES

This scale has a solid iron platform with flanges around the edges which protect the working parts of the scale.

In weighing salt meats and fish the brine, etc., will run off and cannot get into the scale.

They are very strong, accurate and durable, and have all the latest improvements.

The beams are graduated to 100 pounds by  $\frac{1}{2}$ -pound divisions, with the exception of the 400 and 600-pound sizes which are graduated to 50 pounds by  $\frac{1}{4}$ -pound divisions.

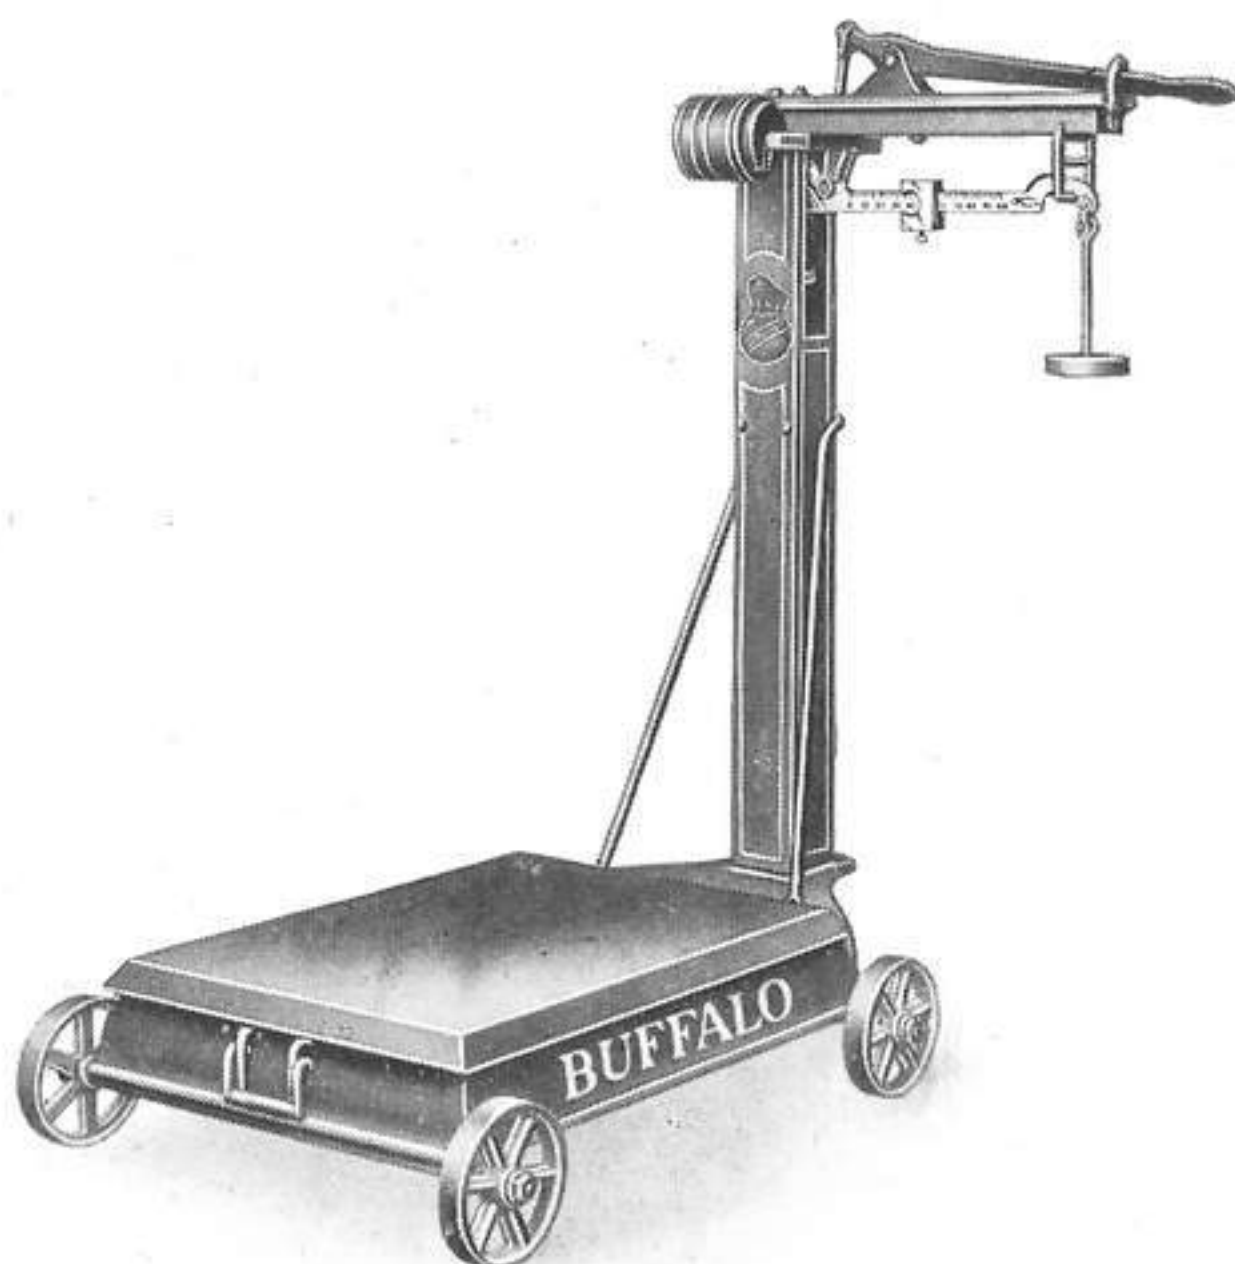

### WITH WHEELS

Rubber, Composition or Cushion Wheels furnished at an extra price.

## PLATFORM SCALES

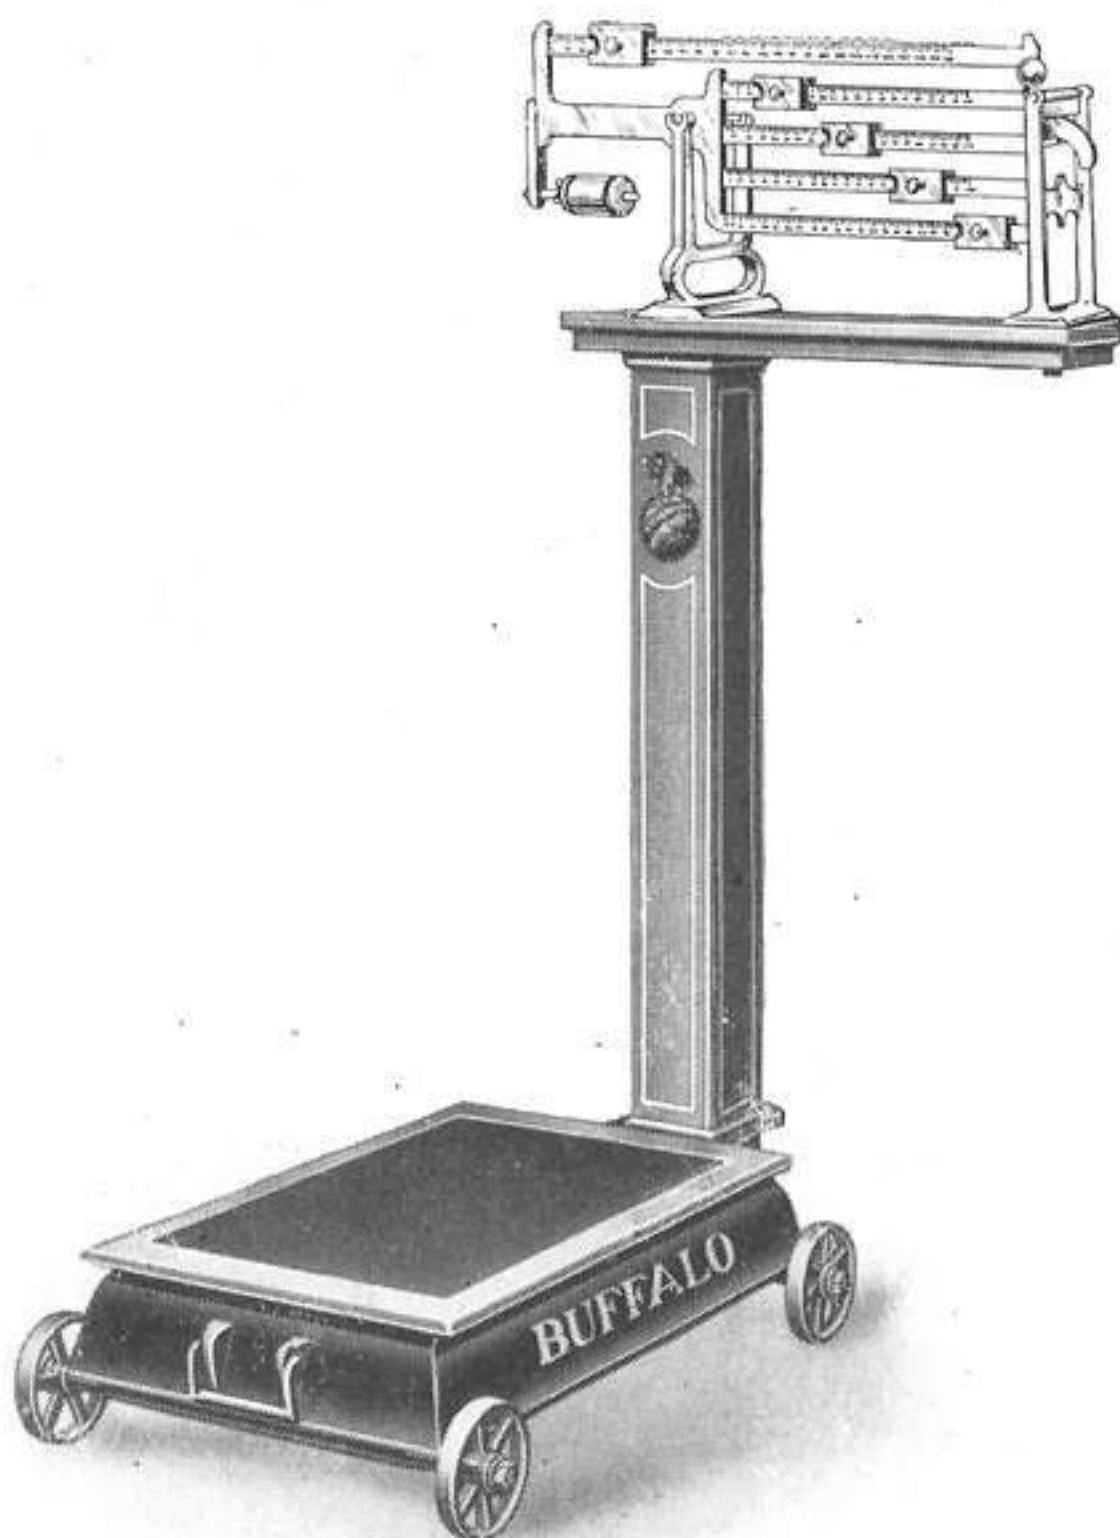

WITH VIBRATORY AXLE

Wheels and sliding poise.

This scale is placed on high raised wheels, and is designed for weighing articles which are likely to hang over sides.

Beams are graduated to 100 pounds by  $\frac{1}{2}$ -pound divisions.

No.	Capacity	Platform	Price
1412	1000 by $\frac{1}{2}$ lbs.	17 x 26 inches	\$57 00
1414	1200 by $\frac{1}{2}$ lbs.	20 x 28 "	65 00
1416	1600 by $\frac{1}{2}$ lbs.	21 x 30 "	77 00

1420	2500 by $\frac{1}{2}$ lbs.	24 x 33 "	102 00
1419	3000 by $\frac{1}{2}$ lbs.	30 x 38 "	135 00

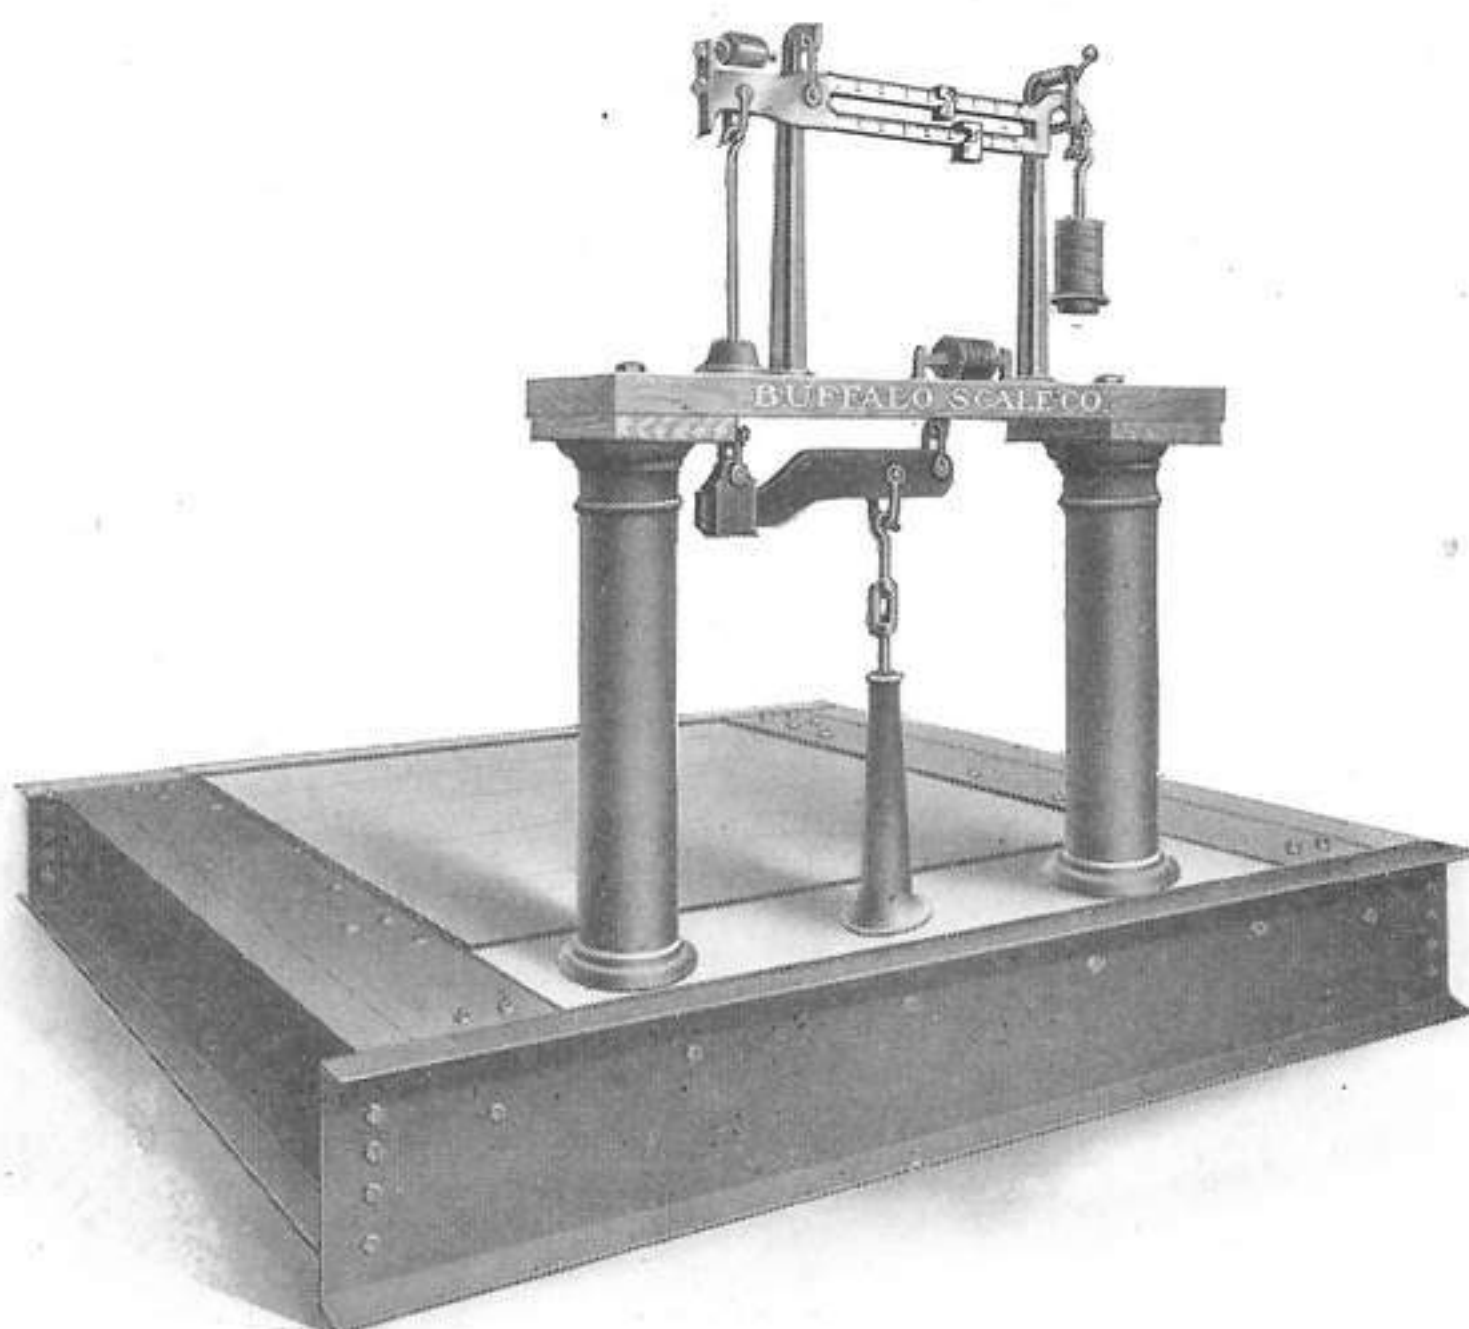

## CHEESE FACTORY SCALES

This scale has a compound beam for weighing and registering separately the different quantities of milk as they are poured into the can, thus preventing delay and annoyance, as a half-dozen customers can be served in but little more time than is required to serve one with the single beam. No weights are used, as the weighing is done exclusively with the poises.

### BEAM GRADUATION—

Scale No. 1421 } Upper bar 250 lbs. x 1 lb.  
 Scale No. 1422 } Four other bars 100 lbs. x  $\frac{1}{2}$  lb.

## HEAVY DUTY DORMANT SCALES

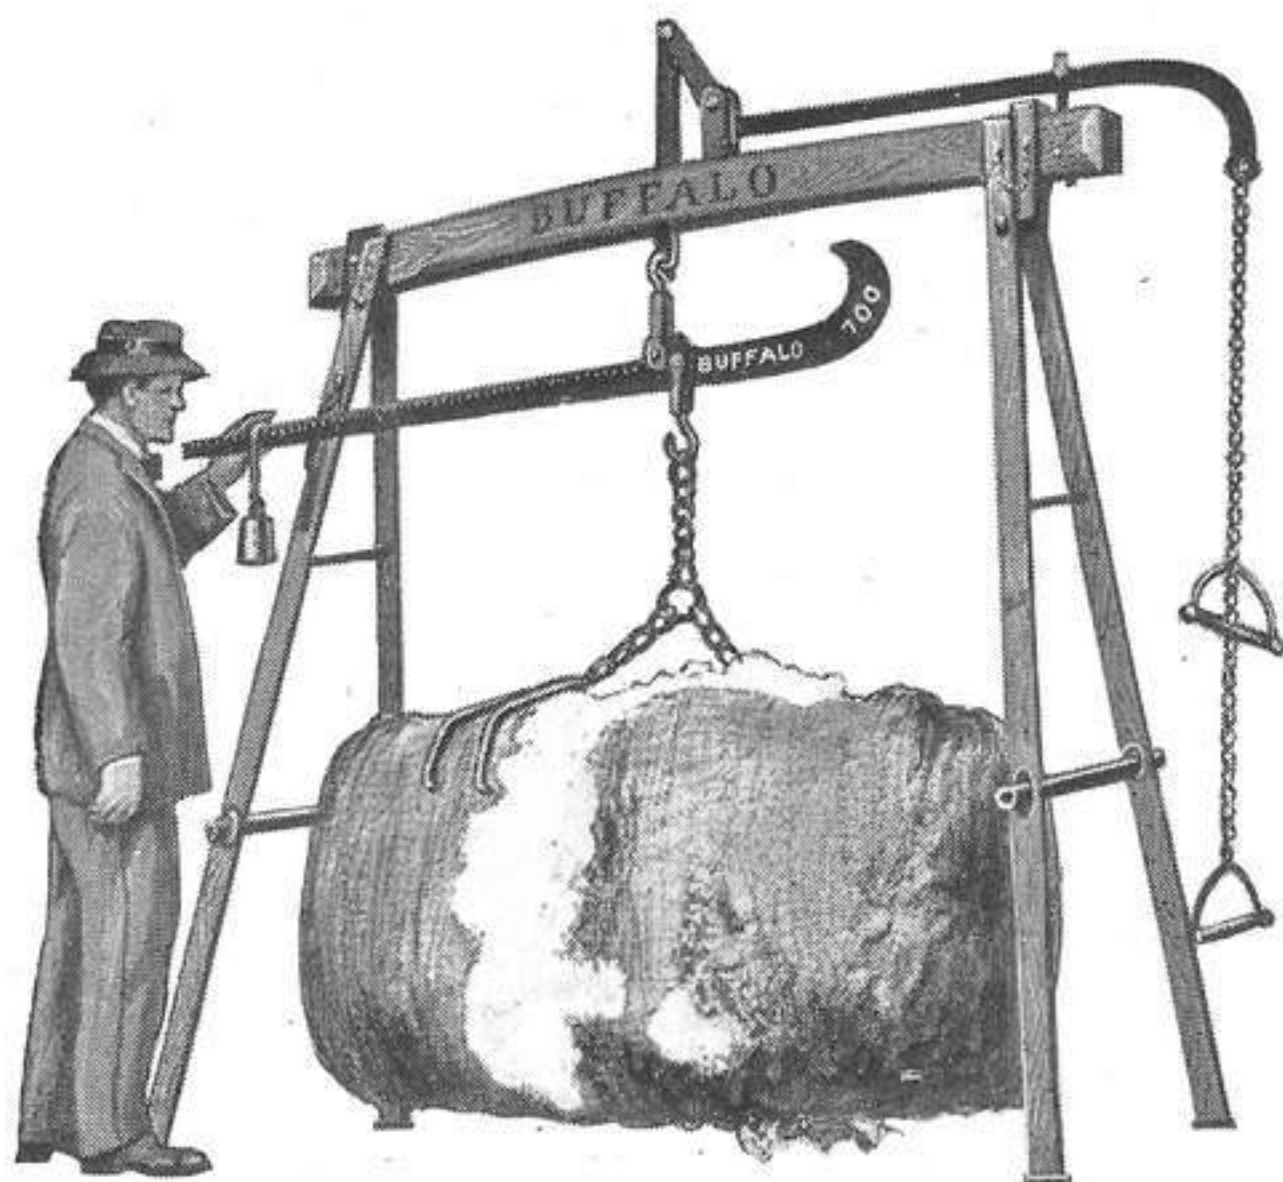

WITH SUSPENSION BEARINGS AND STEEL FRAMING

Though largely used for weighing metals, this scale is designed for any hard, accurate work.

It is self-contained and may also be used as a portable scale.

The construction is entirely of metal, except the shelf and the platform covering.

No.	Capacity	Platform	Price Double Beam	Price Comp. Beam
1426	6,000 lbs.	48 x 48 inches	\$300 00	\$330 00

1427	10,000 "	60 x 72 "	400 00	430 00

## COTTON SCALES

The "Buffalo" Iron-shod Cotton Scale has a perfectly balanced beam about seven feet in length.

Smooth beams are most commonly used and scales are so furnished unless notched beams are specified.

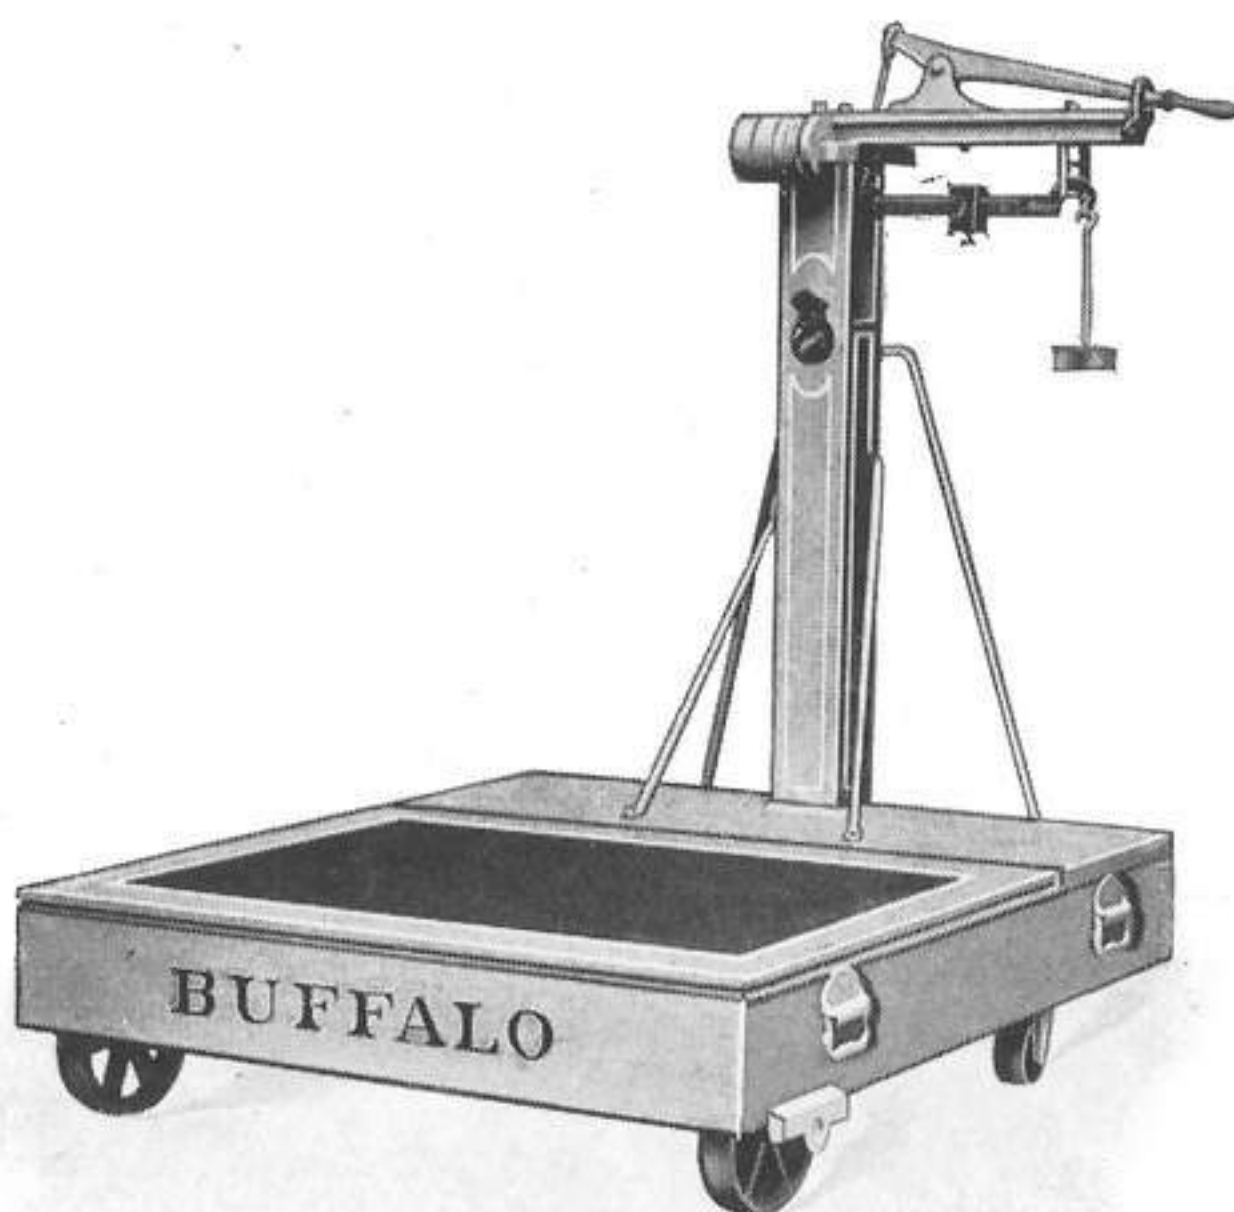

The frame is of selected hard wood and is substantially made. The legs are fitted with iron shoes to prevent splitting.

All iron work is japanned black. The finish of the woodwork is natural color, varnished.

The scale is of the best materials and workmanship throughout.

Polished blades, full polished beams, brass poises, large hooks and other special equipment if desired.

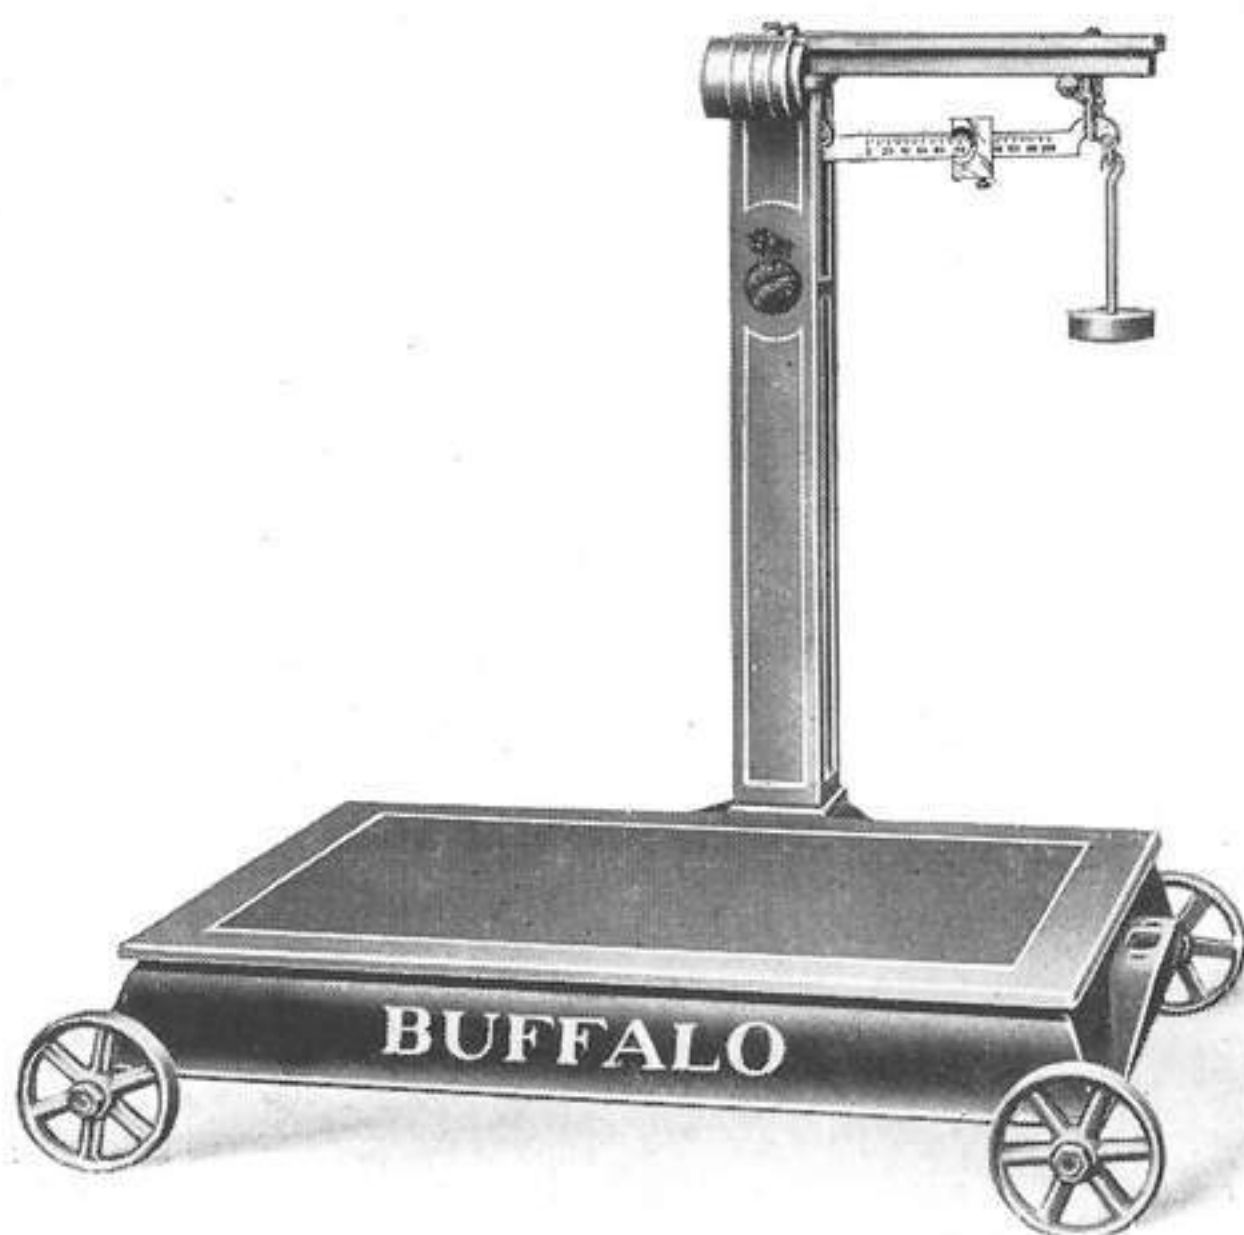

## WOOL AND COTTON SCALES

WITH DROP LEVER, SLIDING POISE AND  
HEAVY CASTER WHEELS

This pattern of scale is particularly suited for weighing bales of cotton and wool, having a large platform and being easily moved from place to place. If desired, bag rack will be furnished at an additional price of \$5.00.

Beam is graduated to 100 pounds by  $\frac{1}{2}$ -pound divisions.

No.	Capacity	Platform	Price
1432	1000 by $\frac{1}{2}$ lbs.	42 x 30 inches	\$100 00

## PORK AND GRAIN SCALES

### WITH AND WITHOUT WHEELS

This scale is especially suited for use in packing houses, flour mills and feed stores, for weighing meats, grain, flour in bags, and all bulky commodities. The beam is marked to 100 pounds by  $\frac{1}{2}$ -pound marks. Weights. 1 pound to 100 pounds.

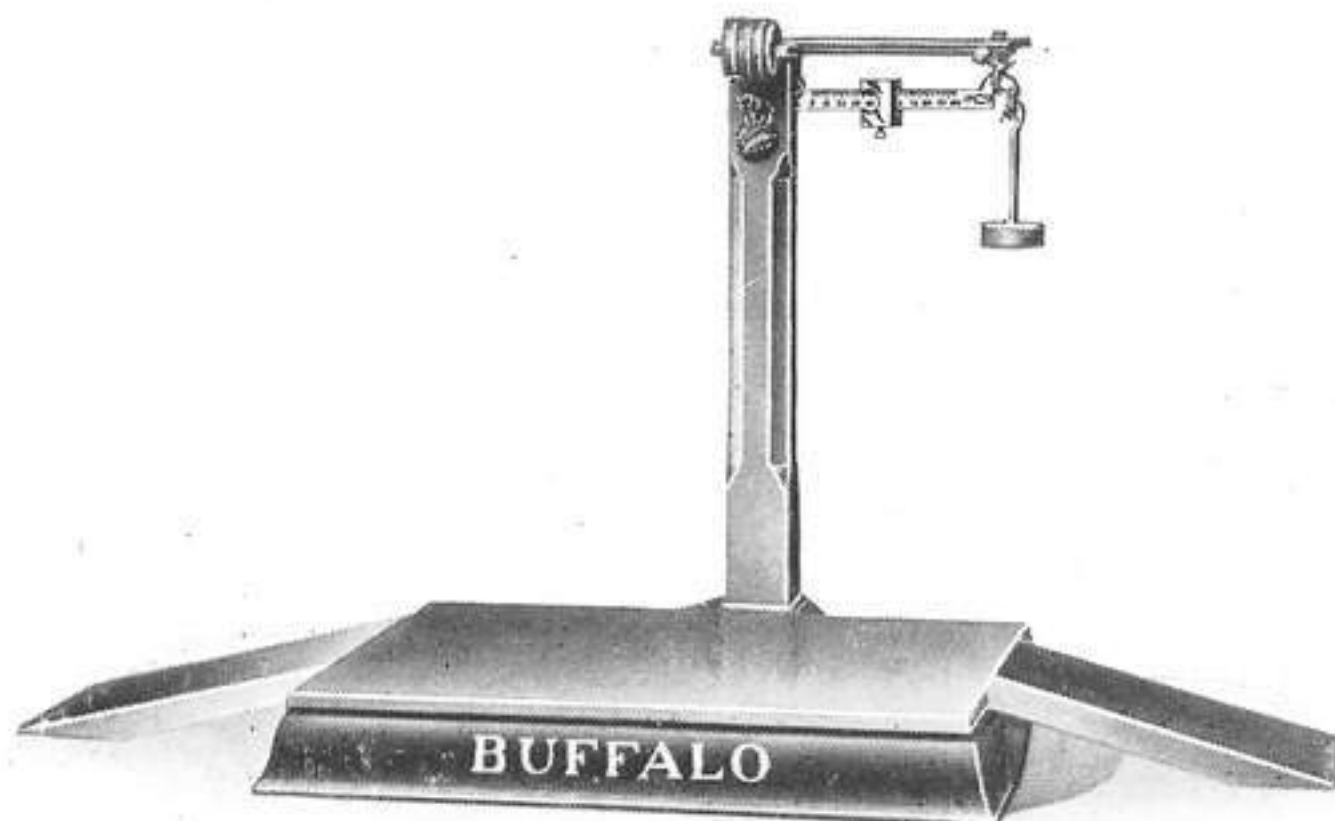

Double beam will be furnished at extra list prices shown at bottom of page 61.

#### WITH WHEELS

No.	Capacity	Platform	Price
1442	1000 by $\frac{1}{2}$ lbs.	42 x 30 inches	\$ 73 00
1444	1200 by $\frac{1}{2}$ lbs.	42 x 30 "	74 00
1446	1800 by $\frac{1}{2}$ lbs.	42 x 30 "	78 00
1448	2000 by $\frac{1}{2}$ lbs.	44 x 35 "	94 00
1450	2500 by $\frac{1}{2}$ lbs.	44 x 35 "	100 00

#### WITHOUT WHEELS

1433	1000 by $\frac{1}{2}$ lbs.	42 x 30 inches	\$68 00
1435	1200 by $\frac{1}{2}$ lbs.	42 x 30 "	70 00
1437	1800 by $\frac{1}{2}$ lbs.	42 x 30 "	73 00
1439	2000 by $\frac{1}{2}$ lbs.	44 x 35 "	87 00
1441	2500 by $\frac{1}{2}$ lbs.	44 x 35 "	93 00

## WHEELBARROW SCALES

No wood is used in the construction of this scale. It is intended for weighing wheelbarrow loads of coal, etc., and platform is suitable size. A set of inclines is included with scale. The beam is marked to 100 pounds by 1-pound marks. Weights, 1 pound to 100 pounds.

### WITHOUT WHEELS

No.	Capacity	Platform	Price
1451	1000 by 1 lbs.	42 x 30 inches	\$70 00
1453	1500 by 1 lbs.	42 x 30 "	80 00
1455	2000 by 1 lbs.	44 x 35 "	93 00
1456	2500 by 1 lbs.	44 x 35 "	115 00

### WITH WHEELS

1458	1000 by 1 lbs.	42 x 30 inches	\$ 75 00
1460	1500 by 1 lbs.	42 x 30 "	85 00
1462	2000 by 1 lbs.	44 x 35 "	100 00
1463	2500 by 1 lbs.	44 x 35 "	125 00

## WHEELBARROW SCALES

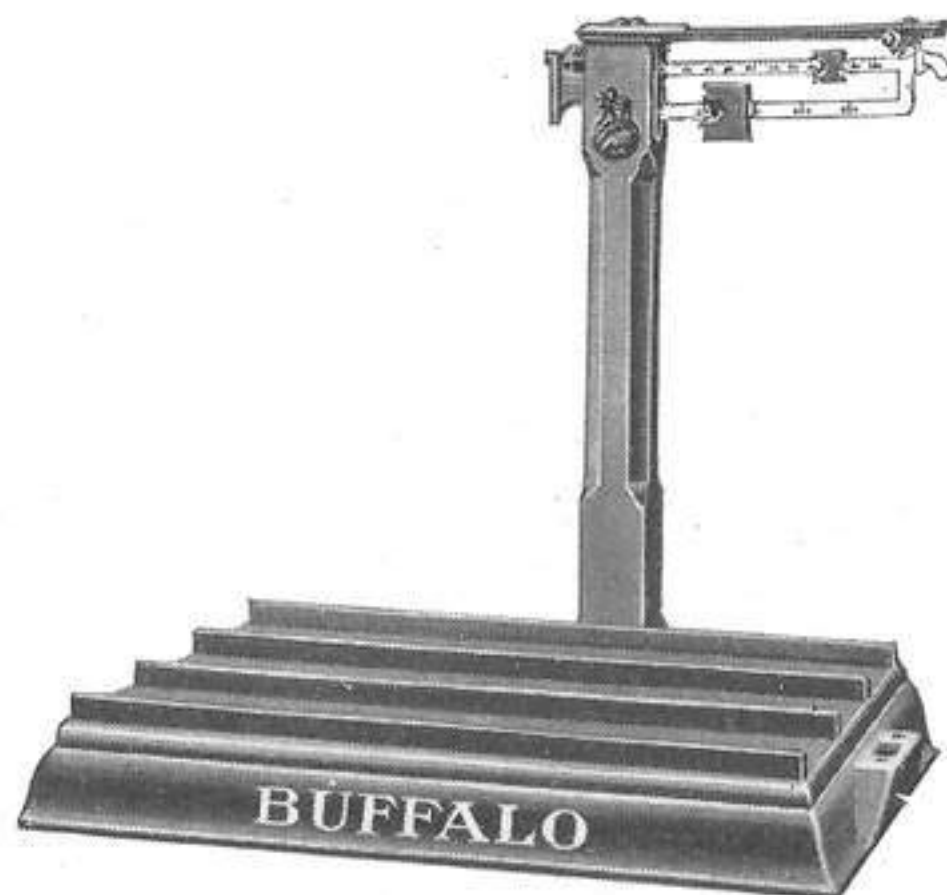

### "A" PATTERN

### WITHOUT WHEELS

No.	Capacity	Platform	Price
1465	1000 by 1 lbs.	39 x 30 inches	\$60 00

### WITH WHEELS

1466	1000 by 1 lbs.	39 x 30 inches	\$65 00
------	----------------	----------------	---------

## ICE SCALES

Double brass beam. No loose weights. Solid iron platform, with ribs, to allow blocks of ice to slide over without obstruction.

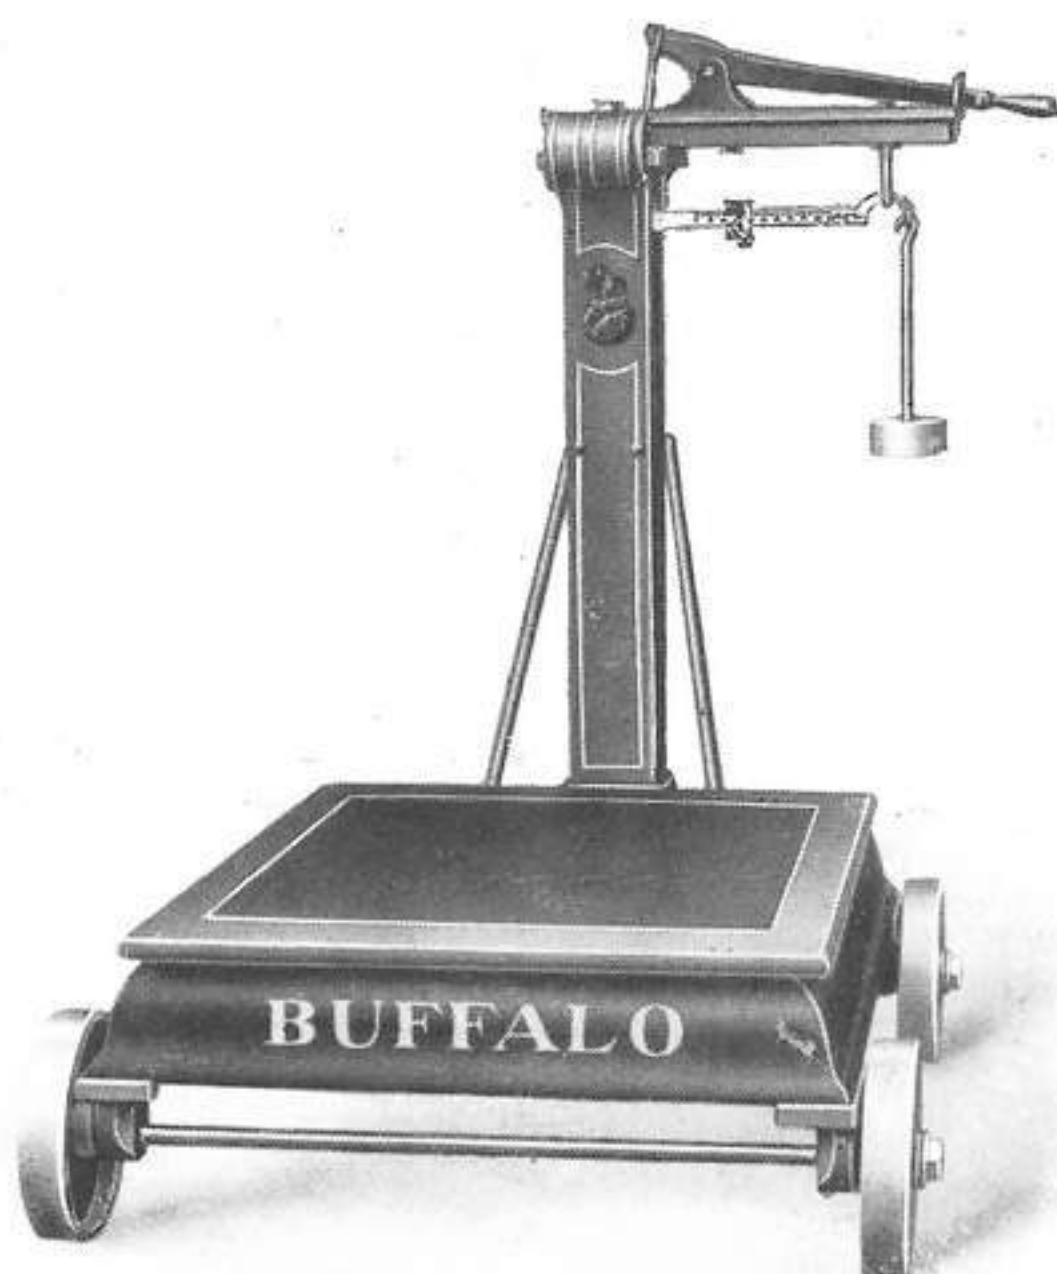

Upper bar graduated by 1-pound notches to 200 pounds; lower bar by 100-pound notches to 800 pounds.

### WITHOUT WHEELS

No.	Capacity	Platform	Price
1473	1000 lbs.	42 x 30 inches	\$80 00

### WITH WHEELS

1472	1000 lbs.	42 x 30 inches	\$85 00
------	-----------	----------------	---------

## IRON SCALES

WITH WHEELS. DROP LEVER

This scale is constructed especially for heavy work, and is warranted strong, accurate and durable. They are in general use in rolling mills, foundries and iron warehouses.

If hanging poise is wanted, order must so specify.

The beam is marked to 100 pounds by  $\frac{1}{2}$ -pound marks on 2500-pound size, and the weights are 1 pound to 100 pounds.

4000 and 6000-pound sizes; beam, 200 pounds by 1 pound, and weights are  $\frac{1}{2}$  pound to 100 pounds

No.	Capacity	Platform	Price
1476	2500 lbs.	24 x 33 inches	\$105 00
1478	4000 lbs.	31 x 40 "	140 00
1480	6000 lbs.	31 x 40 "	165 00

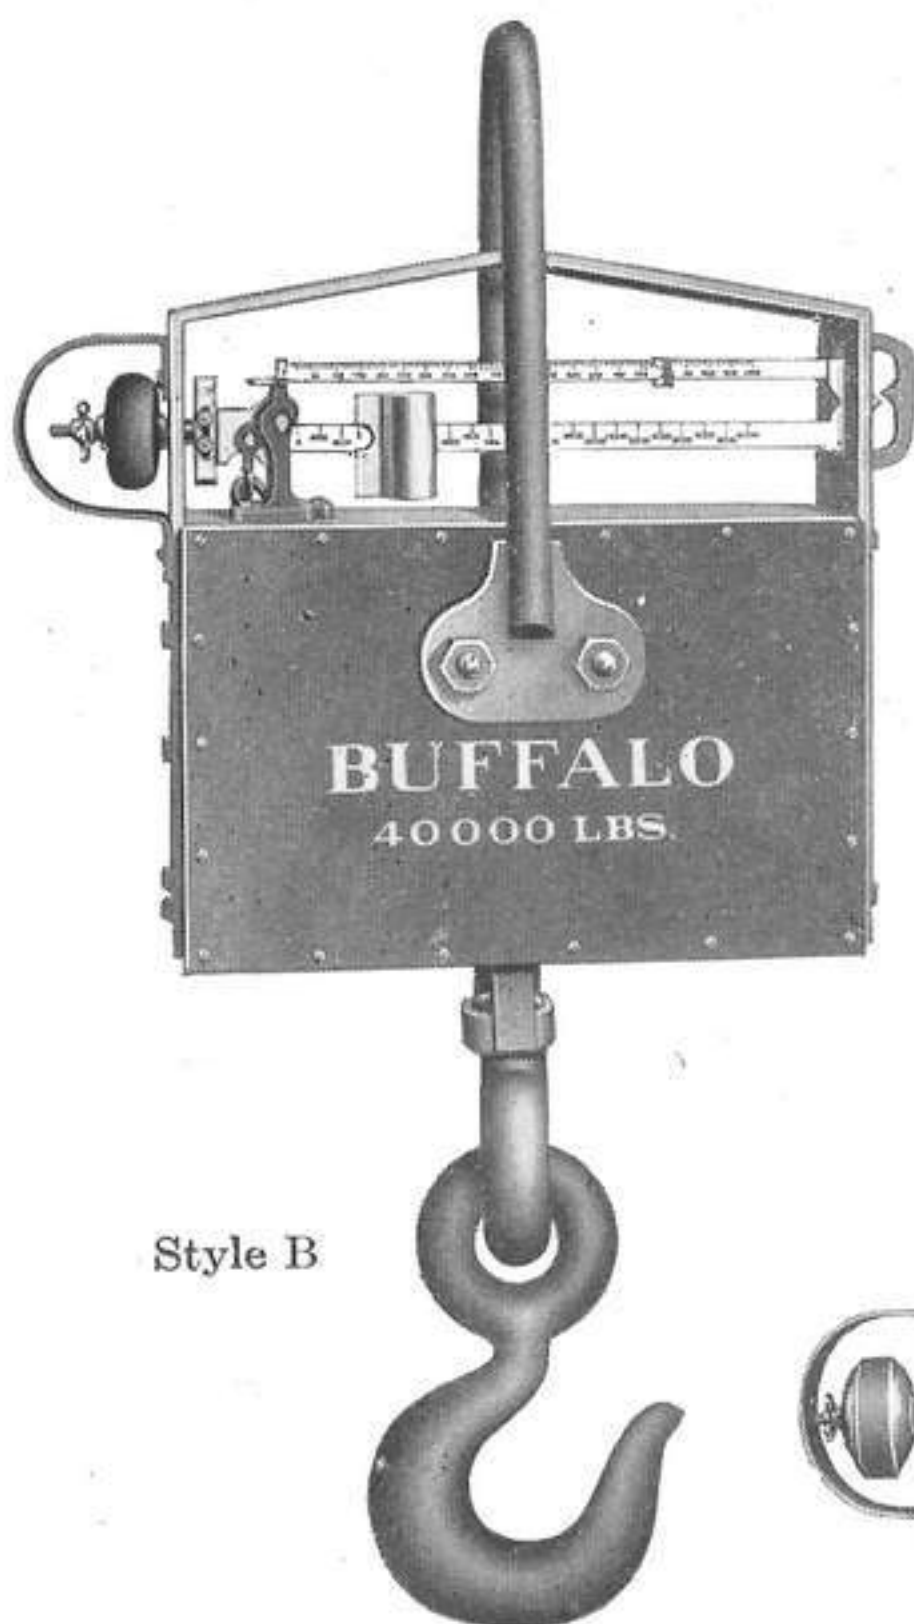

## PIG-IRON SCALES

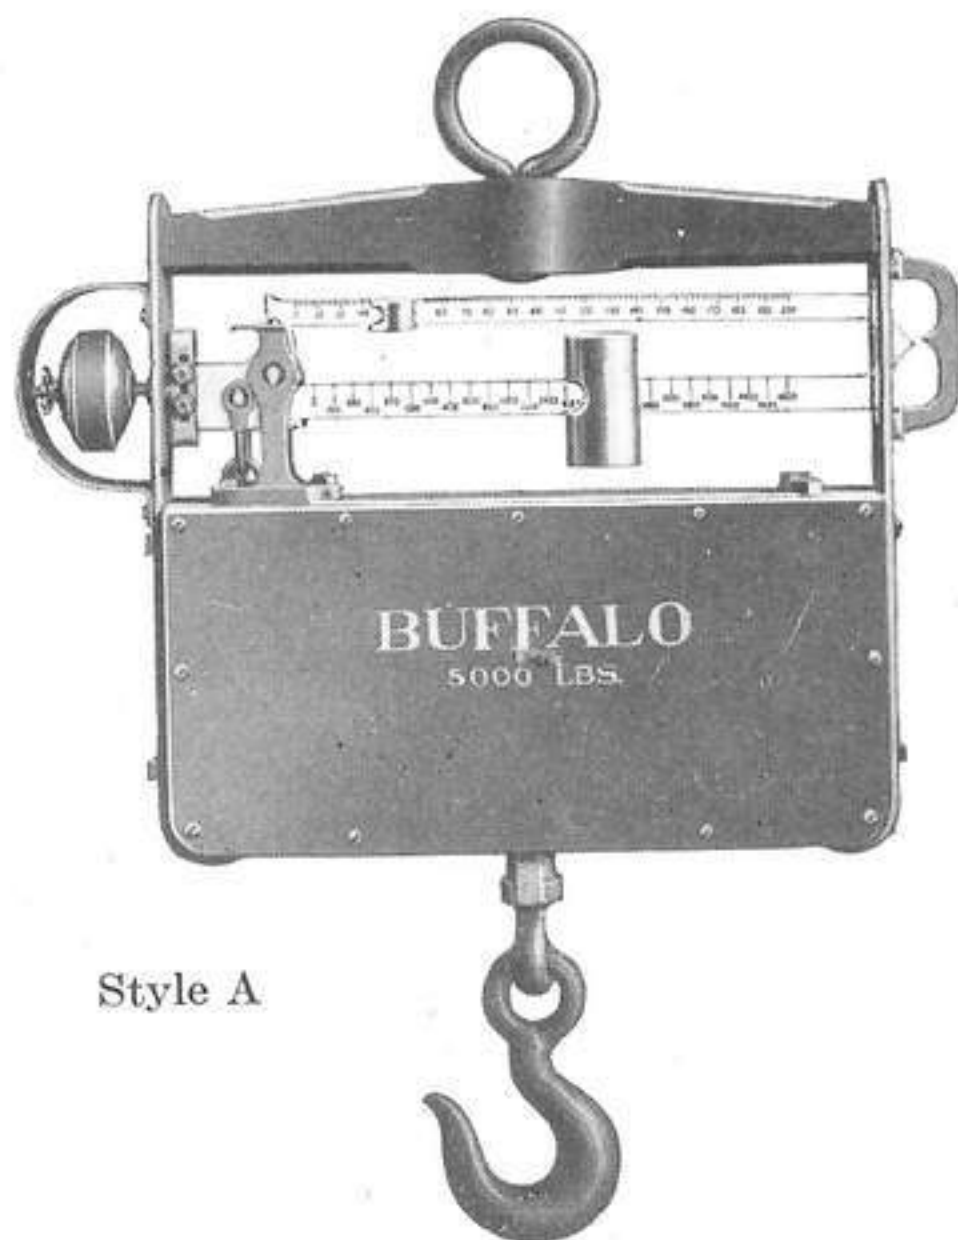

WITH DROP LEVER AND BRASS SLIDING POISE

This scale is made very heavy and constructed entirely of metal, and is especially designed for weighing pig iron and other metals. The beam is marked to 100 pounds by  $\frac{1}{2}$ -pound marks. Weights,  $\frac{1}{2}$  pound to 100 pounds.

No.	Capacity	Platform	Price
1490	2500 by $\frac{1}{2}$ lbs.	24 x 38 inches	\$110 00
1492	3000 by $\frac{1}{2}$ lbs.	24 x 38 "	120 00

Style B

Style A

## SUSPENSION CRANE SCALES

For prices and description see page 79.

## SUSPENSION CRANE SCALES

Buffalo Crane Scales are compact suspended scales containing no springs, but are built upon a principle of leverage as used in platform, wagon or track scales.

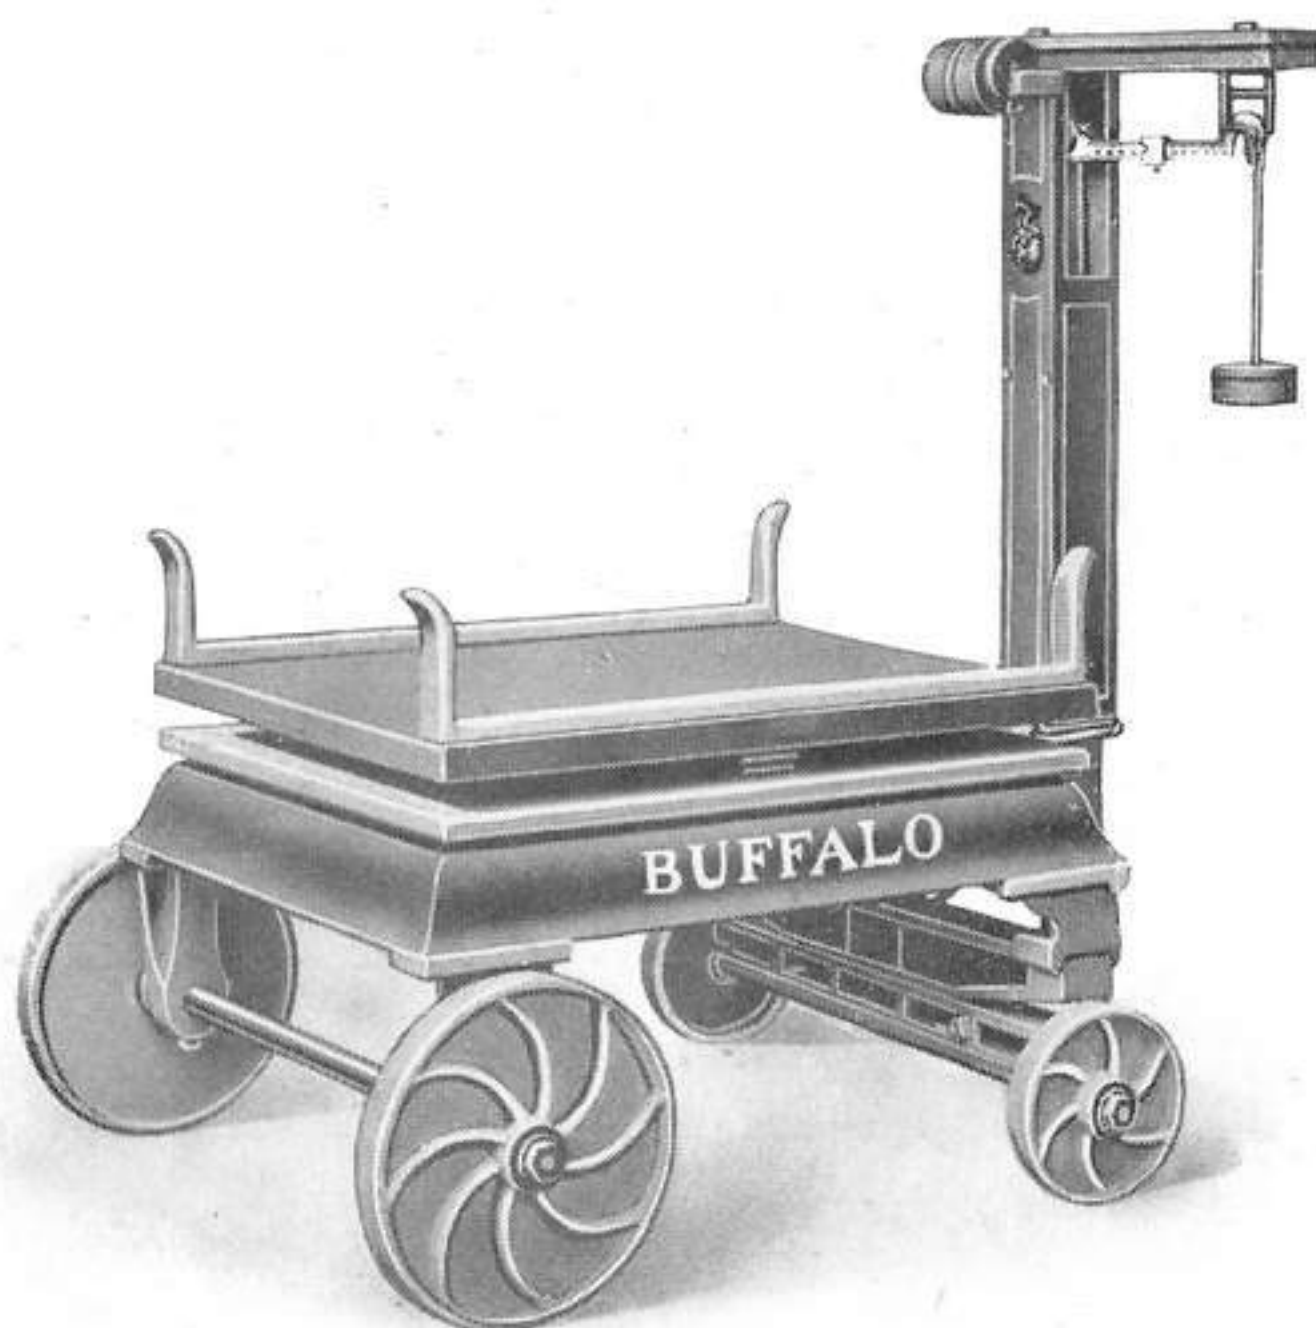

The portability and the high capacity of these scales makes their range of use wide.

They are most largely sold to steel works, foundries and machine shops, but they are also used in all departments of works and stores where heavy materials are handled with cranes.

There are no loose weights with these scales, the full capacity in all cases being marked upon the beam.

Prices for other sizes than those listed below will be furnished upon application.

Style	No.	Capacity	Height	Price
A	1479	1000 by 1 lb.	26 1/2 inches	\$ 80 00
A	1481	1500 by 1 lb.	26 1/2 "	85 00
A	1483	2000 by 1 lb.	27 "	90 00
A	1482	2500 by 2 lbs.	27 "	100 00
A	1484	5000 by 2 lbs.	36 "	160 00
A	1485	6000 by 2 lbs.	36 "	180 00
B	1486	8000 by 2 lbs.	48 "	220 00
B	1488	10000 by 2 lbs.	50 1/4 "	260 00

B	1495	40000 by 5 lbs.	65 "	490 00

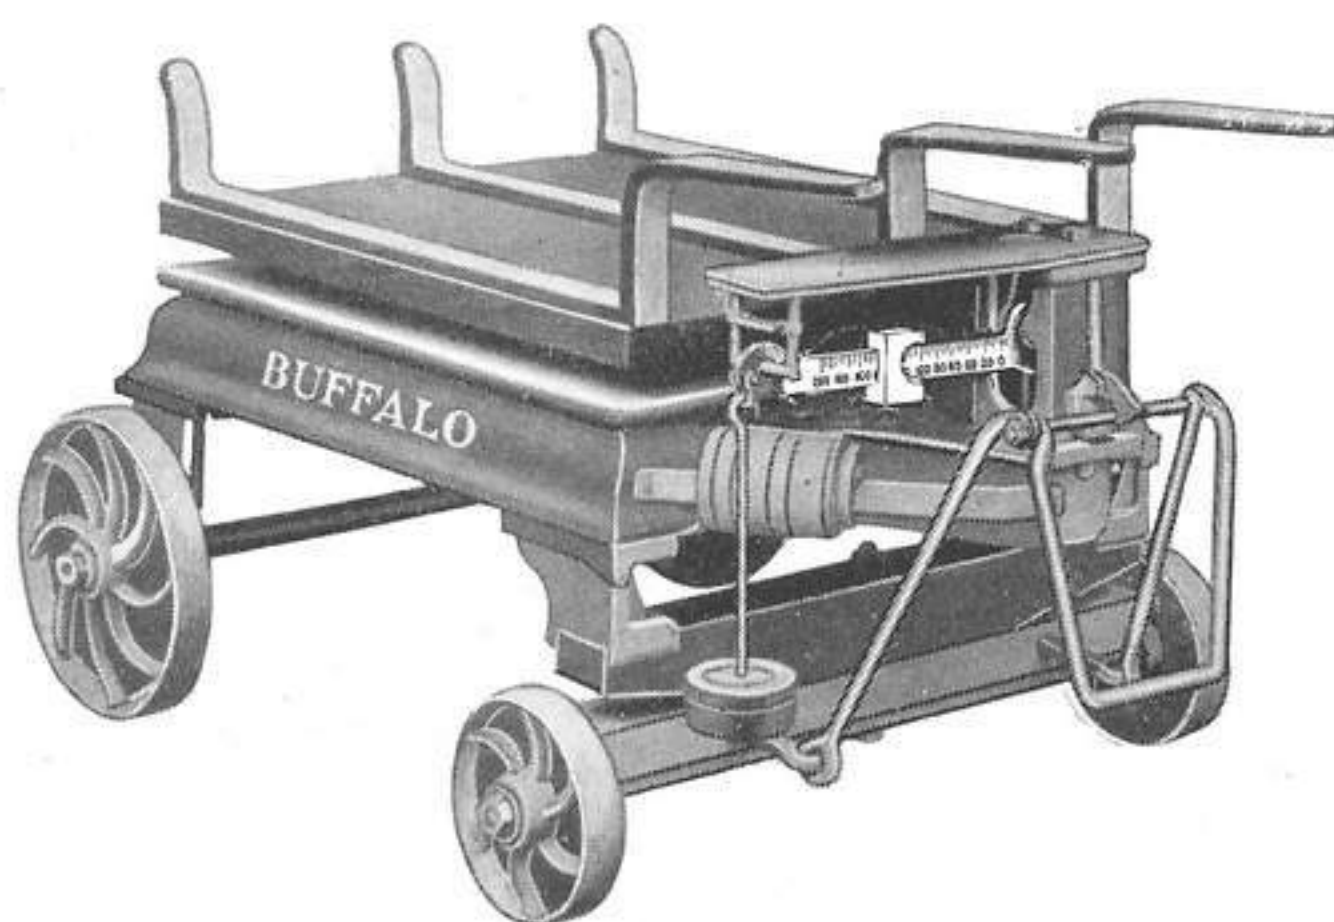

## ROLLING MILL SCALES

WITH VIBRATORY AXLE, RUBBER SPRING PLATFORM AND  
HEAVY WHEELS

This scale is constructed especially for heavy work, and is warranted strong, accurate and durable. They are in general use in rolling mills, foundries and iron warehouses. The beam is marked to 100 pounds by  $\frac{1}{2}$  pounds. Weights, 1 pound to 100 pounds on 2500-pound size; 4000 to 12,000-pound sizes, beam, 200 pounds by 1 pound, and weights,  $\frac{1}{2}$  pound to 100 pounds.

If hanging poise is wanted, order must so specify.

No.	Capacity	Platform	Height of Platform	Price
1494	2500 by $\frac{1}{2}$ lbs.	24 $\frac{1}{2}$ x 32 inches	23 inches	\$125 00
1496	4000 by 1 lbs.	31 x 40 "	26 "	160 00
1498	6000 by 1 lbs.	31 x 40 "	26 "	185 00
1500	8000 by 1 lbs.	31 x 40 "	28 "	210 00
1502	10000 by 1 lbs.	31 x 40 "	28 "	225 00
1504	12000 by 1 lbs.	31 x 40 "	28 "	240 00

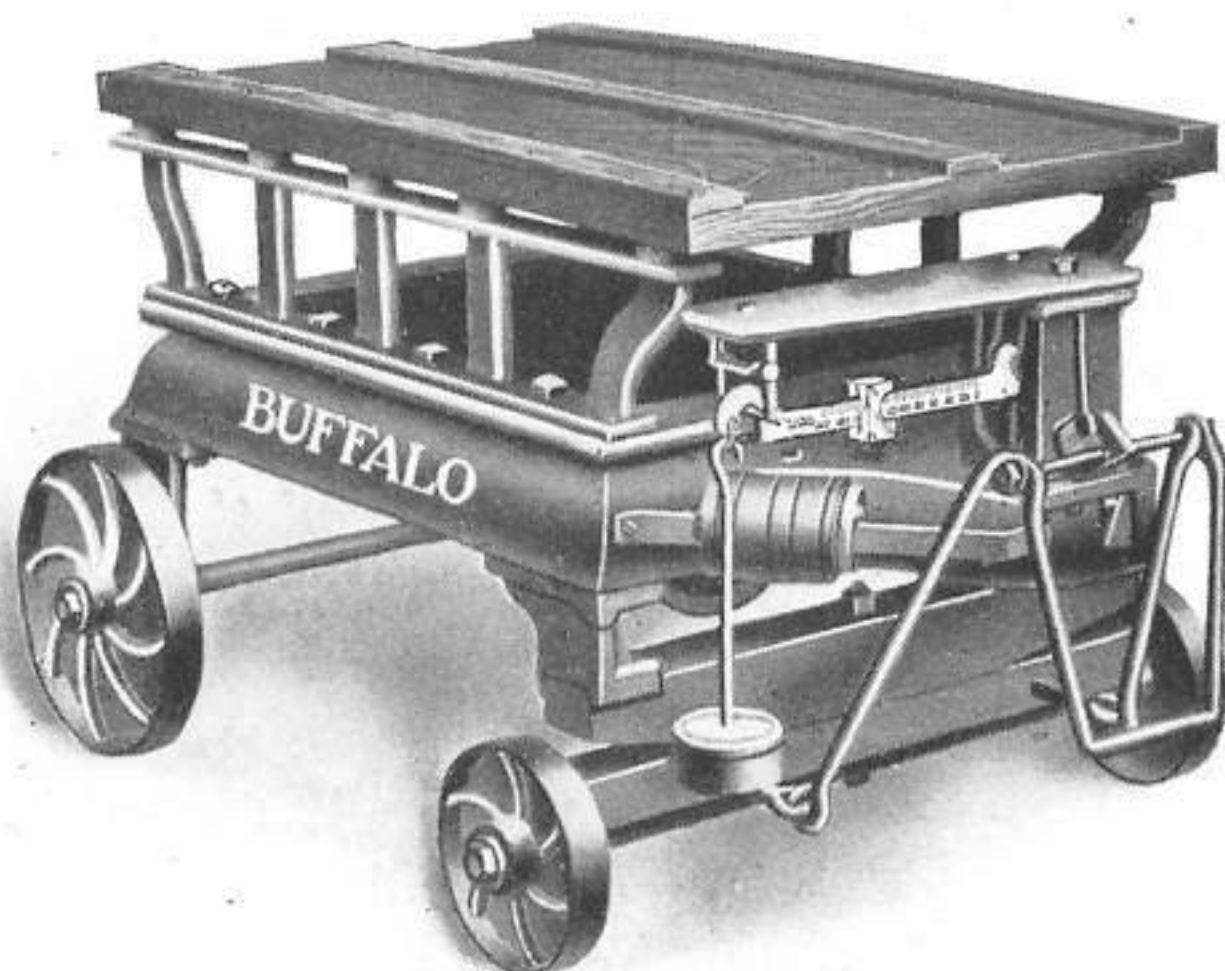

## ROLLING MILL SCALES

WITH SHORT IRON PILLAR, VIBRATORY AXLE, RUBBER SPRING PLATFORM AND HEAVY WHEELS

This scale has long projecting bars over the beam and weights, so that large plates and bars of iron may be passed over the scale.

The beam is marked to 100 pounds by  $\frac{1}{2}$  pounds; weights, 1 pound to 100 pounds on 2500-pound size; 4000 to 12,000-pound sizes, beam, 200 pounds by 1 pound, and weights,  $\frac{1}{2}$  pound to 100 pounds.

No.	Capacity	Platform	Height of Platform	Price
1506	2500 by $\frac{1}{2}$ lbs.	24 $\frac{1}{2}$ x 32 inches	23 inches	\$125 00
1508	4000 by 1 lbs.	31 x 40 "	26 "	160 00
1510	6000 by 1 lbs.	31 x 40 "	26 "	185 00
1512	8000 by 1 lbs.	31 x 40 "	28 "	210 00
1514	10000 by 1 lbs.	31 x 40 "	28 "	225 00
1516	12000 by 1 lbs.	31 x 40 "	28 "	240 00

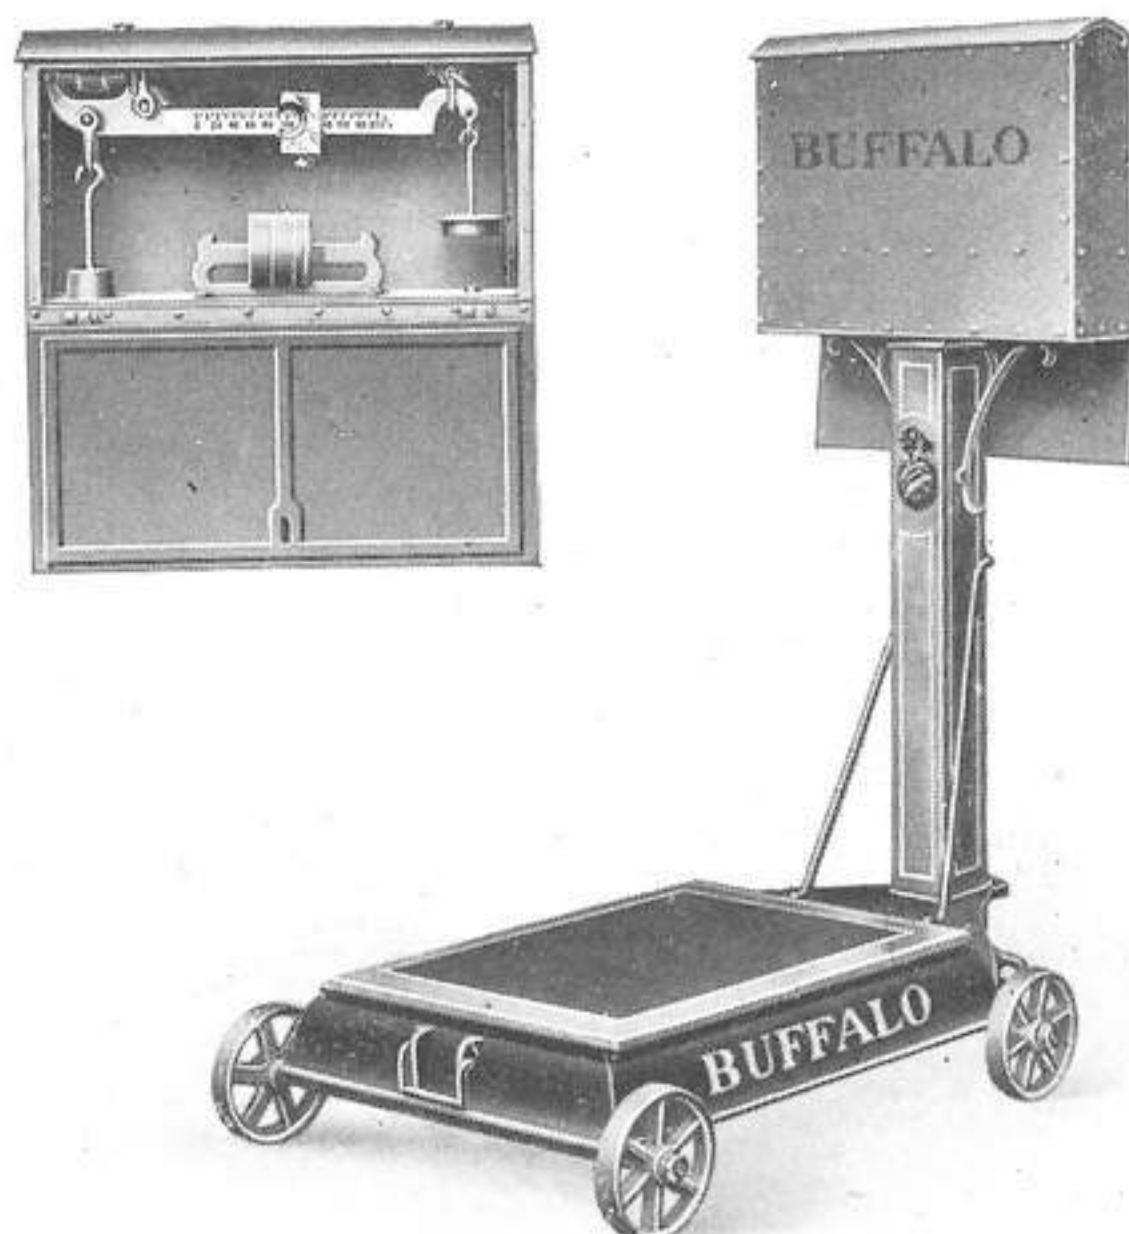

## MONITOR ROLLING MILL SCALES

WITH SHORT IRON PILLAR, VIBRATORY AXLE, RACK,  
RUBBER SPRING PLATFORM AND HEAVY WHEELS

Especially adapted for weighing bar iron or large plates of iron and steel. The beam is marked to 200 pounds by 1-pound marks. Weights,  $\frac{1}{2}$  pound to 100 pounds.

No.	Capacity	Platform	Height	Price
1518	4000 by 1 lbs.	33 x 50 inches	2 feet 10 inches	\$180 00
1520	6000 by 1 lbs.	33 x 50 "	2 " 10 "	210 00
1522	8000 by 1 lbs.	33 x 50 "	2 " 10 "	235 00
1524	10000 by 1 lbs.	33 x 50 "	2 " 11 "	260 00
1526	12000 by 1 lbs.	33 x 50 "	2 " 11 "	285 00
1528	15000 by 1 lbs.	33 x 50 "	2 " 11 "	315 00

## FREIGHT SCALES

An iron box so made as to shed water, preserves the beam and weights. The platform is covered with a wrought-iron plate, and the whole scale is heavily made and adapted for rough usage.

### WITH WHEELS

No.	Capacity	Platform	Price
1533	2000 by 1 lbs.	25 x 33 inches	\$ 98 00
1534	2500 by 1 lbs.	26 x 34 "	110 00
1536	3000 by 1 lbs.	30 x 38 "	150 00

### WITHOUT WHEELS

1529	2000 by 1 lbs.	25 x 33 inches	\$ 88 00
1531	2500 by 1 lbs.	26 x 34 "	100 00
1532	3000 by 1 lbs.	30 x 38 "	140 00

## PORTABLE WAREHOUSE SCALES

WITH OR WITHOUT DROP LEVER

If drop lever is wanted order should so specify.

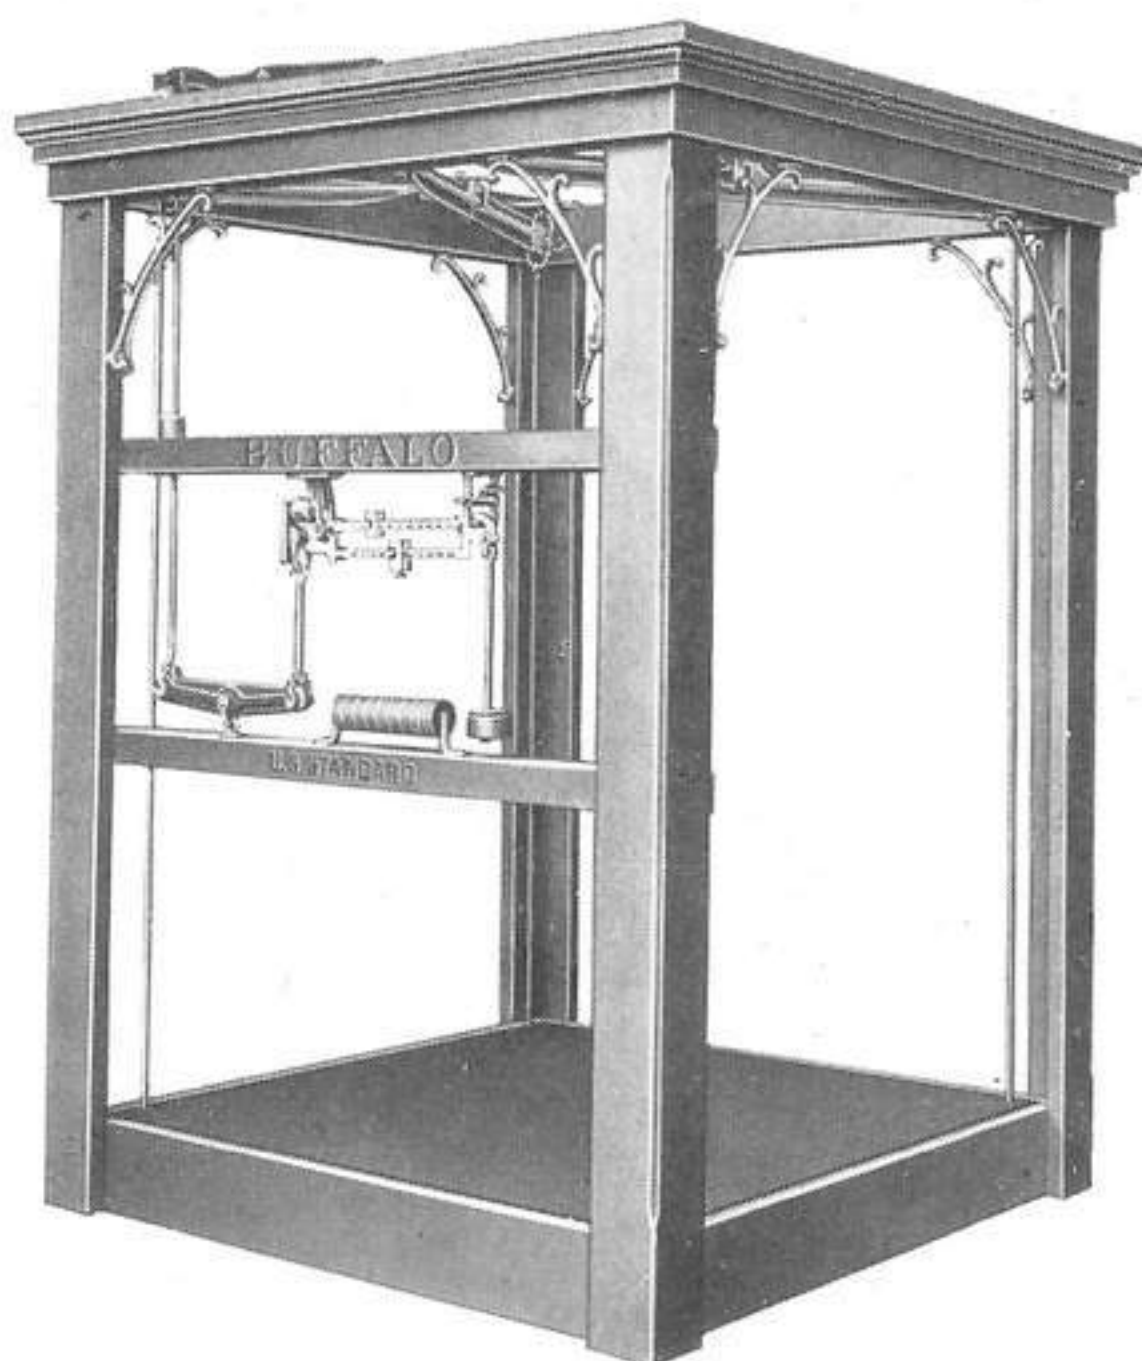

Hardwood box. Strong wheels and axles. Adapted for heavy work. Beam on 2000 to 4000-pound sizes is marked to 100 pounds by  $\frac{1}{2}$ -pound marks; weights, 1 pound to 100 pounds. 5000 and 6000-pound sizes, 200 pounds by 1-pound marks. Weights,  $\frac{1}{2}$  pound to 100 pounds.

### WITH WHEELS

No.	Capacity	Platform	Price
1538	2000 by $\frac{1}{2}$ lbs.	36 x 28 inches	\$ 78 00
1540	2500 by $\frac{1}{2}$ lbs.	37 x 36 "	105 00
1541	2500 by $\frac{1}{2}$ lbs.	46 x 37 "	105 00
1542	3000 by $\frac{1}{2}$ lbs.	44 x 35 "	115 00
1544	3500 by $\frac{1}{2}$ lbs.	44 x 42 "	125 00
1545	4000 by $\frac{1}{2}$ lbs.	55 x 49 "	165 00
1546	5000 by 1 lbs.	50 x 48 "	185 00

### WITHOUT WHEELS

1550	2000 by $\frac{1}{2}$ lbs.	36 x 28 inches	\$ 68 00
1551	2500 by $\frac{1}{2}$ lbs.	46 x 37 "	95 00
1552	2500 by $\frac{1}{2}$ lbs.	37 x 36 "	95 00
1554	3000 by $\frac{1}{2}$ lbs.	44 x 35 "	100 00
1556	3500 by $\frac{1}{2}$ lbs.	44 x 42 "	110 00
1557	4000 by $\frac{1}{2}$ lbs.	55 x 49 "	150 00
1558	5000 by 1 lbs.	50 x 48 "	170 00

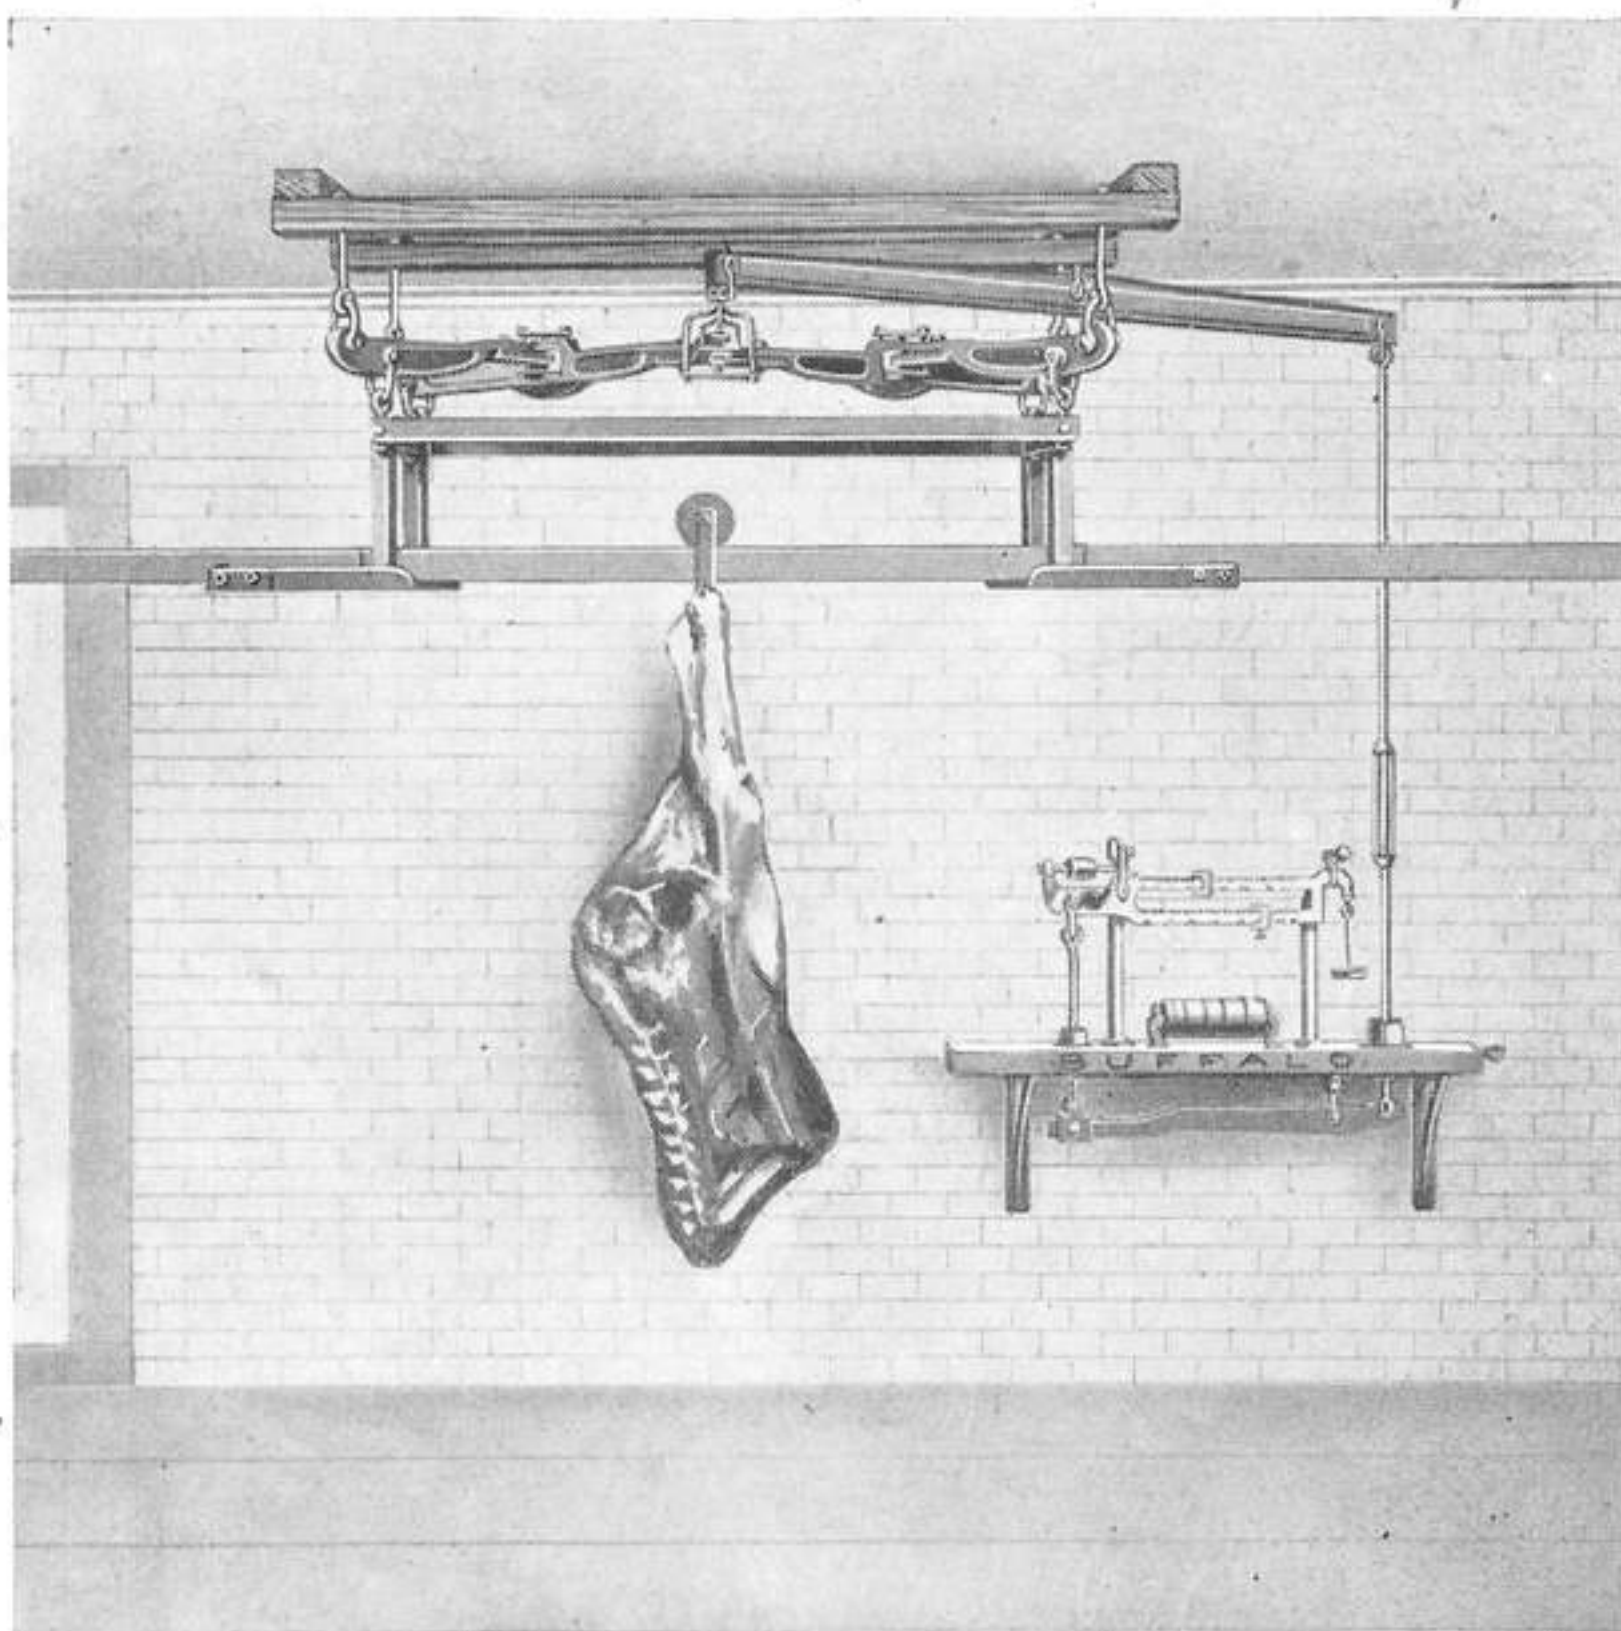

## PORTABLE SUSPENSION SCALES

WITH WOODWORK COMPLETE. POSTS EIGHT FEET HIGH

May be set into floor like "Dormant," and have platform level with floor. Double beam, upper bar marked to 100 pounds by  $\frac{1}{2}$ -pound marks. Lower bar, 200 pounds by 1-pound marks. Weights,  $\frac{1}{2}$  pound to 100 pounds.

No.	Capacity	Platform	Price
1590	4000 by $\frac{1}{2}$ lbs.	5 x 5 feet	\$183 00
1592	With zinc weights	.....	187 00
1594	With brass weights	.....	208 00

## SUSPENSION BUTCHERS' SCALES

WITH DOUBLE BEAM AND SLIDING POISES

Beam graduated to 100 pounds by  $\frac{1}{2}$ -pound divisions on each bar.

This scale is designed for weighing all articles handled on a suspended track, such as dressed beef, hogs, buckets of coal, etc.

A section of track is cut out and attached to the scale, which is placed above.

Price includes extension lever not over 6 feet long; when over 6 feet long but not exceeding 10 feet, price, extra, \$10.00; over 10 feet long, price on application.

Special sizes made to order.

## SUSPENSION BUTCHERS' SCALES

When ordering give the following information:

Distance top of track to bottom of ceiling.

Distance center of track to face of wall where beam is to be located.

Size of track used and thickness.

Diameter of rollers used.

Whether beam is to be on shelf as shown or in beam box.

Unless otherwise specified, suspension butchers' scales are furnished with extension lever 6 feet long, and suspension rods of proper length to make distance from top of track to ceiling 24 inches.

### SINGLE TRACK

No.	Capacity	Track	Price
1566	2000 lbs.	Single, 4 feet	\$100 00
1568	2500 lbs.	Single, 5 feet	125 00
1570	3000 lbs.	Single, 6 feet	150 00
1572	3500 lbs.	Single, 7 feet	175 00

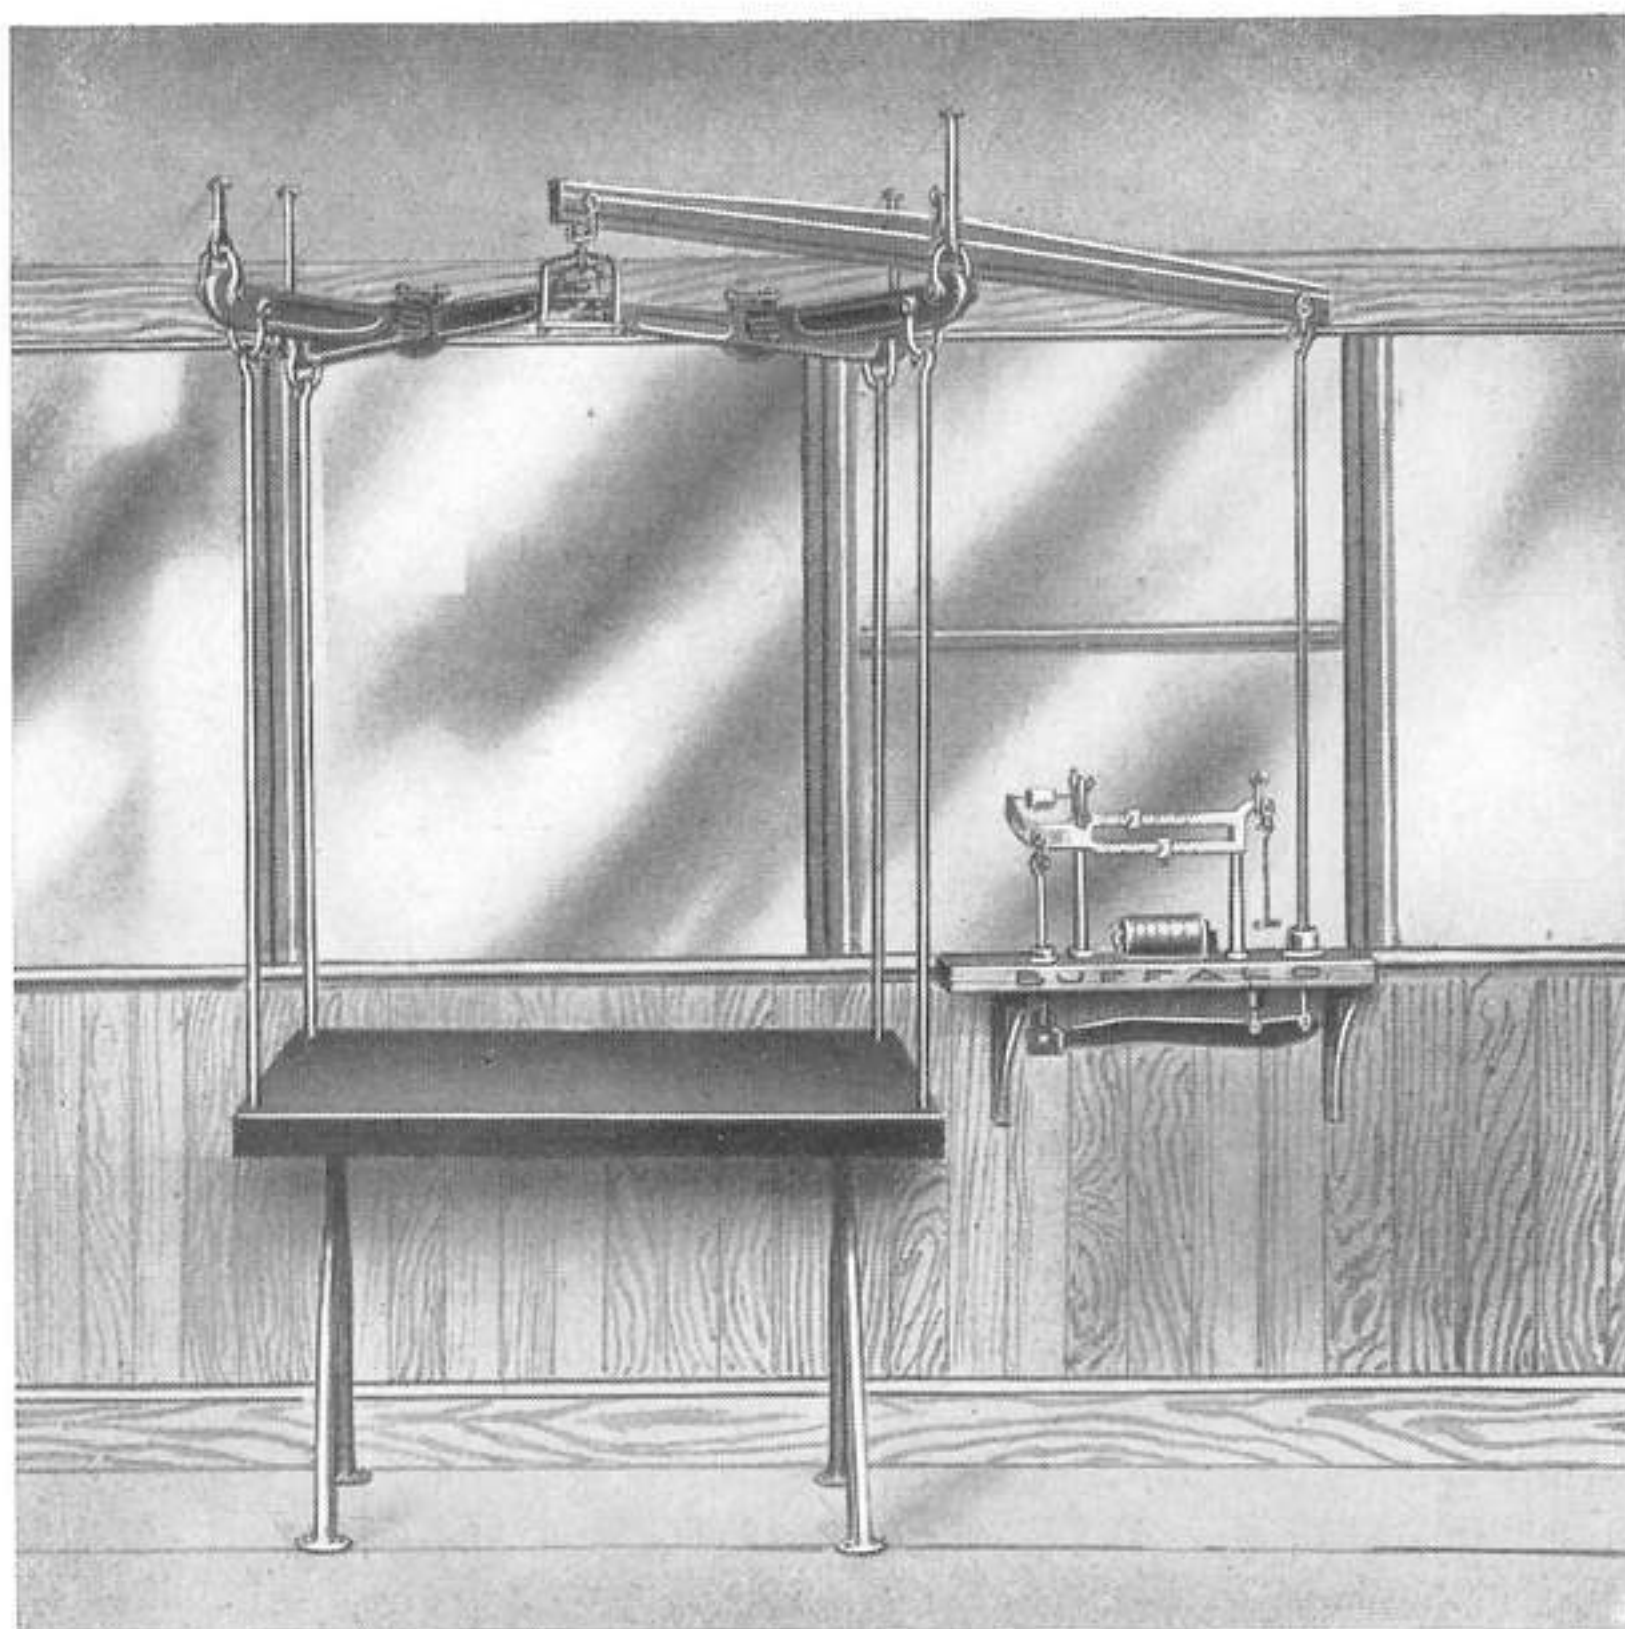

### DOUBLE TRACK

No.	Capacity	Track	Price
1574	2000 lbs.	4 feet	\$130 00
1575	2000 lbs.	5 feet	160 00
1576	2500 lbs.	5 feet	170 00
1578	3000 lbs.	6 feet	190 00
1579	3000 lbs.	7 feet	220 00
1580	3500 lbs.	7 feet	230 00

### BRASS TRIMMINGS, COMPLETE, EXTRA

For scales 2,000 and 2,500 pounds capacity .....\$30 00

For scales 3,000 and 3,500 pounds capacity ..... 40 00

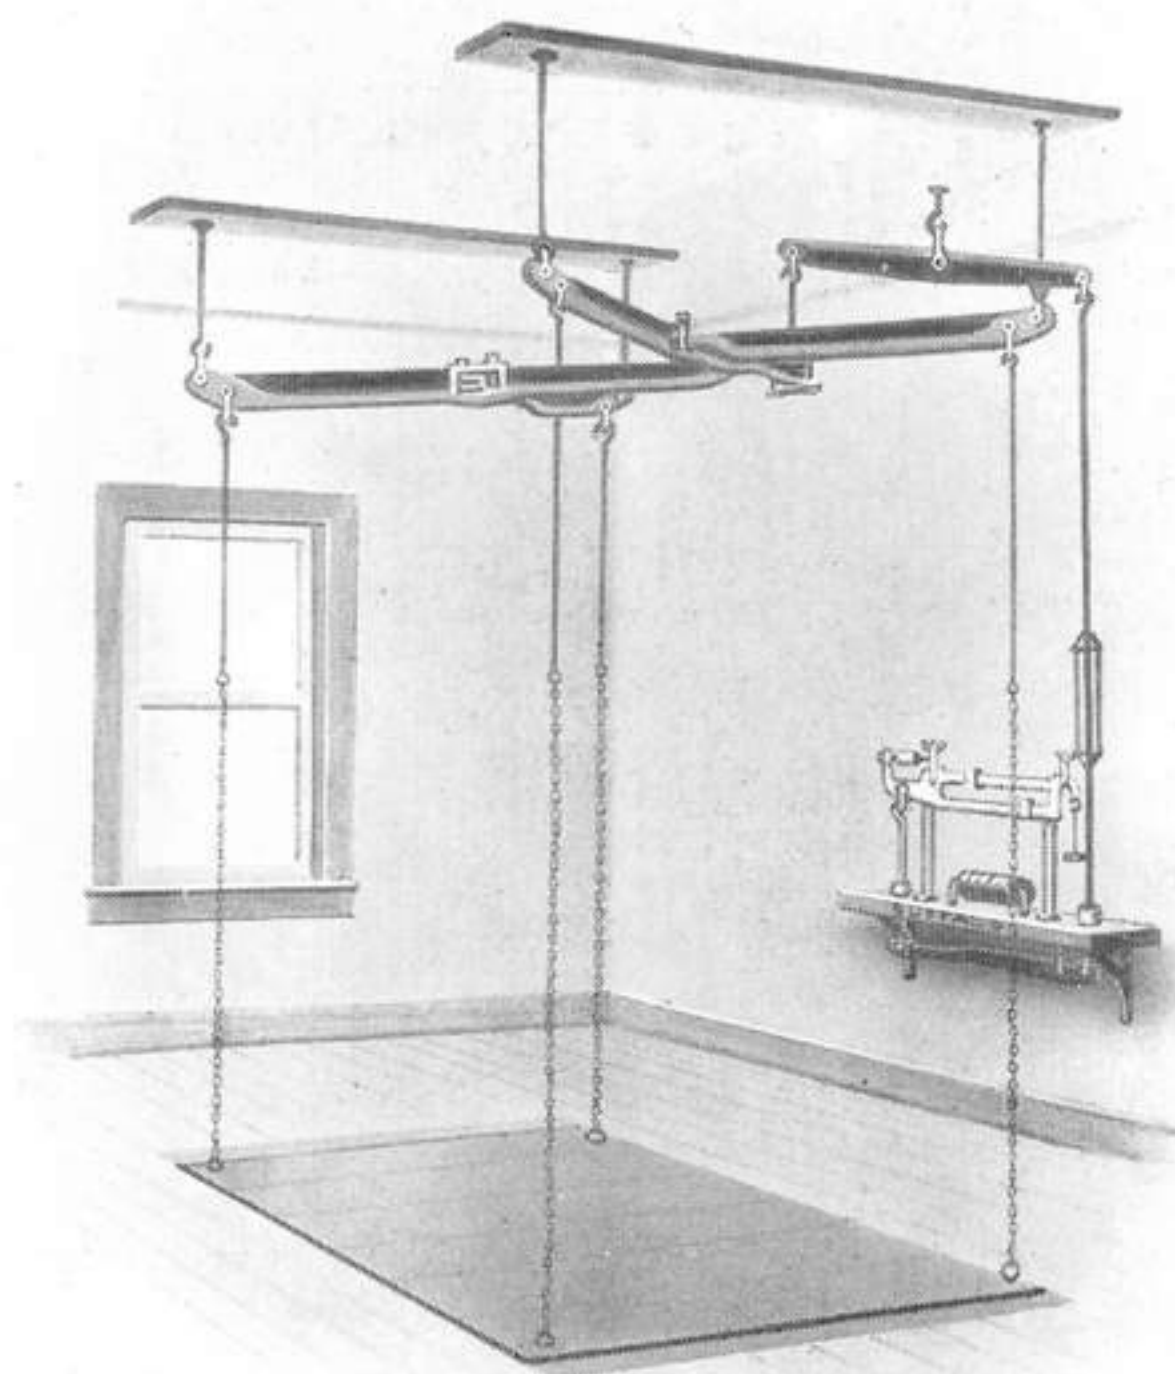

## PACKING HOUSE SCALES

This scale is designed especially for use in packing houses, where it is necessary to have platform in room separate from beam. Regular lever is 4 feet 6 inches long, but beam may be carried any distance required. An extra charge will be made for special extension lever. Furnished with beam box or with iron goose-necks for beam, as desired.

Size of platform, 42 x 42 inches. Height from floor to top of platform, 30 inches, and from top of platform to ceiling, 6 feet, unless otherwise ordered. Double beam. Other sizes made to order.

No.	Capacity	Price
1604	1000 by $\frac{1}{2}$ lbs.	\$125 00

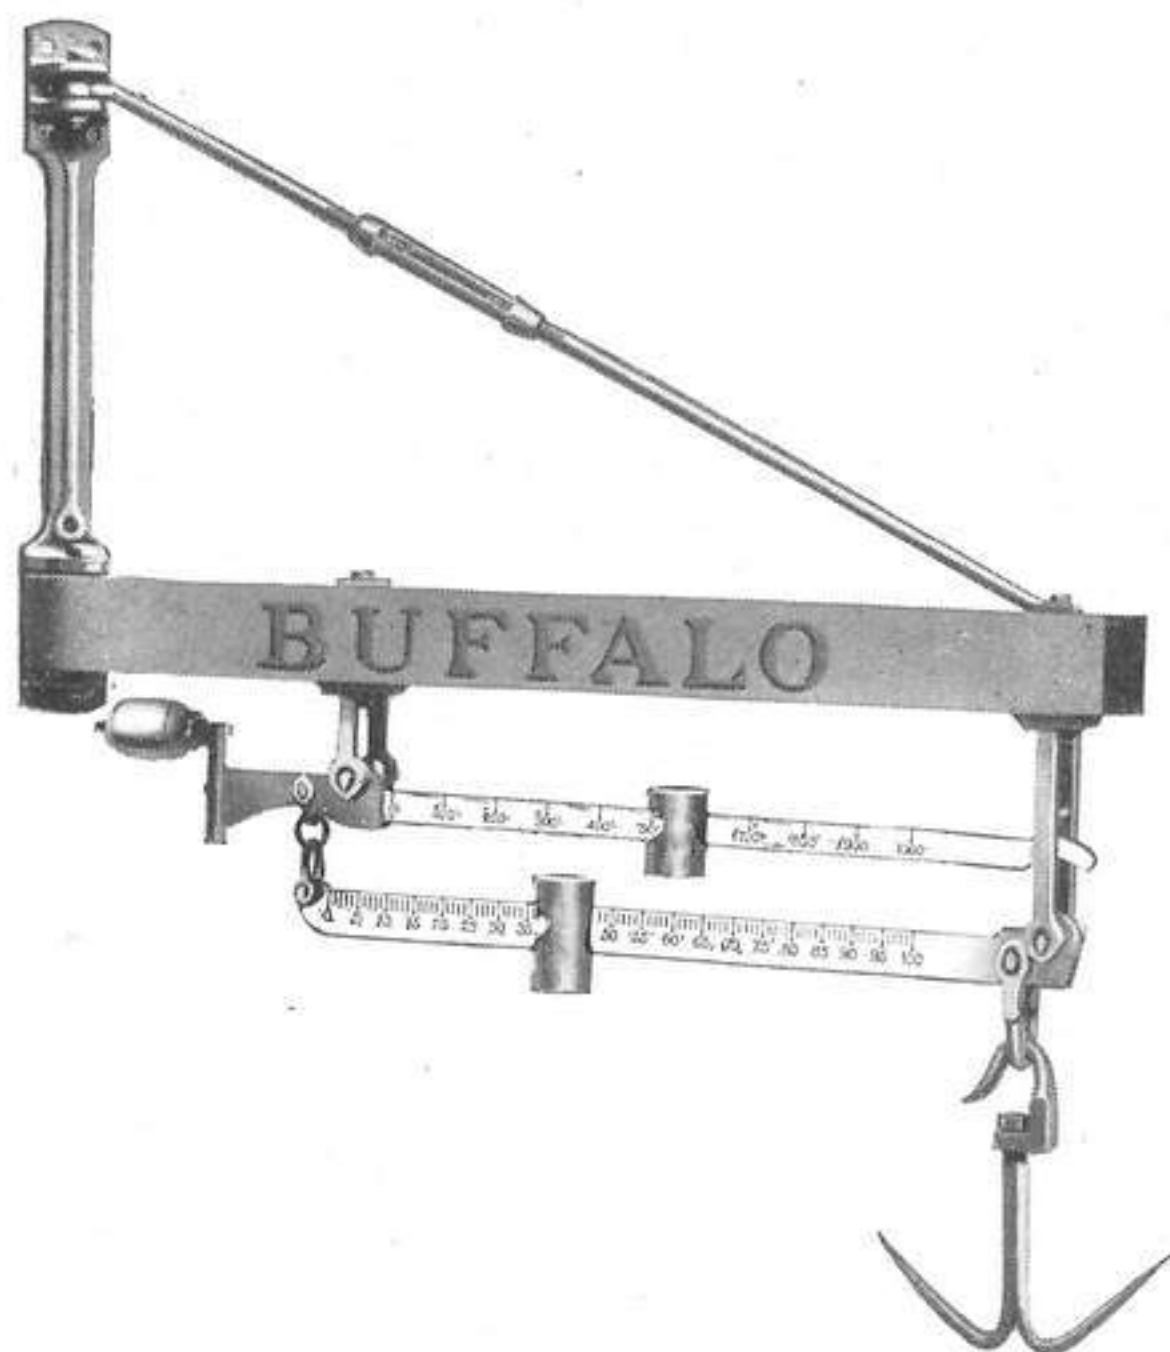

## HIDE SCALES

(Beam by  $\frac{1}{2}$ -pound marks)

The scale is hung from ceiling or overhead framework, with the platform suspended in the floor below, and the beam placed convenient to platform. Designed for hide dealers; it is also well adapted for weighing merchandise which is saturated with salt, or where an ordinary scale would be injured by dampness, causing it to rust. Prices include shelf and brackets but do not include wood platform or outside frame, which will be quoted on application.

No.	Capacity	Price Single Beam	Price Double Beam
1584	4,000 lbs.	\$125.00	\$133.00

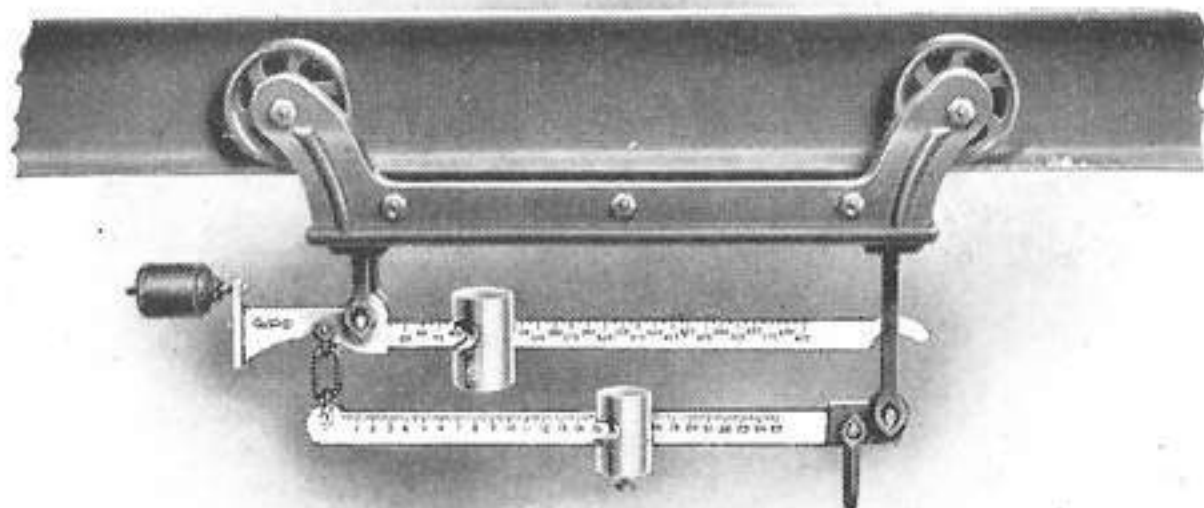

Size of Platform..... 5 ft. 3 in. x 5 ft. 6  $\frac{1}{2}$  in.  
 Size of Platform between rods ..... 5 ft. x 5. ft.

## REVERSE-ACTING MEAT BEAM

This is a beam of unusually strong and simple construction. It is made to be attached to a post or wall. When not in use it may be swung aside. The beams and poises are of brass, nickel plated. No loose weights are required, as the full capacity is weighed with the sliding poises. The beams are marked on both sides.

No.	Length	Capacity	Price
1598	47 inches	1100 x $\frac{1}{2}$ lbs.	\$50 00
1600	38 "	600 x $\frac{1}{2}$ lbs.	40 00
1602	32 "	250 x $\frac{1}{2}$ lbs.	35 00

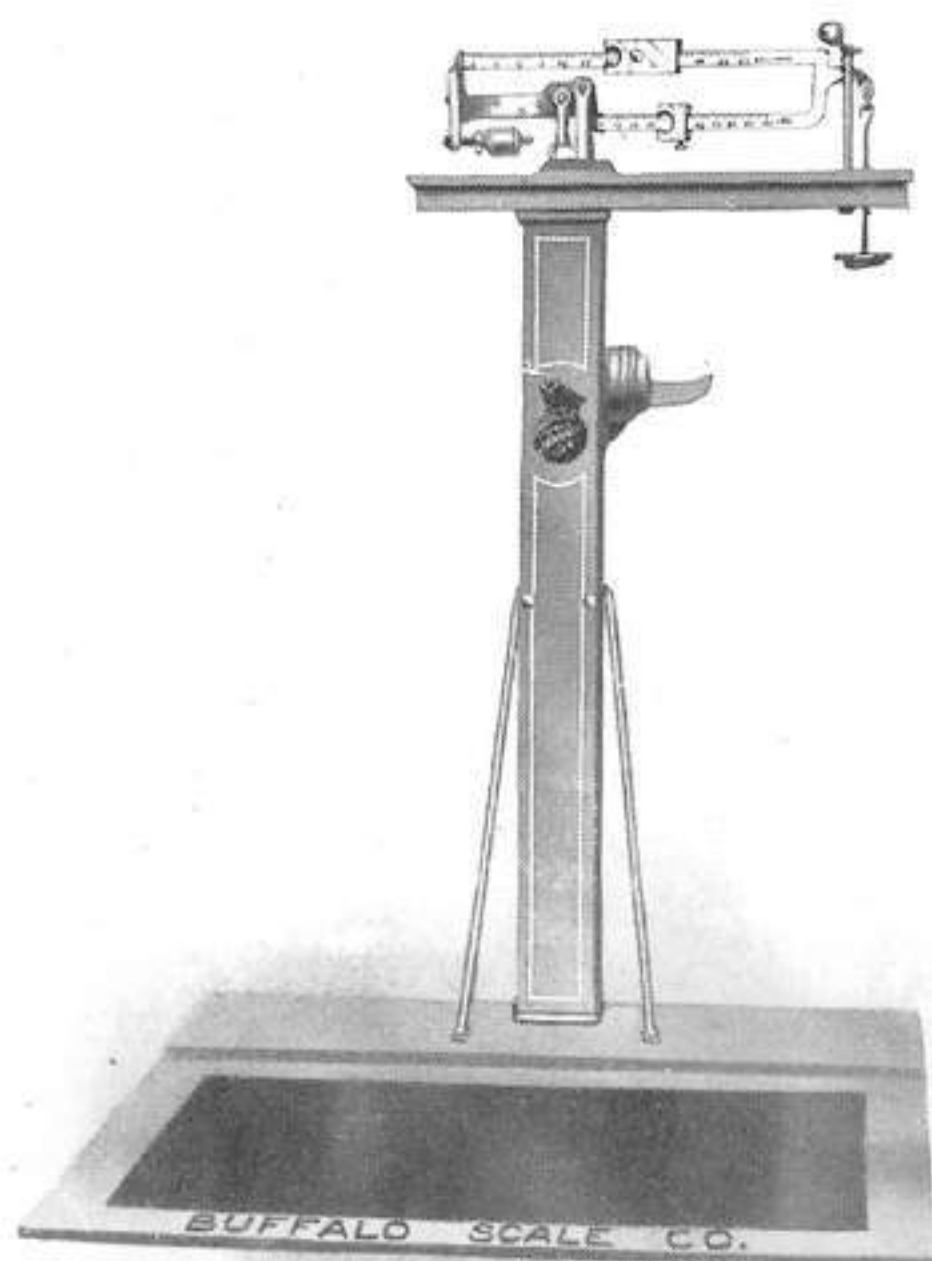

## SUSPENSION TROLLEY SCALE

The scale illustrated above is used in connection with an overhead track, usually an I beam track as shown.

The scale may be equipped with hooks, or a bucket may be attached for conveying and weighing materials fine enough to be so handled. No loose weights are required, the full capacity being indicated by the poises.

No.	Capacity	Price
1582	650 by $\frac{1}{4}$ lbs.	\$65 00

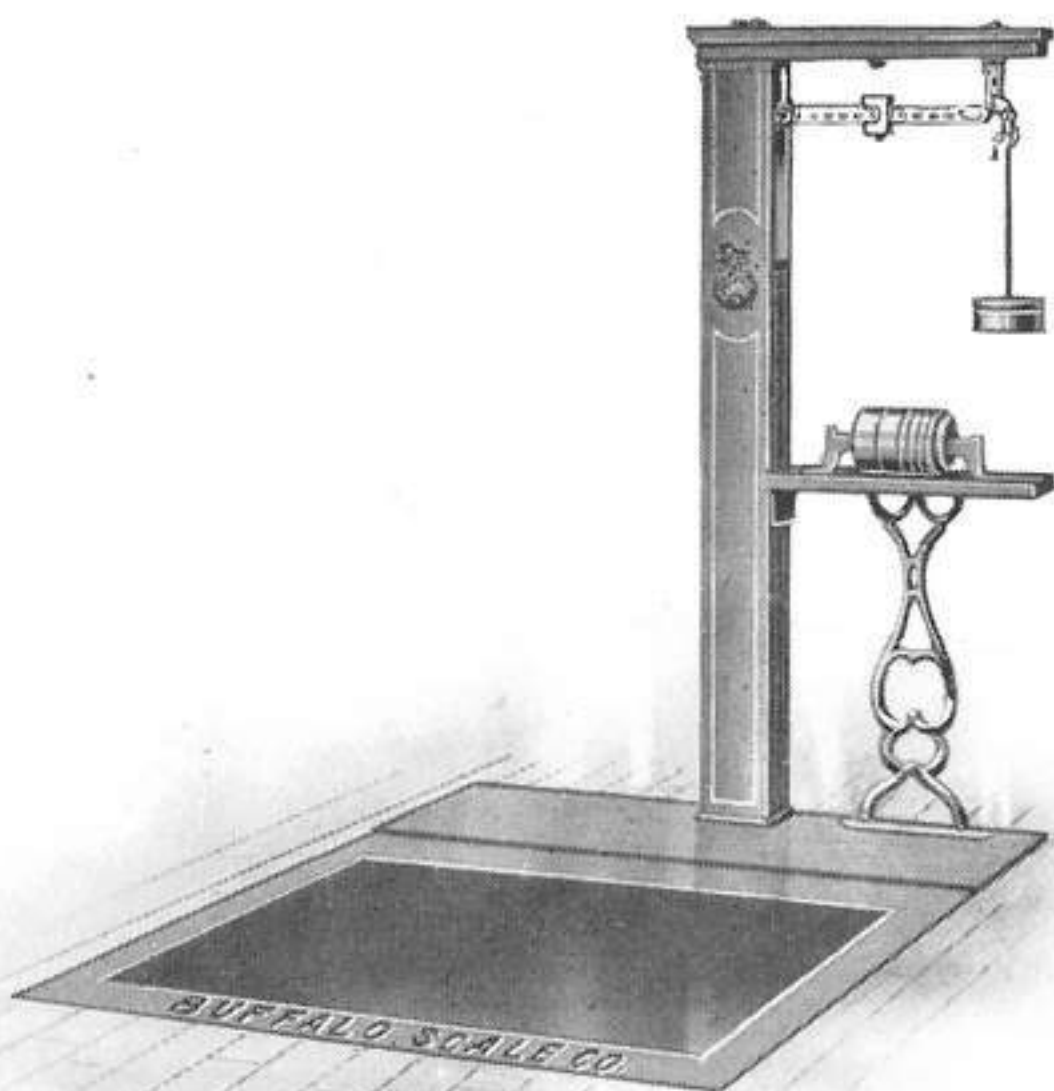

## OIL SCALE

This scale weighs by the gallon and by pounds, and has been constructed especially to meet the requirements of oil dealers, according to their suggestions. It has tare beam.

In ordering, state how many pounds to the gallon scale should indicate.

No.	Capacity	Gallons	Platform	Price
1606	1200 lbs.	60	42 x 30 inches	\$84 00

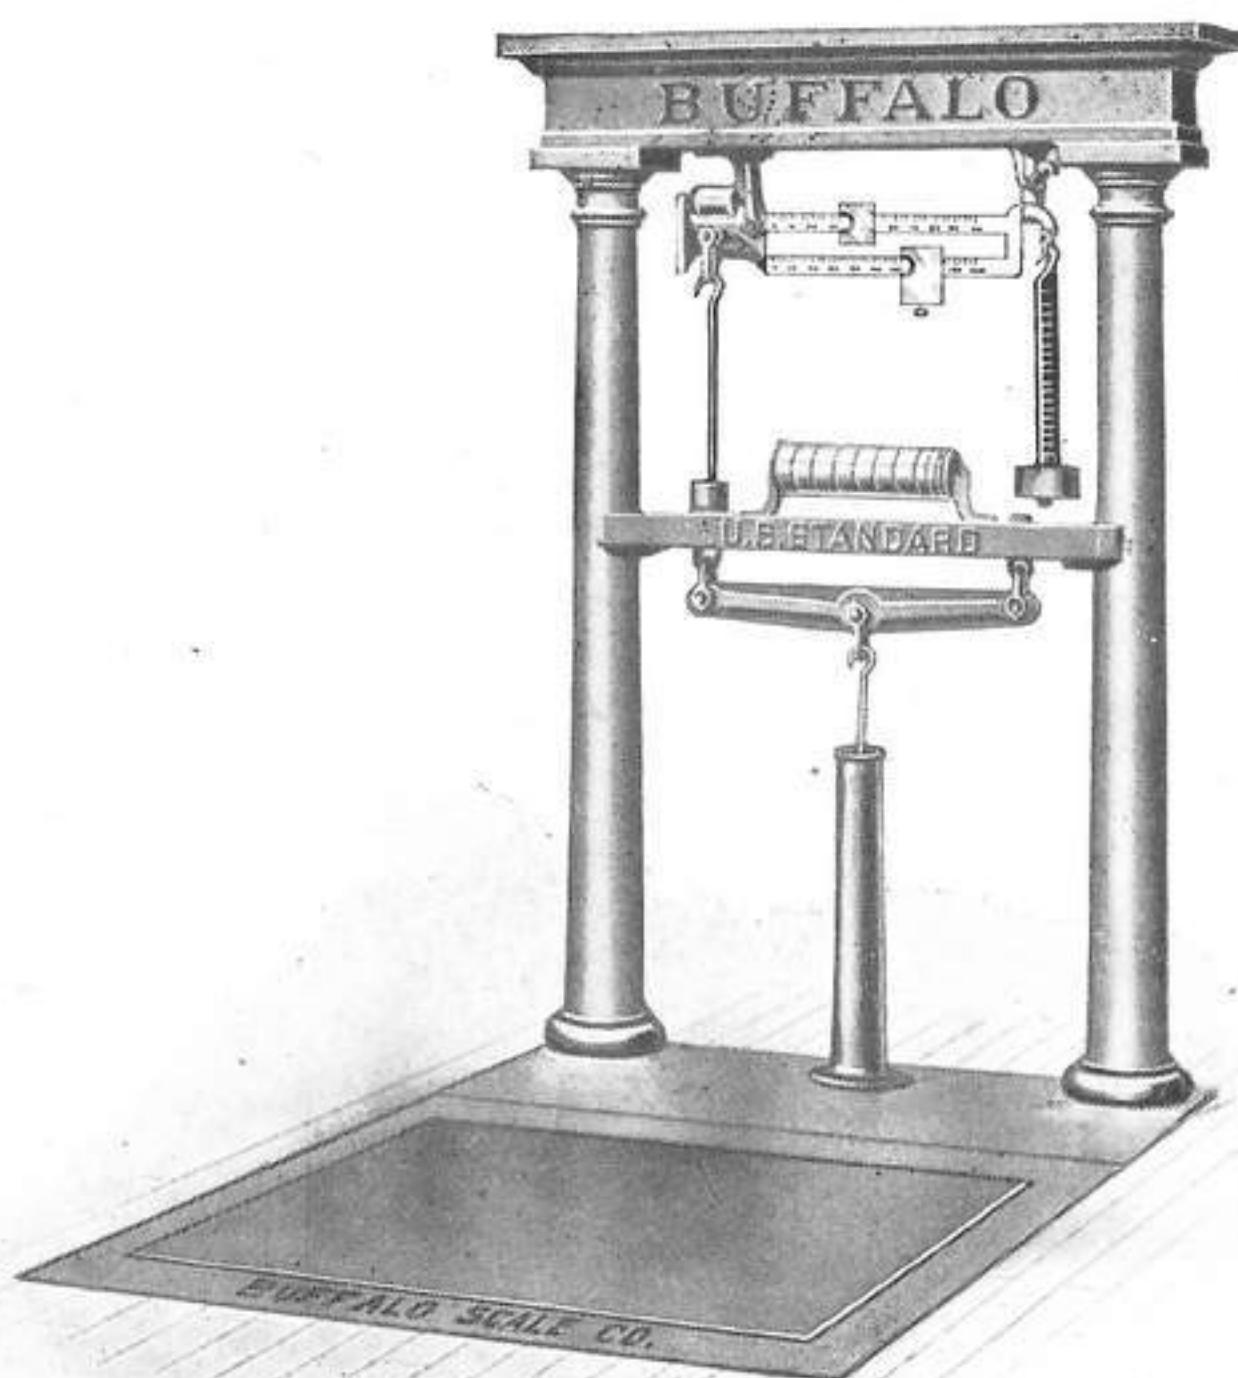

## SINGLE-PILLAR DORMANT SCALES

With or without drop lever. If drop lever is wanted order should so specify. For ordinary uses we recommend scale without drop lever.

These scales are of the iron frame pattern, the levers being hung from a solid iron frame which caps the top of the box. This feature and the heavy construction of Buffalo Dormant Scales make them particularly accurate and durable.

For dimensions of opening required for any Buffalo Dormant Scale, also illustration showing how same should be installed, see pages 96 and 97. Plan for setting any Dormant Scale in concrete will be furnished upon application.

No.	Capacity	Platform	Platform to Pillars	Price
1700	1200 by $\frac{1}{2}$ lbs.	20 x 28 inches	8 $\frac{1}{4}$ inches	\$ 58 00
1702	1500 by $\frac{1}{2}$ lbs.	21 x 31 "	8 "	68 00

1712	5000 by $\frac{1}{2}$ lbs.	50 x 48 "	24 "	150 00
1713	6000 by $\frac{1}{2}$ lbs.	60 x 54 "	13 "	190 00

## TWO-PILLAR DORMANT SCALES

### IRON FRAME

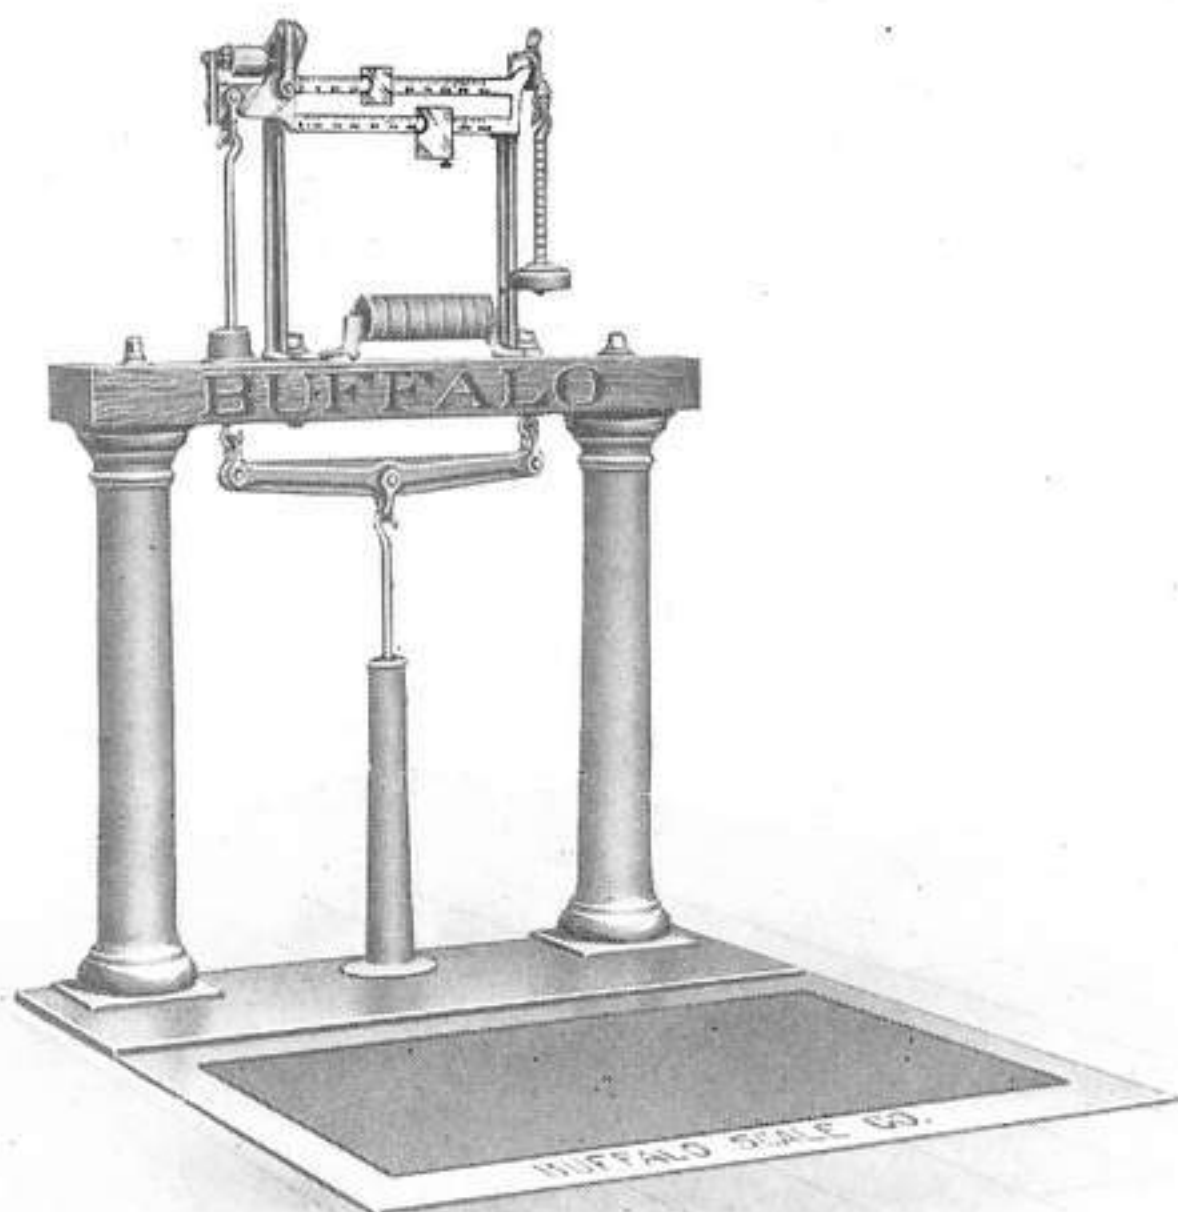

If with double beam and graduated counterpoise, \$8.00 list extra. The pillars of these scales are bronzed, and the finish is elegant in every particular.

These scales are of the iron frame pattern, the levers being hung from a solid iron frame which caps the top of the box. This feature and the heavy construction of Buffalo Dormant Scales make them particularly accurate and durable.

For dimensions of opening required for any Buffalo Dormant Scale, also illustration showing how same should be installed, see pages 96 and 97. Plan for setting any Dormant Scale in concrete will be furnished upon application.

Extra for Compound Beam, \$20.00 list.

No.	Capacity	Platform	Platform to Pillars	Price
1715B	1200 by $\frac{1}{2}$ lbs.	42 x 30 inches	8 inches	\$96 00

## SHORT-PILLAR DORMANT SCALES

### IRON FRAME

With short pillars, as shown in cut. Hardwood shelf and upright standards, otherwise it is the same as our two-pillar Dormant Scale.

These scales are of the iron frame pattern, the levers being hung from a solid iron frame which caps the top of the box. This feature and the heavy construction of Buffalo Dormant Scales make them particularly accurate and durable.

For dimensions of opening required for any Buffalo Dormant Scale, also illustration showing how same should be installed, see pages 96 and 97. Plan for setting any Dormant Scale in concrete will be furnished upon application.

Extra for Compound Beam, \$20.00 list.

Extra for Double Beam, \$8.00 list.

## DORMANT COTTON SCALES

The platform of this scale is large in proportion to its capacity. It has been designed especially for weighing cotton and other bulky goods but is amply strong for general use.

Extra for bag rack, \$6.00.

Extra for double beam, \$8.00.

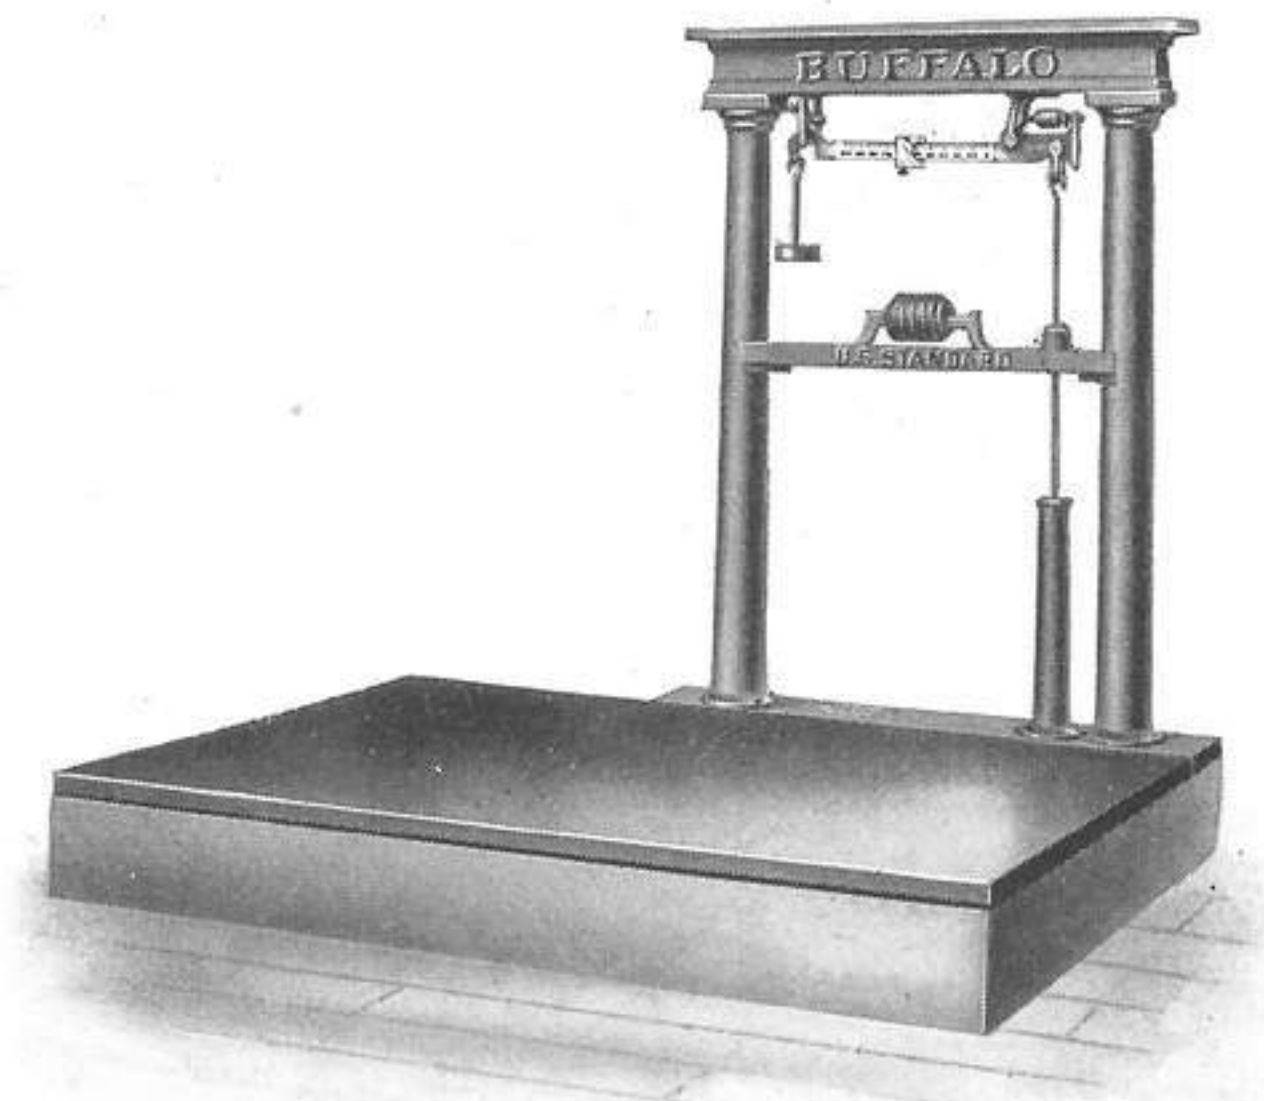

For dimensions of opening required for any Buffalo Dormant Scale, also illustration showing how same should be installed, see pages 96 and 97. Plan for setting any Dormant Scale in concrete will be furnished upon application.

### WITH TWO IRON PILLARS

No.	Capacity	Platform	Platform to Pillars	Price
1742	2000 by $\frac{1}{2}$ lbs.	55 x 49 inches	15 inches	\$125 00

### WITH SINGLE WOOD PILLAR

1740	2000 by $\frac{1}{2}$ lbs.	55 x 49 inches	15 inches	\$110 00
------	----------------------------	----------------	-----------	----------

## COFFEE DORMANT SCALES

### WITH TWO IRON PILLARS

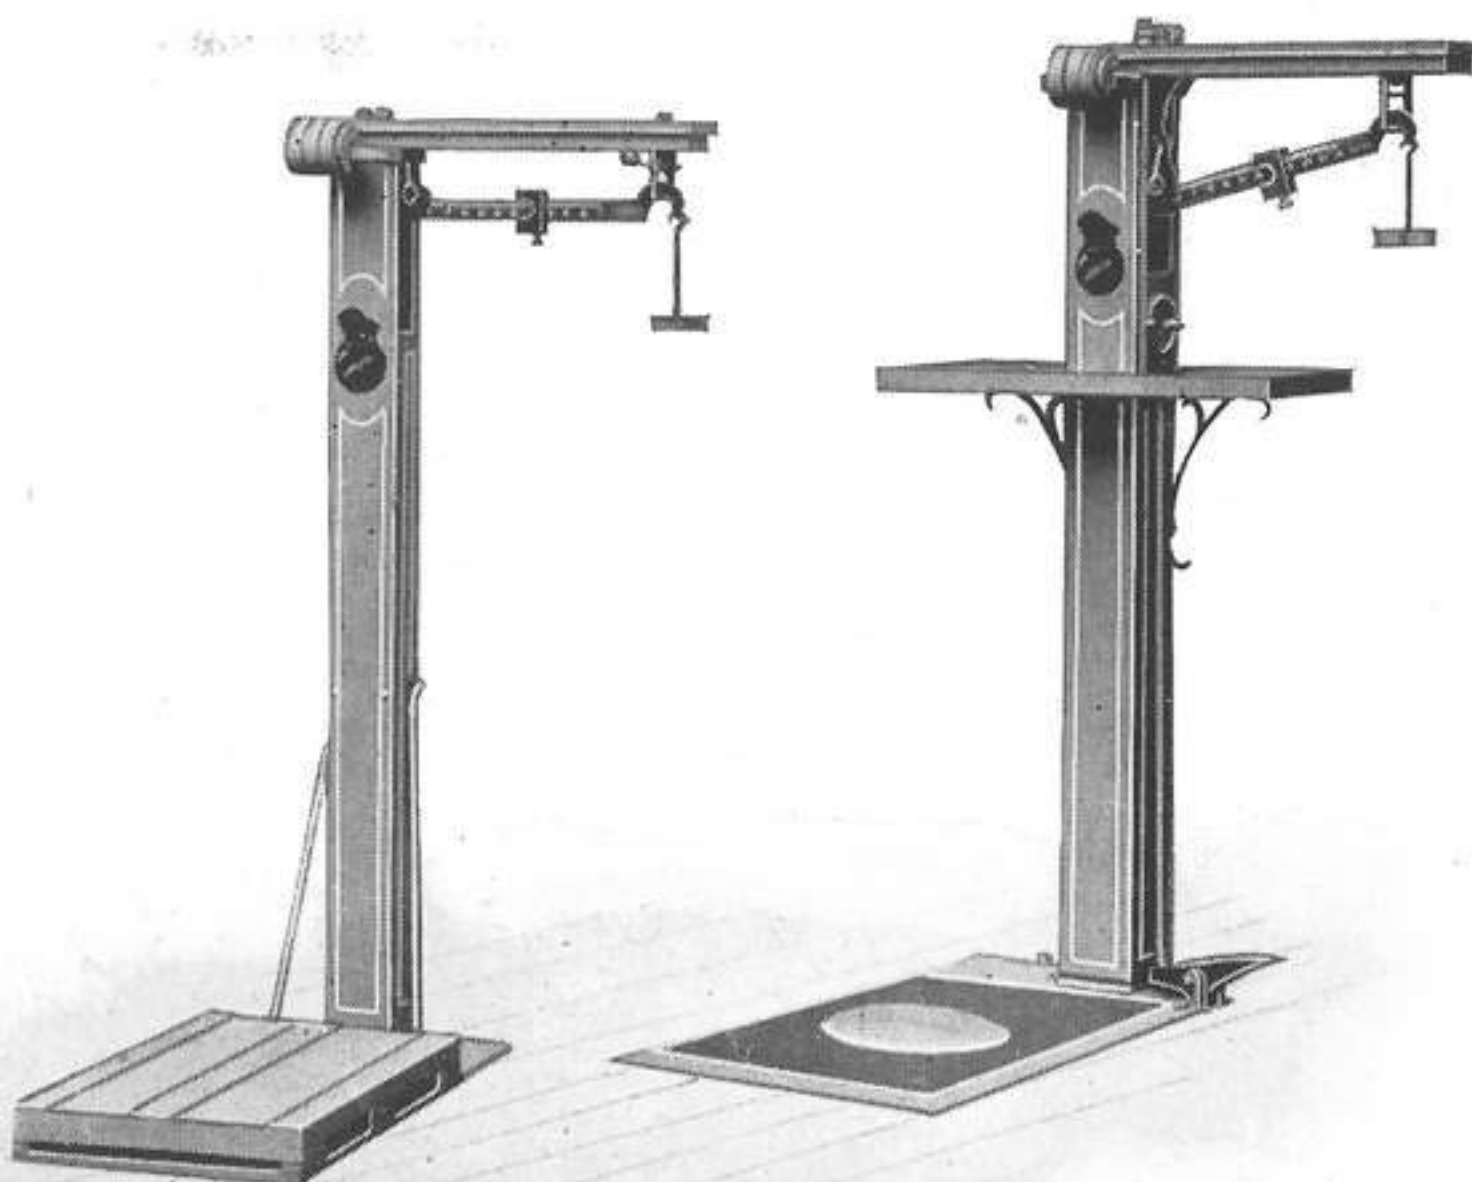

The very large platform of this scale makes it useful for weighing at one time a number of bags of grain, coffee or similar material. The beam is marked to 200 pounds by 1-pound marks. Weights,  $\frac{1}{2}$  pound to 100 pounds. Furnished with bag rack, if desired, at an additional list price of \$12.00.

Double beam, \$8.00 extra.

Short iron pillar outfit furnished if desired, without change in price.

Plan for setting any Dormant Scale in concrete will be furnished upon application.

No.	Capacity	Platform	Platform to Pillars	Price
1743	3500 by 1 lbs.	74 x 52 inches	1 inch	\$125 00

No. 1746

No. 1748

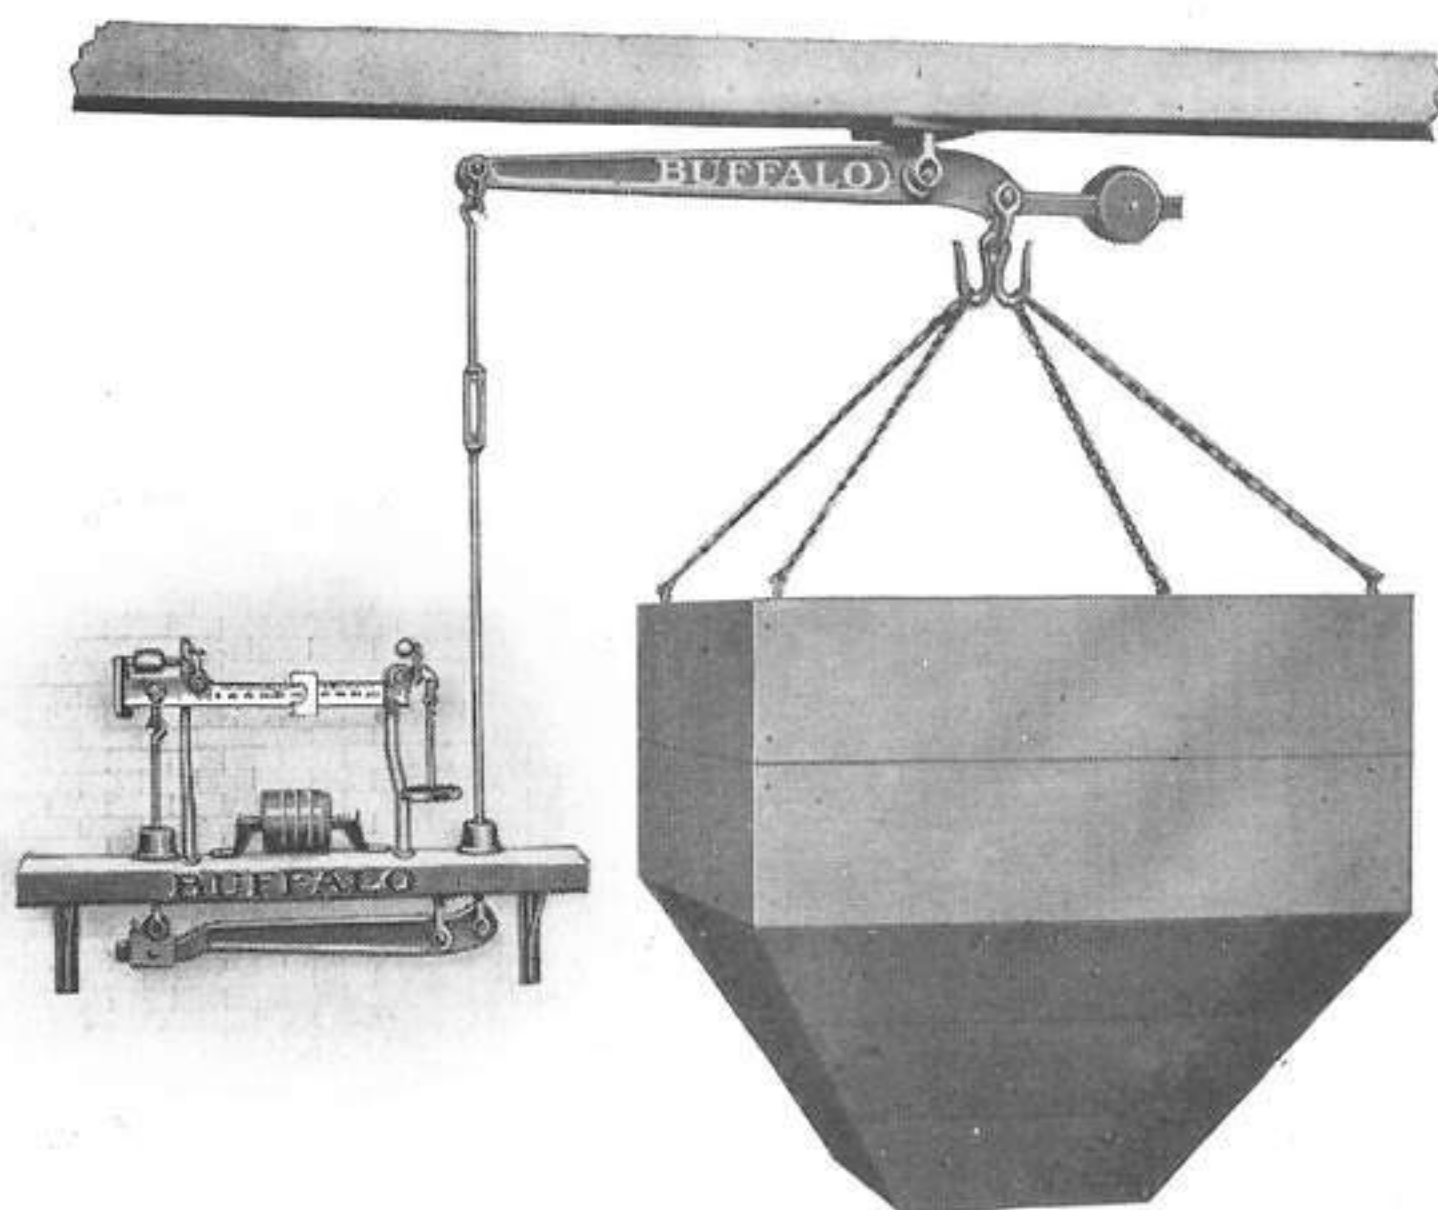

## DORMANT FLOUR SCALES

No. 1744 is set dormant in the floor and is intended for weighing barrels of flour. It is furnished with flour weights in addition to the regular weights.

No. 1748 is made of suitable size for weighing bags and barrels of flour. The machinery of the scale is only in operation when the foot is placed on the lever provided for it. At other times the bearings are relieved from all wear.

For dimensions of opening required for any Buffalo Dormant Scale, also illustration showing how same should be installed, see pages 96 and 97. Plan for setting any Dormant Scale in concrete will be furnished upon application.

No.	Capacity	Platform	Price
1744	600 by $\frac{1}{4}$ lbs.	16 x 25 inches	\$40 00
1746	.....	{ With rubber spring platform }	50 00
1748	600 by $\frac{1}{4}$ lbs.	20 x 28 inches	60 00

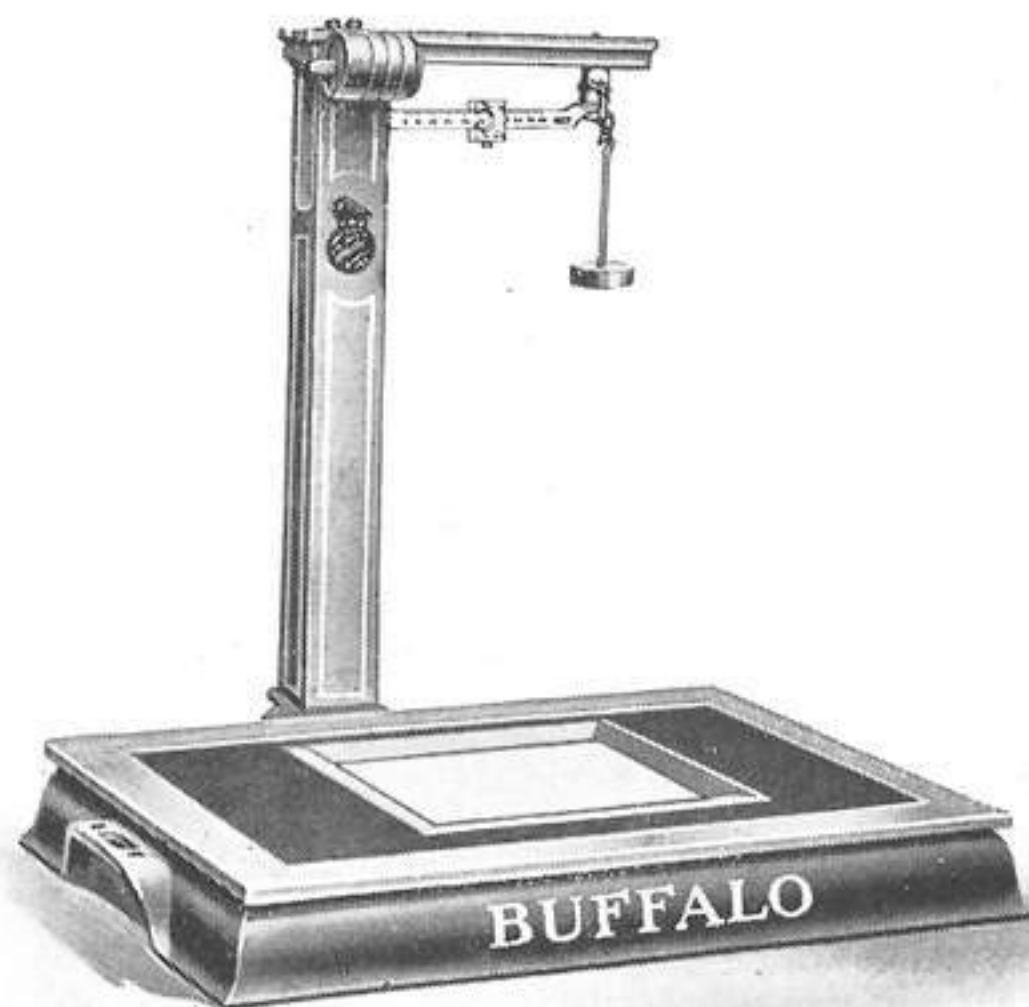

## HANGING HOPPER BEAMS

Exclusive of hopper or any woodwork.

Hopper may be placed as much higher than beam as desired, and the levers and beam may run at different angles. A hanging platform, for weighing grain in bags, is sometimes used instead of hopper.

Special sizes to order.

No.	Capacity	Distance Hopper Hook to Beam Rod	Price
1752	40 bushels x $\frac{1}{2}$ lbs.	4 feet 6 inches	\$60 00
1754	60 " $\frac{1}{2}$ "	4 " 6 "	70 00
1756	100 " $\frac{1}{2}$ "	5 " 6 "	90 00

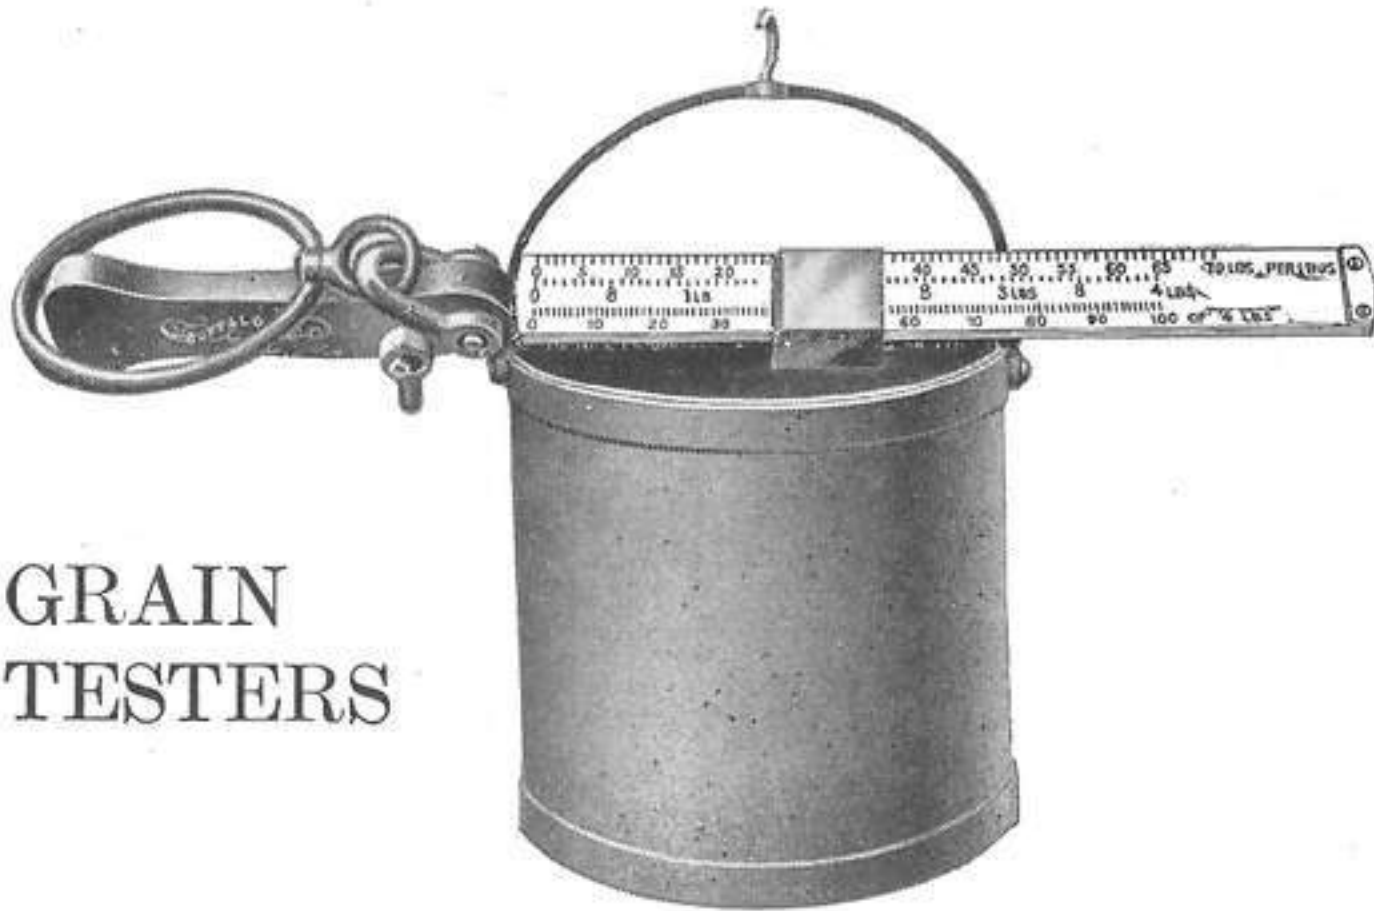

## SINGLE-PILLAR GRAIN SCALES

Portable pattern, with single wood pillar and without wheels.  
Beam, 100 by  $\frac{1}{2}$  lbs.

Price, exclusive of hopper, which is to be furnished by purchaser.

No.	Capacity		Platform	Opening for Hopper	Price
	Bushels	Pounds			
1758	30	1,800 x $\frac{1}{2}$	42 x 30 in.	15 x 15 in.	\$84.00
1760	40	2,400 x $\frac{1}{2}$	42 x 30 in.	15 x 15 in.	92.00

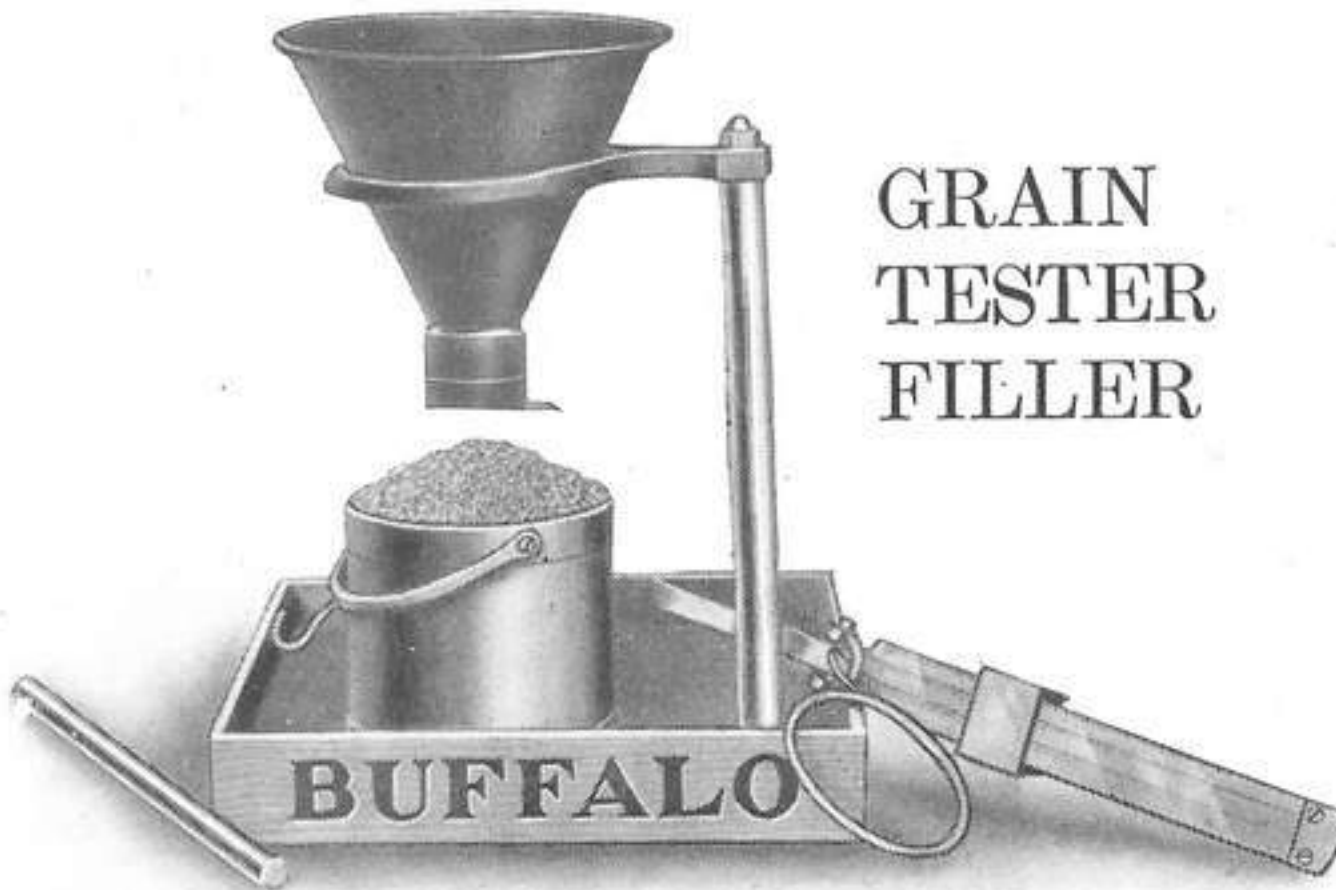

## GRAIN TESTERS

The Buffalo Grain Tester is constructed so that when the cup is empty the beam balances with the poise set at zero. There are upon the beam three rows of marks, which indicate respectively:

- 1st. The number of pounds a sample will weigh to the bushel.
- 2d. The exact weight of sample.
- 3d. The per cent. of loss after cleaning.

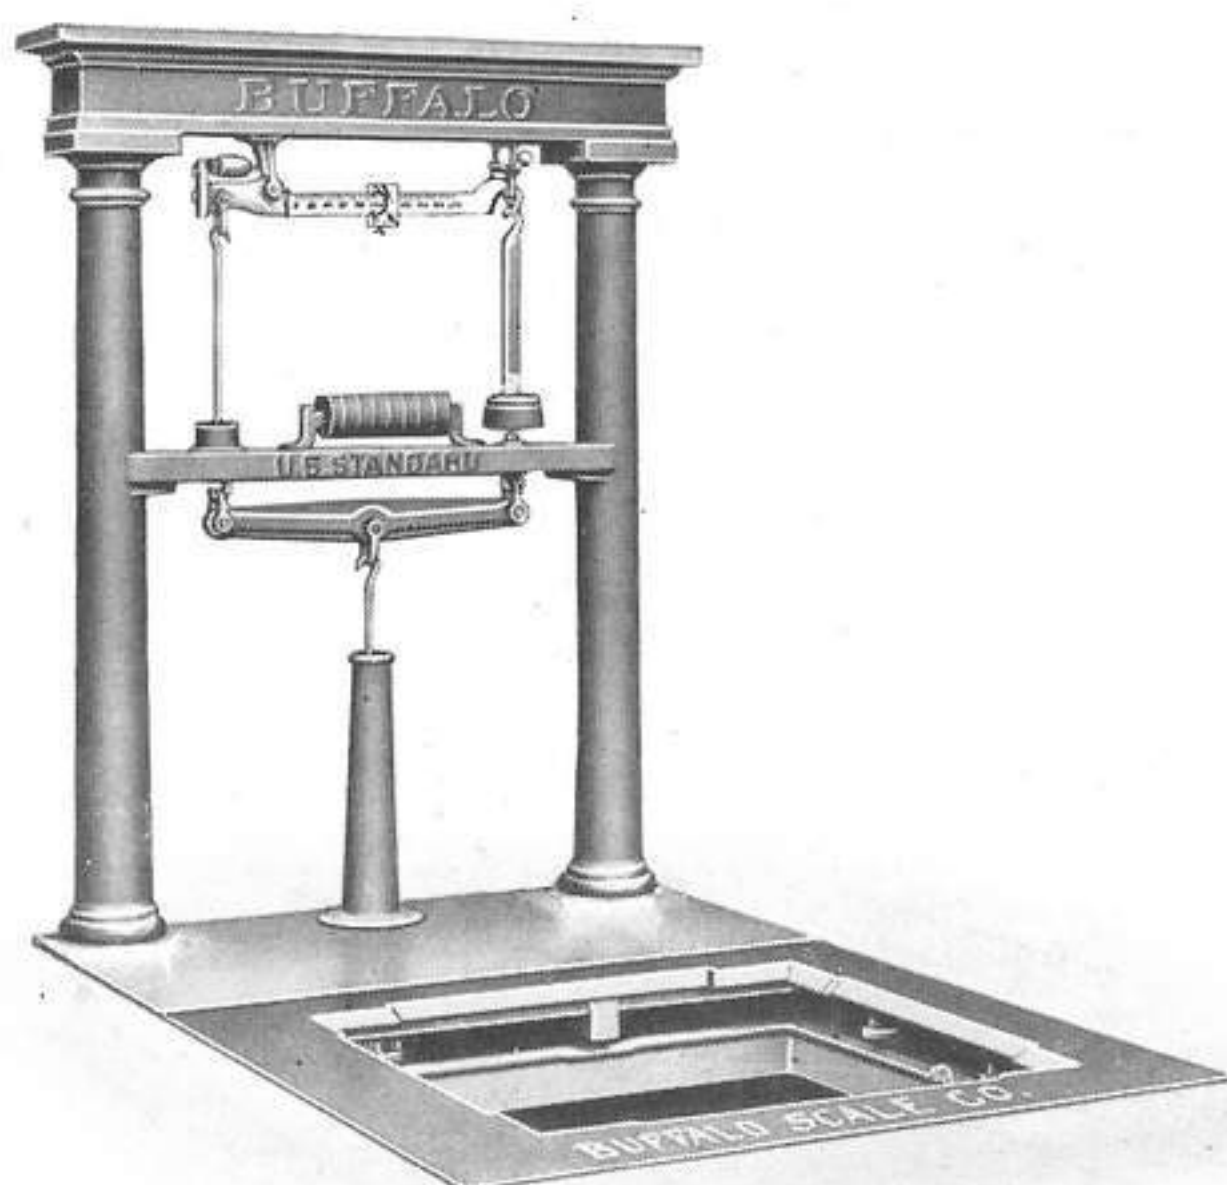

No.	Capacity	Price
1763	1 pint	\$13 00
1764	$\frac{1}{2}$ pint	12 50
1765	1 quart	14 00
1767	2 quarts	15 00

## GRAIN TESTER FILLER

The Buffalo Filler allows the grain to flow in a uniform stream and insures a uniform density in the cup. A polished steel rod is furnished for striking off. The equipment is inexpensive and may be used with any grain tester.

No.	Capacity	Price
1761	1 quart and less	\$5 50
1762	2 quarts and less	6 00

## HOPPER OR GRAIN SCALES

### DORMANT PATTERN

This pattern of Hopper Scale can be set dormant in the floor, and it is especially suited for use in elevators, grain warehouses, flour mills, etc. The prices given do not include the hopper.

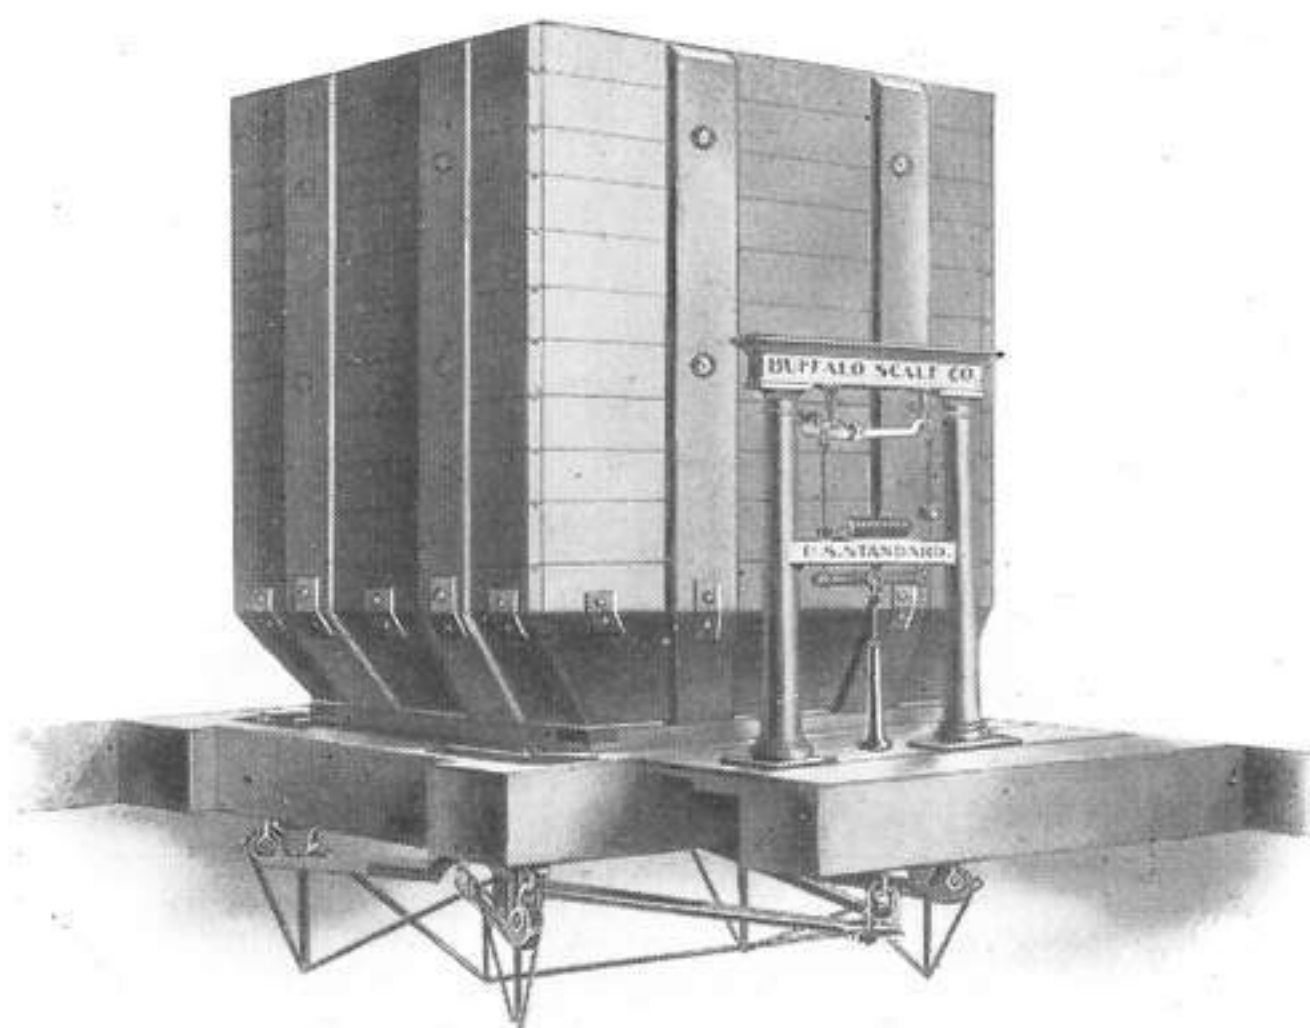

The above scale may be furnished with patent grain beam, if desired. For description see page 126.

### WITH TWO IRON PILLARS

No.	Capacity		Platform	Opening for Hopper	Price
	Bushels	Pounds			
1778	60	3600 by $\frac{1}{2}$	44 x 42 ins.	18 x 18 ins.	\$125 00
1780	100	6000 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	160 00
1782	125	7500 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	180 00
1784	150	9000 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	195 00

### WITH SINGLE WOOD PILLAR

1768	60	3600 by $\frac{1}{2}$	44 x 42 ins.	18 x 18 ins.	\$105 00
1770	100	6000 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	140 00
1772	125	7500 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	160 00
1774	150	9000 by 1	50 $\frac{1}{2}$ x 49 "	36 x 36 "	175 00

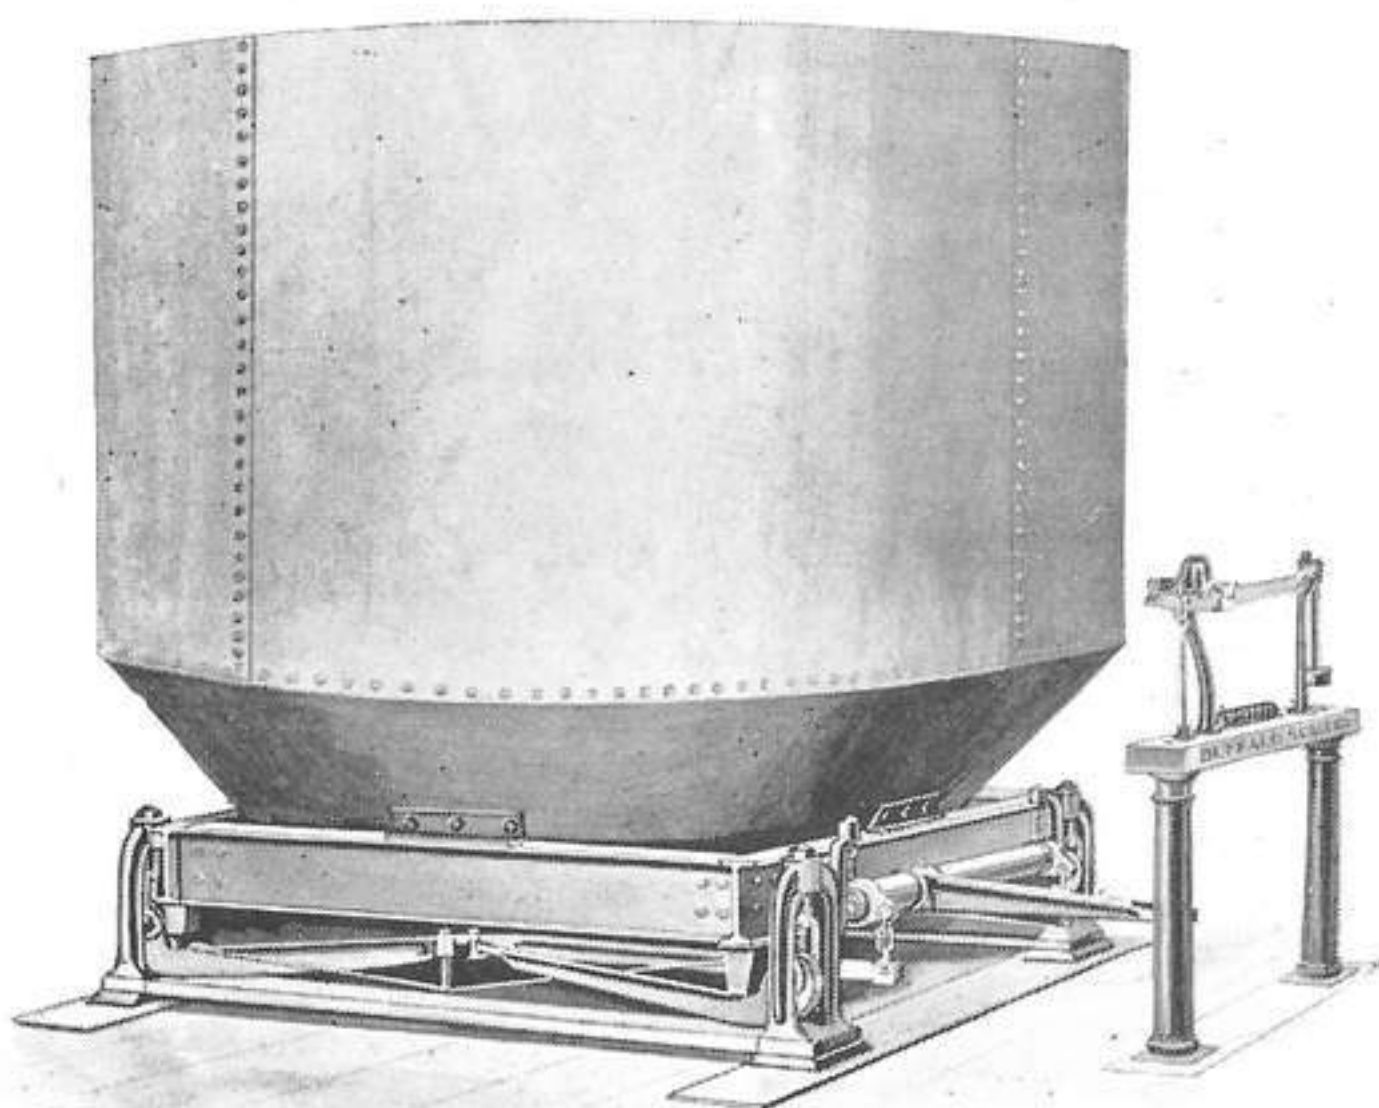

## TWO-PILLAR GRAIN OR HOPPER SCALES

### TRUSSED LEVER PATTERN

Hopper scales of this pattern are made in all sizes from 12,000 to 120,000 pounds capacity, and are furnished with corner irons to keep the scale level if the building settles. They may also be built entirely of iron and steel for special situations in fireproof buildings, and are adapted for many different uses in breweries, grain warehouses and elevators. The sizes given are those commonly used, but may be varied somewhat without adding to the cost of the scale. The beam may be placed below the scale in any desired situation. The prices given do not include the hopper, steel or the timber for the scale, which are to be furnished by the purchaser.

No.	Capacity		Opening for Hopper	Price
	Bushels	Pounds		
1800	200	12,000 by 5	54 x 54 inches	\$225 00
1802	300	18,000 by 5	54 x 54 "	285 00
1804	350	21,000 by 5	54 x 54 "	300 00

1822	1400	84,000 by 5	64 x 64 "	800 00
1824	1600	96,000 by 5	64 x 64 "	900 00
1825	1800	108,000 by 5	84 x 84 "	1100 00
1826	2000	120,000 by 5	84 x 84 "	1200 00

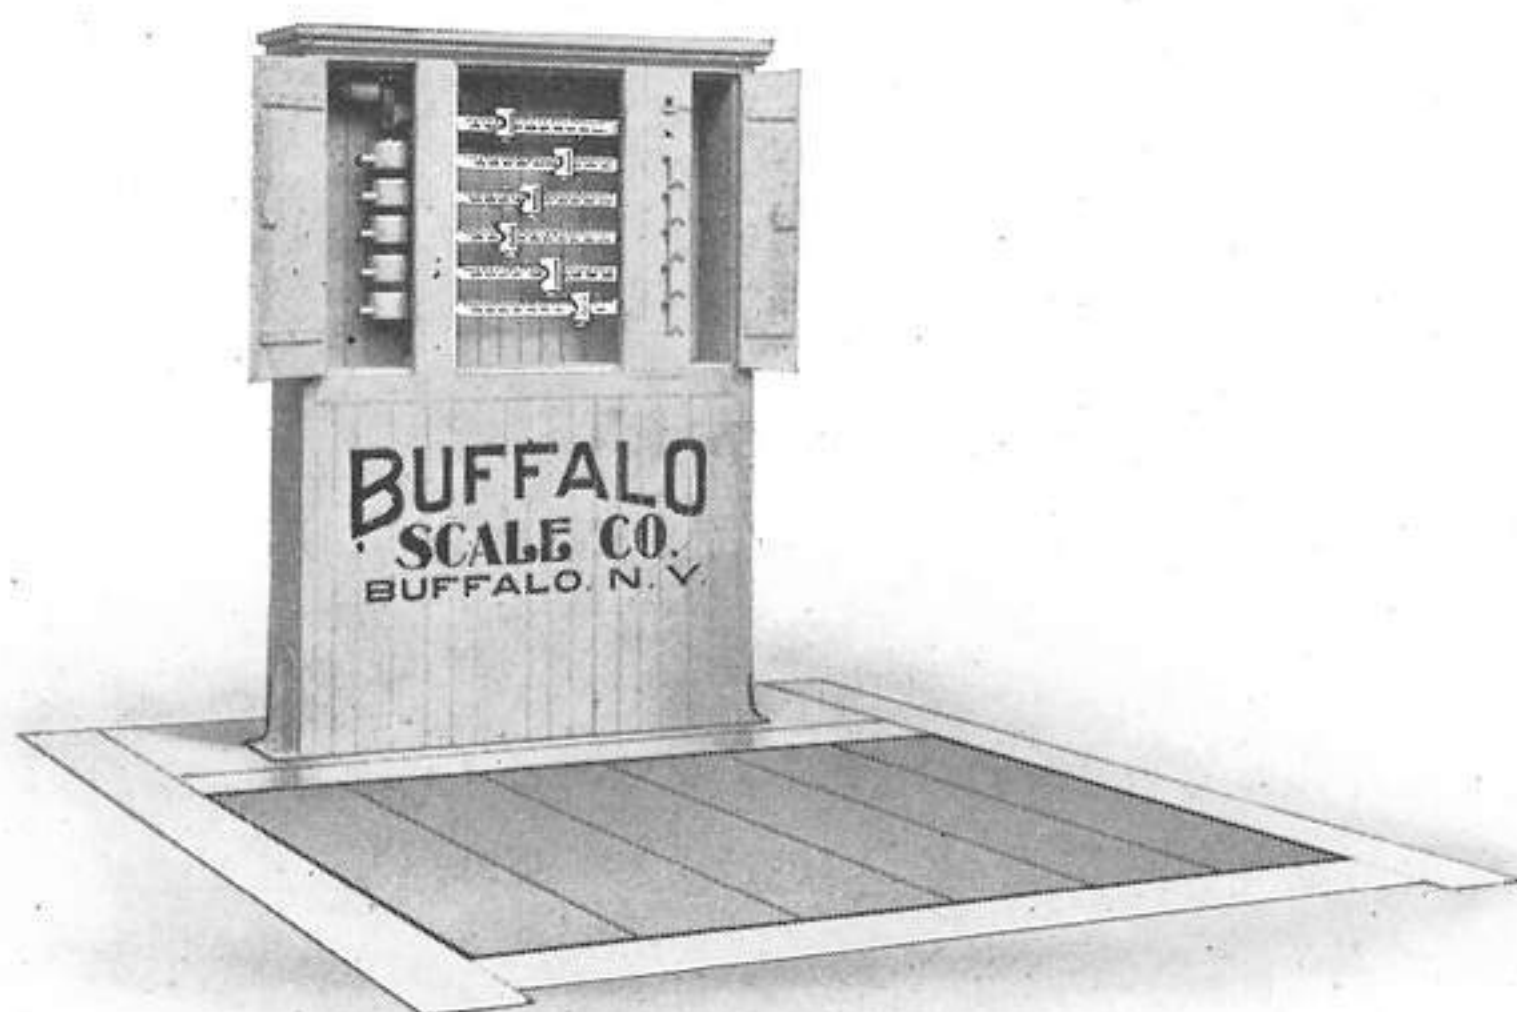

## BREWERS' TWO-PILLAR GRAIN OR MALT SCALES

HOPPER SCALES FOR MALT, GRAIN, MEAL, ETC.

This scale may be built with steel beams or timber to carry hopper.

Price is exclusive of timber or steel beams.

No.	Capacity		Opening for Hopper	Price
	Bushels	Pounds		
1827	200	12,000 by 5	79 x 79 inches	\$ 225 00
1829	300	18,000 by 5	79 x 79 "	285 00
1831	350	21,000 by 5	79 x 79 "	300 00
1833	400	24,000 by 5	79 x 79 "	320 00

1851	1600	96,000 by 5	120 x 120 "	900 00
1853	1800	108,000 by 5	120 x 120 "	1100 00
1855	2000	120,000 by 5	120 x 120 "	1200 00

## FURNACE-CHARGING SCALES

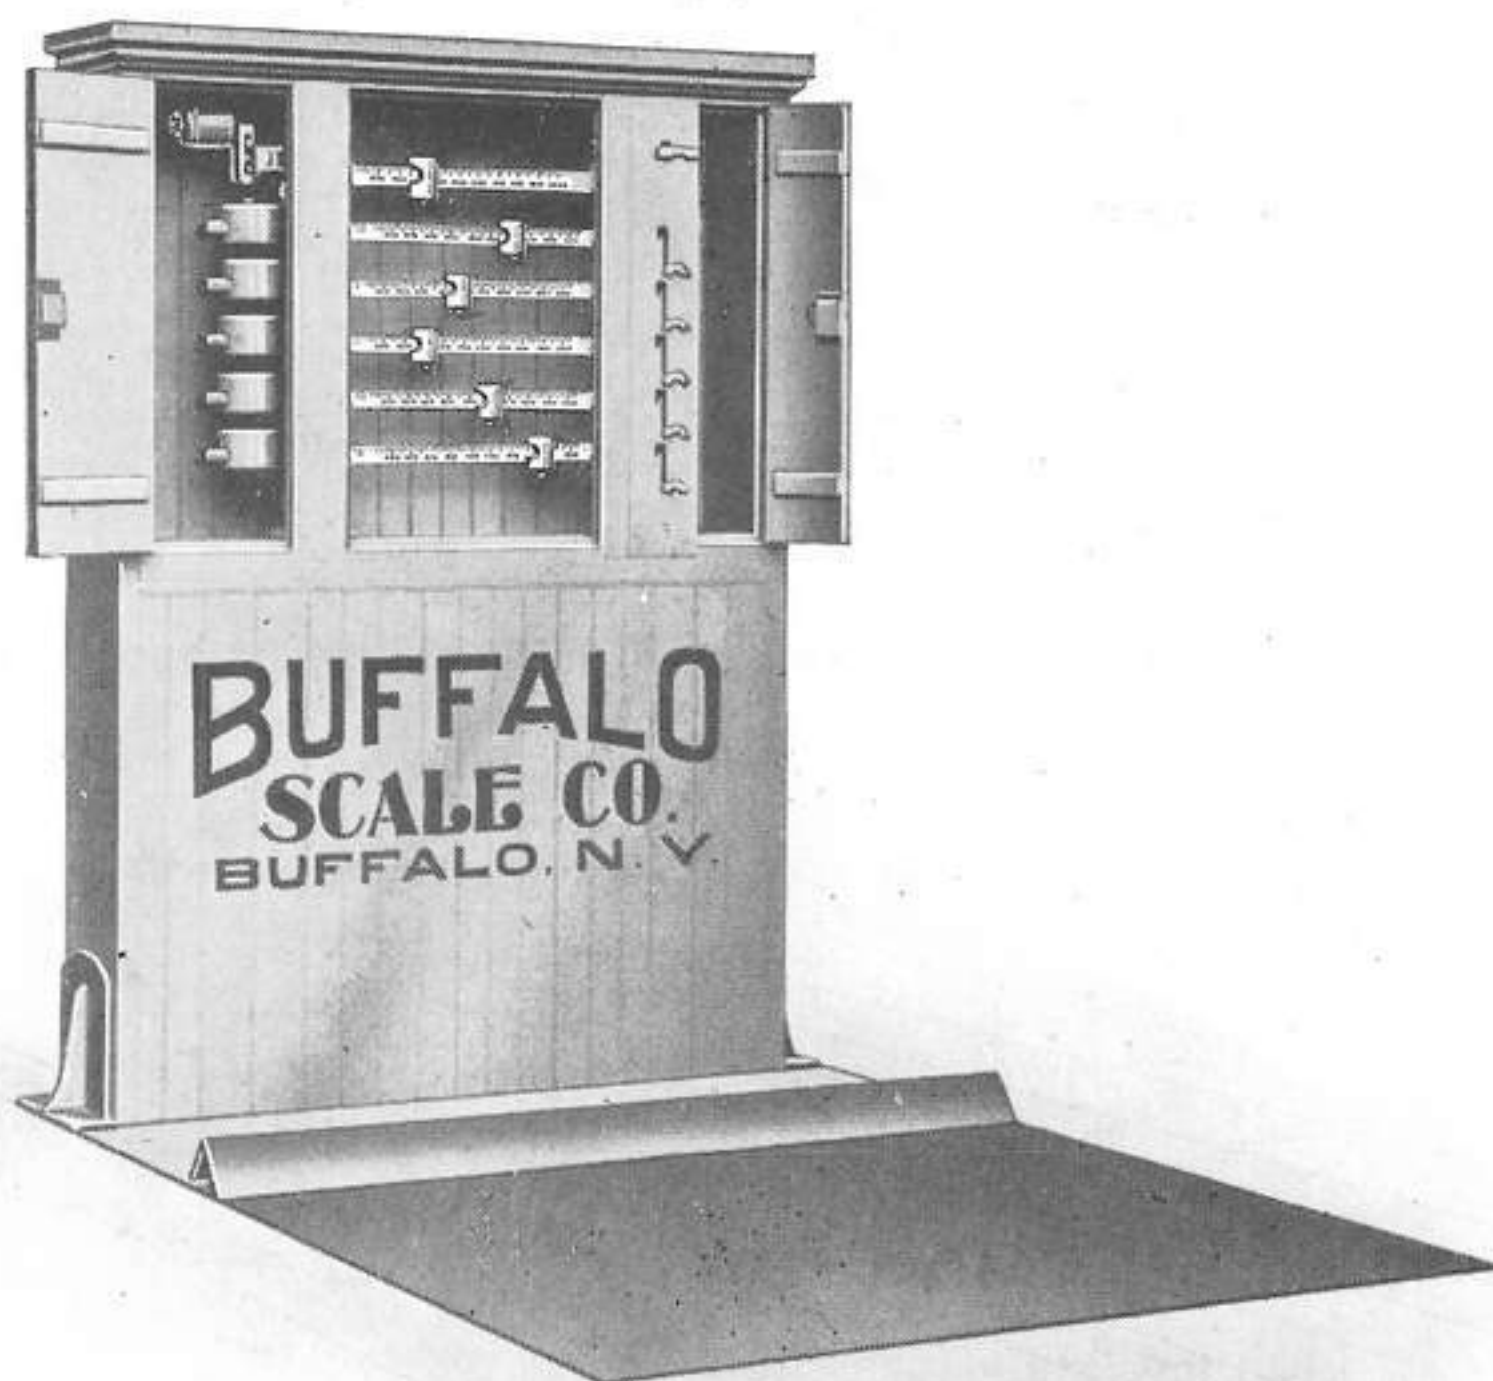

WITH FOUR OR MORE BEAMS

This scale is designed for charging a furnace with a given quantity of four or more different kinds of ore, fluxes, coal or metal. It is so arranged that (by means of indicators outside of the beam box) all the weighing can be done by a person who cannot read, the indicators being first arranged by the foreman. The beam box can be locked so that the weigher or other employees about the furnace cannot change the weights or know how the furnace is being charged.

The frame and platform of this scale may be made of hard wood or steel, which are not furnished by us. Instructions for building are sent with each scale. All other parts are furnished by us.

Additional beams, \$10.00 each, extra.

No.	Capacity	Platform	Price
2000	4 tons, 2000 lbs. each beam	5 x 4 feet	\$230 00

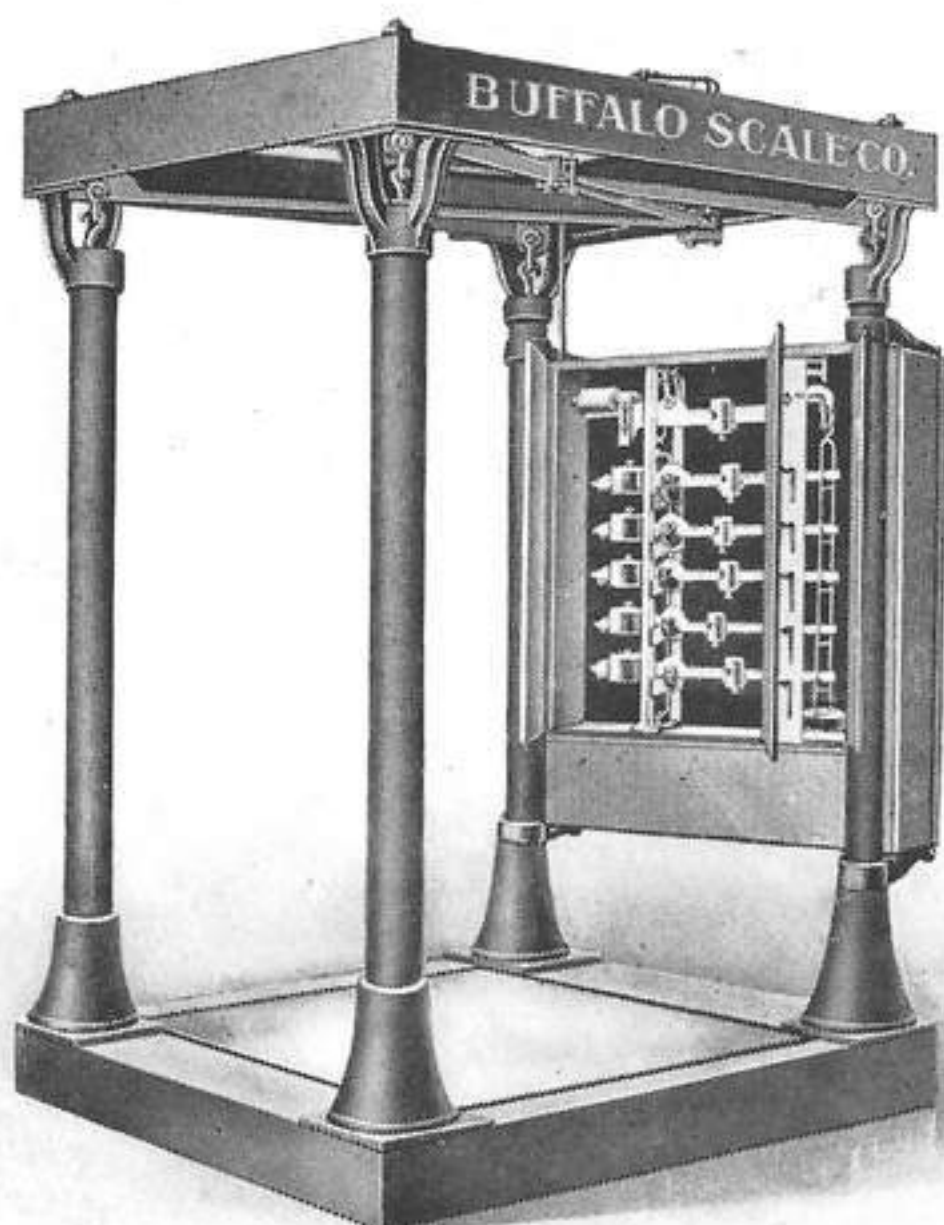

## FURNACE-CHARGING SCALES

DORMANT PATTERN. WITH FOUR OR MORE BEAMS

This style of furnace-charging scale is built like a Dormant, and is furnished with box complete ready to put into the floor. The frame and platform are made of iron, and the latter is flanged as shown in cut.

No.	No. of Beams	Capacity Each Beam	Platform	Price
2002	4	1500 by 5 lbs.	50 x 48 inches	\$305 00
2003	5	1500 by 5 lbs.	50 x 48 "	315 00
2005	6	1500 by 5 lbs.	50 x 48 "	325 00
2007	7	1500 by 5 lbs.	50 x 48 "	335 00
2009	8	1500 by 5 lbs.	50 x 48 "	345 00

## FURNACE-CHARGING SCALES

### SUSPENSION PATTERN

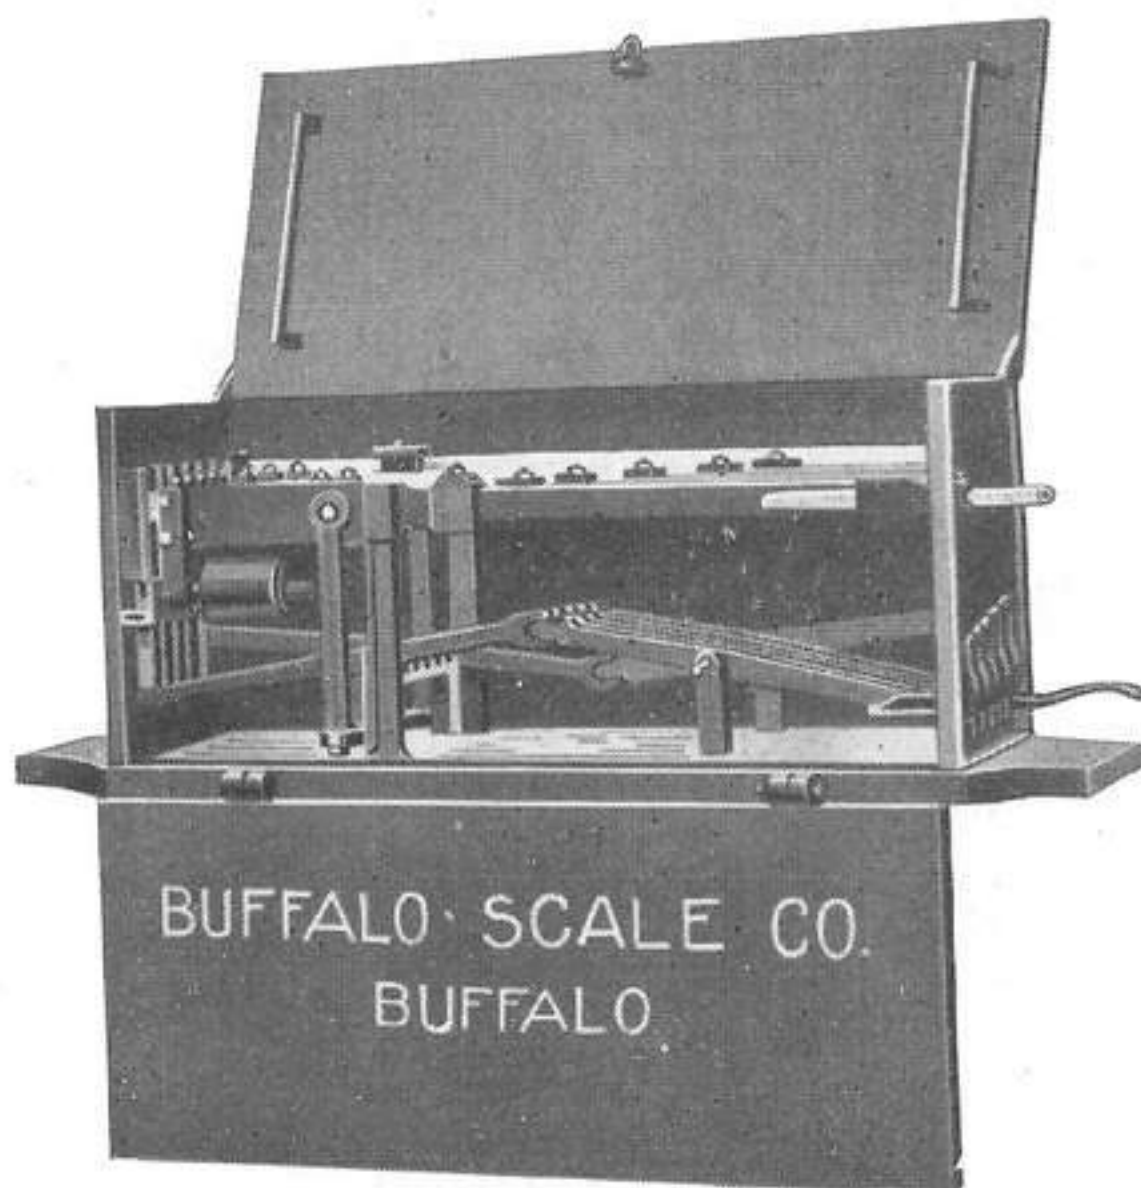

All metal except platform and beam box.

Capacity of each charging beam is 2000 by 5 pounds.

No.	Beams	Height of Posts	Platform	Price
2004	4	8 feet	5 x 6 feet	\$450 00
2006	5	8 "	5 x 6 "	460 00
2008	6	8 "	5 x 6 "	470 00
2010	7	8 "	5 x 6 "	480 00
2012	8	8 "	5 x 6 "	490 00

### WITH WOOD POSTS AND PLATFORM

2015	4	8 feet	5 x 6 feet	\$300 00
2017	5	8 "	5 x 6 "	310 00
2019	6	8 "	5 x 6 "	320 00
2021	7	8 "	5 x 6 "	330 00
2023	8	8 "	5 x 6 "	340 00

## FURNACE CHARGING BEAMS

### REMOVABLE BEAMS IN IRON BEAM BOX

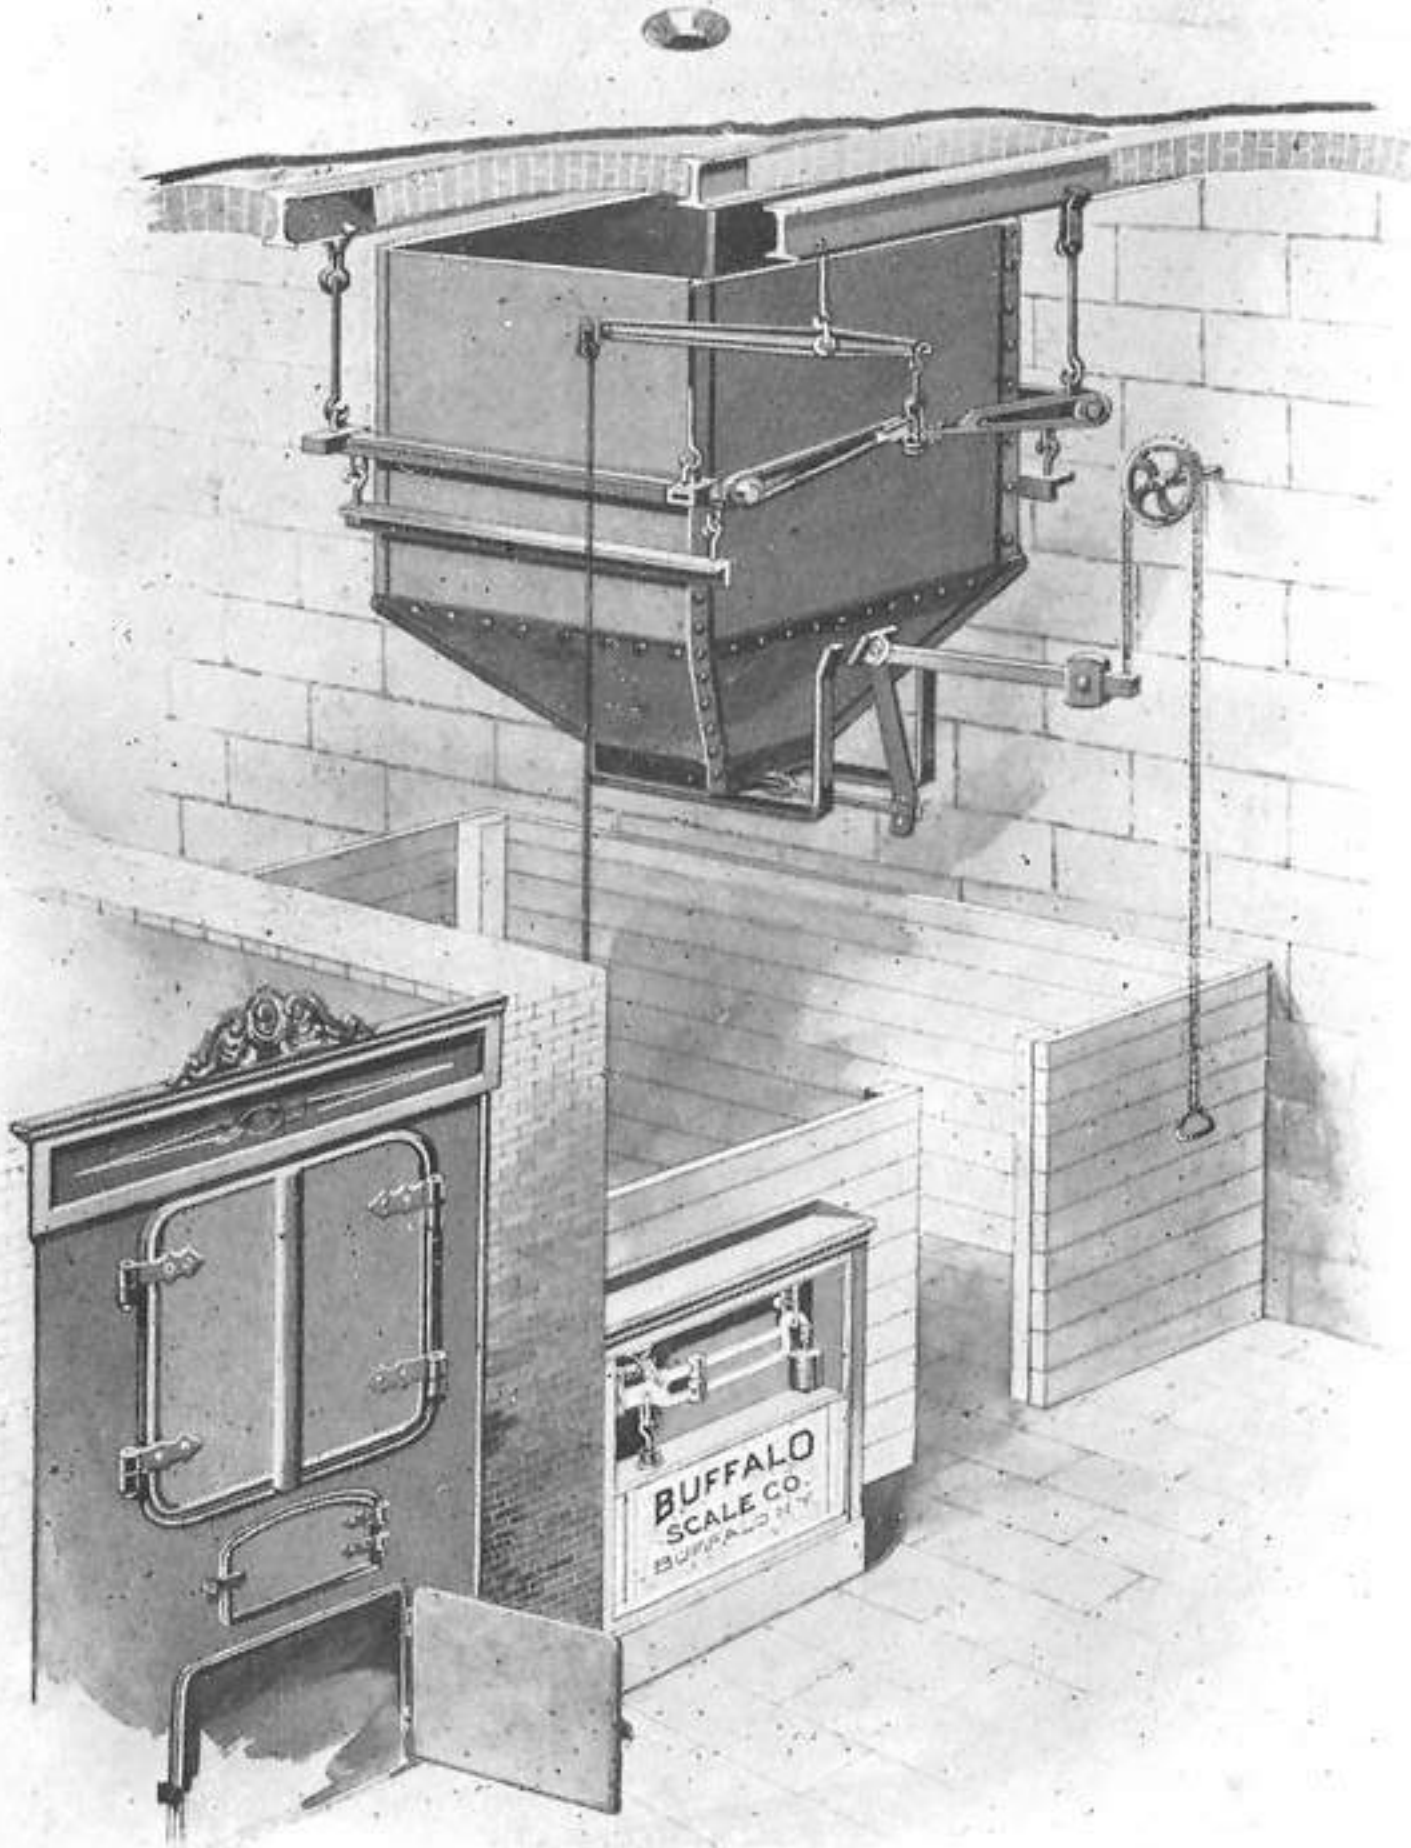

For use on Charging Scales; has four to ten independent beams, all of which are removable, making it convenient to set the poises to the weights desired.

When the poises are set and the box locked, the beams are put in play one at a time by means of latches on outside of box, and an indicator shows when balanced.

Each beam is graduated to 1,600 pounds by 5 pounds, unless otherwise specified.

If so ordered, the charging beams will be left blank, and a templet provided for the setting of the poises. The plus and minus beam, shown operative from outside, is attached at advance in price of \$10.00.

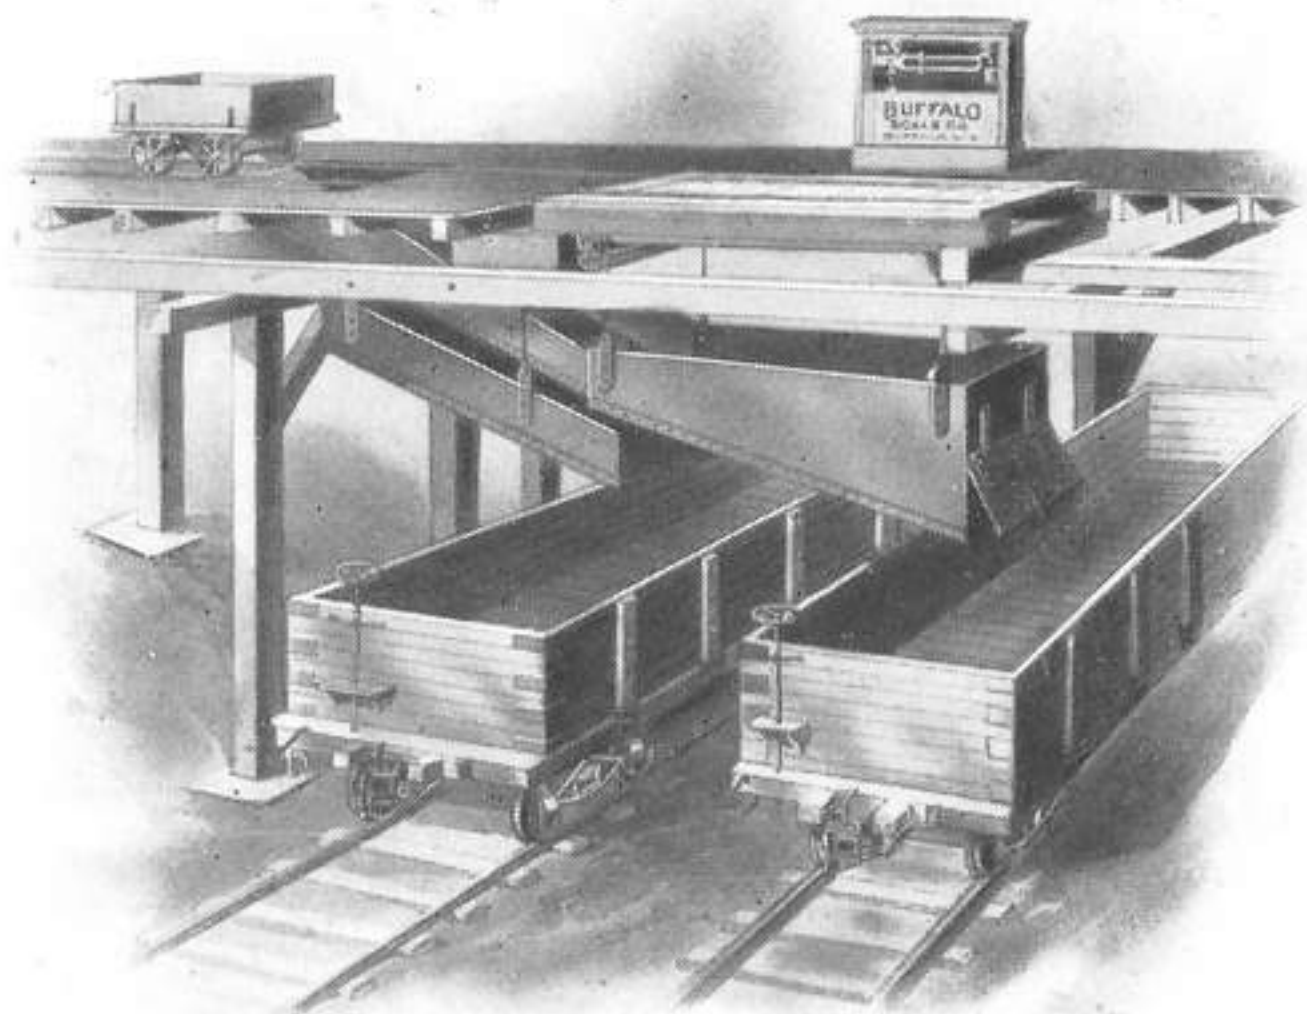

Price four-beam outfit complete .....	\$100.00
Each additional beam .....	10.00

## SUSPENSION COAL HOPPER SCALES

This scale is especially adapted for weighing coal as it is received in buildings. It can be so placed under the sidewalk that all coal delivered will fall into the hopper, where it is weighed. By this means the consumer can ascertain the precise quantity of coal he receives, with absolute accuracy, and without delay or inconvenience.

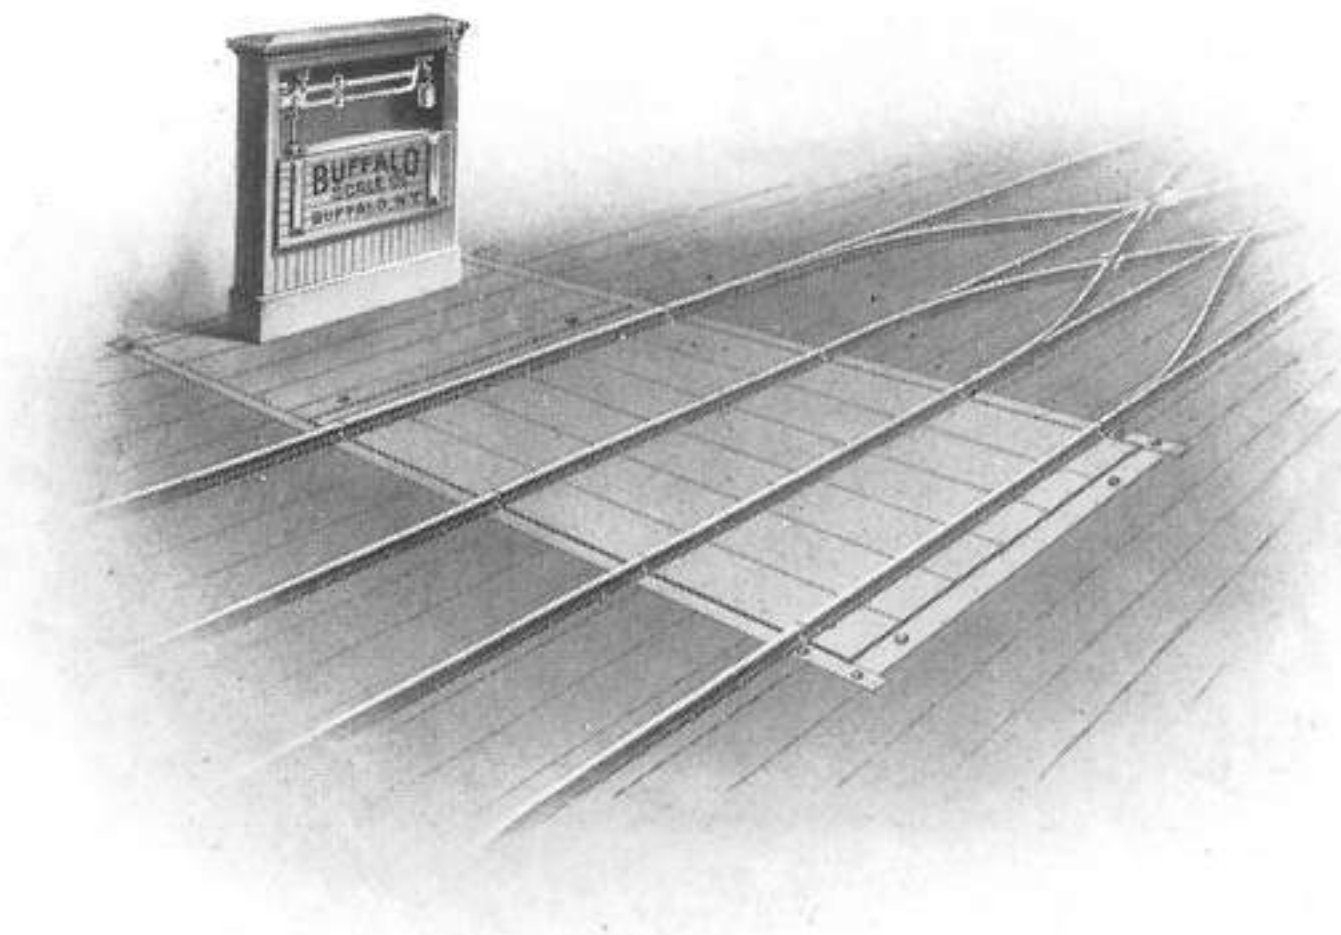

Plans will be furnished and prices given upon application.

## COAL TIPPLE SCALES

This scale is designed for weighing coal at mines, as it comes from the screens and before it passes into the cars on shipping track. The hopper is suspended from the scale, so that when the door is opened the coal discharges direct into the cars. We can furnish scales for this purpose of all sizes from 4 x 6 to 8 x 16 feet, and capacity from 2 to 6 tons.

No.	Capacity	Platform	Price
2100	4 tons	14 x 8 feet	\$185 00

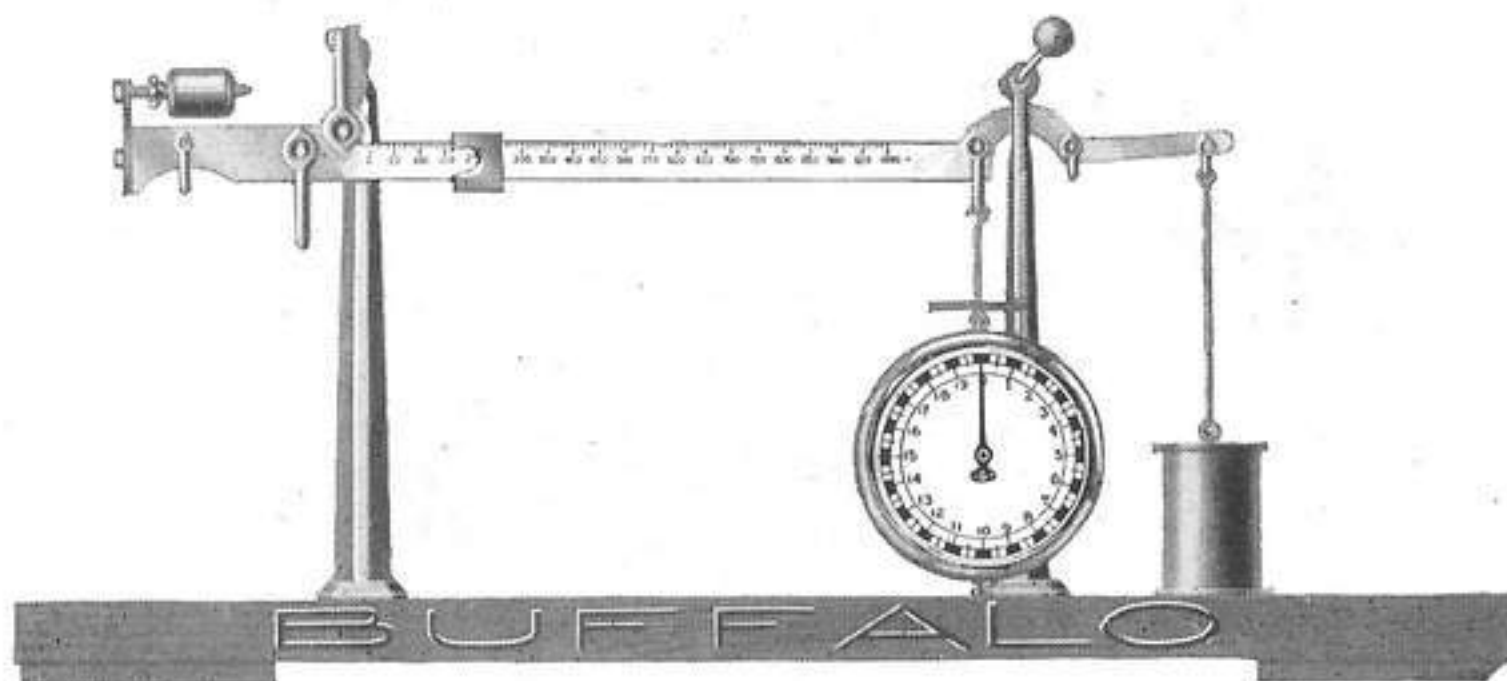

## COAL MINE SCALES

This coal mine scale is similar to our regular line of Miner Scales shown on page 124, except that it is made with a long platform at right angles with the beam, permitting two tracks for mine cars to be laid across it, as shown in illustration.

While designed to be used on a tippie, this scale is suitable for any location where it is desirable to have two industrial tracks on one scale.

Prices do not include material for erecting or beam box.

No.	Capacity	Platform	Distance from Edge of Platform to Beam	Price, Double Beam
2108	4 tons	6 x 10 feet	2 feet	\$160 00

## QUICK WEIGHING BEAMS

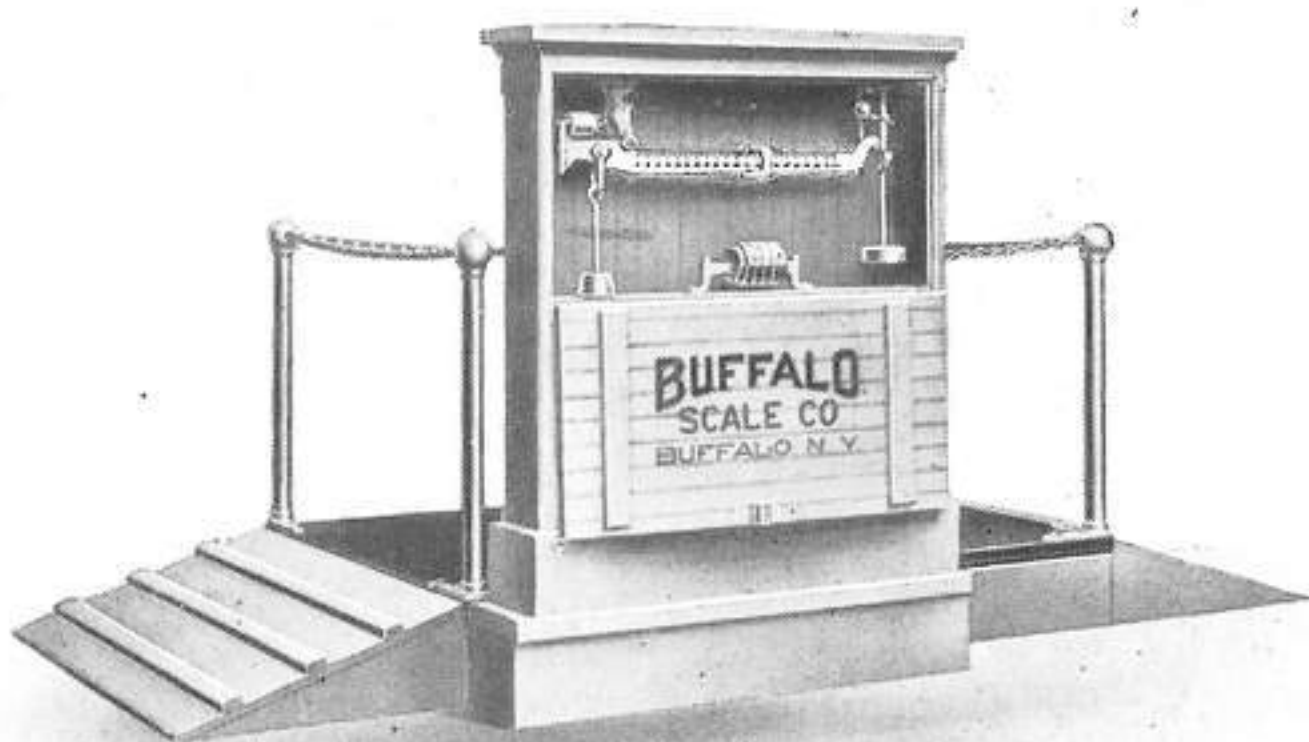

This Quick Weighing Beam consists of a spring dial attached to the beam of a Miner or Wagon Scale.

It is suitable for quick weighing where 50-pound graduations are sufficiently close, as is the case with bituminous coal when weighed at the mines before screening.

Where used for mine work, the weight of the tippie cars is balanced by the poise on the brass beam. The dial shows the net weight up to 2,000 pounds.

If the net loads are over 2,000 pounds, weights are added to counterpoise so that the full capacity of the scale may be used.

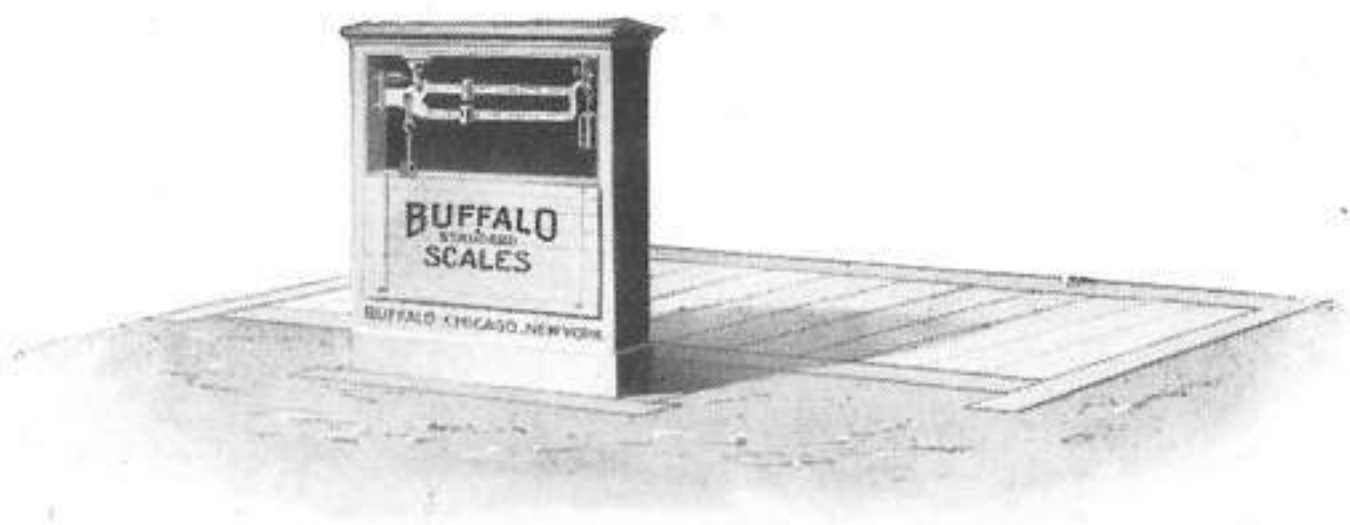

Prices on application.

## PORTABLE BULLOCK SCALES

This scale is designed for weighing a single animal. It is self-contained and easily assembled. When used for other work than weighing cattle, it may be had without post and chain guards, at a reduction of \$10.00 from list. The price of scale does not include the inclines as illustrated.

No.	Capacity	Platform	Price
2110	2000 lbs.	74 x 52 inches	\$150 00

## WAGON AND STOCK SCALES

For prices see page 117.

This scale is made in both the solid or the shallow pit and trussed lever patterns.

**PLATFORM SIZES:** In addition to the sizes shown, the dimensions of platforms may be varied to a considerable extent without increasing the cost of the scale. Inquiries as to scales of special size and capacity will receive prompt attention.

**BEAMS:** Scales as listed are furnished with heavy double brass beams graduated by  $2\frac{1}{2}$ -pound marks or with compound beams which on scales up to ten tons capacity are graduated by 2-pound marks. For illustrations of Beams see page 125.

**EXTENSIONS:** The distance from the platform of the scale to the beam rod may be increased up to 20 feet at a slight additional cost.

**BEAM FIXTURES:** For office use tall iron pillars and wood cap or short iron pillars and shelf will be furnished at additional list prices given on page 127.

**FRAMING:** Buffalo Wagon Scales may be erected with either timber or steel framing.

While the first cost of timber is less than steel, the latter makes a much more rigid, durable scale and is strongly recommended. See page 118 for further description of steel construction.

The prices quoted on Wagon and Stock Scales are exclusive of lumber, including beam box, or steel, and foundation, which are to be furnished by purchaser.

# WAGON AND STOCK SCALES

2240	20 "	22 x 8 "	2 " 2 "	500 00	530 00

## SHALLOW PIT. SOLID LEVER PATTERN

In Buffalo Shallow Pit Wagon Scales the levers are heavy enough not to require truss rods—a construction similar to that of R. R. Track Scale levers. Such scales while slightly more expensive than the trussed lever pattern are very desirable for damp pits where truss rods may rust enough to impare the accuracy of the scale.

See page 118 as to steel construction.

No.	Capacity	Platform	Edge of Platform to Beam Rod	Price Double Beam	Price Comp. Beam
2200	3 tons	14 x 7 feet	1 ft. 8 1/2 ins.	\$165 00	\$185 00

2232	15 "	16 x 8 "	2 " 2 "	410 00	440 00

## STEEL FRAMED WAGON AND STOCK SCALES

Steel is much superior to timber for framing a wagon scale. It is a more rigid, substantial, durable construction. It is easily assembled and if there is any occasion to move the scale, it is easily taken apart.

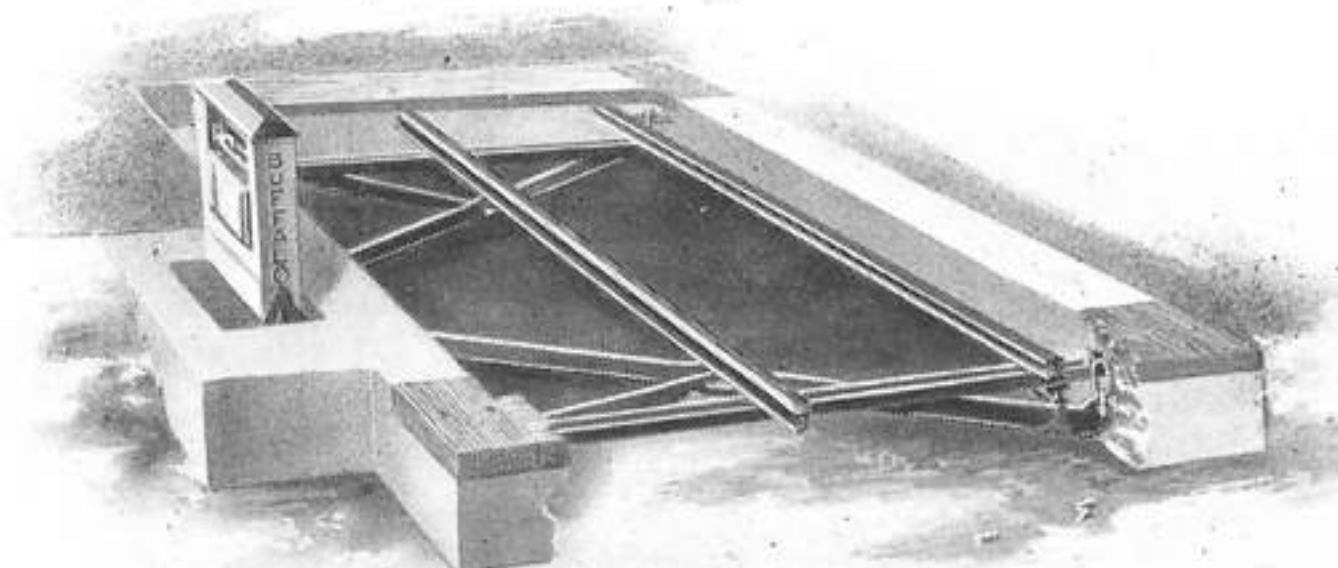

Where steel framing is used, the only lumber required is for the platform and beam box.

We will be glad to quote prices on steel fabricated and ready to assemble for any Buffalo Wagon, Miner, Depot or R. R. Track Scale.

However, where the freight haul is long, the necessary steel may be bought from local dealers in accordance with our specifications and the freight charges saved.

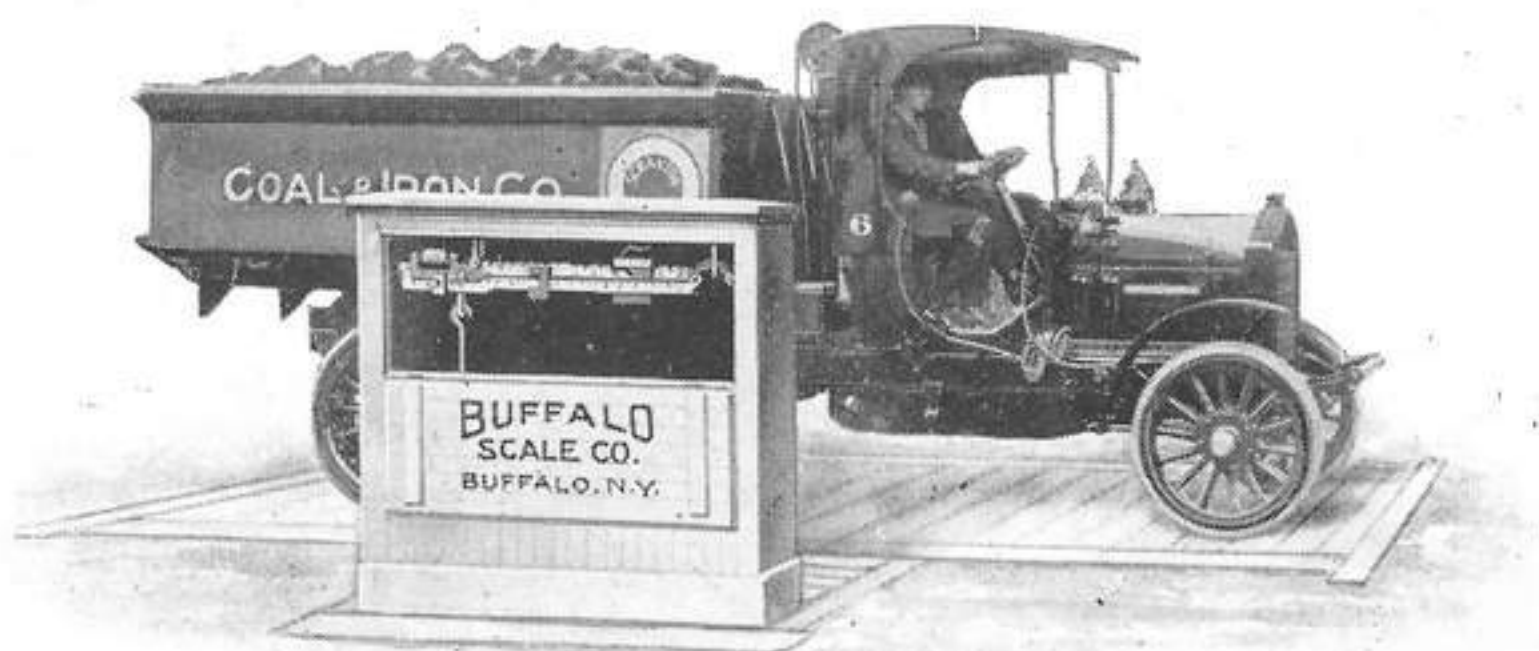

We strongly recommend steel construction.

For list prices of Wagon Scales see page 117.

Steel framed Wagon Scales with platform planking removed.

Upper illustration shows full steel framing. Lower illustration shows partial steel frame with coping of concrete.

## BUFFALO AUTO TRUCK SCALES

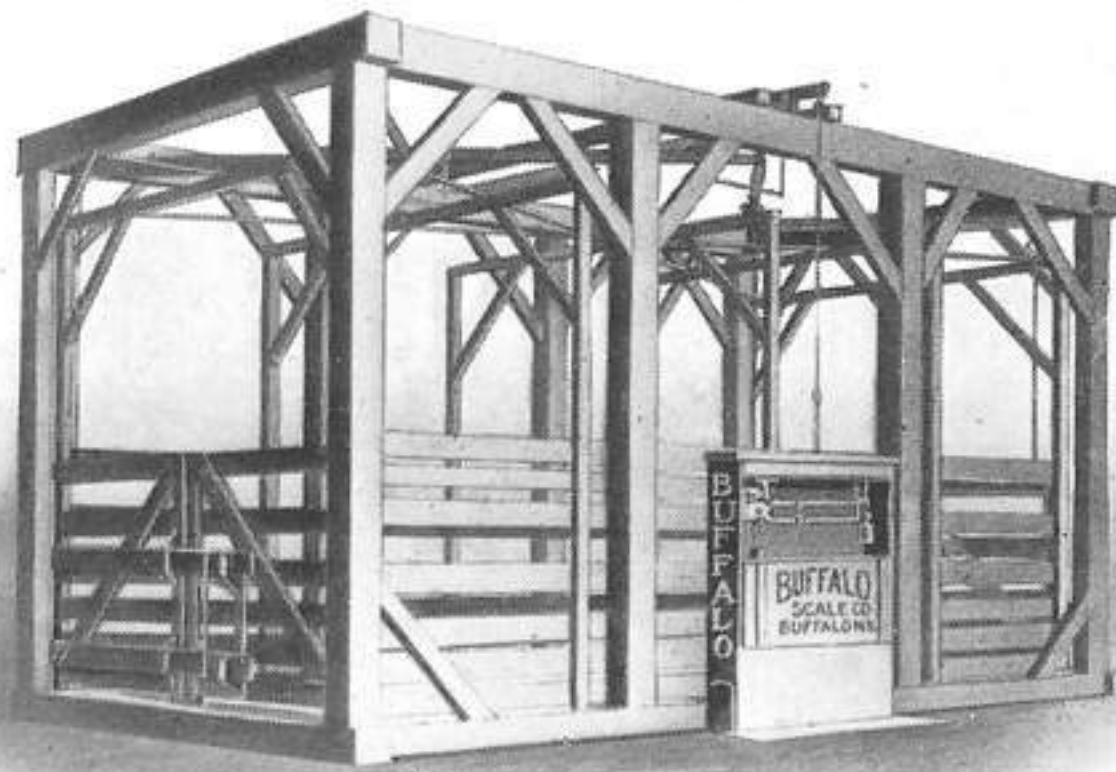

Buffalo Auto Truck Scales are of the Railroad Track Scale type; see details shown on page 129.

High powered automobile trucks, like railroad rolling stock, put unusual shock and strain on scales. This type is designed to withstand such hard service.

While timber framing may be used, steel is strongly recommended as being more satisfactory.

List prices cover scale mechanism only. Customer furnishes structural steel unless otherwise quoted; also lumber, including beam box, and the foundation.

No.	Capacity	Platform	Edge of Platform to Beam Rod	Price Double Beam	Price Comp. Beam

## SUSPENSION WAGON SCALES

WITH DOUBLE BRASS BEAM

Graduated by  $2\frac{1}{2}$ -pound marks.

Timber, including beam box, also foundation for above scales to be furnished by purchaser. The frame should be protected by a roof.

No.	Capacity	Size of Platform	Price
2250	3 tons	14 x 12 feet	\$220 00
2252	4 "	14 x 12 "	245 00
2254	5 "	14 x 12 "	270 00
2256	6 "	14 x 12 "	315 00
2258	8 "	14 x 12 "	340 00
2260	10 "	14 x 12 "	365 00
2262	6 "	16 x 12 "	325 00
2264	6 "	18 x 12 "	335 00
2266	6 "	24 x 12 "	355 00
2268	10 "	16 x 12 "	375 00
2270	10 "	18 x 12 "	385 00
2272	10 "	24 x 12 "	400 00

## DUMP SCALES

Beams graduated by  $2\frac{1}{2}$ -pound marks.

For use in elevators and grain warehouses for convenient and quick weighing and dumping of grain.

The platforms of these scales are entirely free from levers, so that any dump can be built in the platform.

Prices are exclusive of timber and foundation.

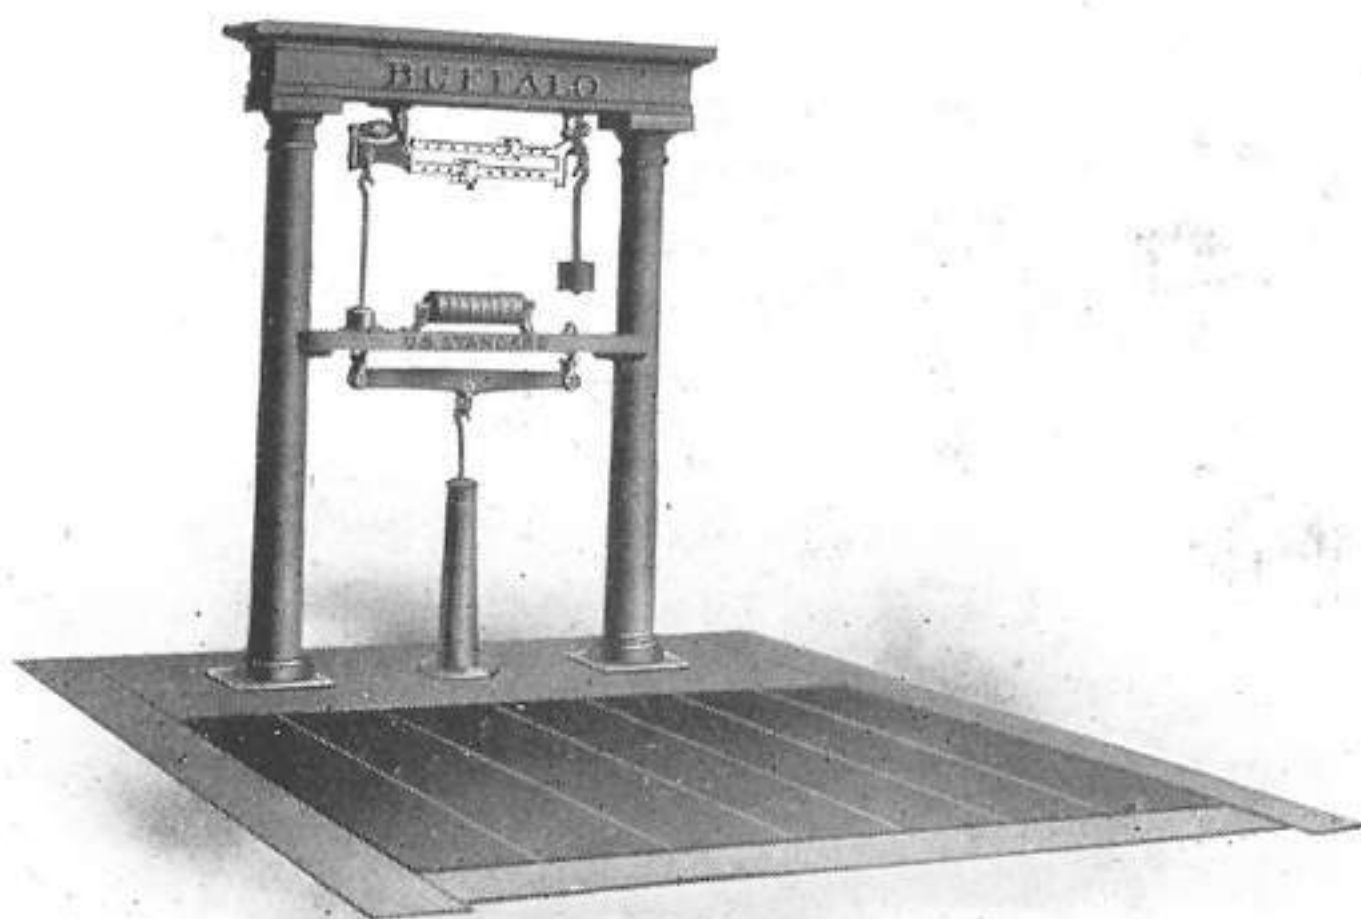

No.	Capacity	Size of Platform	Price
2300	4 tons	16 x 8 feet	\$190 00
2302	5 "	16 x 8 "	220 00
2304	6 "	22 x 8 "	265 00
2306	8 "	22 x 8 "	300 00

For list on iron pillar outfit for beams, as shown, see page 127.

With above scales we can furnish dump irons as follows:

Our own manufacture, extra, net, \$15.00.

Controllable, extra, net, \$40.00.

## RAILROAD DEPOT SCALES

WITH PILLARS AND CAP

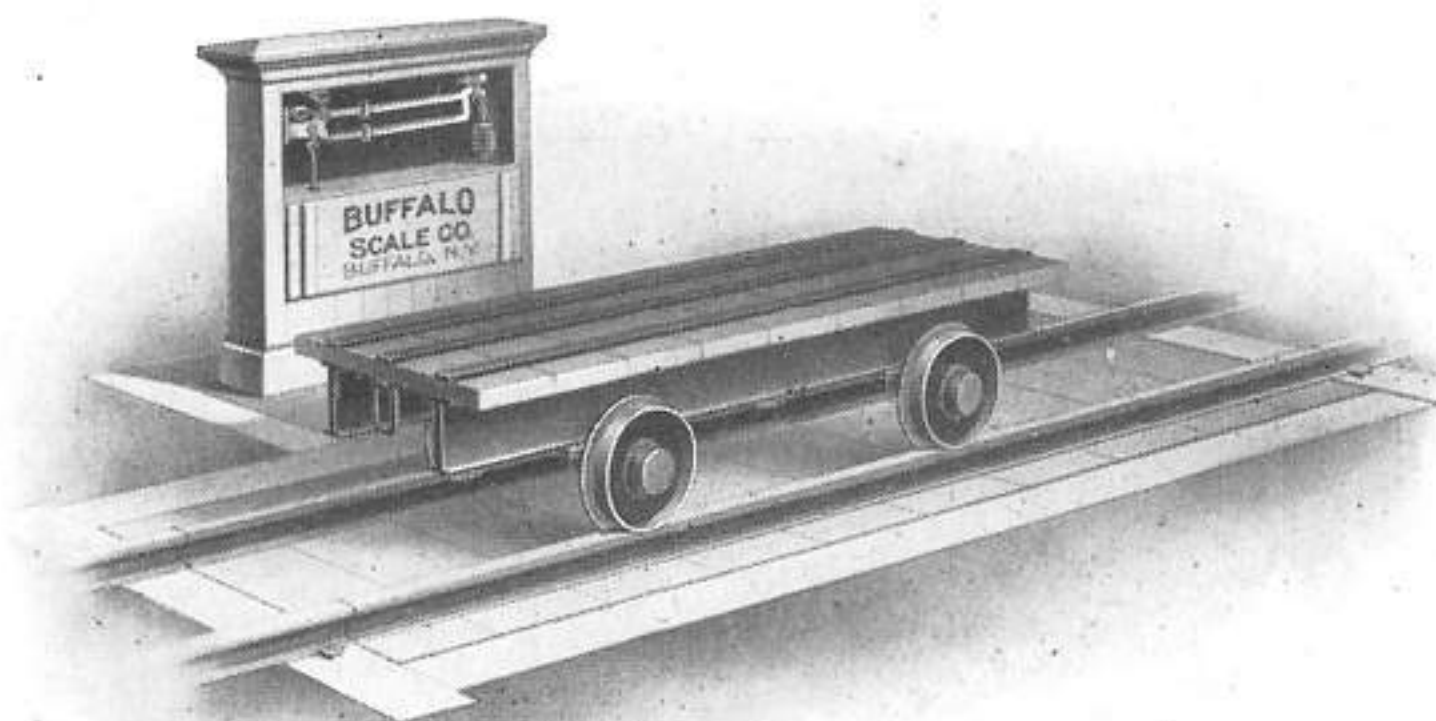

This scale is designed for use in freight houses and factories for heavy weighing. Prices named are exclusive of foundations or timber, including beam box, which are to be furnished by purchaser.

Double beam \$8.00 more than single beam.

### GRADUATION OF BEAMS

2 ton—Single beam.....	500 lbs. x 2	lbs.
3 to 10 ton—Single beam.....	1000 lbs. x 2 ½	lbs.
2 ton—Double beam .....	Each bar 500 lbs. x 2	lbs.
3 to 10 ton—Double beam {	Top bar 2000 lbs. x 2	lbs.
	Lower bar 1000 lbs. x 2 ½	lbs.

No.	Capacity	Platform	Price Single Beam	Price Comp. Beam
2292	2 tons	4 ½ x 3 feet	\$145 00	\$165 00

2280	6 "	10 x 9 "	240 00	270 00

## INDUSTRIAL RAILWAY SCALES

The use of light, narrow gauge tracks with push cars in all kinds of modern plants has created a demand for this type of small track scale.

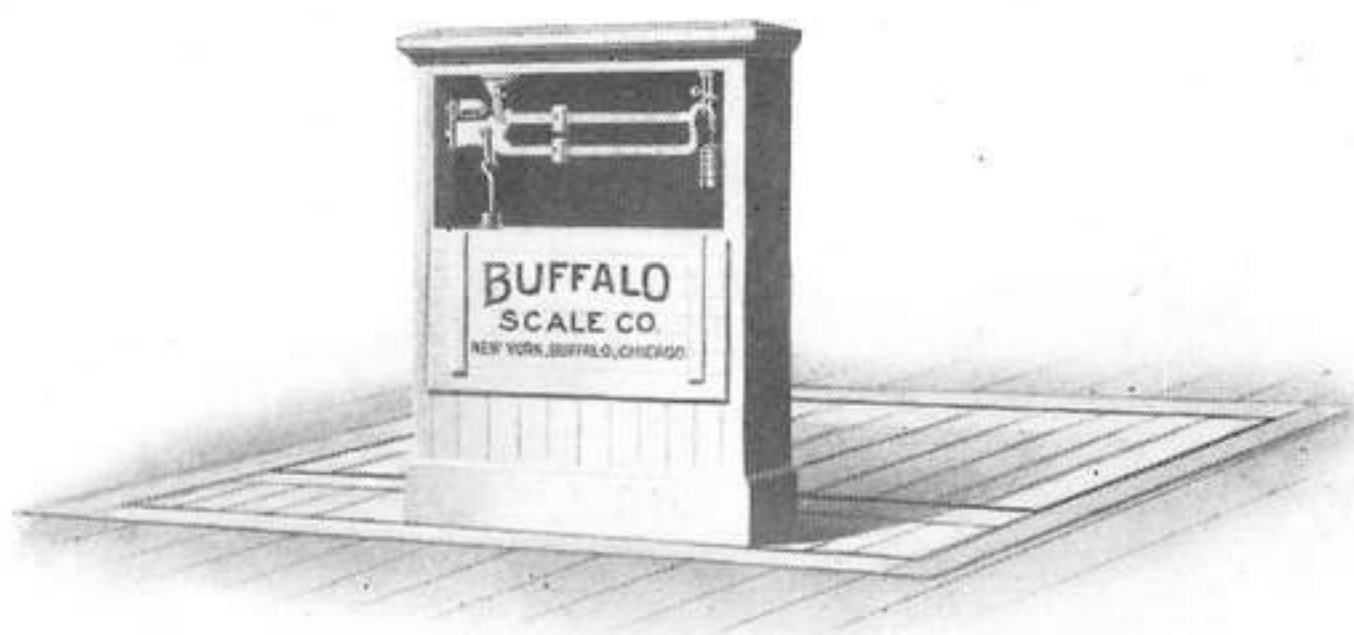

They may be had for any gauge of track and may be erected with timber or structural steel, with wood, boiler plate or cast plate platforms.

In addition to scales mentioned below, we recommend our Single Pillar Dormant Scales for this purpose. See page 93.

We will also be pleased to make quotations on special scales of this type as may be desired.

Timber, including beam box, to be furnished by purchaser.

No.	Capacity	Platform	Center of Platform to Beam	Price Single Beam	Price Double Beam	Price Comp. Beam
2297	2 tons	5 feet x 27 inches	43 inches	\$125 00	\$135 00	\$145 00
2298	3 "	5 feet x 27 "	43 "	135 00	145 00	155 00
2299	5 "	5 feet x 27 "	43 "	145 00	155 00	165 00
2301	6 "	12 feet x 27 "	43 "	225 00	235 00	245 00

## MINERS' AND TRANSPORTATION SCALES

WITHOUT PILLARS OR CAP

This scale is designed for weighing small cars, heavy machinery and bulky articles in factories. Special sizes may be furnished if desired.

Double beam, \$8.00 more than single beam.

Purchasers furnish foundation, lumber and beam box.

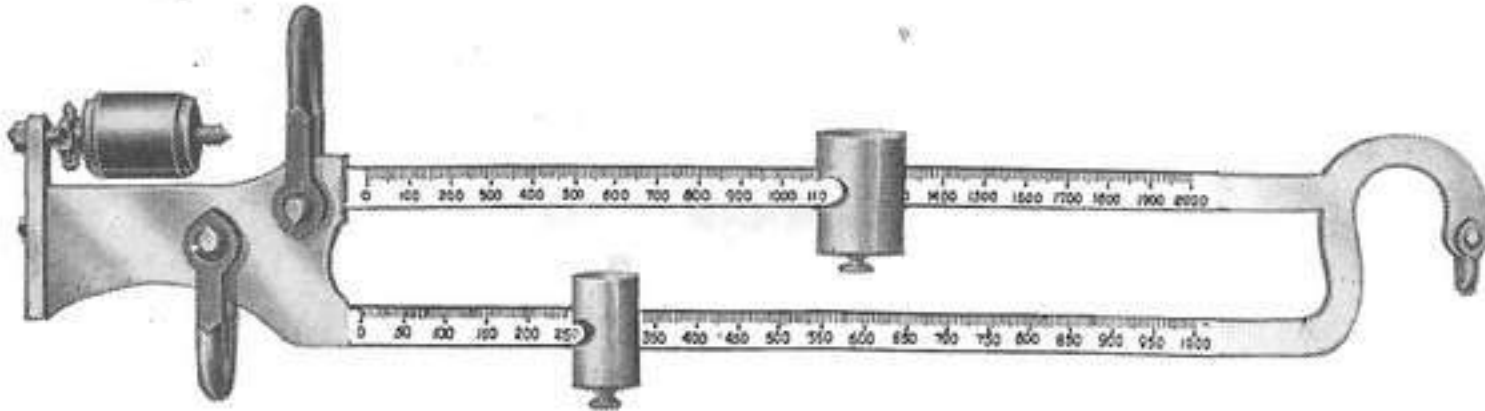

### GRADUATION OF BEAMS

2 ton—Single beam.....	500 lbs. x 2 lbs.
3 to 10 ton—Single beam.....	1000 lbs. x 2 ½ lbs.
2 ton—Double beam.....	Each bar 500 lbs. x 2 lbs.
3 to 10 ton—Double beam {	Top bar 2000 lbs. x 5 lbs.
	Lower bar 1000 lbs. x 2 ½ lbs.

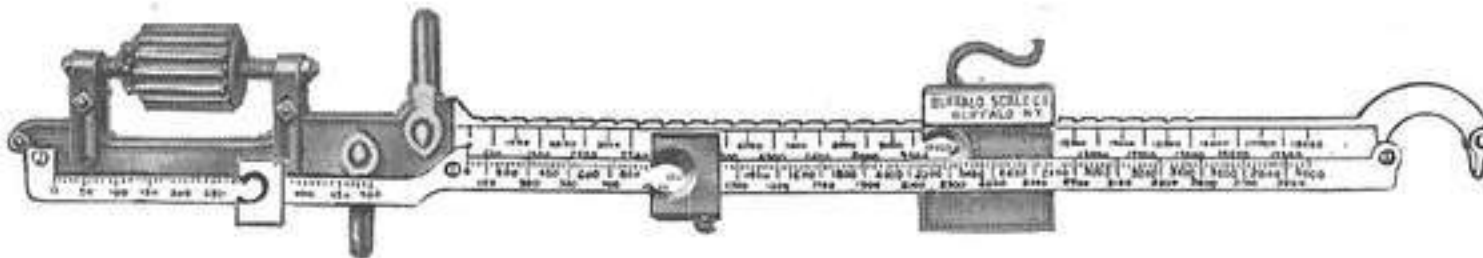

No.	Capacity	Platform	Edge of Platform to Beam Rod	Price Single Beam	Price Comp'd Beam

# BEAMS FOR WAGON, MINER AND R. R. DEPOT SCALES

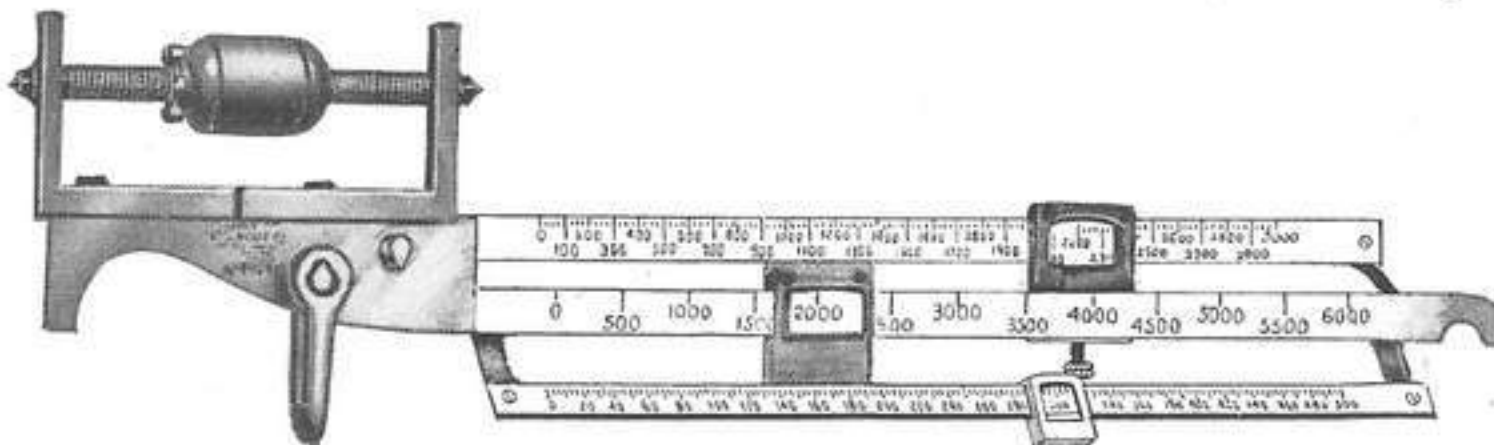

DOUBLE BEAM

COMPOUND BEAM

Requiring no loose weights.

COMBINATION BEAM

Requiring no loose weights.

For Recording Beams see page 128.

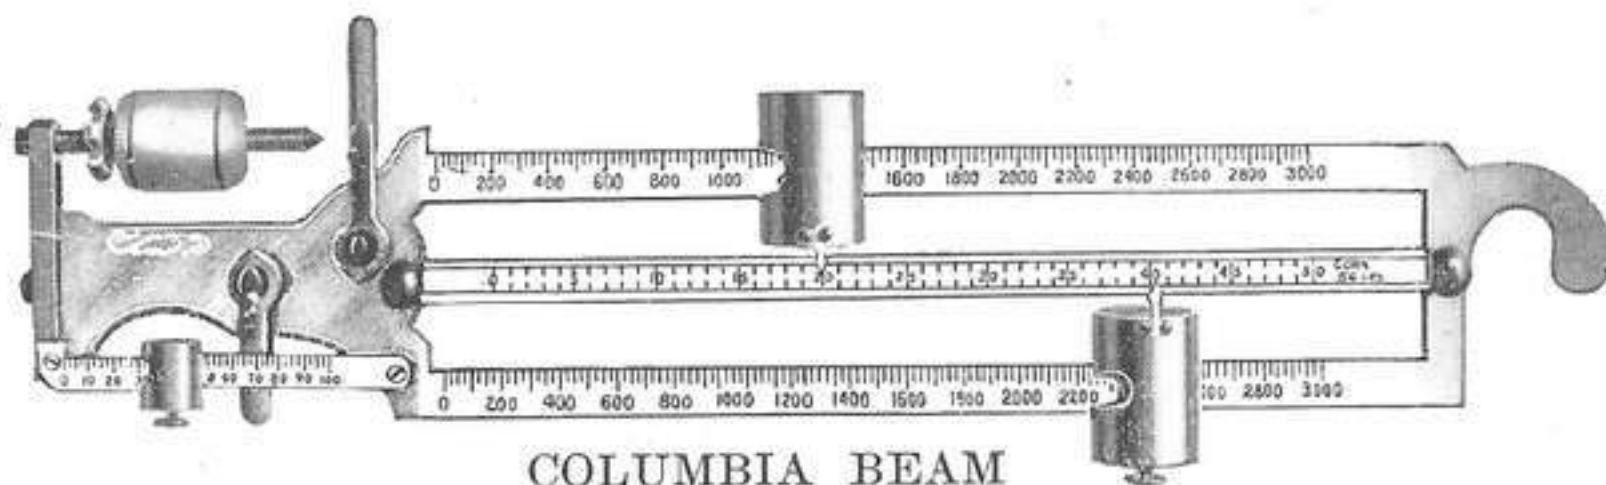

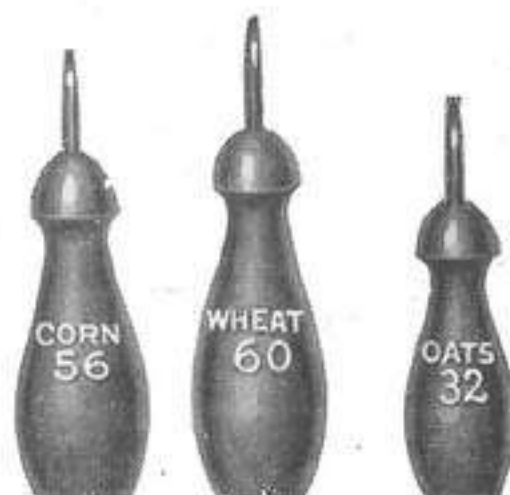

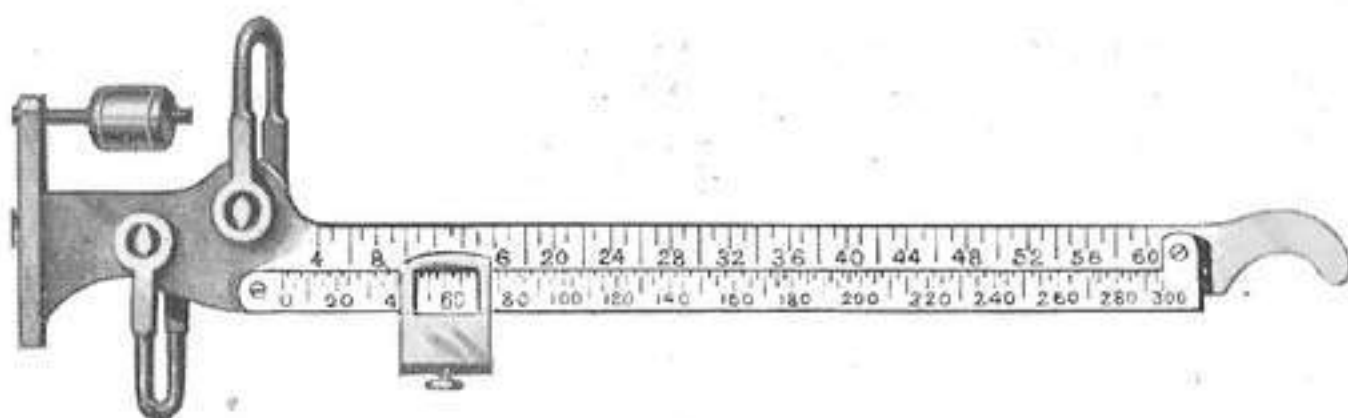

## GRAIN BEAMS

The main beam is notched but is balanced without a poise.

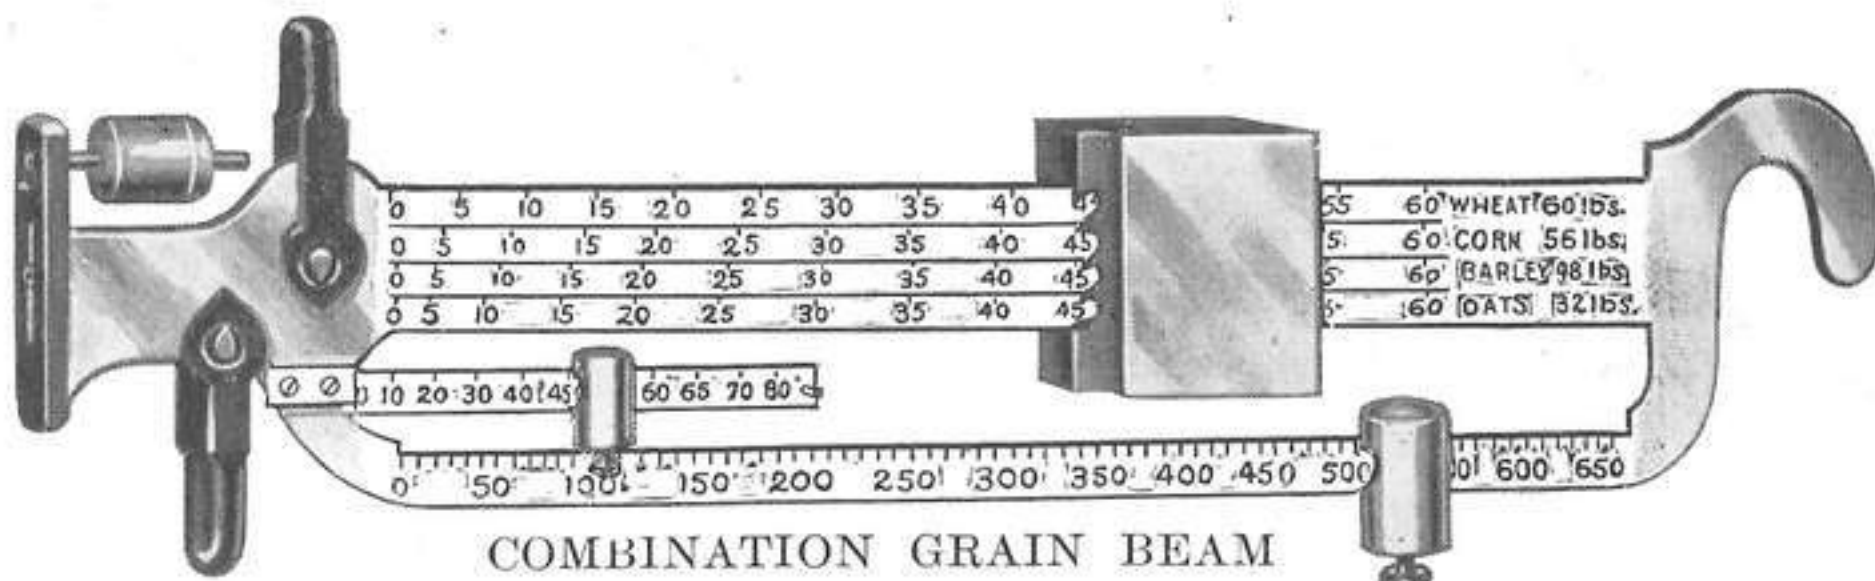

The notches on main beam are marked 1, 2, 3, 4, etc. If the wheat poise is hung in a certain notch, it will balance so many bushels of *wheat*, while the oat poise at the same notch would indicate the same number of bushels of *oats*, and so on. Any number of poises may be used with this scale, and may, of course, be adjusted so as to weigh any commodities in any denominations. The small beam in front of the main beam is marked in 1-pound graduations up to 300 pounds, and is used for taking tare or of weighing fractions of bushels. Unless otherwise ordered, these beams will be furnished with brass poises—for wheat 60 pounds to a bushel, corn 56 pounds to a bushel, and oats 32 pounds to a bushel.

Price, with 40 and 60-bushel scales, \$20.00 extra.

Price, with 100 and 150-bushel scales, \$30.00 extra.

COLUMBIA BEAM

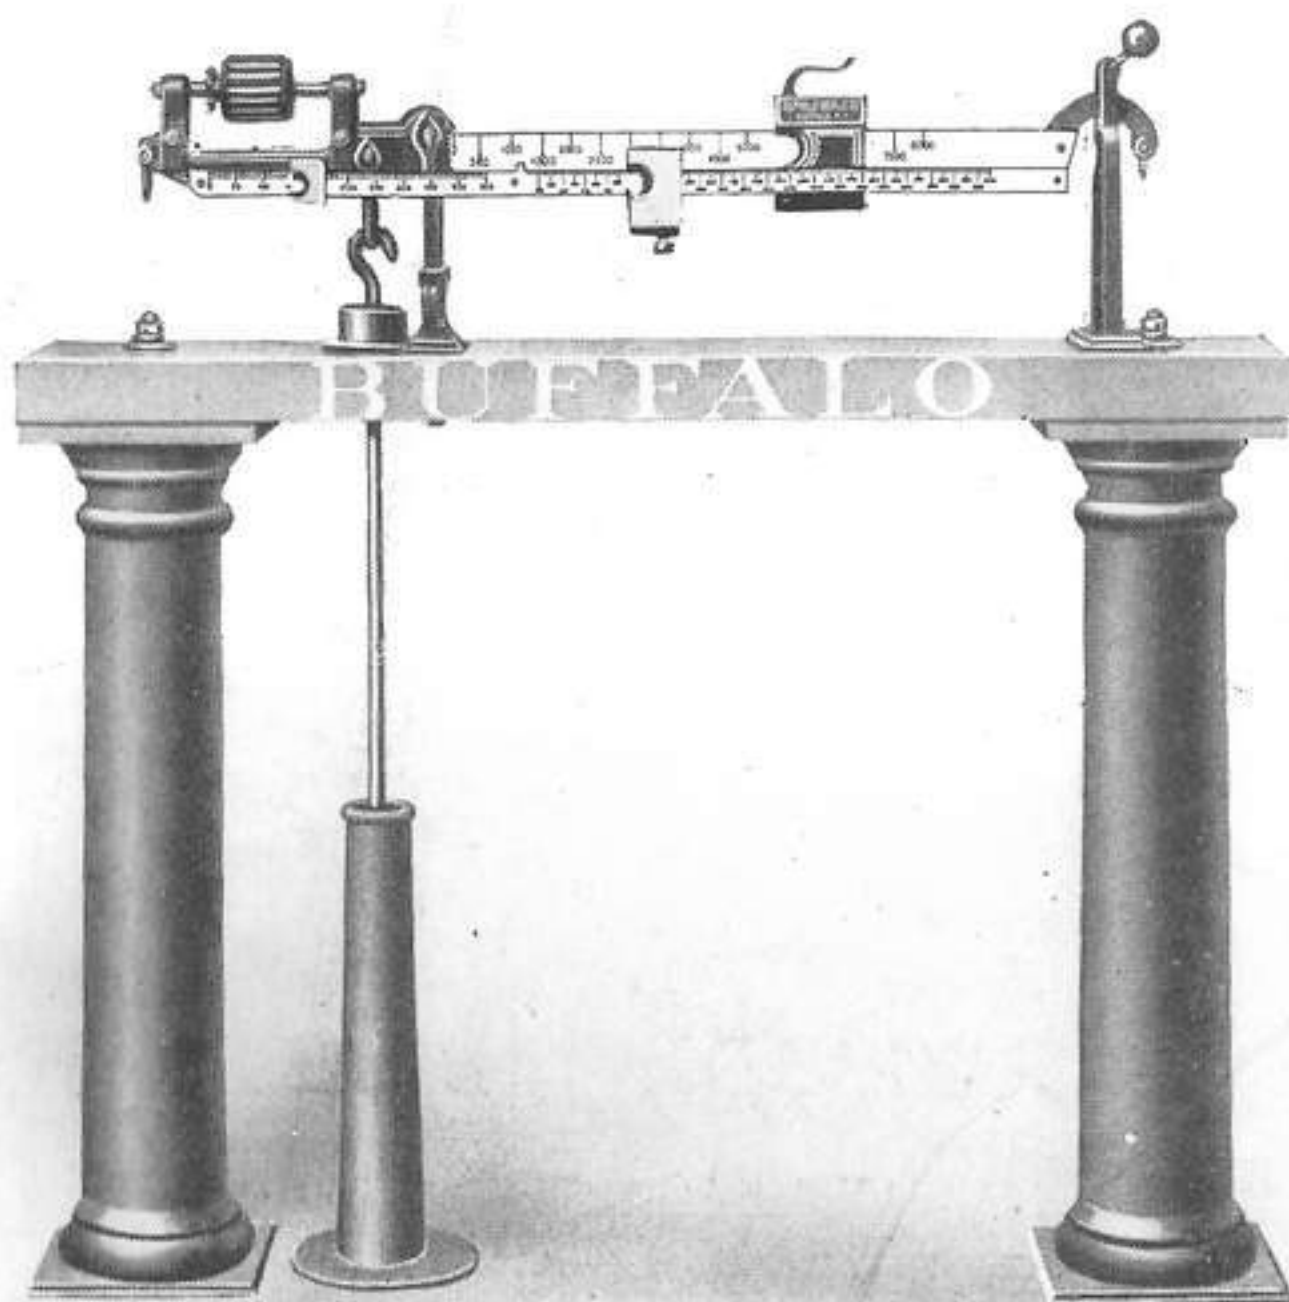

COMBINATION GRAIN BEAM

Price, with 60-bushel scales, \$25.00 extra.

Price, with 100-bushel scales, \$30.00 extra.

Price, with 125 to 150-bushel scales, \$40.00 extra.

## SHORT IRON PILLAR BEAM OUTFIT

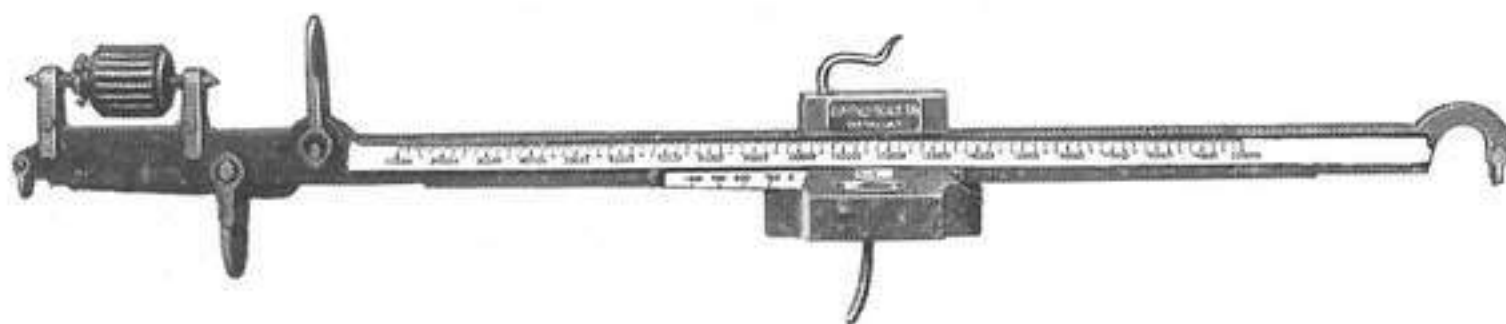

This substantial and convenient beam outfit may be furnished with any Miner, Wagon, Stock or Railway Scales. It is especially designed for durability and convenience in use. Prices do not include beam, counterpoise or weights.

3 to 5-ton scales .....	\$25 00
6 to 15-ton scales .....	30 00
Scales of over 15 tons capacity .....	35 00
Goose-necks, alone, per set.....	6 00

## TALL IRON PILLAR BEAM OUTFIT

This outfit is furnished with Miner, Wagon, Stock or Railway Scales at the following prices, to be added to the prices of the scale, these prices not including beam, counterpoise or weights.

3 to 5-ton scales .....	\$40 00
6-ton scales and over.....	50 00

## RECORDING BEAMS

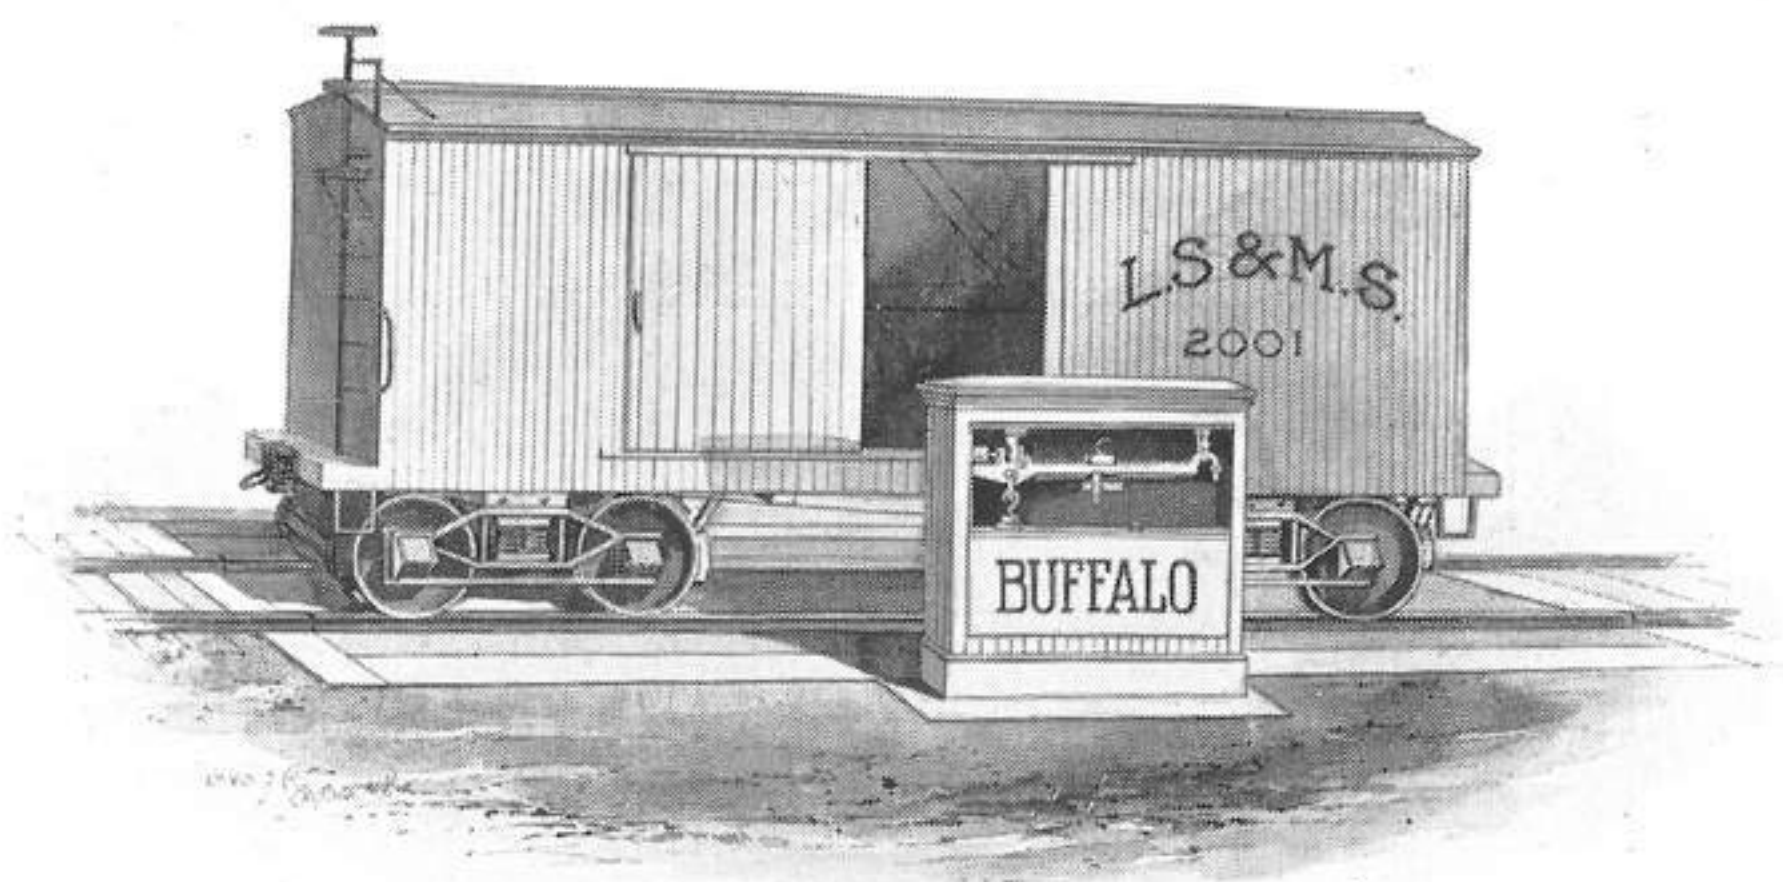

FOR RAILWAY TRACK, WAGON, COAL AND  
HOPPER SCALES

The above illustration represents our Recording or Type Registering Beam, whereby a ticket is printed or stamped, giving a true record of each load weighed. This record entirely prevents the errors which so frequently arise through mistakes in reading the weight.

The device consists of raised figures of hard bronze, on the under side of the beam, corresponding with the regular graduations. There are two slots in the face of the poise, to be used respectively in taking the gross and tare weights, and their relative positions are such that the weights will be printed one over the other for convenience in calculations.

The weighing is done as in the ordinary manner, and, in order to obtain a printed record, a card is inserted in slot and the handle pulled, which forces card into contact with the hard type, and prints the record.

Prices quoted upon application.

## RAILROAD TRACK SCALES

### IRON FRAME, SHALLOW PIT

Buffalo Railroad Track Scales are used by the most exacting railroad, mine and mill trade in the United States and foreign countries. The Pit Scale is the one most commonly used, though the suspended pattern is desirable for many locations. Plans will be furnished for either timber or steel construction. The scales may be built with a dead rail, for the use of locomotives, thus avoiding unnecessary wear. The beam may be single, double, triple or recording. See pages 128 and 136.

An expert mechanic can be furnished to aid and superintend the erection of Buffalo Railroad Track Scales. When writing for prices, give full information as to length and capacity of scales desired, gauge of track, style of beam and where scale is to be located.

All Railroad Track Scales, Pit Pattern, except Suspension Bearing type, are 7 feet 6 inches in width and so furnished, unless otherwise ordered. Where scales are constructed with dead rail, platforms are 7 feet in width.

Exclusive of timber and foundation. Suspension Track Scales  
made to order.

## HEAVY DUTY SUSPENDED BEARING RAILROAD TRACK SCALE

Main Lever of Buffalo 150-ton R. R. Track Scale with Yoke Removed

The increase in weight and capacity of railroad equipment has lead the transportation companies and others of late to demand 150 and 200-ton railroad track scales where ten years ago 80 and 100-ton scales were sufficiently heavy for their use.

In addition to demanding stronger and more durable scales, greater accuracy is also required.

To meet these conditions the Buffalo Scale Company is building a single link, center connected, suspension bearing scale. The general lever plan of this scale conforms to the standard construction used by the Buffalo Scale Company for some years and which has proven most satisfactory.

In the old type of scale, however, the main levers were swung in links from arches and the platform bearings rested solidly upon the main lever bearing-pivots. In the new scale the main levers rest on chairs and the entire system of levers throughout the scale is at all times free from oscillation.

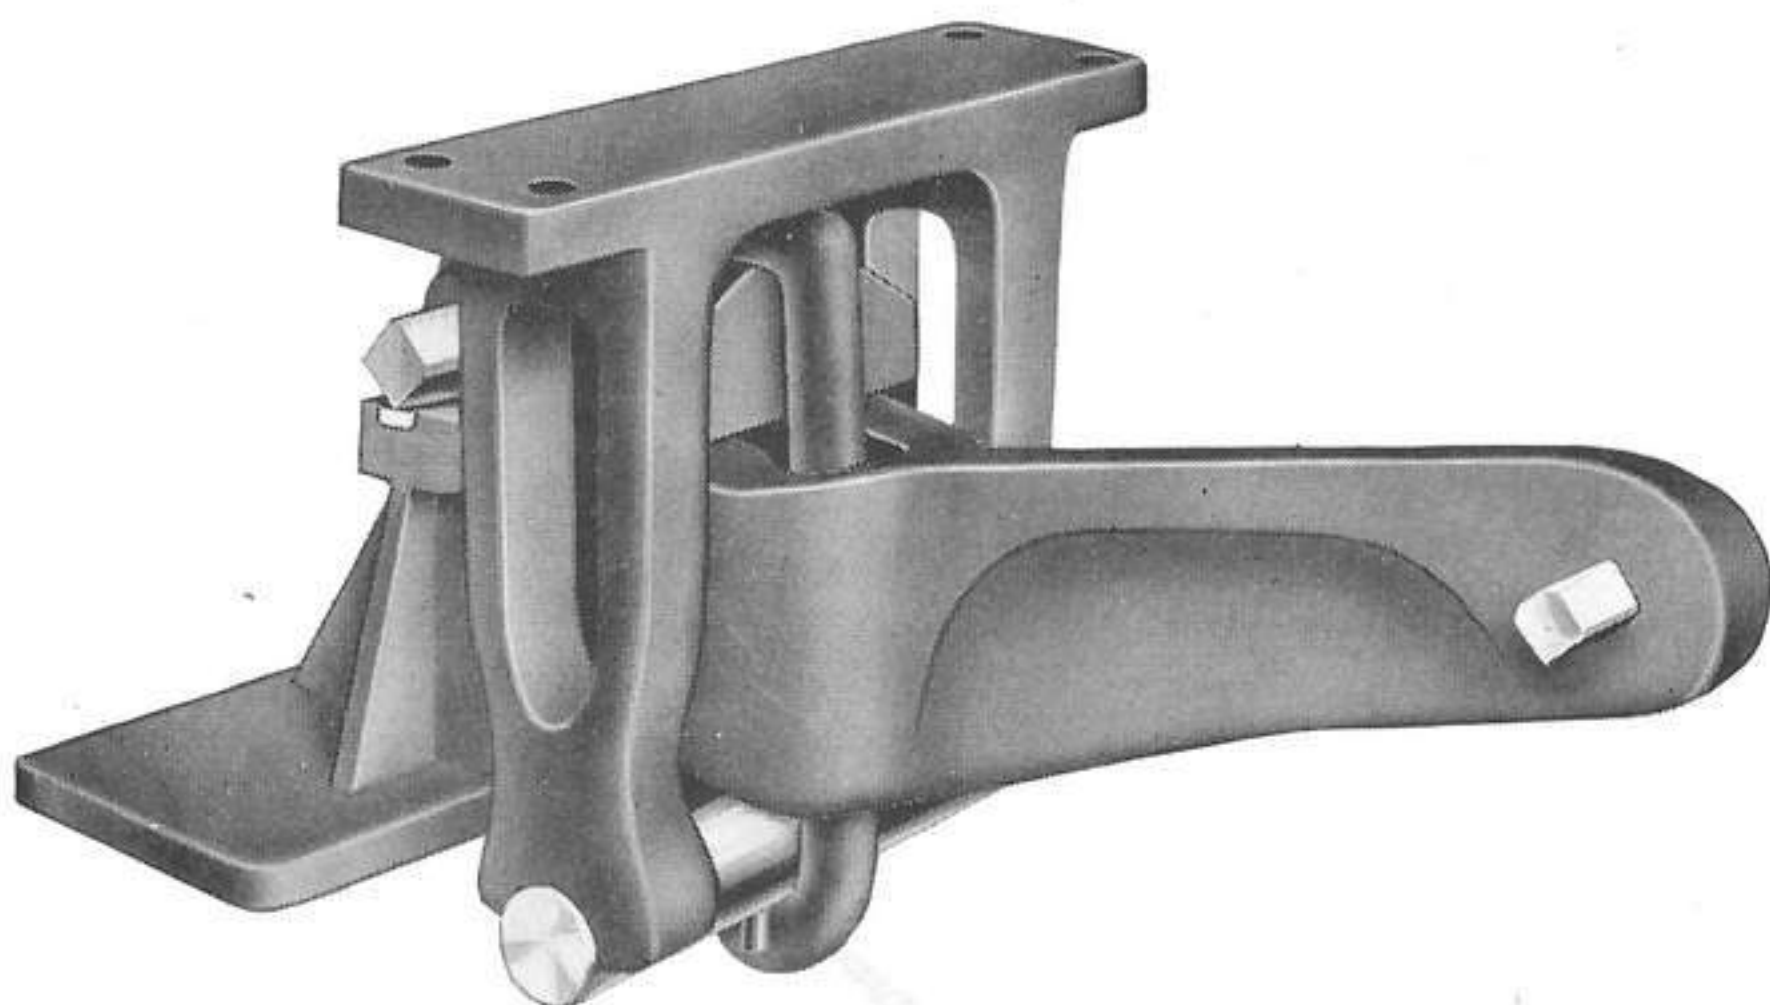

The suspension bearings carrying the platform consist first of a heavy bearing block resting on a main bearing-pivot of equal length. Over this block and extending downward through a vertical slot in the main lever hangs a heavy square topped steel link. Through the bottom of this link passes a steel pin and upon the ends of this pin rests the steel yoke which supports the platform.

In a 4-section scale eight (8) of these bearings carry the load. They permit free oscillation of the platform in all directions, save the pivots from wear and prevent change of balance in the scale, thereby ensuring great accuracy. In other suspension bearings using two links and a rocker bar, the oscillation is less free in a longitudinal than in a transverse direction.

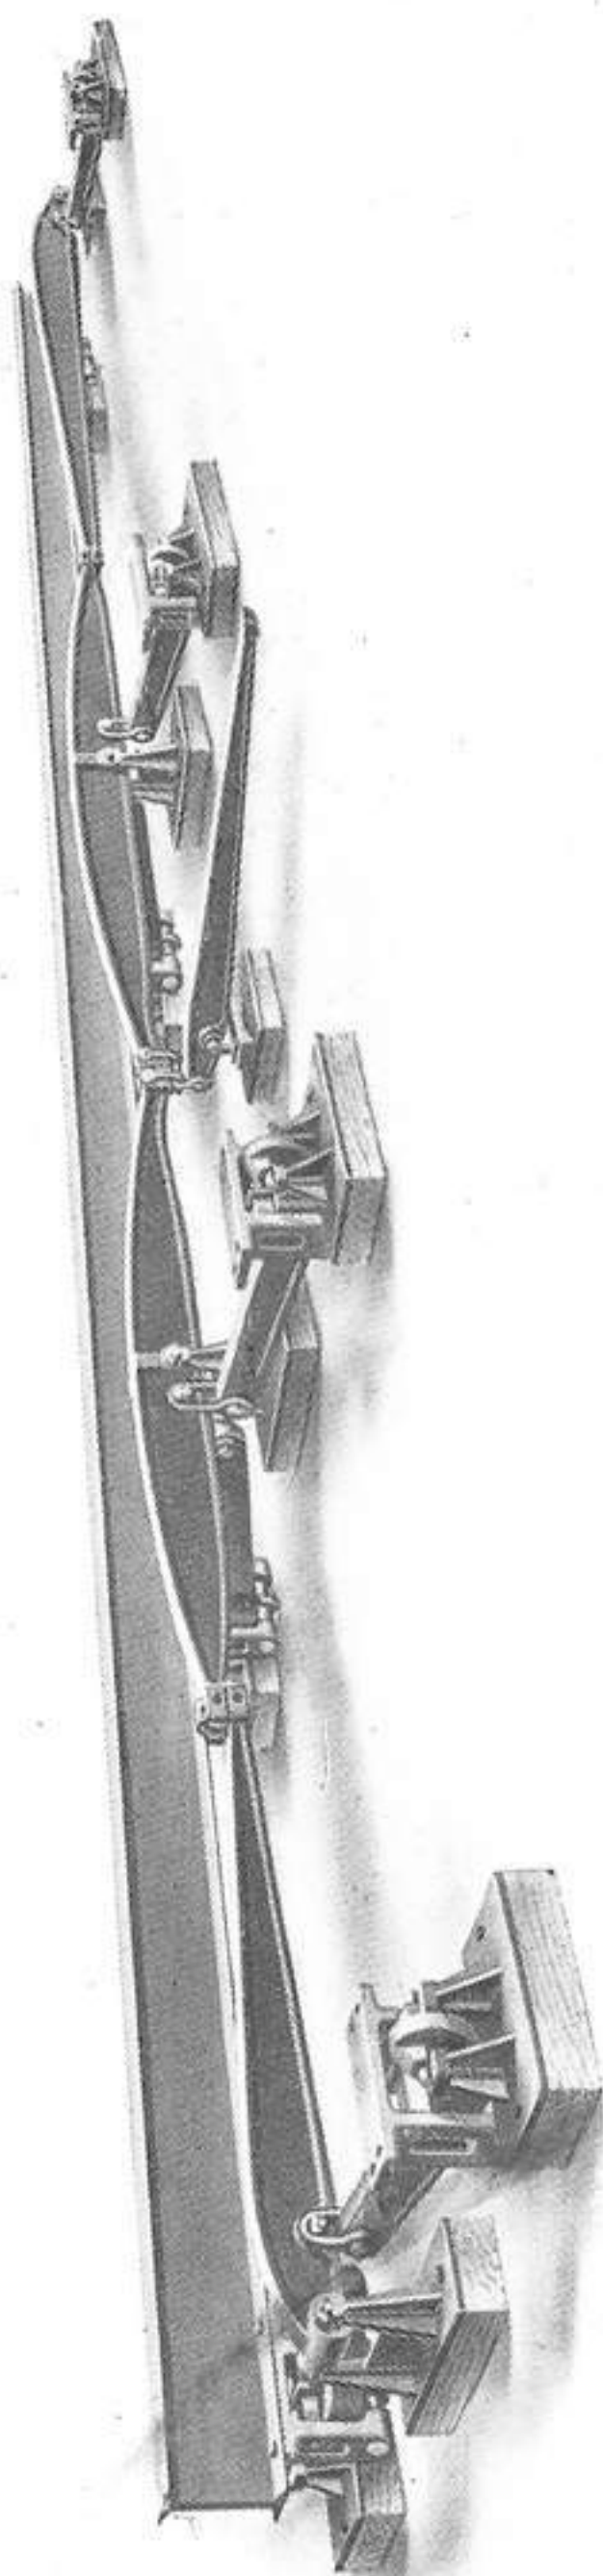

The construction throughout is very heavy with 100% allowance for impact. All stresses are figured in accordance with the best modern engineering practice. Main bearing-pivots are  $10\frac{1}{2}$  inches in length, suspension links 23 inches in length; pivots are reinforced with cast iron backing.

The maximum of simplicity, strength and efficiency is claimed for this bearing.

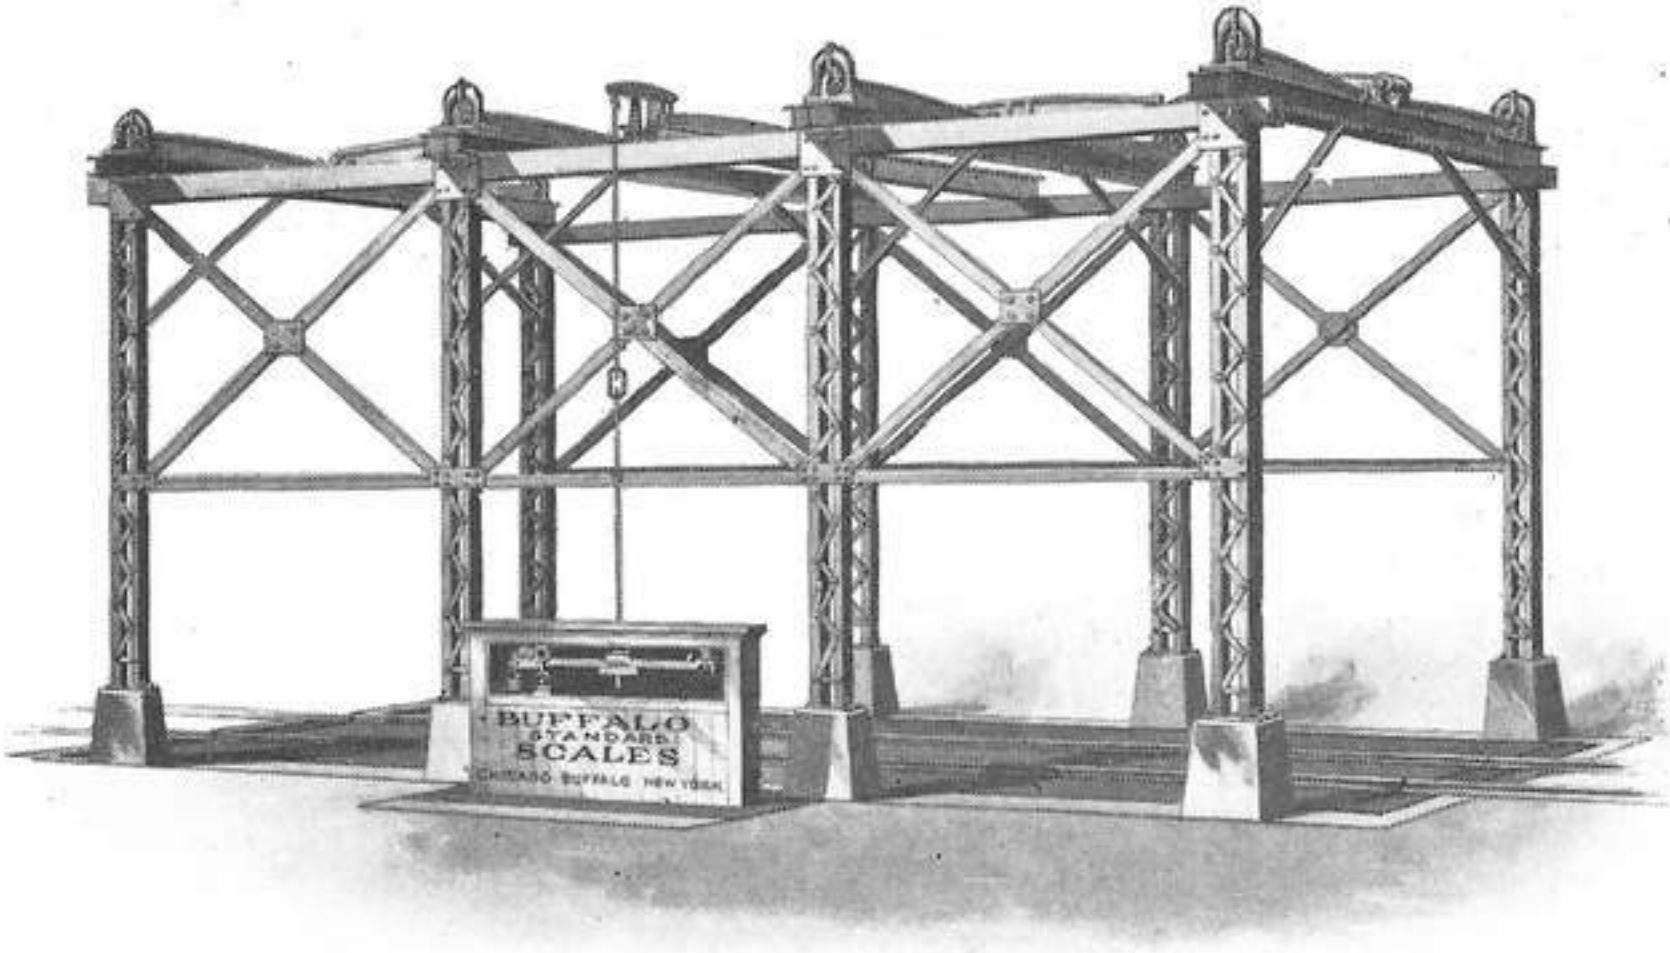

The Buffalo Heavy Duty Suspension Bearing Track Scale has been adopted by leading railroad systems and large manufacturing corporations of the United States. A detailed description of the scale with plans showing various styles of framing will be gladly submitted upon application.

Main Lever of Buffalo 150-ton R. R. Track Scale with Yoke

LEVER ARRANGEMENT OF BUFFALO 4-SECTION, 150-TON SUSPENSION  
BEARING R. R. TRACK SCALE

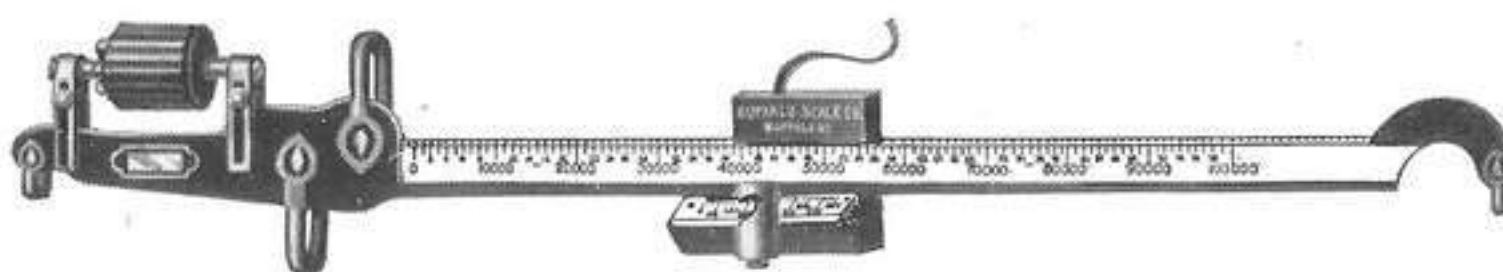

## SUSPENSION IRON-FRAME RAILROAD TRACK SCALES ]

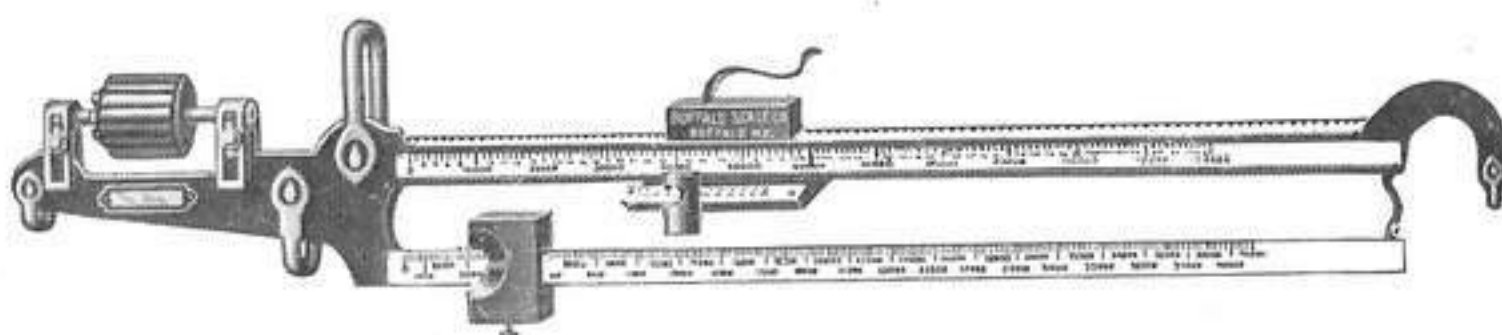

The Suspension Track Scale has been found very desirable for sections where the ground is low and wet, and will meet the requirements successfully. The working parts of scale are above and out of the way of all moisture or dirt. The scale may be protected by a light roof. It is made in all sizes. If desired, scales of this pattern may also be built with timber structure, instead of steel, as shown.

Plans and prices for suspension style of Railroad Track Scales will be submitted on application.

TRIPLE BEAM

GRIDIRON BEAM

For recording beams see page 128.

## TESTING MACHINE

This machine applies a transverse strain to 1 inch square bars, 12 to 24 inches long. It is substantially built with iron columns, hardwood base and heavy cap. The height is 6 feet, the length 5½ feet. It is worm driven and easily operated to its full capacity—5,000 pounds. No loose weights to be lost, the full capacity being marked on the beams. The hand wheel may be set on either side of the machine. An indicator records the amount of deflection. In use the operator stands upright, turning the wheel with one hand and moving the poises with the other. This is an ideal machine.
